* The BDC project is within ¼ mile of Boerum Hill and Cobble Hill, two communities whose scale is protected by historic district designation and, in the case of Cobble Hill, by a 50-foot height restriction. I question how any reasonable decision-maker in this process could consider that a hulking, 430-foot structure would make any sense at all in these historic, low-rise neighborhoods.

* The proposed action provides for mental health services, health care, job training, education and other social services within the new Brooklyn structure. These are all needed services, but wouldn't it make better sense for some of this programming, particularly the preventative programs, to be located within the very communities at risk vs. at the BDC?

* There is a railroad tunnel below Atlantic Avenue that is approximately 184 years old. It is the oldest urban railroad tunnel in North America. The Scope of Work must consider the impact of the demolition, excavation and construction of the new facility directly adjacent to this fragile engineering artifact.

* The proposed 1,500 beds at the BDC site together with the hundreds of additional uniformed and civilian workers that will be required, will add significantly to the many existing and planned burdens the community is confronting, such as:

* The impact on the water and sewage systems must be considered within a larger radius than is currently proposed because of existing and planned developments within a radius of only slightly more than ¼ mile. Examples are the planned 1,000 units of housing on the former Long Island College Hospital site and 166 units on Pier 6 in Brooklyn Bridge Park.

* The Scope of Work must address the number of parking spaces that will need to be provided for the hundreds of additional civilian and uniformed employees.

* The traffic study area needs to be comprehensive enough to include the impact of other City projects proposed in the vicinity, including the rebuilding of the BQE and the construction of the BQX streetcar.

I thank you in advance for considering these concerns as you draft the final Scope of Work.

Scott H. Jacobs

Brooklyn, NY 11201

STATEMENT AGAINST NYC'S ROADMAP TO CLOSING RIKERS ISLAND

Gaurav Jashnani, CUNY Ph.D. Student, Research Coordinator at the Public Science Project, and #NoNewJails Member

My name is Gaurav Jashnani. I want to begin by stating clearly that I support closing Rikers immediately, and that it doesn't take ten years to do that. I also want to state that I oppose the construction of all four of the proposed jails, which will harm our city at great economic and social cost.

With the most basic reforms like pre-trial detention, cash bail, speedy trial laws and so on that have been proposed by the Lippman Commission, verbally supported by our garbage governor, and/or advocated by the Just Leadership campaign that has been fighting for these new jails, we can reduce the detainee population so that we won't need Rikers OR any new jails. If we end pre-trial detention, we can close Rikers tomorrow!

As we all know, even those who deny it: Being in jail is terrible no matter what. It means, isolation, degradation, and violence, whether that jail is on the island or in Kew Gardens or right here in lower Manhattan. We have no reason to think that the correctional officers of this city will be miraculously transformed in the upcoming months, or that adding retail and social services and drug counseling in the same building will somehow shift the racialized violence that permeates jails and prisons all across the country.

I am a research coordinator with the Public Science Project, located at the City University of New York. My work for the last four years has been focused on the impacts of broken windows policing in our city. I want to stress one small part of our findings: people are constantly abused and violated in The Tombs, the Brooklyn House of Detention, and the numerous police precincts of this city. These aren't things that can be fixed by a nicer layout. For example, after interviewing over 130 people who had been arrested for non-criminal violations, we found that nearly a third of them were denied food, water or bathroom access while detained. A third experienced verbal abuse. 1 in 7 were denied a necessary medication. More than 1 in 20 were sexually assaulted while detained. This was all for the lowest level of offense, and during the briefest of detentions. A bigger, shinier cage is always still a cage.

Coming to this hearing reminds of my own experience being in the Tombs. I watched CO's curse people out when they asked for water, use threats and homophobic slurs without provocation, and even come in a cell to punch someone in the face when he dared to "talk back." That wasn't Rikers, and the correctional officers of this city are not especially terrible people – they're just the enforcers of a racist criminal justice system, one that will never keep poor people of color safe or treat them with dignity.

Building these jails is a long-term commitment to violence. Once they go up, reducing the population below 5,000 (if even to that) will be a pipe dream. We have organizations in this city like Common Justice, which already successfully divert people from prison after convictions for serious felonies like assault and robbery – why do we pretend it's helpful to lock people up for those and so many lesser things? We need this \$10 billion for real investment in our communities, things like decent schools and truly affordable housing. Cages will never be worth our while, and will never make us safe.

"BOROUGH BASED JAIL SYSTEM
DRAFT SCOPE OF WORK FOR AN ENVIRONMENTAL IMPACT STATEMENT
CEQR No: 18DOC001Y

Hi,

I am a resident in Downtown Brooklyn. I live two blocks away from the Brooklyn House of Detention. I have followed the scope of work very closely, and I believe the city has not done an adequate job taking the community's needs into consideration. The size of scale of the proposed building is not acceptable. Therefore, I am against the expansion of the Brooklyn House of Detention (BHOD).

The size of the proposed new building is too large for our small community. Boreum Hill and Cobble Hill have maximum high restrictions of 50 feet. The new BHOD building will be tall enough to be visible from many parts of the neighborhood, and it will become the new landmark in our area. A prison should not be a landmark.

The city thinks that adding retail space to the bottom of the new BHOD will benefit the community. This is inaccurate. The retailers who will move into this space will cater to the expanding prison-visitor population. With an expanding prison population, the surrounding area will have more bail bonds. These types of shops will not benefit the local community.

Finally, I am a resident and property owner whose apartment faces the prison. I will be directly affected by the years of construction, which generates noise pollution, air pollution, and traffic congestion. I will also suffer when the expanded building blocks my sunlight, reduces my privacy, and forces me to stare at a much larger prison every day for years. If I were a renter, I could move out, but as a property owner, I don't have that option.

The city needs to reconsider the size and scale of this project!

Regards,
Mirjam Jasiak-Kim
Resident of 96 Schermerhorn Street
Brooklyn, NY 11201

"

Jardley Jean-Louis

jardleyjeanlouis@gmail.com

"Hello,

A 1.9 million square foot, 29-story high Jail complex does not belong in primarily residential communities (CB 9 is 90.54

residential). It would totally overwhelm and alter for the worse the social and economic character of this 100-year-old historic Kew Gardens community, a community in which we know our neighbors and meet them daily on the streets.

Kew Gardens, a community of fewer than 20,000 households, will be devastated, overwhelmed by the mega-city proposed.

A 1510 inmate jail complex two blocks from 2 public elementary schools and very close to 1 private middle-high school absolutely presents problems to young children walking our streets.

Our neighborhoods are already burdened with tremendous motor traffic at the bottle-neck created by four adjacent highways: Grand Central Parkway, Long Island Expressway, Van Wyck Expressway and Jackie Robinson Parkway.

Hundreds of cars and trucks destined for the jail, e.g. deliveries, services, day & night time staff, guards, administrators, medics, legal aids etc. will exacerbate the problems.

The jail would further overload Queens Boulevard at its busiest intersection: the crossings of the four already noted highways.

Aggressive commuter and commercial automobile traffic from all five major thoroughfares already traverse through this interchange – as well as through the narrow, single-lane residential side streets of Kew Gardens, Forest Hills and Briarwood used as alternatives to bypassing highway traffic – thus making the crossings and side-streets unsafe for neighborhood pedestrian traffic.

Our so-called “rich” public transportation consists of the heavily over-crowded E, F, M & R trains and the Q60 bus. Only a stranger would blithely exaggerate our ability to absorb more increases.

These are only the proverbial “tip of the iceberg” issues that impact and concern our communities. A massive city-like jail complex with its enormous construction problems will exacerbate already difficult situations – as well as bring many new problems. Our community and the infrastructure will be altered for the worst.

A small diverse and cohesive community just cannot absorb any of this without eventually being destroyed.

Best,
Jardley Jean-Louis,
A Kew Gardens Resident

BOROUGH-BASED JAIL SYSTEM

DRAFT SCOPE OF WORK FOR AN ENVIRONMENTAL IMPACT STATEMENT
CEQR No. 18DOC001Y

COMMENT SHEET

NAME: Michael Jessop

ADDRESS: 2691 State St

EMAIL: _____

COMMENTS:

I am against the expansion of
the jail. This is not a Borough Based
system. there are 5 Boroughs and 11
Jails.

Written comments on the Draft Scope of Work will be accepted by DOC through **October 15, 2018** and may be submitted at the scoping meetings, by email, or by regular mail to the contact below.

NYC Department of Correction
Attn: Howard Fiedler
75-20 Astoria Boulevard, Suite 160
East Elmhurst, NY 11370
boroughplan@doc.nyc.gov

RainbowDee

rainbowdee@verizon.net

"What Scam is going on in Kew Gardens - destroy municipal parking lot –rebuild it and open in Spring 2018 then destroy it again to put to install a 29 story jail –and tell the public that will increase property values - there is some FRAUD going on!

Department of Corrections – FIX RIKERS -don't spread the problems when you can't manage RIKERS-

To all those with plans to install a 29 story Jail in Kew Gardens

WE DON'T WANT THIS -stop wasting tax dollars

Replace the incompetents that cannot manage , renovate or reform Rikers –

Our borough president did not even care enough to attend the meeting – what are we paying for

The corrections department cannot run one facility effectively; managing additional locations is just extending the problem to the new facilities without addressing the causes

The poor ADMINISTRATION - must be replaced by people who KNOW what to do and how to clean up the mess

Stop the mandatory overtime for corrections officers so exhausted they cannot function effectively

Stop destroying Kew Gardens causing property values to go down as more homeless are already suturing this small community and neighboring communities

We need better government and administrators –that have integrity and care about this community

We have lost UPS, Hot and Crusty and other stores already leaving the area – please have a conscience and STOP this

Stop wasting our tax dollars that just rebuilt the municipal parking lot- in Kew Gardens -stop prioritizing the inmates of Rikers over the residents of our community

Subject: Say NO to the Mega-Jail Proposed for Our Community - Public Comments Deadline is this Monday!

<<https://gallery.mailchimp.com/888778088ce3cb1da2ebf5f1f/images/ea617b30-d40c-44b4-a7a7-2ec5ecfbf5f.jpg>>

Urgent - only 48 hrs remain for us to express our community's concerns.

We must make loud and clear the reasons we say "NO" to the Mayor's neighborhood jail proposal for Kew Gardens, Queens!

Deadline for comments: Monday, October 29th.

<<https://gallery.mailchimp.com/888778088ce3cb1da2ebf5f1f/images/bea5396c-0791-49ea-9e07-b83e4e1d8643.jpg>>

Let us put this proposal in perspective for you.

Above is a Google Earth image showing exactly where the City plans to build this mega-jail. You can see the plot near Queens Boulevard and Union Turnpike in Kew Gardens - at the junction of Forest Hills, Briarwood and Kew Gardens Hills by the Union Turnpike Subway stop.

The area rendered in RED shows, to scale, what the Mayor's Office is requesting as the build envelope by special permit, for the proposed Queens Jail in Kew Gardens. To be clear, what this simply means is that they require a ""special permit"" because it is previously unheard of to put something of this gargantuan scale in our residential community.

Zoning and building laws that exist, do not permit such massive structures to be built here for many obvious and practical reasons. These laws were well thought-out and hard fought for in past decades, in order to protect our residential communities, and have worked well to both develop and define the character of this unique neighborhood.

The Mayor's Office simply doesn't respect any of that.

PLEASE WRITE YOUR SPECIFIC CONCERNS ON THE PROPOSED JAIL IN KEW GARDENS by the City's deadline for public comments - Monday, October 29, 2018.

Only comments emailed or posted to Howard Judd Fiedler the Director of Design Unit at Department of Corrections, will be considered –

HERE'S A BRIEF OUTLINE OF THE SCOPING ISSUES re the physical, social, economic and construction impacts on our community:

A 1.9 million square foot, 29-story high Jail complex does not belong in primarily residential communities (CB 9 is 90.54

residential). It would totally overwhelm and alter for the worse the social and economic character of this 100-year-old historic Kew Gardens community, a community in which we know our neighbors and meet them daily on the streets.

Kew Gardens, a community of fewer than 20,000 households, will be devastated, overwhelmed by the mega-city proposed.

A 1510 inmate jail complex two blocks from 2 public elementary schools and very close to 1 private middle-high school absolutely presents problems to young children walking our streets.

Our neighborhoods are already burdened with tremendous motor traffic at the bottle-neck created by four adjacent highways: Grand Central Parkway, Long Island Expressway, Van Wyck Expressway and Jackie Robinson Parkway.

Hundreds of cars and trucks destined for the jail, e.g. deliveries, services, day & night time staff, guards, administrators, medics, legal aids etc. will exacerbate the problems.

The jail would further overload Queens Boulevard at its busiest intersection: the crossings of the four already noted highways.

Aggressive commuter and commercial automobile traffic from all five major thoroughfares already traverse through this interchange – as well as through the narrow, single-lane residential side streets of Kew Gardens, Forest Hills and Briarwood used as alternatives to bypassing highway traffic – thus making the crossings and side-streets unsafe for neighborhood pedestrian traffic.

Our so-called “rich” public transportation consists of the heavily over-crowded E, F, M & R trains and the Q60 bus. Only a stranger would blithely exaggerate our ability to absorb more increases.

These are only the proverbial “tip of the iceberg” issues that impact and concern our communities. A massive city-like jail complex with its enormous construction problems will exacerbate already difficult situations – as well as bring many new problems. Our community and the infrastructure will be altered for the worst.

A small diverse and cohesive community just cannot absorb any of this without eventually being destroyed.

Kew Gardens must not be sacrificed to fulfill the mayor’s apparition!

NYC Department of Correction
Attn: Howard Fiedler
75-20 Astoria Boulevard, Suite 160
East Elmhurst, NY 11370

Mrs. Peiling Junek
96 Schermerhorn Street, Apt. 6D
Brooklyn, NY 11201

Dear Mr. Fiedler:

I have lived in the vicinity of the Brooklyn House of Detention for the last decade and have been its immediate neighbor for the last eight years. I am not opposed to the necessity of such facilities in proximity to the seat of county government. I do, however, strongly object to the Mayor's sweeping plan, which seems to prioritize distributing a reduced jail population across most of the boroughs in a one-size-fits-all solution over meaningfully balancing the shape and needs of justice with those of the impacted communities.

The Mayor's intention to present a fair, considered approach has widely missed its mark. A significant lack of public engagement in the planning stages, the formulation of a borough-based jail system that quietly exempts Staten Island from shouldering its own burden, and a willful disregard for the area's low-rise (i.e. under 250-ft height) visual character all point toward a poorly conceived, shortsighted plan.

It feels to me that Mayor De Blasio has opted for the path of least resistance in an effort to close Riker's Island as soon as possible. It is far easier to build "as-of-right" on city-owned land following a process that minimizes the community's ability to affect outcome, than to address the systemic problems (DOC, mental health care system, pre-trial holdings, etc.) that would require such a monument to jails to be built in the first place.

I strongly encourage the Mayor to revise the scope of the proposed action to incorporate more community input and to call for multiple jail sites within all the boroughs – Staten Island included – that integrate in spirit and in form with our justice system and communities.

Sincerely,

Peiling Junek

Peter Kaliski

pe1k2@earthlink.net

"Mr Howard J Friedler, AIA

Please be advised that I, a Kew Gardens resident, am in total agreement with the other residents of this neighborhood in regard to the proposed jail. It would be an overload of resources to try to accommodate such a huge project in a small community. We just can not handle it, along with all the problems associated this jail would bring. Please reconsider bringing this burden to us.

Peter Kaliski
83-25 Beverly Rd.
Kew Gardens 11415

"

Lucy Kaminsky

kaminsky.lucy@gmail.com

"To the Mayor's Office of Environmental Coordination and the Department of Corrections:

Dear. Mr. Fielder,

New York City should divest from jails and invest in communities. NYC must close the 10 jails on Rikers Island immediately without building new jails. Jails have high social and economic costs for communities. In 2017, the budget for the Department of Corrections was

1.4 billion; the NYPD budget was

5.2 billion, and the city spend nearly

1 billion on criminal courts. It costs over

200,000 to incarcerate one person for one year on Rikers Island, and

140,000 to incarcerate one person for one year across NYC jails. Meanwhile, the Department of Education spent

14,500 per student per year. By prioritizing incarceration to the tune of

7 billion per year, the City demonstrates its lack of concern for socioeconomic conditions in the Bronx, Brooklyn, Queens, and Manhattan. Instead of a jail, Chinatown needs affordable housing and free space for community programs. Instead of a jail, Mott Haven needs displacement prevention and community healthcare. Instead of a jail, Brooklyn needs truly affordable housing for the working and middle class Black and Latinx families currently being pushed out of their neighborhoods by gentrification. Instead of a jail, Queens needs services for immigrants and elders and a guarantee of true sanctuary. If the City is going to re-zone these four sites over massive community objection, why not re-zone them to provide services that our communities actually need? NYC lives in the shadows of mass incarceration and its apparatuses of enforcement, including the violence and dehumanization of Rikers Island. The borough-based jail plan merely redistributes the shadows, it does not eliminate them.

As a city official, it is your imperative to protect and care for its citizens. Jails and Prison tear communities apart and therefore tear at the fabric of society. I have no doubt that someday we'll look back on prisons in this country the way we look back on slavery.

Sincerely,

Lucy Kaminsky
Clinton Hill, Brooklyn

George Karabotsos

georgekarabotsos@gmail.com

"Dear Mr. Fiedler,
and others who may have access to this e-mail,

My name is George Karabotsos.

I own an apartment at 199 State Street, a block away from the proposed new Brooklyn Detention Center. I have lived here for over nine years.

I support the construction of a new Detention Center.

BUT, I do NOT agree with the current proposed plan that would include a 40 story building.

NO matter how well it is designed to fit into the community and neighborhood, it will be substantially taller than anything around it. This alone is cause for major concern.

I have had the chance to talk to others in the neighborhood; the size and height of the proposed facility is what causes the greatest concern.

Please consider the above.

Sincerely,

George Karabotsos
199 State Street, 4B
Brooklyn, NY

Jessica Katz

jlkdsgn@outlook.com

"Att: Howard Fiedler

I am a resident of Kew Gardens, Queens.

I live at 125-10 Queens Blvd. (Silver Towers) which is
located directly across the street from the Courthouse.

Many years ago, when I first moved into the building, the original ""modest"" detention facility
behind the courthouse

was still in use. I would not go out on Queens Blvd. in the evenings and know people attacked
by prisoners released

from across the street. Cars were broken into, etc.....

After the facility was closed the neighborhood became safer & quieter. The value of our homes
began to rise.

This is a residential neighborhood - with businesses. our contribution to the city is being near the
criminal courthouse

and the Borough Hall. We should NOT be now straddled with an enormous prison
complex!!!!!!!!!!!!

Queens certainly has a variety of neighborhoods that contain industrial areas more appropriate to
the location of

a Prison!!!! It is NOT appropriate to destroy a middle class residential neighborhood - just
because you have decided

to empty Rikers. The value of all our homes will be significantly diminished and our lives
damaged!!!! How dare you??

Come up with a better proposal that does not cause destruction of stable middle class neighborhoods!!!

Jessica Katz

" Oct 15, 2018

Dear Mayor DeBlasio,

The following is my comment in response to the city's proposal to build 4 new prisons in the boros of Queens, The Bronx, Brooklyn and Manhattan.

I am opposed to the building of new jails, prisons and penitentiaries. I believe an opportunity is being missed. Spending billions of dollars to build new prisons dedicates huge amounts of money and time to the most inflexible and destructive aspect of criminal justice - imprisonment. It supposes that we can solve difficult social problems by spending money without addressing their sources. The growing awareness of systemic racism and prosecutorial abuse revealed by DNA testing have shown that the criminal justice system is deeply flawed. Many have suffered its injustice. Before we build more prisons we need to understand the scope of that injustice. It is clear that in the recent past we have invested heavily in building prisons and become attached to the need to fill them. We can break that cycle.

It is also of great concern that prison building, maintenance and supervision has become a business. I believe that it is not a proper function of the state to hand its power and responsibility for maintaining jails, prisons and penitentiaries for the safety of its citizens, including those incarcerated, over to profit-making businesses.

There are many wiser and more humane roads to take. These include addressing the sources of crime and the many ways we prosecute and punish people on their way through the criminal justice system. In New York City reform efforts in policing, decriminalization and sentence reduction have led to positive changes. There are more efforts and reforms to be made.

Regarding jails, specifically, bail reform is another option tbeing discussed. Could it be better to keep people out of jail while they await trial if they are not dangerous? We must be willing to resist the impulse to throw money at problems. Before building more jails we should look carefully at their impact on all of us. Spend time and money holding these discussions. That will only be beneficial.

I am strongly opposed to the City's proposal to build 4 new prisons. One of the abuses, frequently decried, of Rikers Island, is that people languish there awaiting trial. Numerous judges have spoken about their frustrations with the trial system which they say needs critical reform as well. Building more prisons without properly addressing the many limitations of the court system exacerbates both problems - continuing abuse of the accused and the failures of the courts to give people fair and timely trials.

If the prisons which exist near the courts are insufficient to hold those awaiting trial we should attempt to find ways to reduce jailing of the accused as they await trial, renovate the facilities if needed before attempting to spend our way out of the problem.

I also object to the failure of the City to seek input from the public and communities through-out the city.

Sincerely,
Brian Kelly
88 White St
NY NY 10013

Howard Fiedler,

Rikers costs over

2.4 billion to run annually. It costs over

200,000 to incarcerate someone for a year. Moreover, over 75

of those people are released because they're found not guilty. It is clear to me that Rikers and incarceration at large is ineffective, costly, and cruel. The mayor is making the right move to propose to close Rikers by 2027, but this Draft Scope of Work is misguided. I cannot support the four new jails construction across the boroughs. It will once again lead the city to invest more money in the inefficiency of jailing when the mayor can do more to resource alternatives to incarceration, such as restorative justice and ending pretrial detention. He will only take action if key actors, such as yourself, Mr. Fiedler, take a moral stance against the plan. Please, work on large-scale projects that are not this one. This plan needs to stop immediately starting with rejection of the Draft Scope of Work. Thank you.

Kathleen Keske

Attn: Howard Fiedler

Dear Mr. Fiedler,

I am writing to express my concerns about this proposed development which, if it is to move forward will have a drastic impact on my community.

As a resident of Kew Gardens, I know that the high quality of life we enjoy here is built on hard work by our neighbors, our school, local businesses and local law enforcement officers. Having an enormous jail adjacent to our neighborhood will be way more than we can manage. The scale of the project would alter our neighborhood greatly, and doubtlessly come with many burdens for us and I have not heard any way that the planned project will take this into account. Parking is just the tip of the iceberg.

I have heard that Rikers is in terrible shape, and that it's rife with human rights violations. I fully support devoting serious tax money to finding solutions to these problems. But I wonder what it would cost to fix the structures on Rikers Island, to invest in an overhaul of the staffing and training procedures, and to invest in programs that would keep people out of jail to begin with. I would not mind having a jail facility in my neighborhood if it was not just a mini version of Rikers in a fancy new expensive building. And this project sounds extremely expensive.

I want to know if this project is really necessary, or whether the burden on our local neighborhoods of Kew Gardens, Forest Hills and Briarwood, and the billions of dollars this proposal is to cost would not be much better spent on fixing the corrections buildings the City already has, and working to keep people out of jail through large scale prevention programs: investing in education, job training, help to those with mental illness, and proven mentoring and rehabilitation programs.

The people of NYC deserve options, and our tax money should go to help make this the kind of city that treats all its residents and neighborhoods fairly.

Thank you.

Sincerely,

Miriam Kessler
Kew Gardens

"Should reconsider the construction of new jails in Brooklyn

Task 1. Project Description

The scope of the proposed draft EIS considers the construction of new jails in Brooklyn, the Bronx, Manhattan and Queens, and compares its environmental impacts to the No Action condition in which no new jails would be built and their sites would remain in their existing condition. The Scoping Document indicates that the proposed project is guided by the principle of "neighborhood integration," which includes promoting safety and security, designing dignified environments, leveraging community assets, and providing added value and benefits to the surrounding neighborhoods."

In the absence of real engagement with the communities in which the new jails would be situated, and a proposed action based on a one-size-fits-all approach, the proposed action is fundamentally flawed and violates the basic tenet of seeking to best integrate with the neighborhoods in which the new jails would be located.

By making no distinction to the current or historical distribution of detainees among the five boroughs, the proposed action will likely create new jails that are excessively large for the boroughs in which they will be placed, which will impose unacceptable impacts on those communities. For this reason, we request that DoC revise its scoping approach to consider other alternatives to the proposed action than simply the No Action condition.

More specifically, the EIS should give specific consideration to an alternative that would locate a second jail within the four boroughs slated by the proposed action for a new jail housing detainees that have already been convicted and the addition of a single new jail on Staten Island. It should further take into consideration the number of detainees that must remain close to the court system vs. those who have already been tried and convicted; the number of detainees with special needs and/or mental illness that should be diverted from the jail system before they are arraigned so that they can be placed in more appropriate therapeutic facilities; and the number of detainees whose principal residence is on Staten Island and should be housed in a new jail facility adjacent to that borough's courthouse.

Task 2. Land Use, Zoning and Public Policy

The project involves a 1.4 million SF building with an FAR of 20 or more. The 2004 Downtown Brooklyn Special District Plan capped FAR at 12 and the current jail facility has an FAR of 3.5 on a site that would presently allow an FAR of 6.5. Given the tremendous density of the proposed facility, the EIS should evaluate such a dramatic change to the City's existing zoning policy and its lack of transitional zoning alongside the adjacent low-rise residential communities, and the alternatives that could be considered to reduce that density to the established zoning.

The project is also within 1/4 mile of Boerum Hill and Cobble Hill, communities whose scale is protected by historic district designation and, in the case of Cobble Hill, by a 50-foot height

restriction. The EIS should evaluate the impact of a building that will rise to more than 430 feet on these low-rise neighborhoods.

The EIS should also evaluate the proposed project in terms of its cumulative impact with the redevelopment of the former Long Island College Hospital site that is one block outside the 1/4-mile study area. We believe that the 1/4-mile radius is inadequate and is intentionally set to treat this project in isolation from other developments.

The proposed action provides for mental health services, health care, job training, education and other social services within the Brooklyn jail. The scope does not currently take into account these added services, the number of employees required to provide those services, and the impact their workforce will have on traffic, parking and air quality within the adjacent communities.

Given our objection to the one-size-fits-all approach of the proposed action, and to the failure to consider other alternatives to the No Action condition, we ask DoC to evaluate the proposed action in terms of whether it meets “fair share” standards of allocating detainees within the system according to factors that fairly spreads the burden on each of the boroughs.

Task 3. Socioeconomic Conditions

In considering the impact of the proposed project on indirect business and residential displacement, DOC should evaluate:

- a) how the proposed density of the Brooklyn jail and its operations, including impacts on traffic congestion, will affect neighborhood residents and the ability of local businesses to remain within the study area.
- b) whether the construction of jails of 1,510 beds is based on a thorough analysis of jail operations, within the United States and elsewhere, and whether jails of this magnitude can be safely and humanely operated.
- c) what resources and training facilities are required to address the need for culture change within the city’s jail system with respect to how corrections officers handle detainees. This issue should be addressed in the context that the plan does not provide for the creation of such training facilities or training programs.
- d) The EIS should evaluate how the four new jails, including the Brooklyn Detention Center, will impact the large number of detainees with mental health issues, and whether the inclusion of this population within the new jails represents the most efficacious approach to meeting the needs of this population. The EIS should specifically discuss the approaches that are being used in other cities to divert this population before they enter the criminal justice system and before they are detained within a jail.

Task 4 Community Facilities

The proposed action will create the densest building in Downtown Brooklyn with a unique security environment. In conjunction with the tremendous increase in residential and commercial development in this area, the EIS should evaluate whether the City has the existing fire

protection resources in the downtown area to protect the detainees in the event of a large scale fire.

Task 7 Historic and Cultural Resources

Architectural Resources:

The scope should consider the impact of the demolition of the existing Brooklyn Detention Center and the excavation and construction of the new jail facility on the approximately 184 year old railroad tunnel below Atlantic Avenue, the oldest urban railroad tunnel in North America, and the steps that will be undertaken to protect this fragile engineering artifact..

Task 8. Urban Design and Visual Resources.

The EIS should evaluate the impact of the proposed action's unprecedented increase in FAR adjacent to Boerum Hill, Downtown Brooklyn and the transitional zone between low-rise Cobble Hill/Boerum Hill and Downtown Brooklyn on the urban design features of these communities..

Task 10. Water and Sewer Infrastructure

The proposed addition of 1,510 jail detainees to the Brooklyn site and hundreds of uniformed and civilian workers will add significantly to the burden of the existing water and sewer system. This impact should be considered as part of the much larger increase due to existing and planned developments within a larger radius than 1/4 mile, given the addition of approximately 1,000 units of housing on the former Long Island College Hospital site and 166 units on Pier 6 in Brooklyn Bridge Park.

Task 11. Transportation

Travel Demand and Screening Assessment:

The assessment must enumerate and take into account the number of staff in addition to uniformed officers, including employees providing the medical, mental health, job training, reentry and other social services to the detainees, retail workers, visitors to the jail, such as retail consumers, attorneys, and family members. The assessment must project the number of trips they generate, the modal split, and the impact of each of those types of trips on the capacity of the various transportation modes.

The traffic data study area needs to include intersections on Smith Street south of Atlantic to, at minimum, the intersection at Bergen St, and on Atlantic Avenue east of Smith Street to, at minimum, the intersection at 4th Avenue.

The traffic study needs to take into account the impact of other city projects proposed in the area including, but not limited to, the rebuilding of the BQE and the construction of the BQX streetcar.

The traffic study must include an analysis of the transportation of corrections officers and detainees between all courts, precincts, other borough jails, and medical facilities. In addition, it must clearly discuss the number of trips that will be required with respect

to the detainees housed from Staten Island who will be transported to court facilities on Staten Island.

The traffic study must analyze the impact of the volume of use of the proposed loading dock and sally port on Smith Street.

The traffic study must analyze the current NYPD intake process and how it might change under the proposed plan, particularly with respect to the police stopping on State` Street and walking suspects down the ramp into the courthouse to be arraigned. The traffic study must also assess the proposed plan in terms of traffic and parking by DoC and NYPD official vehicles.

The traffic study must analyze the proposed plan for deliveries to ground floor retail uses and their impact on traffic conditions within an expanded study area.

The traffic study must identify specific mitigation measures that will be undertaken to lessen the traffic impacts of the trips generated by the jail facility, including measures to discourage the use of cars and encourage the use of transit. The study should also address the additional traffic resources that the City will provide to ensure that the necessary enforcement actions will be taken.

The traffic study must analyze the Citibike station located on site and the impact of its removal or relocation.

Parking:

The assessment must discuss the basis on which the number of parking spaces to be provided for the Brooklyn jail site was determined, particularly with respect to the number of civilian employees that be using the jail in addition to uniformed officers.

The assessment must discuss the cost and need for providing free employee parking in a transit rich location.

The assessment should consider how DoC buses and vans will be accommodated on the Brooklyn jail site.

Task 12. Air Quality

The assessment must consider the impact of all the visitors to the Brooklyn jail site, including those undertaken by non-uniformed employees providing services within the facility.

Task 14. Noise

The analysis must address noise caused by multiple outdoor areas on every floor and the mitigation measures that will be taken to reduce or eliminate that noise.

Task 16. Neighborhood Character

The proposed site is zoned FAR 6.5 for community use. The surrounding large buildings are all built between FAR 7 and 12. The much larger majority of buildings in the area are built at FAR 3 or lower. The combined size, density, bulk and height of the proposed Brooklyn jail are unprecedented for all of Brooklyn. The analysis must look at the effects of the increase in FAR, the proposed lack of required setbacks and the overall height discrepancies on the character of the adjacent neighborhoods.

Task 17. Construction Impacts.

The study must analyze the proposed plan with respect to how the use of the Brooklyn Courts by detainees, including pre- and post-arraignment, and vehicle needs will be handled during the demolition of the existing Brooklyn jail and the construction of the new jail.

The current Brooklyn Detention Center provides habitat to nesting peregrine falcons. The demolition of the current jail will displace that habitat. We ask that DoC give consideration to mitigation of this displacement, including designing the facade of the new jail to provide opportunities for new nesting sites. More generally, we ask that the assessment be conducted to consider a Natural Resources task in accordance with the CEQR Technical Manual that addresses the peregrine nesting sites but also other additional natural resources that will be affected by the project during construction and when the new jail is being operated.

Task 18. Alternatives

The scoping document considers only the proposed action and the No Action alternative. Reflecting our concerns with the flawed approach of the planning process, and specifically, it lacks of community engagement, and the failure of the proposed

action to successfully integrate into the affected communities by ignoring the most optimal distribution of detainees within the five boroughs, we ask that the scope be expanded to consider multiple jail sites within each of the boroughs slated by the proposed action for a new jail and a new jail on Staten Island.

"

pablokim@gmail.com

"BOROUGH BASED JAIL SYSTEM
DRAFT SCOPE OF WORK FOR AN ENVIRONMENTAL IMPACT STATEMENT
CEQR No: 18DOC001Y

Dear Committee,

I am writing to express my extreme dissatisfaction with the extreme steps being taken to expand the Brooklyn Detention Center without a proper Town Hall meeting or adequate community involvement.

The Brooklyn Detention Center has been part of the Boerum Hill community since 1957. While I am not opposed to updating the facility, the proposal is grossly out of scale with the surrounding environment.

As a local homeowner and resident, my family I plan to fight this unjust move to the end. My wife and I will exercise civic protest, and support only public candidates and officials who understand our cause.

Politics aside, sadly, this proposal means an extreme expansion of the Detention Center in an already congested area that will change our lives. I am a native New Yorker, and my wife and I were thinking of starting a home in the neighborhood.

We are reconsidering our lives and our family plans due to this blatant theft of public trust.

Very respectfully,

Paul Kim
96 Schermerhorn St 7D
Brooklyn NY 11201
"

Patty Ko

info@email.actionnetwork.org

"

Howard Fiedler,

I do not approve any part of the Draft Scope of Work. After reviewing the plan, it is clear that it would cause significant environmental damage and health hazards on the sites where it is proposed. These new jails will not solve the crux of the issue: that most people held on Rikers are detained because they are too poor to pay bail. Over 75

are eventually released because they are not found guilty of crime. Mr. Fiedler, I am asking you to take a moral stance against further working on the architecture of this building. You have the power to halt its construction and encourage the city to instead invest in solutions to incarceration which include restorative justice. Incarceration does not have to be the only way. Please, reject this plan now.

What have the correction officers started about this plan to build a 40 story prison - how will security be enforced if elevators have to be taken to over 40 floors? This plan also erroneously imagined that each borough will only have 1000 crimes committed in each one. That's ludicrous, and the prisoners will end up having to be transported to the different borough, which negates the purpose of closing rikers under the pretext that it would be easier to move prisoners to court.

Patty Ko

pattysko@gmail.com

"

Dear Mr. Fiedler,

I represent a coalition of several buildings with over 1,000 residents and growing by the day. The City's approach to the new jail facilities is reckless and thoughtless. It lacks proper planning and community engagement. We are fundamentally opposed to the planning process and are offering our comments under protest on the draft scope of work as we are being compelled to do so.

Page 12 of the EAS full form (attached) highlights the "determination of significance" completed by the lead agency. It considered 19 impact categories and determined that 14 of those have a potentially significant adverse impact on the neighborhood. We are posing questions on each of the impact categories where the lead agency determined this project to have a potentially significant adverse impact on the neighborhood.

1. Land Use, Zoning and Public Policy

The 2004 Downtown Brooklyn Special District Plan capped FAR at 12 and the current Brooklyn Detention Center has a FAR of 3.5 on a site that would presently allow an FAR of 6.5. The proposed action involves a 1.4 million SF jail in Brooklyn with a FAR of 20 or more.

The draft EIS should address the following:

- Why the DoC is not considering other alternatives for the number, size and placement of new jails and expand the environmental analysis to include other actions than the proposed action and No Action condition?
- Explain why the proposed plan does not provide for housing detainees that originate in Staten Island in a new jail facility adjacent to that borough's courthouse, and how that failure does not undermine the stated goals of the proposed plan?
- Explain why the proposed action did not consider locating a second jail within each of the four boroughs to house detainees that have already been convicted and do not have to be adjacent to court facilities?
- Identify the expected number of detainees that must remain close to the court system and compare that number to those who have already been tried and convicted; the number of detainees with special needs and/or mental illnesses; and the number of detainees whose principal residence is on Staten Island.
- Explain what steps, if any, will be taken under the proposed action to identify and divert people with mental illnesses from the jail system before they are arraigned and address how the City plans to place these people in more appropriate therapeutic facilities. The EIS should identify the location and capacity of these therapeutic facilities.
- Evaluate the proposed project in terms of its cumulative impact on traffic congestion, municipal infrastructure (water, sewer, police, fire, sanitation, etc.) with the redevelopment of the former Long Island College Hospital site and the reconstruction of the Brooklyn Queens Expressway. The EIS should address the specific measures the City will undertake during the construction of the new jail and during its operation to mitigate these impacts, and what specific investments the City will take to accomplish those mitigation measures.
- Identify the number of both uniformed DoC employees and non-uniformed staff of all types that are expected to work in the proposed Brooklyn jail, the transportation modes by which they are

expected to reach this facility, the impact on the capacity of the transportation system, and on other environmental factors.

2. Socioeconomic Conditions

The draft EIS should address the following:

- How the proposed density of the Brooklyn jail and its operations, including impacts on traffic congestion, will affect neighborhood residents and the ability of local businesses to remain within the study area?
- Whether the construction of jails of 1,510 beds is based on a thorough analysis of jail operations, within the United States and overseas, and whether jails of this magnitude can be safely and humanely operated? The EIS should provide reference to the specific studies that were made to reach this assessment and explain how the proposed action is similar and different to the other examples cited in these studies.
- What resources and training facilities are required to address changing the culture within the city's jail system with respect to the treatment of detainees by corrections officers? The EIS should address this issue in terms of the specific measures that will be taken to train DoC personnel on an on-going basis.
- How the four new jails will impact the large number of detainees with mental health issues, and whether the inclusion of this population within the new jails represents the most efficacious approach to meeting their needs? The EIS should specifically discuss the approaches that are being used in other cities to divert this population before they enter the criminal justice system and before they are detained within a jail and explain whether the City plans to implement any of these measures as part of implementing the borough-based jail plan.

3. Shadows

- The proposed action will create the densest building in Downtown Brooklyn that is proposed to be 40 stories tall. The EIS should specify how it intends to address the massive shadows this building will cast on the neighborhood buildings.

4. Historic and Cultural Resources

- The EIS should evaluate the impact of the demolition of the existing Brooklyn Detention Center and the excavation and construction of the new jail facility on the approximately 184 year old railroad tunnel below Atlantic Avenue, the oldest urban railroad tunnel in North America, and the specific steps that will be undertaken to protect this fragile engineering artifact. In particular, the EIS should address whether any equipment, including seismic devices or other monitoring devices, will be installed in the tunnel to measure this impact.

5. Urban Design and Visual Resources

- The EIS should evaluate the visual impact of unprecedented increase in FAR of the new Brooklyn Detention Center adjacent to Boerum Hill, Downtown Brooklyn and the transitional zone between low-rise Cobble Hill/Boerum Hill and Downtown Brooklyn with respect to the urban design features of these communities. Since the new facilities will be undertaken by a Design

Build process, the EIS should identify the specific measures that will be incorporated into the contract with the selected Design Build team to ensure that the design of the new jail facility is architecturally and aesthetically compatible with the adjacent communities in terms of design, materiality, light reflection, and other aspects.

6. Hazardous Materials

- The EIS should evaluate the impact of the potentially hazardous materials that are released into the air during the demolition phase of the project. All details of these materials should be provided to the public along with measures that will be adopted to make sure that these materials are properly disposed-off from the site without affecting the neighboring community.

7. Water and Sewer Infrastructure

- The proposed addition of 1,510 jail detainees to the Brooklyn site and hundreds of uniformed and civilian workers will affect the capacity of the existing water and sewer system serving the site and nearby communities. This impact should be considered as part of the much larger increase due to existing and planned developments within a larger radius than ¼ mile, given the addition of approximately 1,000 units of housing on the former Long Island College Hospital site and 166 units on Pier 6 in Brooklyn Bridge Park. The EIS should evaluate the current capacity of this infrastructure and the additional impact provided by the new jail and new developments nearby, and explain what, if any, investments will be required to upgrade their capacity.

8. Transportation

- The EIS should provide a detailed assessment of the impact the new jail is likely to have on traffic in the neighborhood. In order to do so, the EIS must assess the number of people likely to come to the new Brooklyn jail on a daily basis.
- This assessment should include uniformed DOC officers, employees providing the medical, mental health, job training, reentry and social services, among others, to the detainees, retail workers, and visitors to the jail, including but not limited to retail consumers, attorneys, and family members. The assessment must project the number of trips they generate, the modal split, the timing of their arrival and departure, and the impact of each of those trip types on the capacity of the various transportation modes. The assessment must include an analysis of the number and timing of trips of corrections officers and detainees between all courts, precincts, other borough jails, and medical facilities. In addition, it must clearly discuss the number of trips that will be required with respect to the detainees housed from Staten Island who will be transported to court facilities on Staten Island.
- The traffic data study area needs to include intersections on Smith Street south of Atlantic Avenue at least to the intersection at Bergen Street, and on Atlantic Avenue east of Smith Street at least to the intersection at 4th Avenue. The traffic study also needs to take into account the impact of other proposed projects in the area including, but not limited to, the rebuilding of the BQE, the construction of the BQX streetcar, and the development of three new residential towers on the former Long Island College Hospital site. The traffic study must analyze the impact of the proposed loading dock and sally port on Smith Street in terms of trip generation.
- The traffic study must analyze the current NYPD intake process and how it might change under the proposed action, particularly with respect to police stopping on State Street and walking

suspects down the ramp into the courthouse to be arraigned. The traffic study must also assess the proposed plan in terms of traffic and parking by DoC and NYPD official vehicles.

- The traffic study must analyze the proposed plan for deliveries to ground floor retail uses and their impact on traffic conditions within an expanded study area both during and after the construction of the Brooklyn jail.
- The traffic study must identify specific mitigation measures that will be undertaken to lessen the impacts of the trips generated by the jail facility, including measures to discourage the use of cars and encourage the use of transit by persons working in or visiting the Brooklyn jail. The study should also address the additional traffic resources that the City will provide to ensure that the necessary enforcement actions will be taken.
- The traffic study must analyze the Citibike station located on site and the impact of its removal or relocation.
- The assessment should consider how DoC buses and vans will be accommodated on the Brooklyn jail site.
- The assessment must discuss the basis on which the number of parking spaces to be provided for the Brooklyn jail site was determined, particularly with respect to the number of civilian employees that will be using the jail in addition to uniformed officers.
- The assessment must discuss the cost and need for providing free employee parking in a transit rich location.

9. Air Quality

- The EIS must consider the impact on air quality of all employees and visitors to the Brooklyn jail site, including those undertaken by non-uniformed employees providing services within the facility. It should also identify specific measures that will be undertaken to reduce particulate emissions from DoC vehicles while present at the site.

10. Greenhouse Gas Emissions

- The EIS must consider the impact of greenhouse gas emissions on the surrounding neighborhoods.

11. Noise

- The EIS must address the specific level of noise caused by outdoor recreation areas on floors of the Brooklyn jail housing detainees and the specific mitigation measures that will be taken to reduce or eliminate that noise.

12. Public Health

- The EIS must address the impact on public health given the significant increase in foot traffic in the area.

13. Neighborhood Character

- The proposed Brooklyn site is zoned FAR 6.5 for community use. The surrounding large buildings are all built between an FAR of 7 and 12. The much larger majority of buildings in the area are built at FAR 3 or lower. The combined size, density, bulk and height of the proposed Brooklyn jail are unprecedented for Brooklyn. The EIS must look at the effects of the increase in FAR, the lack of proposed setbacks and the overall height discrepancies on the visual character of the adjacent neighborhoods. The EIS should clearly indicate what specific requirements will be imposed upon the Design Build team to ensure visual compatibility with the adjacent historic neighborhoods.

14. Construction

- The EIS must analyze the proposed plan with respect to how the use of the Brooklyn Courts by detainees, including pre- and post-arraignment, and DoC vehicle needs will be handled during the demolition of the existing Brooklyn jail and the construction of the new jail.
- The current Brooklyn Detention Center provides habitat to peregrine falcons. The demolition of the current jail will displace that habitat. We ask that DoC identify the number of nesting falcons at the current jail and identify how this displacement will be mitigated, as well as the measures that will be taken, if any, to provide opportunities for new nesting sites. More generally, we ask that the assessment be conducted to consider a Natural Resources task in accordance with the CEQR Technical Manual that addresses the peregrine nesting sites but also other additional natural resources that will be affected by the project during construction and when the new jail is being operated.

The scoping document does an inadequate job of taking into consideration various elements that should be considered for a project of this magnitude. It considers only the proposed action and the No Action alternative. Further, it fails on engaging with a community that is open to a reasonably sized jail to help the city with closing Rikers. Our inputs must be taken into consideration and we expect a thorough analysis and response to the questions posed by us in the draft EIS.

COMMENTS:

Totally against Queens Borough-Based Jail System.

Rehabilitate Rikers Island - It will be more cost effective - OR build a new building next to existing one.

Give free Metro card/shuttle bus to inmates families.

We have many schools-daycare and senior centers which will cross paths with jail system.

Our subway & buses are already over crowded - Queens does not need more people using systems.

Parking cars in Cons. is already a challenge.

Property values will go down!

The new footbridge which cost a lot of money will go nowhere plus the bridge has not even opened yet - more waste of money.

The parking garage that took year to build will be destroyed - all tax dollars wasted.

Why did Staten Island get an exemption ???

Organization Name: DCP

Message Type: Complaint

Topic: City Planning Commission

Message: I am against the Mayors and Councilwoman Chin's proposed project for 80 Center in Manhattan and overall projects in the 4 communities being targeted to replace Rykers. The lack of scoping, transparency and disregard for the neighborhood coupled with the environmental impact across all levels, sound, light, pollution, and traffic show that this project and scale is inappropriate for this location and community. This project should be stopped immediately and a large scale review of opportunities up to including executing the new reformed prison design as well as building a courthouse on Rikers island. It is a shame the city does not understand the impact to the architectural integrity of Foley Square in addition to all the above more immediate concerns impacting the community and quality of life. Chinatown has born the brunt of bureaucratic decisions and missteps already with barricades, police plaza, 3 jails, etc, etc. So before you "Penn station"; our !

neighborhood creating a huge ugly, out of scale and against zoning complex which incapacitates an already compromised transportation corridor, eliminates sunlight on parks and increases pollution, try for once to think about the parks, people, community, and quality of life for the people already there.

"Dear Mr. Fiedler,

I am very disappointed by the recent news of opening of borough based jail near the Queens Criminal Courthouse in Kew Gardens, NY as a result of shutting down Rikers Island jails.

These are the worst of the worst inmates and they do not belong in such a beautiful community. When the jail was in operation, there were numerous incidents of cars being broken into and stolen in the neighborhood. When the inmates are released on bail, some of them can turn against the community that they get exposed to. I am a woman and it is not simply not possible for me to come home late with so many inmates just around the block. You can assure, but it still doesn't give me the strength going by the past experiences when a smaller jail was in operation. A jail doesn't belong to a residential community.

I would like to request to STOP the plan to develop the new complex with nearly 2 million square feet. Karen Koslowitz indicated that this jail will economically benefit the community. How will this benefit the businesses in community? This plan was never communicated to the Kew Gardens community and without any input from all other communities. For all the residents who supported Mayor De Blasio and Karen Koslowitz, why are they doing this to us? The residents in Kew Gardens, Forest Hills, Kew Garden Hills and Briarwood will be impacted by the development of this jail. It will increase crime and it will be unsafe for all the residents and children living in this community. In addition, it will create more traffic congestion, create more filth, and entice families of inmates to make this an unsafe community to live in.

I have children and I plan on moving out from this area as a result of opening of this jail.

PLEASE REQUEST MAYOR DE BLASIO AND KAREN KOSLOWITZ TO STOP THE DEVELOPMENT OF THIS JAIL. IT WILL DESTROY THE RESIDENTS OF KEW GARDENS COMMUNITY. PLEASE STOP!!!!

"

Chris Kucha

ckuchany@gmail.com

"Dear Mr. Fiedler,

I've been a member of the Downtown Brooklyn community for 30 years, and outlined below are my key concerns regarding the Draft Scope of Work for the Borough-Based Jail System:

- There was a notable absence of real engagement with the affected surrounding community and, largely due to that lack of proper process, the proposed action is fundamentally flawed in that it violates the stated purpose of seeking to best integrate the new facilities into the surrounding neighborhoods affected.
- The BDC project is within ¼ mile of Boerum Hill and Cobble Hill, two communities whose scale is protected by historic district designation and, in the case of Cobble Hill, by a 50-foot height restriction. I question how any reasonable decision-maker in this process could consider that a hulking, 430-foot structure would make any sense at all in these historic, low-rise neighborhoods.
- The proposed action provides for mental health services, health care, job training, education and other social services within the new Brooklyn structure. These are all needed services, but wouldn't it make better sense for some of this programming, particularly the preventative programs, to be located within the very communities at risk vs. at the BDC?
- There is a railroad tunnel below Atlantic Avenue that is approximately 184 years old. It is the oldest urban railroad tunnel in North America. The Scope of Work must consider the impact of the demolition, excavation and construction of the new facility directly adjacent to this fragile engineering artifact.
- The proposed 1,500 beds at the BDC site together with the hundreds of additional uniformed and civilian workers that will be required, will add significantly to the many existing and planned burdens the community is confronting, such as:
 - o The impact on the water and sewage systems must be considered within a larger radius than is currently proposed because of existing and planned developments within a radius of only slightly more than ¼ mile. Examples are the planned 1,000 units of housing on the former Long Island College Hospital site and 166 units on Pier 6 in Brooklyn Bridge Park.
 - o The Scope of Work must address the number of parking spaces that will need to be provided for the hundreds of additional civilian and uniformed employees.
 - o The traffic study area needs to be comprehensive enough to include the impact of other City projects proposed in the vicinity, including the rebuilding of the BQE and the construction of the BQX streetcar.

I thank you in advance for considering these concerns as you draft the final Scope of Work.

Sincerely, Chris Kucha

199 State Street, Brooklyn, NY 11201

Elizabeth Ku-Herrero

elizabethnku@gmail.com

"Hello,

It has come to my attention that there is a plan to build 4 new jails in New York City. As a resident of this state and of this country, I believe this is wrong. We should be spending some putting more money into facilities to help better our community instead of incarcerating individuals. A jail is a band aid that corrodes the wound.

Thank you

Elizabeth Ku-Herrero

DRAFT SCOPE OF WORK FOR AN ENVIRONMENTAL IMPACT STATEMENT
CEQR No. 18DOC001Y

COMMENT SHEET

NAME: Vivian Kurz
ADDRESS: 109 Mawbray Dr Ken Gardens N11
EMAIL: shecker@ppxnet.com 11415

COMMENTS:

This is a neighborhood already too crowded
with homeless shelters + overdevelopment
There is NO space for additional cars
or parking or traffic.
The train (subway) platform is packed
trains always full for Jamaica

Please do not destroy this
neighborhood - it is mostly the
first historically to be a suburban
community.

Please move the Jail to
Long Island City a place with more
space
Thank you

"I am writing to ask for your support in opposing the proposed construction of a jail in Kew Gardens.

I'm including below the reasons to oppose the jail which was sent to public officials by the Board of our building, 125-10 Queens Boulevard, which is also known as Silver Towers.

I ask you to review these reasons and act forcefully to halt this project.

Thank you.

Sincerely,

Ronald Kushner

Public Transportation and Pedestrian Congestion: Our community is a major hub. The subways and buses that converge here are already overcrowded. Long lines of people waiting for the buses snake down Queens Blvd. and Kew Gardens Road.

Construction: The proposed jail would take several years to construct and would be a massive project. During what hours will construction take place? What steps will be taken to shield the surrounding residential buildings and business from construction noise, debris and dust?

Removal of 82nd Avenue: The streets within the proposed campus are already congested by traffic and parked vehicles. Removing a section of the street will only exacerbate congestion.

Parking during Construction: During construction of the proposed jail, the 302 spots in the current municipal lot will be lost. Additionally, the 300+ spots on the surrounding streets (82nd Ave., 126th St., 132nd St. and Grand Central Pkwy) will be lost during the years of construction. This area of Queens Blvd. and the surrounding side streets are already heavily congested with vehicles searching for free or low cost metered parking. This area cannot accommodate any additional vehicular traffic.

General 24/7 Jail Operations: The proposed jail will operate 24hours a day and 7 days a week. What noise and intrusive bright lights will disturb residents during the evening hours? Will loud trucks making

deliveries or picking up trash will come and go all night long? Will inmates be transported on buses or other vehicles during the night? Jails are traditionally lit with very bright external lights. How will the lights be curbed to prevent intrusion into the surrounding residences?

Traffic Congestion and Parking: Again, traffic congestion in this area has soared in recent years. Trucks making deliveries and vehicles transporting to and from the Dialysis Center opposite Borough Hall are constantly double parked, which frequently brings traffic on Queens Blvd. to a standstill. Drivers visiting Borough Hall, the Courthouse and local businesses constantly clog the local streets while circling in search of free or low cost metered parking. Meanwhile the new municipal lot sits 2/3 empty because it is so expensive, while parking in this neighborhood has at times led to altercations.

Sewage and Drainage: The proposed jail will house 1500+ inmates. Additionally there would be hundreds of officers, staff, visitors, etc. There are currently several large residential buildings being constructed across from the proposed Jail on 134th Street. How will the current sewage infrastructure accommodate such an influx of such a huge number of people?

Trash Removal: This proposed facility will produce a huge amount of trash. Where will it be stored? How will it be removed? Will we be woken every night by trucks removing trash? As we represent one of the largest buildings in the area, we cannot express how disappointed that the proposal continues to move ahead without these issues being addressed timely by the Mayor or city officials. We believe that moving forward with this community-based jail system would negatively affect the living experiences of people living in this community (and adjacent communities of Forest Hills and Briarwood) in the myriad of ways noted above. With that said, we are vehemently opposed to the Mayor's proposal. Yet, we welcome the opportunity to open a dialogue regarding the matter further. Thank you, and we look forward to hearing from you or your representative(s) in short order!

Appendix

Appendix A: "A Refutation to a Borough-Based Jail System"

(Submitted by a Silver Towers Shareholder)

[Note: Please submit your comments relating to the proposed jail to Howard Fielder of the NYC Department of Corrections at boroughplan@doc.nyc.gov <<mailto:boroughplan@doc.nyc.gov>> no later than Monday, October 15th.]

To: NYC Department of Corrections Attn: Howard Fiedler boroughplan@doc.nyc.gov
<<mailto:boroughplan@doc.nyc.gov>>

Dear Mr. Fiedler,

The Borough-Based Jails proposal, described in the NYC Office of the Mayor publication ""Beyond Rikers - Towards A Borough-Based Jail System"" presents lofty goals, but its impact will be negative and inequitable on NYC's residential communities.

Following are various points made in the brochure and my assessment of the validity of those points:

A. "... the proposed jails' site locations were selected based on "" sufficient size to fit an equitable distribution of the City's jail population across four boroughs . . .""

Assessment:

1. The prison population will not be distributed ""across"" four boroughs. 2. The prison population will be concentrated in four small, highly residential communities.

B. "... the sizes of the proposed Borough jails are equitable . . ."

Assessment:

1. At a building size of 1,910,000 gsf, the proposed Queens Borough Jail would be 18

larger than the next largest Borough jail, in Manhattan, at 1,560,000 gsf.

C. "... Borough community impacts are equitable."

Assessment:

1. Only one community in each Borough will have a residential parking impact.
2. The EAS describes impact on Kew Garden's residential parking, as moderate by ""1,115 parking spaces, including 676 public spaces (within 205,000 gsf) as replacement for the existing public parking on the project site,""
 - a. The current parking structure is largely unused.
 - b. People who drive to visit, or work, at Borough Hall and the Criminal Court, currently park in Kew Gardens' residential community for free, rather than pay for parking in the parking structure provided.

2

- c. Residents currently can't find places to park, near the homes they live in, or wish to visit, and residents currently have visitors refuse to visit, or ask to change plans to visit, because they can't find parking.
 - d. Some community members currently find it difficult to enter or exit their driveways because some people who don't live in the community encroach driveways when they park.
 - e. Community members have been threatened when attempting to discuss driveway encroachments with people blocking driveways.
 - f. Cars were broken into or stolen when the jail was in operation behind the courthouse a number of years ago. There is no reason to believe that a new jail would not cause that negative impact to occur here again.
3. The EAS makes no mention of the proposed jail plan's neighborhood impacts by the jail's estimated 250 daily visitors; 290 detention facility workers; 100 centralized care workers; 20 community facility workers; and 8 additional parking workers.
4. The EAS does not look beyond 400 feet of the proposed jail for impacts, but beyond those 400 feet will be significant community impacts.

D. "" . . . Borough-based jails will be ""Fairer, Safer, More Efficient . . . ""

Assessment:

1. There is no evidence that a new building will make any of these assertions true. The hypothesis that cleaner, newer jails could curtail violence and the existing inequities in the treatment of inmates is flawed logic, and dismisses the role of properly trained corrections officers in running the day-to-day operations of the jail.
2. Rikers is known for not being fair, safe, or efficient. Its staff, leadership, and inmates would simply move to new spaces. Spaces provide no reforms to the manner in which people work together or relate to each other, or how inmates would treat one another. For example: Ninety teens were moved from Rikers to the Horizon Juvenile Center on October 1, 2018. On October 3, 2018, at least 20 Correctional Officers at Horizon were injured in an inmate brawl that was, at least in part, associated with rival gangs conflict.

E. “. . . new Borough-based jails will be ""a good neighbor,"" with ""retail and other amenities to serve the neighborhood""

Assessment:

1. There is no evidence that any of these ""amenities"" are needed in the proposed communities.
2. When the Detention Center was open, frequently those people were able to make bond and were released at night would break into cars searching for items of worth and steal radios, which is in direct contrast to this idea of being a “good neighbor”.

F. "" . . . proximity to courthouses will reduce delays in cases and the time people stay in jail.""

3

Assessment:

1. This is a false claim as transporting inmates to courthouses from Rikers does not delay their cases being heard.
2. Half the people awaiting trial in Rikers are there because they can't afford bail.
3. There are a myriad of reports of inmates waiting over a year for their cases to be heard in court because of court backlogs.

G. "" . . . accessibility to public transportation"" will enable ""family members, lawyers, and service providers"" to ""easily visit"" inmates.

Assessment:

1. Accessibility to public transportation is a major current problem of Kew Gardens residents.
2. Q60 busses currently can't pull to the curb to enable mobility challenged passengers to enter or exit the bus via the ramp option. Q60 busses often stop in the traffic lane, blocking cars, because the Q10 double long busses, and Green Cabs encroach the Q60 stop.
3. Long passenger lines for Q10 and Q60 busses, currently block pedestrian traffic on the sidewalk, to and from the E and F line subway station.
4. The stairway entrance and exit to the subway station is very narrow and can't be widened, so even without the additional worker and visitor traffic to and from the new jail, traversing that stairway is currently difficult and dangerous.

Overall, my assessment regarding this proposal is that the “Beyond Rikers” Plan is Not Just!!!

1. The plan does not hold the Department of Corrections accountable.
 - a. The Department of Corrections has not demonstrated that it can reform its operations to provide a safe environment for inmates, or staff, regardless of physical location and space.
 - b. Inhumane treatment of inmates needs to be resolved by the Department of Corrections.
 - c. Delays in trials can only be resolved in the City's court system.
 - d. Building related safety issues could be addressed on Rikers. As the inmate population is reduced, buildings can be rebuilt to resolve structural and foundation issues, while methane gas issues can be mediated as buildings are rebuilt.
2. The plan is not just to neighborhood residents.
 - a. The fact that the City owns the land that it proposes to use for a new jail, and that the new jail would be next to an existing courthouse, seems just to City planners and the Mayor, but it is not just to the Kew Gardens community which already is plagued by overcrowded parking and transportation resources.
 - b. Bringing hundreds of additional people into this small community to work in and visit the new jail will make its transportation and parking issues unbearable, even at night and on weekends, which now offer a slight respite from these problems

"

Carol Lacks

carollacks@aol.com

"Dear Mr Fiedler,

I grew up in Forest Hills but since I was 12 years old and drove my bike under the Austin Street tunnel and entered Kew Gardens, I decided then and there that Kew Gardens was the home for me. At 23 I moved into a studio apartment in the Texas, next door to the Kew Gardens post office. I loved the interesting mom and pop stores, the movie theatre, my friendly neighbors, the wonderful diversity and how comfortable and safe I felt. When I got married we moved to Hampton Court on Park Lane South and brought up our daughter in what we viewed as a perfect neighborhood, a place where our daughter could make friends of many different ethnicities and be exposed to new ideas and cultures. I joined the local organizations whose mission was (is) to protect the quality and livability of the Kew Gardens Community. We offered activities whose intent was to bring people together in the community that they love. Our mission now as always is to protect the life that we cherish for ourselves, our children, our neighbors. We cannot let developers take over our real estate. We cannot allow a 29 story prison to be constructed in our small sweet residential community. If brought to fruition our community, the safe urban village that we love, will change dramatically. We hope that you will reconsider this disastrous decision. We know that the plans for the prison began 1 1/2 years ago and it was a secret, without town halls and public forums along the way. The voice of Kew Gardens residents were not heard because the planners did not care to hear them. A prison will change the Kew Gardens that we know and love!!! We hope that you will stand with us and not against us and will change your plans about bringing the prison to Kew Gardens. Thank you!

>
>
>
>
>
>
>
>

>> Please, reconsider this disastrous decision. This plan did not involve the voice of people of the who live here or did the planners look at the impact it will have on the future of our neighborhood for years to come. Thank you.

>>

>> This prison must not go up!

>>

>> Sincerely,

>>

>> Rosemary and Lewis Sherman

Albert Lai

a.lai@ymail.com

"Dear officers,

We are writing to express our strong opposition to the proposed reopening and expansion of a jail facility at 126-02 82nd Ave, Kew Gardens.

We respectfully ask for considering choosing another site for the jail for the following reasons:

1. The proposed address is too close to so many schools and kids' playgrounds. The following schools are all within walking distance of the proposed address, with closest only 5 minutes' walk: Kew-Forest School, Preschool of America Daycare, Our Lady Queen of Martyrs Catholic Academy, elementary schools P.S. 101, P.S. 196 and P.S. 144, Archbishop Molloy High School etc. As parents, the thought of detainees and just released sex offenders or child predators wandering around the neighborhood is frightening. Not to mention the rare but potential impact of gang activities, or violent fights happening so close to kids' schools and playgrounds.
2. Another potential risk is the increase of people with weapons in the neighborhood. This will increase the probability of massive shooting in nearby schools and playgrounds.
3. Both the communities of Kew Gardens and Forest Hills will suffer tremendous economic loss. A lot of parents and local business will move out the communities, resulting in a crash of nearby housing markets.
4. Road infrastructure nearby will not be able to handle the dramatic increase in traffic that will occur after the proposed expansion. The nearby Queens Boulevard is already one of the deadliest streets in the city.

We support the effort to close Rikers Island and the goals of making our municipal jails more humane. However, the choice of 126-02 82nd Ave Kew Gardens is very inappropriate. We strongly suggest reconsidering another site.

Thank you

Albert Lai

Queens Resident

"

Julia Lansford

julia.lansford@gmail.com

"Good afternoon, Mr Fiedler and the colleagues!

My name is Julia Lansford and I live in Kew Gardens, a beautiful historic neighborhood in Queens.

The place is full of trees forming canopies above roads, emerald green lawns, castle-like mansions and old-fashioned brick apartment buildings. Pace of life is slow here and change is reluctant, which is quite strange for a nabe that is in a mere seventeen-minute ride from Penn Station. A local TD bank branch has an old picture of the bridge over LIRR tracks on its wall. The scenery has not changed much since 1950s. How many of New York City's neighborhoods can boast that?

Just look around when you drive or walk down the streets of Kew Gardens. Do you see any really tall buildings around? Tallest apartment buildings are averaging 7-8 floors, hardly ever topping that.

Now imagine what a concrete monster of 29 stories would do to our neighborhood. Its menacing tower would loom over our heads, seen from every single apartment in Kew Gardens, always present, always reminding us that now we live next to a jail. It would destroy the magic of our unique architecture.

We love our neighborhood and appreciate its historic and architectural value. Many of us chose to live here precisely because of it. Some of us, myself included, have invested their whole life savings into buying a place in Kew Gardens, into settling here for life. Needless to remind anyone that property value is likely to go down when besides schools, parks and small businesses you have a gigantic jail as your next door neighbor.

This is home. This is where we want to live and to lead good quality life.

We already struggle with LIRR and subway delays and overcrowding. Our highways and roads already are overrun with heavy traffic. The proposed giant jail does not come with any improvements to the infrastructure which means that public and private transit pains will only get worse.

In addition, the jail is planned to be built just two blocks away from two public elementary schools. Jails simply don't belong next to schools.

We may be a small quiet neighborhood but we are also fighters. People of Kew Gardens managed to save the bridge over LIRR tracks from the demolition proposed by the MTA. New York Times wrote about it here <<https://www.nytimes.com/2018/07/12/nyregion/queens-kew-gardens-bridge-repair.html>> <https://www.nytimes.com/2018/07/12/nyregion/queens-kew-gardens-bridge-repair.html>

We are not giving up. The jail doesn't belong here and we'll do our best make sure New York City Government is aware of it.

Thank you for your time.

--

Sincerely,

Julia Lansford

"I cannot believe you are considering the jail for this neighborhood. It is already congested , at times traffic does not move. There are lines on the street waiting for the buses at Union Turnpike. When I go outside I am reminded on a daily basis of the homeless shelter nearby. Certainly this problem has gotten worse under this administration and I have little fail the jail is going to improve the neighborhood.

I hope your minds are still open

"I am a resident of Downtown Brooklyn and oppose the grotesque expansion of the detention facility. As citizens of the city we should respect human scaled development. It is true that downtown Brooklyn included many new high rises. These differ from the detention center, however, in that the taxpayer will bear the cost burden of this skyscraper.

Don't fix problems with the same thinking that caused them!

The taxpayer should only be asked to pay for housing that is human scaled, with the possibility of long term integration. There are many additional plots of land in Brooklyn that could be used to release the taxpayer from the obligation to pay for a skyscraper to house inmates long term in their Downtown Business District.

Dan Le

"

Andy Lee

andylee8@gmail.com

"A jail complex does not belong in primarily residential communities. It would totally overwhelm and alter for the worse the social and economic character of this 100-year-old historic Kew Gardens community, a community in which we know our neighbors and meet them daily on the streets.

Our government should be advocating to better our communities and quality of life. Why wouldn't there be consideration to have the facilities built at Willets Point or JFK airport area.

The Kew Gardens interchange is constantly burdened with heavy traffic and there is constant lack of street parking.

Hundreds of cars and trucks destined for the jail, e.g. deliveries, services, day & night time staff, guards, administrators, medics, legal aids etc. will exacerbate the problems.

"Analysis and Response to Draft Scope of Work for 80 Centre St. Jail Proposal

New York City Dept. of Corrections

Attn: Howard Fiedler

75-20 Astoria Blvd. Suite 160

East Elmhurst, N.Y. 11370

Re: Draft Scope of Work for an Environmental Impact Statement – Borough based Jail system

CEQR No. 18DOC001Y

Introduction

The proposed plan to close down Rikers Island as a jail facility and install a 40 plus story tower at the Louie Lefkowitz building (80 Centre St.) adjacent to the Chinatown community including right next to Columbus Park will likely have a detrimental impact for the community. The fact that the proposal is being rushed in a short period of time without community participation determining the validity of the proposal is a testament to its dishonesty towards Chinatown and the adjacent and targeted communities. Chinatown and the surrounding area is primarily made up of people of color, has businesses and residences including homeowners.

An example of speeding up the process that mitigates community participation is combining the normal four separate ULURP process for this proposal into one. The fact that Staten Island wasn't included demonstrates a double standard and undermines the premise justifying the closure of Rikers.

The Scope of Work assumes that there will be limited impact on the community. There is every reason to believe that this is false.

Impact on the Environment

The proposed study area of 400 feet is insufficient in addressing the impact for the area including Chinatown. The study should have a wider field of analysis due to the density of the area. This would include the demolition and construction of 80 Centre St and traffic concerns.

Certainly, the building of a 40 plus tower would increase traffic and requires more study to determine the impact.

Given the scale and size of the proposed jail, it would create a huge shadow overlooking Columbus Park. This in itself should nullify the site for the jail. The current 6-4 FAR would be greatly exceeded and would require a variance. There is a reason why the FAR is appropriate for the area. Columbus Park is an important respite and gathering for a community devoid of much park space. It would be a crime if the jail is built on this site.

Impact on the Economy

The Economic impact of jails in Chinatown has been negative. There have been issues of parking abuse by Corrections and Police in the area due to the fact that Chinatown has two NYC jails and one Federal Prison along with New York City Police headquarters in the area. The loss of parking, closure of Park Row and limited economic circulation has impacted Chinatown's economy. The jails have no contracts with businesses within the Chinatown business community or hire from the community labor pool. In fact, Chinatown has an increased vacancy of commercial properties that reflects the limited economic participation by the law enforcement community working in the area.

If a larger jail is built, it may inhibit regular shoppers from coming to Chinatown or families visiting their loved ones would shop in the area are clearly uncertain. It may exacerbate an already difficult economic situation.

Impact of Decentralized and Enlarged Jail in Chinatown

The notion that the city can successfully reduce the population safely is an area of contention. It may require repeat offenders who normally can't make bail to go free despite their records. It also assumes that a reduction to the targeted 5,000 would resolve problems in the jails themselves. Gang violence is still a problem within the jails. It should be noted that the Corrections Union (COBA) is opposed to the idea of closing Rikers and moving expanding jails to the outer boroughs as a solution.

This coupled with the illegality of the drug trade while our own United States foreign policy has increased the drug supply makes prison reform less viable. Clearly a need for criminal justice reform is needed given that racial profiling clearly exists.

It seems the city has yet to create the preconditions for any decentralization or proven that their ideas of prison reform work.

Its Very Expensive

The cost overruns will likely be astronomical. The idea of rebuilding Rikers to temporarily house Rikers' population while the borough jails are being built is absolutely wasteful. The city should prioritize fixing NYCHA housing, upgrading education, enacting real criminal and prison reform, etc.

80 Centre St. has recently undergone renovations. It would be another sign of waste if it had to go through another one.

Conclusion

The problem with the Mayor DeBlasio's proposal and its foundational document Lippman Commission Report is its failure to accurately analyze the impact of the jails would have on the community where the jails are being placed. More importantly, the communities chosen have little input on whether the jails should be placed in their communities or whether decentralization is the best solution.

In Chinatown, where I live, it can have a devastating impact and can undermine the community where businesses and residences are negatively affected.

The proper steps are to:

- (1) Withdraw the Draft Scope of Work,
- (2) Stop the EIS and ULURP processes, and
- (3) Start the process anew with real community engagement regarding all crucial decisions, including whether to build a new jail in Lower Manhattan.

To ensure meaningful participation by these communities, we also call on Mayor Bill de Blasio to disclose all documents concerning (a) the decision to close Rikers and replace it with borough-based jails, (b) the selection of 5,000 as the target number for the City jail population, and the contingency plan if this target is not reached, and (c) the selection of 80 Centre Street and rejection of other sites.

"

I have lived in Kew Gardens most of my life and over the course of the past few decades have seen the erosion of our neighborhood along Queens Boulevard near Borough Hall since the construction of the detention center and the Kew Gardens criminal court building. Individuals in prisons should not be subjected to inhumane conditions as has been witnessed and documented at Rikers. However, transference of one poorly conceived system into a community without the consent of its residents, poses many obvious and unforeseen, negative consequences. Indeed, at a very minimum, it does not respect the democratic process. This ill-conceived project is a continuation of mass incarceration and its ugly legacy.

In residing here since 1949, I have witnessed the change to a multiethnic community in Kew Gardens and appreciate the opportunity to be a resident in the most diverse county in the nation. One of the strengths that I have recognized having grown up in a working class Greek American family is educated neighbors who had an influence on my parents and myself; a father who worked a night shift as a foreman at National Biscuit Company on the west side of NYC; and, a mother who worked in the 'sweat shops' on 7th Avenue as a seamstress. Middle-class neighbors served as role models for our family and encouraged my parents to consider an education beyond a high school degree. My parents passed away in the 1950s when I was in my teens. Three mentors kept me in my first year of college: our family doctor who lived close to us and escaped Nazi Germany during WW II - I refer to her as my Jewish mother; a Greek Orthodox priest at our local church in Jamaica; and, my husband of 61 years who I met in my first year of college and was in law school at the time. I am proud to say that I am a graduate of CCNY, Hunter College and NYU where I earned a Ph.D. **I share this because public officials need to have urban plans for residents in our communities to minimize the exodus of people from higher income groups and prevent the rise of more isolated lower income families that further disenfranchise them leading to higher crime rates.**

Professionally, I have taught at Hunter College for a period of 41 years. I served on many college wide committees, some of which I chaired, where colleagues came from areas that included social work, women's studies, sociology, anthropology, school education, and community health, to name a few. Many of them were involved in social justice issues concerning the working-class poor. **This is why I feel outraged at how a budget so massive and designed in a clandestine manner by public officials for a penal system embedded in racism and profit profiteering is outrageous and borders on scandalous!**

There are much better uses of tax-payer funds, such as community initiatives that focus on quality of life issues not only in Kew Gardens but also in surrounding neighborhoods where many hardworking and law-abiding families from diverse ethnic and religious backgrounds live and pay taxes. Our working-class families, especially the poor, need to feel empowered and integrated into our larger communities with a hopeful eye toward the future. I urge you to use our hard-earned taxes for initiatives that include:

- 1) parenting programs that focuses on raising children from a concept of love and not one of physical and emotional discipline in its many unhealthy forms (see bell hooks in her publication on All about love and James Gilligan's work on violence, to name a few);
- 2) early prenatal care where the U.S ranks at the bottom of a list among industrialized nations with the highest rates of infant and maternal mortality according to the CDC, particularly as it pertains to African American families – infant mortality rates have served as a marker for how a country is doing with its overall health;
- 3) early intervention in schools for all children that need to be addressed by school staff and other individuals trained in identifying and intervening in high risk behaviors such as bullying and other antisocial behaviors;
- 4) mentoring services for children who are lagging educationally;
- 5) programs such as music, the arts and sports that keep children in schools and off the streets;
- 6) nutrition education for families that need to be aware of better eating habits and food options that will enable them to buy nutritional foods; and,
- 7) language interpreters for families that do not have command of the English language and avenues for helping them integrate into our larger communities.

There are many other services and venues for creating change. **Prevention is the key factor as it is for many issues in our neighborhoods as opposed to “fixing” what is already broken like another poorly designed penal system as you propose.** “Fixing” perpetuates a revolving door policy which may be great for profit making but not quality of life issues, especially among disenfranchised families. “Social reform” not “penal reform” is the impetus for real change. **This project needs to be voted down and elected public officials need to be respectful of their constituents!**

To Whom It May Concern:

It is a travesty that The City is trying to force a 40 story jail onto Chinatown without any input from The People or without any consideration on how this will inevitably negatively affect this Community and its surrounding areas.

More appalling is that Mayor DeBlasio and Council Woman Margaret Chin have more regard for the criminals than they do for the tax paying and law abiding citizens.

Let us all remember, Mayor DeBlasio and Council Woman Margaret Chin are "ELECTED OFFICIALS" who were elected to serve The Community at large and NOT just the criminals.

The fact that Mayor DeBlasio's rush to push this jail through before his last term is up without the proper process and community engagement leaves one to believe there must be some alternative motive or some backroom deal where only a handful stands to benefit.

In the end, YOU AND I ALL KNOW, it is NOT in the best interest to have a 40 story jail in our community. Chinatown and our surrounding areas have more jails and courts that any other community across The Nation!

Rikers Island was built for a certain reason. With that being said, NO ONE WANTS A JAIL, let alone a 40 story monstrosity in their neighborhood. Would you??????

"Harold Fiedler
75-20 Astoria Boulevard, Suite 160
East Elmhurst, New York 11370
Email: boroughplan@doc.nyc.gov

Mr. Harold Fiedler-

Our entire community is AGAINST THE JAIL!

City's proposal exceeds the current FAR by nearly 219

.

This should have automatically triggered another suitable site.

Why are the elected officials who we Voted in going against what their Constituents want?
Spending what is projected to be 30 Billion dollars for a four borough detention center seems outrageous and a total waste of the taxpayers money!

How current and accurate are the city traffic survey for the area? When exactly were they done?
Having this jail will cripple Chinatown, its surrounding areas, and all of the already congested downtown area.

What authentic study have been in terms of a 40 story jail and the shadows it will cast on the trees in the only Chinatown based park?

How many 40 story jail have been built and proven to be safe? God forbid if there is a emergency where immediate evacuation is required, ie. an 9/11 incident, would the prisoners be at risk? Think about the lawsuits the city would have given a similar scenario where the detainees are not able to get out. Furthermore, what happens to the security of the surrounding area?

What about the quality of life for the neighborhood? Were these variables even considered?

What other sites were truly explored and viable? I heard that the city was going to build upon the existing jails on White Street and then a quick and not fully baked decision was made for 80 Centre Street to be the designated site.

Why did Mayor de Blasio do this without any real regard for the community and engagement from Our Elected City Officials? Is there some back room deal that we do not know about? Are the developer and the desire to make money at the cost of ALL THE PEOPLE in the four neighborhoods where the jails are to be built worth it? Is Mayor de Blasio really thinking this through? There are too many unanswered questions and holes to this half baked notion that this is a viable idea.

Did you and The City do due diligence in terms of pricing out how much it would cost to just fix up Rikers?

Why is there a huge campaign and pressing demand to close Rikers?

How is closing Rikers and building four based borough jails doing it in the name of Prison Reform? Should the inner workings and administration of the jail such as the training of prison guards and the actual management of the jail be what we are really talking about when we are talking about legitimate Prison Reform?

Furthermore, was any consideration given to the symmetry and height requirement for Foley Square? Did anyone bother to research the historical background, significance and preservation of The Lefkovitz Building which basically should be a Landmark Building?

With all this being said, I demand that the process be stopped.

I also look forward to answers to these questions.

Thank you for your consideration and time.

Best,
Denise

David LeRay

daveleray@gmail.com

"To whom it may concern,

We write as very concerned citizens of Kew Gardens.

As an initial matter, it is bad policy to have a jail in a residential area, period. Jails house criminals, who should be nowhere near areas with families and children. Criminals and their visitors, who may be likely to have criminal records themselves, will be more likely to be found throughout the local area. The proposed jail would literally be a few blocks away from the P.S. 99 elementary school, where children may be walking home or playing. This is a major negative for the Kew Gardens community and surrounding areas that cannot be offset by a few extra parking spaces. We expect families like ours to reconsider living in this area, which could sadly lead to a downward spiral in the quality of this beautiful neighborhood.

Furthermore, the current Detention Center is around 100 feet tall. While jails should never be built in residential communities, at least the current facility blends into the surrounding scenery to some degree. It is shorter than several residential towers in the area (Silver Towers at 240' and Court Plaza at 285') and cannot be observed from most of Kew Gardens. In contrast, the proposed structure will tower at 310 feet high. It will be the tallest building for miles and will be a blight on the skyline. It will also symbolize the changed character of the neighborhood. As a point of reference, the Windsor Building in Forest Hills, which already sticks out on the neighborhood skyline, is a comparatively modest 21 stories tall. If this facility goes forward, at a minimum, the size should be reduced from the current proposal to fit more into the character of the surrounding area.

Thanks,

David and Dorothy LeRay

"Dear President Katz, Councilwoman Koslowitz,

As a Briarwood resident for the past 20+ years right across from the courthouse, by Hoover and 134th street, I am very concerned and naturally object the building of a jail right next to a residential area.

There is a school up the hill, on Kew Gardens Rd. There is a women shelter on 134th and Union Turnpike.

The Courthouse by itself creates a lot of parking limitations. With the new jail, it will be impossible to find parking here. 5000+ inmates will have family and friends that will park here, loiter, congest the area, making it impossible for us to live. Our apartments' value will plunge. I implore you to do everything within your power to move the jail to another neighborhood, maybe closer to JFK where it is industrial and not residential.

Merav Levi, RD, MS, CDN, CSG

October 16 2018

I have lived in Kew Gardens for 50 years- been a member of The Kew Gardens Civic Association for most of these years-been a PA president in all of my daughter's public schools and -have been in touch with all our elected officials on issues that related to to our communities during these years.

Therefore, I was astounded by the news, recently announced on August 15 2018 , that a huge prison is to be constructed in our small community.(**There is a published book, KEW GARDENS: URBAN VILLAGE IN THE BIG CITY**) that our city officials might want to read. **We were all blindsided by the release of the very comprehensive plans released in August with NO community input.**

I attended the scoping meeting- learned nothing new there that we had we had not already heard from the press and other sources. In addition, we are hearing rumors about city wide trauma centers to be sited here which would further have a negative effect on the citizens of this historic community.

Here are some questions -(Since we got only speeches that were **TELLING US WHAT WAS GOING TO HAPPEN**)

When was this plan first hatched ?

Who funded the Lippman Commission?

Where did the \$8 million come from to fund all these comprehensive plans?

WHO had input into into the scope and design of these plans?

What statistics were used for the number of inmates planned for the facility in Kew gardens?

I doubt Kew Gardens has more that Staten Island.

What is the cost of this plan? Where is the money coming from??

What developers were consulted and involved in this plan?

There seems to be an extraordinary rush to to push this flawed and extremely unpopular Plan (in all the Boros) through the system

WHERE DID THE IDEA THAT THIS WAS GOOD FOR THE COMMUNITIES COME FROM?

NOT FROM THE COMMUNITIES

WE WERE NEVER CONSULTED ON ANY PART OF THE DECISIONS THAT WILL HAVE A DEVASTATING IMPACT ON OUR COMMUNITY

"Dear Mr Fiedler,

I'm a concerned resident of fresh meadows queens zip 11366 and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails.

I take the Express bus to the city and back through union turnpike and queens Blvd and it takes me 90 minutes each way. If you will build a mega structure adjacent to queens Blvd it will create unbearable traffic.

There's so much free space for such a facility outside of NYC. Please be considerate

Thank you.

Best,
Avi levy

Subject: objection to the proposed jail location

Dear officers,

We are writing to express our strong opposition to the proposed reopening and expansion of a jail facility at 126-02 82nd Ave, Kew Gardens. We respectfully ask for considering choosing another site for the jail because of the large population of young children living in the neighborhood.

The proposed address is too close to so many schools and kids' playgrounds. The following schools are all within walking distance of the proposed address, with closest only 5 minutes' walk: Kew-Forest School, Preschool of America Daycare, Our Lady Queen of Martyrs Catholic Academy, elementary schools P.S. 101, P.S. 196 and P.S. 144, Archbishop Molloy High School etc. As parents, the thought of just released criminals wondering around in the neighborhood is frightening. Not to mention the rare but potential impact of gang activities, or violent fights happening so close to kids' schools and playgrounds.

We support the goals motivating the effort to close Rikers Island. However, the choice of 126-02 82nd Ave Kew Gardens is very inappropriate, and we strongly suggest reconsidering another site.

Thanks and regards,

Jessy

Katia Lief

katia.lief@gmail.com

"I was at the meeting last night at PS 133, in regard to the proposed expansion of the House of Detention on Atlantic Avenue—and I'm glad I went. It was shocking to understand the enormous scope of the proposed expansion and that, if built, the new structure will tower monstrously over our neighborhood and flood an already dense area with hundreds if not thousands more people and cars every day. As it is now, the current building is in context with the surrounding scale of the neighborhood. I can see it from my house and I have no problem with it. But a building more than twice the size will rob not just my house but all of the neighborhood of light and sky. I strongly oppose any rezoning in order to build the proposed enormous building.

Another concern is that, in increasing the size of four existing jails, include Brooklyn's, much of Rikers' dysfunctionality and brutality will simply be relocated to other parts of the city in the new, enormous jails. Why not leave the existing jails (other than Rikers) the size they are now, and build additional smaller jails in other parts of the city? There is certainly space farther out in Brooklyn, and also in the Bronx. Creating more, not larger, jail buildings will also genuinely address the issue of proximity for family members of inmates. (For someone traveling from, say, Coney Island to Boerum Hill, it's a very long commute.) And why on earth isn't a jail being planned for Staten Island?

There is so much about the proposed new jail plan that is wrong-headed. Personally, I'm angry that the city has not provided a more comprehensive public review process for neighborhoods to evaluate the scope of work involved in each jail proposal, separate from the idea of closing Rikers.

Sincerely,
Katia Lief

Subject: Jail facility at Kew Garden

Dear officers,

We are writing to express our strong opposition to the proposed reopening and expansion of a jail facility at 126-02 82nd Ave, Kew Gardens. We respectfully ask for considering choosing another site for the jail for the following reasons:

1. The proposed address is too close to so many schools and kids' playgrounds. The following schools are all within walking distance of the proposed address, with closest only 5 minutes' walk: Kew-Forest School, Preschool of America Daycare, Our Lady Queen of Martyrs Catholic Academy, elementary schools P.S. 101, P.S. 196 and P.S. 144, Archbishop Molloy High School etc. As parents, the thought of detainees and just released sex offenders or child predators wandering around the neighborhood is frightening. Not to mention the rare but potential impact of gang activities, or violent fights happening so close to kids' schools and playgrounds.
 2. Another potential risk is the increase of people with weapons in the neighborhood. This will increase the probability of massive shooting in nearby schools and playgrounds.
 3. Both the communities of Kew Gardens and Forest Hills will suffer tremendous economic loss. A lot of parents and local business will move out the communities, resulting in a crash of nearby housing markets.
 4. Road infrastructure nearby will not be able to handle the dramatic increase in traffic that will occur after the proposed expansion. The nearby Queens Boulevard is already one of the deadliest streets in the city.
- We support the effort to close Rikers Island and the goals of making our municipal jails more humane. However, the choice of 126-02 82nd Ave Kew Gardens is very inappropriate. We strongly suggest reconsidering another site.

Thanks and regards,

Stephanie Lin

shlin475@gmail.com

"I am glad that progress is being made towards closing Rikers - in any other country it would be cited as an example of human rights violations - but opening new jails undermines this positive impact. These jails will be filled and they will be staffed by the same or similar abusive employees as Rikers was - no screening system can solve prisoner mistreatment. We'll hear all the same stories of under-served mental health needs, physical and psychological torture, and suicide.

Particularly abhorrent is the city's reliance on cash bail, which leaves vulnerable, impoverished residents incarcerated for months and years before they even get a day in court! What reasoning can justify spending city funds on more jails instead of unclogging the mess that keeps them full? I urge you to extend some empathy - imagine being taken off the street for weeks, stuffed in a cell, treated as less than human, waiting for your court date, your only chance to maybe get back to your community and your loved ones, as it gets delayed and rescheduled by forces outside your control.

I live near the Brooklyn Detention Complex and I walk past it nearly every day to get to my workplace. While it is an outdated eyesore, I hardly think the answer is renovating it into a bigger jail. The idea that this would somehow improve the neighborhood with first-floor shops and basement parking beneath a tower's worth of unjustly imprisoned pre-trial detainees is not only misguided, it is downright cruel.

"Dear Mr Fiedler,

I'm a concerned resident of KEW GARDENS - 11415 and I'm reaching out today to express my strong opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails.

Closing the existing prison will NOT fix the current issues at Rikers Island; it will only seek to exacerbate them and spread them to all the boroughs and Manhattan. The proposed budget would be far better spent on education, street repairs, and city projects to enhance our beautiful neighborhood - not destroy it with this prison.

In addition to adding more traffic to an already overloaded intersection.

The jail will be close to 3 schools, posing problems for our children, will depreciate surrounding property values.

THIS CANNOT BE ALLOWED!!!

Do the right thing and keep the jail out of queens.

Thank you.

Yvonne Lindahl

"

Nancy L Linday

pactote@aol.com

"

Mr. Howard Fiedler:

The NYC Ferry System, opened on May 1, 2017, renders obsolete the transportation studies used to prepare the New York City Borough-Based Jail System Draft Scope of Work to prepare a Draft Environmental Impact Statement (CEQR No. 18DOC001Y).

Because the Draft Scope is based on obsolete transportation studies, it is critical that the City withdraw its scope and start its research all over again, including the excellent transportation access that the NYC Ferry System can provide to Rikers Island, as the basis for its new study.

On September 19, 2018, it was announced that the "NYC Economic Development Corporation (NYCEDC) just kicked off its 2018 Ferry Feasibility Study to determine sites for future landings or routes that could complement the existing NYC Ferry Service."

<https://www.metro.us/news/local-news/new-york/help-nyc-ferry-decide-where-to-sail-next>

<https://www.nycedc.com/resources/studies/2018-ferry-feasibility-study>

2018 Ferry Feasibility Study

New York City Economic Development Corporation (NYCEDC) is undertaking a new ferry feasibility study to examine sites for possible future landings. The first stage of this process will include meeting with elected officials and community board representatives along the city's waterfront to learn about potential sites to include in study. The study will take into consideration factors such as water depths, population density, existing access to transit, and travel time comparisons between modes.

At the September 6th, 2018, meeting of Community Boards 1 & 3, at the Town Hall held by Manhattan Borough President Gail Brewer & Councilwoman Margaret Chin on September 12th, 2018, and at the Draft Scope meeting held on September 27th, 2018, city representatives repeatedly stated how hard it is for visitors to get to Rikers Island. Yet not one of them discussed the new reality: NYC Ferry is incredibly popular and the new route to Soundview (opened on August 15, 2018), which passes Rikers Island, has already become one of the most popular ferries of all.

" "We're slashing commuting times, connecting residents to major job centers and reuniting New Yorkers with their waterfront and helping them discover other neighborhoods," President and CEO James Patchett said. "We look forward to exploring ways to bring ferry service to more communities." " <https://www.metro.us/news/local-news/new-york/help-nyc-ferry-decide-where-to-sail-next>

The part of the existing ferry trip from 90th Street--near Gracie Mansion--to Soundview, in The Bronx, takes only 15 minutes and passes Rikers Island on the way.

<https://www.ferry.nyc/routes-and-schedules/route/soundview/>

Timing the trip in the afternoons of Friday, October 19, and Saturday, October 20, 2018, I found the following critical information:

- (1) The section of the ferry trip from the 90th Street stop to Rikers Island takes less than 10 minutes.
- (2) The section of the ferry trip from the Soundview stop to Rikers Island takes only five minutes.

The astounding progress in waterbased transportation provided by the New York City Ferry system that is described above by NYCEDC President and CEO James Patchett must be the basis for an accurate transportation access study for the future of Rikers Island.

Yours truly,

Nancy Linday

"

Elliott Liu

eliu@gradcenter.cuny.edu

"Dear Howard,

I have been a Bronx resident for over a decade, and seen the terrible toll inflicted on the young people and families of this borough by mass incarceration. The closing of Rikers is an important step toward rolling back this problem. But the plan to move the last inmates off Rikers by expanding beds in all five boroughs--and building a new jail in the Bronx--threatens to undo all that our communities have worked for. Please do not insult and betray Bronxites this way.

Scholarship and historical experience show clearly that efforts to reduce incarceration by making facilities "'nicer,'" and expanding institutional capacity to incarcerate, only perpetuates the problems it claims to solve. Do not repeat the same mistakes as your predecessors, and foist the problems of mass incarceration onto another generation. Stop this jail expansion plan, close Rikers unconditionally, and bring our people home.

Sincerely,
Elliott Liu

"

Julian Liu

treku.liu@gmail.com

"Dear Mr. Fiedler,

I'm writing to express my opposition as a New York City resident to the estimated

10 billion borough jail plan to replace Rikers. The proposed new jails are both bad for the neighborhoods that they will be placed in and a waste of taxpayer and city resources better spent on affordable housing, health care and education.

Sincerely,

Julian Liu

Brooklyn NY

"

James Lola

james@smithhanten.com

"Not only is the proposal for expanding this facility overreaching and inappropriate, you need to get more community input before just riding roughshod on us.

The intersection of four vibrant neighborhoods is NOT the appropriate place to site a 1.4 MILLION sq ft detention facility – it is NOT the Highest and Best Use of the location

Please take into consideration more input from the surrounding community and our elected representatives besides Stephen Levin

BOROUGH-BASED JAIL SYSTEM

DRAFT SCOPE OF WORK FOR AN ENVIRONMENTAL IMPACT STATEMENT
CEQR No. 18DOC001Y

COMMENT SHEET

NAME: Leslie A. Lyga
ADDRESS: 39/140th St 286 Cypress Ave. Bronx NY 10451
EMAIL: bigl@juno.com

COMMENTS:

- who do you consider to be the stakeholders?
- How many beds will the jail hold? men? women?
- The site is contaminated how will you protect the air quality ~~of the~~ during construction and the rats which will contaminate the neighborhood if construction were to begin.
- How much does it cost to house one person who is jailed per month?
- How will it affect my taxes as a homeowner?
- Where does the money come from to build the jail.
- Our car and home insurance rates will rise because of the crime the jail will bring.
- I do not ~~want~~ want collection officers with guns

Written comments on the Draft Scope of Work will be accepted by DOC through **October 15, 2018** and may be submitted at the scoping meetings, by email, or by regular mail to the contact below.

Michael Lyon

mlyon01@comcast.net

"Rikers needs to close, but New York should not build replacement jails.

Blacks, Latinos, the poor, the mentally ill, unconvicted people awaiting trial, and the homeless are over-represented in among the jail population, and therefore all should be done to reduce incarceration.

In San Francisco, many hundreds of advocates for civil rights, public health, homeless people, disabilities, and racial equality

Grouped together and convinced the City to abandon its plans to build a replacement jail and adopt alternative plans to reduce the jail population and bed days. Suggested alternatives included bail and parole reform, mental health and housing services, and programs for pre-release education and job-skills and post-release jobs, housing, counseling, and health services.

Subject: Public Hearing Local Law

Date: Thu, Sep 27, 2018 2:09 pm

Attachments: Public Hearing-1.pdf (188K), public hearing.pdf (212K), Pro. Int. No 1063-A.pdf (209K)

Honorable Gale Brewer, Manhattan Borough President
Honorable Margaret Chin, City Council Member:

Dear Gale and Margaret:

I am going to make a testimony on Thursday, September 27, 2018 in support of the public hearing and protest against the City's new detention Center planning at 80 Worth Street.

There has been already a Local Law of New York City, No.90 of 2009 / Council Intro. No. 1063-A, which mandates a public hearing to be held prior to any capital project could start. This law was drafted by then Councilman Alan Gerson based on Edward Ma's initial proposal. Also, I have made a testimony for the proposed law of transportation at the public hearing chaired by Councilman John Liu, Chairman of the Council Transportation Committee on October 8, 2009. The proposed law was finally passed by the Council on December 21, 2009, approved by the Mayor on December 28, 2009 and returned to the City Clerk on December 28, 2009.

I am wondering if the law could have a binding force, applicable to the new detention center planning announced by City Hall without Chinatown Community input? Community democracy could be better accomplished through a process of building community construction in partnership between government and people, such as, through a public hearing.

Also, in order to strengthen the current protest, I have already asked CB 2's joining CB 1 and CB 3 in forming a stronger community alliance against the new detention center planning, which has been orally approved by Terri Cude, CB 2 Chair, pending on the Transportation Committee meeting's voting for approval on Thursday, October 4, 2018.

Finally, I plan to make a testimony against the term limits for the purpose of the preservation of American tradition, value, culture, quality life and community democracy, as well as with their continuity, growth and prosperity. The term limits is literally destructive and eroding the foundation and functioning of our community board system of democratic legacy, public education and human resource development with special knowledge and skill in land use and governmental affairs, etc.

Attached are :

1. My testimony
2. News clip of World Journal of the public hearing on transportation on October 9, 2009.
3. copy of a proposal for mandating a public hearing to be held prior to capital project could start, 10/8/09, by Edward Ma, CB 2 board Member.
4. Copy of the Council Int. No. 1063-A, passed by the Council on 12/21/09.
5. Copy of the Local Law of New York City, No.90 of 2009

Thank you.

Respectfully,

Edward Ma, Member, Community Board 2, Manhattan

From: Edward Ma <edma55@aol.com>
To: Edma55 <Edma55@aol.com>
Subject: Public hearing mandated by law prior to any capital project engagement started
Date: Thu, Sep 27, 2018 10:20 am

Dear Honorable Gale Brewer, Manhattan Borough President
Honorable Margaret Chin: New York City Council Member

I am profoundly grateful to attend this public hearing held on behalf of the interest of Chinatown community.

As a Members of Community Board 2, I would like to state that Chinatown is entitled and mandated to be informed in advance to have a public hearing like this one. It is regretful to see that the current planning to build a new detention center in Chinatown was announced without notifying Chinatown and its input and participation.

Apparently, City hall is unable to respect a legislation instituted by City Council's Int. No. 1063-A / New York City Laws of No.90 for the year of 2009, passed by City Council on December 21, 2009 and approved by the Mayor on December 28, 2009, respectively. This law was drafted by former Councilman Alan Gerson based on the initial proposal by Edward Ma, Community Board 2 on October 8, 2009.

This law has mandated that any capital project engagement has to be preceded two weeks in advance by holding a public hearing for community participation. This is what I have been always advocating that **community democracy could be accomplished more through the process of building community construction in partnership between the Government and community.**

It is very regretful to see that the law is neglected in the announcement of planning to build a new detention center in Chinatown without notifying Chinatown community in advance with their input and participation. This is the reason why I oppose Building a new detention center in Chinatown.

In 1993 new jails were built in Chinatown, now again in Chinatown. Chinatown has been already overly crowded, we do not need jails no more, we need more senior housing, instead. If building a new detention center in Chinatown is justified by the nearby location of the court and saving 31 million dollars of annual transportation expenses. Then I would suggest two plans: one is to remodel Rikers island: 2nd plan is to establish a court at the Rikers Island. The New York City court system has been existed in the civic center over 100 years. It was only about 30 years ago that the Harlem Branch Court was established. Therefore the alternative choice is to remodel Rikers Island with the new court on the spot.

Thank you for the restoration of this democratic process for Chinatown by having this public hearing.

Edward Ma, Member of Community Board 2

市議會公聽6案 交局挨轟

議員和民衆開砲 批交局研究都是「過場」 且林士果、布碌崙橋等案 倨傲罔顧民意

記者曹健

紐約報導

紐約市議會交通委員會8日在主席劉醇逸主持下就六項提案舉行公聽會，關心曼哈坦下城且林士果(Chatham Square)規畫案的華埠代表在作證時齊聲抨擊市交通局(DOT)疏於與社區溝通，劉醇逸等市議員也批評交通局態度傲慢、罔顧民意。

市議員郭亞倫提出的1063號議案，要求交通局所有影響10%以上機動車流量的重要交通建設工程，須在定案前至少30天，將包括經費、地圖、交通替代方案在內的整體計畫提交給相關的社區委員會和市議員，並根據反饋的意見進行改進。

來自華埠的社區代表馬士珍、李卓勳、陳翠芳、陳倩雲、江永波、伍振亮等人以及林士果改建為例，稱交通局在未充分聽取社區意見的情況下就片面決定改建方案，不考量華埠商家

和民衆會遭受的衝擊。

交通局負責外展事務的副局長David Woloch在作證時表示，每項規畫都與社區機構進行了對話，他更聲稱且林士果工程早在五年前就通報給華埠社區，但馬士珍和李卓勳等駁斥說根本沒有，即便是今年初的公聽會也是草草進行了事，交通局代表還說不論社區意見如何都要動工。

劉醇逸批評交通局當初以工程迫在眉睫為由召開且林士果重建案公聽，結果遲延至今還未動工，顯然並不緊迫；他還說，法律規定街道封閉前要提前120天通知社區，而交通局卻在市長令下當機立斷地將時報廣場和先鋒廣場之間的百老匯路段改成步行街。

Woloch極力辯解交通局一直落力進行外展工作，該做的程序都做了，但多位市議員和作證民衆以「說謊」和「傲慢」來形容交通局，稱所謂的調查研究和民意公聽都是走過場。華埠

代表更以布碌崙大橋整修、格蘭街單車道等交通項目來力證交通局的作業「不透明」、「不親民」。

昨日同時舉行公聽的還有增加停車不熄火罰款的947號提案。該提案是因1月華埠東百老匯兩名華童被無人駕駛的倒退廂型車撞死，以及一名皇后區青少年被小偷駕駛盜竊而來的未熄火汽車撞死等慘劇而提出，中年喪子的歐美玲和夫婦到場作證。提案要求將司機在汽車停泊時未熄火便下車的違規罰款由5元升至250元。

其他公聽的提案包括要求雇主為駝單車送信或送貨雇員的安全違規行為負責的624號提案；要求通勤小巴要在車輛上張貼乘客權益海報的1023號提案；要求交通局在更改停車收費表(Meter)標準前60天在社區公示的1076號提案；要求交通局在任何試行計畫(Pilot Project)啟動前60天通報社區委員會的1077號提案。

市議員郭亞倫(右起)、劉醇逸在公聽會上質問交通局代表(右圖)。下圖為華埠社區代表李卓勳(右起)、馬士珍、伍振亮出席市議會公聽會。

World Journal October 9, 2009 Friday

New York City Council Transportation Committee held a public hearing on October 8 chaired by Councilman John Liu, concerning about Council's six legislation including the No. 90 Local Law of the City of New York for the Year of 2009/ Council Intro. No 1063-A about mandating a public hearing to be held two weeks in advance for community participation. Chairing Councilman John Liu and other Council Members complain unanimously about that DOT's arrogant attitude in neglecting civilian services. Pictures: top- Councilman John Liu chairing the public hearing; right, Councilman Alan Gerson, who drafted the Local Law, No. 90 based on the initiative proposal by Ed Ma, Community Board 2, testifying, in the middle of the lower picture.

(The legislation of the Local Law No. 90 of NYC / Council Int. No.1063-A was passed by City Council on December 21, 2009, and approved by Mayor on December 28, 2009.)

**Testimony on Mandatory Community Meetings Prior to
Public Hearing on Construction Project**

To: Honorable John C. Liu, Chair and Honorable Members,
Transportation Committee, NYC City Council
From: Edward Ma, Member of Community Board 2, Manhattan /
Vice Chair, Chinatown and Neighbors Committee
Former Human Rights Commissioner, NYC
Date: October 8th, 2009, Thursday

May I have the privilege in the request of your help to support the legislation mandating that when City agencies plan a public hearing on community construction, the community should be notified 4 months ahead with 6 follow-up community meetings.

My testimony for this legislative proposal is designed to enhance partnership between city agencies and community through public education and the participation of residents and business for dialogue and mutual understanding. All of these activities could be conducted systematically prior to the public hearing in order to make the construction successfully meeting the community needs in a democratic process.

However, problems have occurred in various ways of poor communication and casual preparation for public hearing, such as notifying the community in a short notice, distributing flyers only in a few neighborhoods, news release not reaching to the core population of the community, etc. Therefore, many residents are unaware of the prospective public hearing. Very often the project presentation carries many professional jargons, hardly understood even by educated people, let alone for those poor English language residents.

Consequently, this would lead to either poor participation or lack of grasping what the project is all about. A haphazard, bureaucratic presentation would result in disconnected, rejected or unconcerned feelings from the residents and community. Instead of winning community support, this kind of hearing would provoke resentment, even angry protest against the projects. "It is a City project, but not for the community."

In the past 15 years, in Chinatown, there seems to have no community input when public hearing is conducted before community construction started. And these public hearings have been always notifying Chinatown with a short notice in less than a weeks or two without consideration of community needs. Why Chinatown is not given a chance to participate during the planning process since the construction is aimed for community development. Especially after 9/11 disaster, "business remains as usual", despite the devastated impact on Chinatown residents, business, and traffic congestion, etc. Why Chinatown is always deprived of the right to speak up in the decision making process for what they want for their own community in a democratic process.

1. In 1994, MTA failed to notify Chinatown for the closing of D train Grand Street subway station in order to repair Manhattan Bridge, let alone a public hearing.

2. On August 13, 2008, City Planning held a public hearing on Lower East Side Rezoning with reportedly spending \$2 millions for research of three years. However, Chinatown was informed only in less than a month before the public hearing given.
3. On December 2, 2008, when a public hearing on Chatham Square reconfiguration was presented by DOT, the project's flyers and maps were made available in less than a week.

As a community activist involving all the above three projects, may I make the following recommendations:

1. A mandate should be instituted at least four months and six community meetings prior to public hearing could begin.
2. Each public hearing should be mandated to last two hours including Q/A time to assure participants' understanding of the project content and its impact on local residents, business and traffic congestion, etc.
3. Publicity should be conducted as follows:
 - a. Flyers and pamphlets should be printed in bilingual languages for local residents with quality graphic design and pictures, readable with no professional jargons. And these flyers and pamphlets could be printed at least 5,000 copies each and distributed to all the neighborhoods in the community.
 - b. Press release should be given in bilingual languages prior to each meeting.
 - c. Press conference should be held three times by inviting local ethnic and mainstream media in addition to local community agencies and local leaders.
 - d. City projects should invite qualified community agencies, at least two of them, as partners for consultation.

I would appreciate if you could add more legal and technical points in order to strengthen this legislation.

Hopefully, after all the above efforts, the City would receive more support from the community for public hearing and construction projects. When partnership is established between City and community, we hope that **justice, equality, democracy and quality of living would be assured.**

Community democracy could be better accomplished through the process of building community construction in partnership between government and people.

Thank you.

Pro. Int. No. 1063-A

By Council Members Gerson, Gentile, Comrie, Foster, Gonzalez, James, Lappin and Nelson

A LOCAL LAW

To amend the administrative code of the city of New York, in relation to notice of major transportation projects.

Be it enacted by the Council as follows:

Section 1. Chapter 1 of title 19 of the administrative code of the city of New York is amended by adding a new section 19-101.2 to read as follows:

§19-101.2 Review of major transportation projects. a. For the purposes of this section, the following terms shall be defined as follows:

1. "Affected council member(s) and community board(s)" shall mean the council member(s) and community board(s) in whose districts a proposed major transportation project is to be located, in whole or in part.

2. "Major transportation project" shall mean any project that, after construction will alter five or more consecutive blocks involving a major realignment of the roadway, including either removal of a vehicular lane(s) or full time removal of a parking lane(s) or addition of vehicular travel lane(s).

b. If an agency of the city other than the department implements a major transportation project, such agency, in lieu of the department, shall provide the notice required by this section.

c. Prior to the implementation of a major transportation project, the department shall forward notice of such project to affected council member(s) and community board(s) by first class mail and electronic mail.

d. Within seven days after receipt of such notice: (i) the affected council member(s) may submit recommendations and/or comments on such notice to the department; and (ii) the affected community board(s) may request a presentation of the major transportation project plan by the department, which shall be made to the community board within thirty days of such community board's request.

e. Each presentation shall include, at a minimum, the project limits, a description, and a justification of such plan, and a map showing the streets affected by such plan and, within three days of such presentation, shall be forwarded to the affected council member(s).

f. The department shall consider recommendations and/or comments, if any, made within seven days of the presentation to the community board, from the affected council member(s) and affected community board(s), and may incorporate changes, where appropriate, into the plan.

g. The department may implement its plan fourteen or more days after it sends an amended plan or notice that it will proceed with its original plan to the affected council member(s) and community board(s).

h. Nothing in this section shall be construed to prohibit the department from providing notice of its major transportation projects on its website and to affected council member(s) and community board(s) and other interested parties by other means in addition to those specified in this section.

i. Nothing in this section shall be construed to require the department to provide notification of major transportation projects requiring immediate implementation to preserve public safety.

§2. This local law shall take effect one hundred and twenty days after it is enacted into law.

LOCAL LAWS

LOCAL LAWS

OF

THE CITY OF new york

FOR THE YEAR 2009

No. 90

Introduced by Council Members Gerson, Gentile, Vacca, Comrie, Foster, Gonzalez, James, Lappin, Nelson, Liu, White Jr., Arroyo, Garodnick, Jackson, Mealy, Weprin and Yassky

A LOCAL LAW

..Title

To amend the administrative code of the city of New York, in relation to notice of major transportation projects.

..Body

Be it enacted by the Council as follows:

Section 1. Chapter 1 of title 19 of the administrative code of the city of New York is amended by adding a new section 19-101.2 to read as follows:

§19-101.2 Review of major transportation projects. a. For the purposes of this section, the following terms shall be defined as follows:

1. "Affected council member(s) and community board(s)" shall mean the council member(s) and community board(s) in whose districts a proposed major transportation project is to be located, in whole or in part.

2. "Major transportation project" shall mean any project that, after construction will alter four or more consecutive blocks, or 1,000 consecutive feet of street, whichever is less, involving a major realignment of the roadway, including either removal of a vehicular lane(s) or full time removal of a parking lane(s) or addition of vehicular travel lane(s).

b. If an agency of the city other than the department implements a major transportation project, such agency, in lieu of the department, shall provide the notice required by this section.

c. Prior to the implementation of a major transportation project, the department shall forward notice of such project to affected council member(s) and community board(s) by electronic mail.

d. Within ten business days after receipt of such notice: (i) the affected council member(s) may submit recommendations and/or comments on such notice to the department; and (ii) the affected community board(s) may either submit recommendations and/or comments on such notice to the department and/or request a presentation of the major transportation project plan by the department, which shall be made to the community board within thirty days of such community board's request.

e. Each presentation shall include, at a minimum, the project limits, a description, and a justification of such plan, and a map showing the streets affected by such plan and, within three days of such presentation, shall be forwarded to the affected council member(s).

f. The department shall consider recommendations and/or comments, if any, made under the provisions of subdivision d of this section and/or within seven days of the presentation to the community board, from the affected council member(s) and affected community board(s), and may incorporate changes, where appropriate, into the plan.

g. The department may implement its plan fourteen or more days after it sends an amended plan or notice that it will proceed with its original plan to the affected council member(s) and community board(s).

h. Nothing in this section shall be construed to prohibit the department from providing notice of its major transportation projects on its website and to affected council member(s) and community board(s) and other interested parties by other means in addition to those specified in this section.

i. Nothing in this section shall be construed to require the department to provide notification of major transportation projects requiring immediate implementation to preserve public safety.

§2. This local law shall take effect one hundred and twenty days after it is enacted into law.

THE CITY OF NEW YORK, OFFICE OF THE CITY CLERK, s.s:

I hereby certify that the foregoing is a true copy of a local law of The City of New York,

passed by the Council on ...December 21, 2009..... and approved by the Mayor

onDecember 28, 2009.....

MICHAEL M. McSWEENEY, City Clerk Clerk of the Council.

CERTIFICATION PURSUANT TO MUNICIPAL HOME RULE §27

Pursuant to the provisions of Municipal Home Rule Law §27, I hereby certify that the enclosed Local Law (Local Law 90 of 2009, Council Int. No. 1063-A) contains the correct text and was passed by the New York City Council on December 21, 2009, approved by the Mayor on December 28, 2009 and returned to the City Clerk on December 28, 2009.

JEFFREY D. FRIEDLANDER, Acting Corporation Counsel.

georjana

g.mm@me.com

"Dear Mr. Felder,

I am opposed to the building of a jail for the following reasons.

1. Rikers Island is the most perfect location for a jail. The problem is not with the building structures but rather with the inherent workings of the system which is flawed.

The Corrections commission reviewed several years of inspection records at Rikers and found that the city had whiffed basic requirements — it did not staff enough guards, failed to inspect corrections officers' guns, and issued guards weapons for which they were not certified. The city also dragged its feet reporting inmate deaths and suicide attempts to the state commission. THESE PROBLEMS WILL NOT GO AWAY WITH NEW JAILS. FIX THE PROBLEMS ON RIKERS!

2. CRIME in Kew Gardens will increase.

3. LACK OF PARKING A new parking lot was just completed by the Courthouse costing Millions of taxpayer dollars! Where will all these vehicles be parked once that parking lot is replaced with a 29 story jail???? At present I am unable to pull out of my driveway on Coolidge Ave due to lack of visibility for oncoming traffic because there are already so many cars parked on the street, many from people going to the courthouse!

4. TRAFFIC CONGESTION . Queens Blvd and surrounding streets are already gridlocked. It is already overcrowded.

5. DECLINE OF QUALITY OF LIFE. No one wants to live near a jail, have gangs hanging around, drug addicts and dealers. The element presently on Rikers will follow. Why ruin a nice residential neighborhood.

Unsavory types will not only be on the streets but on the subways making them unsafe. Residents must pass the jail site to go to the Union Tpke subway station.

6. CRIME INCREASE. Bringing in a bad element of people.

7. DECLINE OF PROPERTY VALUES. No one wants to raise a family around a jail with criminals lurking about.

8. SIRENS FROM THE JAIL Will be going off at all hours into the night disturbing the peace and tranquility of our neighborhood.

9. CLOSING RIKERS IS LUCRATIVE FOR NYC, I.E. Builders playground on Rikers as well as the Boroughs. Not good for residents but who cares about them when builders and NYC will profit!

I believe that I have stated numerous reasons opposing the closing of Rikers and opening jails in the boroughs.

I hope that you will realize what a mistake this would be for the residents of Queens.

We really enjoy living here.

Thank you,

Georjana Macri

Kew Gardens, NY 11415 Kostasm@verizon.net

October 10 2018

To the Officials of the Department of Corrections of the City of New York

I voice my objection to the building of a new jail in Kew Gardens, Queens.
The impact on the community will be devastating.
The scale of the planned building and the number of people it will accommodate is extreme.
There is nothing beneficial in planting a new jailhouse in a residential area.
On the contrary, there are a lot of reasons not to.
Please consider these:

1) Commuting

As the terminal of 3 bus lines and a couple more passing through we are overcrowded.
Lines are very long most of the day.
Subways are very slow either direction. Almost double the normal time. Even when there's no work planned.
That's reality. An hour to and from Manhattan is common. Standing room only.
Professionals commuting find it rough. That turns them away from the area, Away from Queens in general.

2) Quality of services

Kew Gardens needs more commercial space. More and Better quality of shopping.
The only new restaurants opening in Kew Gardens are new editions of failed fast food chains.
All on Queens Boulevard.
There are no Super Markets for 10 long blocks. Then there is one. Then nothing.
On Queens Boulevard where the shops are there is not enough space for shops.
How can you accommodate more customers working at or visiting the Jail?
There are not enough delis and coffee shops.
There is no area for opening shops near the planned jail.

3) Quality of life

As a result of the above there will be more people on the streets. With no place to go to. And people worried about it.
That does not help a community.
We have a brand new Hotel/Apartment building next block that is rented to homeless for allegedly 5,000\$ a month.
Cars outside do not match the place. Or the neighborhood.
The permanent homeless population is growing though. They are near the subway and government buildings 24/7.
Garbage is filling the streets especially near the subway and bus stations, and the streets are not swept often enough.
It's pretty stinky most of the time. Everyone throws their trash on the street. Today I saw garbage bags near the Q10 bus piling up for 3 days.

4) Property values and Queens status

Kew Gardens has the potential of being the most sought after part of Queens. And NYC.
Proximity to Corona park, Forest park, highways and trains, makes it very desirable.
It is still not overcrowded and maintains a family oriented atmosphere. Not many places in NYC can claim that.
How can a 1500 bed jail help to maintain that? What is the benefit to the community?
Furthermore, what is the effect on property values on a vastly single housing community?

5) Where is the money coming from?

One big question is what is to become of Riker's island?
In the long run is it to be sold for condos and development?
Who pays for 29 stories 1500000 Sq. feet facilities?
Why are not the new jails build on Rikers?
Why do we need new Jails and not fix Rikers?

The sort time allotted for planning such a major intrusion in a community is bound to have devastating effects.
Please reconsider.

Respectfully

Constantin Maragoudakis

COMMENTS:

I am 76 years old lady living with my husband Jacob in Kew Gardens for 18 years or more. I love Kew Gardens and my neighbors. I think to build a jail in a very nice neighbourhood will ruin the community life, will create safety issues for elders and youngsters, specially the PS.99 Public school kids. Then It will increase traffic conjection that exist anyway between Queens Blvd and Union Turnpike intersections.

Sincerely
Zabel Hatem

COMMENTS:

① PS 99 right off Queens Blvd.

② Court house on Queens Blvd

③ Briarwood Shelter across with bridge connecting

④ new homeless shelter for men near Queens Blvd

By putting up new jail will ^{overcrowd} increase area with danger
for confrontation (confrontation)

Let other neighborhoods share in project's benefits.

Too much exposure for young kids

East Elmhurst, NY 11370

Dear Mr. Fiedler:

I am writing to provide my comments on the proposal for the new Brooklyn jail facility. I attended the scoping session held in Brooklyn recently.

First, the mass of the proposed building is unacceptable. It is too tall and too bulky. There should be a second facility in another location in Brooklyn so this one can be appropriate in size for both the prisoners and the community residents. The convenience in visits for families and for bringing the prisoners to court would not be seriously compromised if another jail was located in the Brooklyn Navy Yard, the passenger ship terminal, Red Hook, or another location not far away.

Second, the plan to have retail on the Atlantic Avenue side of the building is inappropriate unless there is a plan to have a loading dock on Smith Street for the shops. There is absolutely no standing at the curb, as it is a moving lane of traffic on a very busy street. If trucks had to load and unload on Atlantic Avenue, there would be a traffic jam all day.

Third, it seems the number of spaces for parking would not be enough for both uniformed and civilian employees; with no thought given to visitors. All of the parking lots in the area have been built on, the municipal lot was torn down, the LICH lot was torn down, and parking is problematic in this area. More parking spots should be included in the plan.

I hope the City responds to the community and revises the plan. I agree Rikers should be closed, but a massive building is not a necessary outcome.

Sincerely,

Carol Marker

I have lived in Kew Gardens most of my life and over the course of the past few decades have seen the erosion of our neighborhood along Queens Boulevard near Borough Hall since the construction of the detention center and the Kew Gardens criminal court building. Individuals in prisons should not be subjected to inhumane conditions as has been witnessed and documented at Rikers. However, transference of one poorly conceived system into a community without the consent of its residents, poses many obvious and unforeseen, negative consequences. Indeed, at a very minimum, it does not respect the democratic process. This ill-conceived project is a continuation of mass incarceration and its ugly legacy.

In residing here since 1949, I have witnessed the change to a multiethnic community in Kew Gardens and appreciate the opportunity to be a resident in the most diverse county in the nation. One of the strengths that I have recognized having grown up in a working class Greek American family is educated neighbors who had an influence on my parents and myself; a father who worked a night shift as a foreman at National Biscuit Company on the west side of NYC; and, a mother who worked in the 'sweat shops' on 7th Avenue as a seamstress. Middle-class neighbors served as role models for our family and encouraged my parents to consider an education beyond a high school degree. My parents passed away in the 1950s when I was in my teens. Three mentors kept me in my first year of college: our family doctor who lived close to us and escaped Nazi Germany during WW II - I refer to her as my Jewish mother; a Greek Orthodox priest at our local church in Jamaica; and, my husband of 61 years who I met in my first year of college and was in law school at the time. I am proud to say that I am a graduate of CCNY, Hunter College and NYU where I earned a Ph.D. **I share this because public officials need to have urban plans for residents in our communities to minimize the exodus of people from higher income groups and prevent the rise of more isolated lower income families that further disenfranchise them leading to higher crime rates.**

Professionally, I have taught at Hunter College for a period of 41 years. I served on many college wide committees, some of which I chaired, where colleagues came from areas that included social work, women's studies, sociology, anthropology, school education, and community health, to name a few. Many of them were involved in social justice issues concerning the working-class poor. **This is why I feel outraged at how a budget so massive and designed in a clandestine manner by public officials for a penal system embedded in racism and profit profiteering is outrageous and borders on scandalous!**

There are much better uses of tax-payer funds, such as community initiatives that focus on quality of life issues not only in Kew Gardens but also in surrounding neighborhoods where many hardworking and law-abiding families from diverse ethnic and religious backgrounds live and pay taxes. Our working-class families, especially the poor, need to feel empowered and integrated into our larger communities with a hopeful eye toward the future. I urge you to use our hard-earned taxes for initiatives that include:

- 1) parenting programs that focuses on raising children from a concept of love and not one of physical and emotional discipline in its many unhealthy forms (see bell hooks in her publication on All about love and James Gilligan's work on violence, to name a few);
- 2) early prenatal care where the U.S ranks at the bottom of a list among industrialized nations with the highest rates of infant and maternal mortality according to the CDC, particularly as it pertains to African American families – infant mortality rates have served as a marker for how a country is doing with its overall health;
- 3) early intervention in schools for all children that need to be addressed by school staff and other individuals trained in identifying and intervening in high risk behaviors such as bullying and other antisocial behaviors;
- 4) mentoring services for children who are lagging educationally;
- 5) programs such as music, the arts and sports that keep children in schools and off the streets;
- 6) nutrition education for families that need to be aware of better eating habits and food options that will enable them to buy nutritional foods; and,
- 7) language interpreters for families that do not have command of the English language and avenues for helping them integrate into our larger communities.

There are many other services and venues for creating change. **Prevention is the key factor as it is for many issues in our neighborhoods as opposed to “fixing” what is already broken like another poorly designed penal system as you propose.** “Fixing” perpetuates a revolving door policy which may be great for profit making but not quality of life issues, especially among disenfranchised families. “Social reform” not “penal reform” is the impetus for real change. **This project needs to be voted down and elected public officials need to be respectful of their constituents!**

COMMENTS:

Prisons do not belong in a residential community. Though I ~~will~~ live on the 23rd floor I will have have murders, rapists and pedofiles looking in my window. Where I reside with my wife and 7 year old child. I am not exaggerating I can see clearly individuals in the existing parking lot. I don't care that parking and traffic will be adversely affected. (i do) I just care more that my family will be negatively impacted by a major correctional institution across the street. Have you ever smelled Rikers Island on a hot summer week? I live in a community which is struggling to survive. We do not need more bail bonds, lawyers, and chain stores. Fix the system and Rikers. My son has a final message for you. my name is Nathan. I don't want to see a prison out the window.

September 29, 2018

Howard Fiedler
NYC Department of Correction
75-20 Astoria Boulevard, Suite 160
East Elmhurst, NY 11370

Dear Mr. Fiedler,

My husband and I attended your scoping meeting on Wednesday, September 26, 2018. Having listened to the city's presentation, **no, I am not in favor of the borough-based jail plan.** I especially disagree with its placement in Kew Gardens at 126-02 82nd Avenue.

Your representatives did not adequately address the impacts and the following concerns remain:

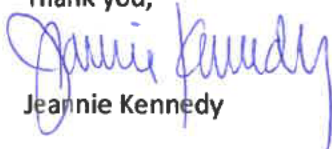

- Increased traffic on Union Turnpike and Queens Boulevard due to the influx of visitors, personnel, etc. with a facility that houses 1,500 detainees
- Increased congestion on city buses and subways due to the influx of visitors, personnel, etc. with a facility that houses 1,500 detainees
- Increased crime
 - When you consider that reducing the population held likely means that the most unlawful remain, what steps will be taken to reduce the violence and avoid it in the community?
 - Kew Gardens is currently dealing with the effects of the city's use of market-rate hotel rooms on Queens Boulevard to house homeless men. How will they mitigate a potential increase of crime surrounding the jail?
- Reduced property values
 - In the presentation you indicated property values would increase by 14%, a number that is dubious without any data on how the study was conducted. Has the study only looked at the social services they intend to include and not the 29-story jail above them?

Most egregious and lacking in the proposed plan is the city's inability to fully address how and why Riker's Island has become so incredibly violent. I agree prison reform is necessary and Riker's must be cleaned up and must operate differently. However, the team presenting on Wednesday night did not provide details on what policies and practices will change to avoid the situation escalating in the borough-based option. As a citizen of Queens for 23 years, there was no evidence provided that the Queens facility would be any different than Riker's.

Lastly, what is the city's intention for the land that once held Riker's Island when it is demolished? The borough-based plan appears to be a thinly-veiled plan to develop Riker's island for airport use or luxury housing with city views – at the expense of communities in Brooklyn, Queens, the Bronx and Manhattan.

I urge you to reconsider this plan and instead, rehabilitate Riker's for continued use. Fix the physical space if need be but you must address operations, policies and procedures first.

Thank you,

Jeannie Kennedy

COMMENTS:

Mayor Blasio

Since you have become a Mayor of New York City, the crimes have increased. During the period of Mayor Giuliani there were no crimes. Make the tuff law, and reduced the number of jails. Bring Soudi Ambias law here. Criminals are pampered here, jails are paradise of criminals. If you have no experience of criminals then you should not be here. Criminal families should go to Riker Island. Jails should not be in the cities. Take all jails near your backyard and some with Hillary Clinton and Obama. Drug addict and criminals place in the jail far away from the city. Take all jails to white house.

"Constantin Maragoudakis
45 Kew Gardens Rd # 4F
Kew Gardens, Ny 11415
Kostasm@verizon.net <mailto:Kostasm@verizon.net>

October 10 2018

To the Officials of the Department of Corrections of the City of New York

I voice my objection to the building of a new jail in Kew Gardens, Queens.
The impact on the community will be devastating.
The scale of the planned building and the number of people it will accommodate is extreme.
There is nothing beneficial in planting a new jailhouse in a residential area.
On the contrary, there are a lot of reasons not to.
Please consider these:

1) Commuting

As the terminal of 3 bus lines and a couple more passing through we are overcrowded.
Lines are very long most of the day.
Subways are very slow either direction. Almost double the normal time. Even when there's no work planned.
That's reality. An hour to and from Manhattan is common. Standing room only.
Professionals commuting find it rough. That turns them away from the area, Away from Queens in general.

2) Quality of services

Kew Gardens needs more commercial space. More and Better quality of shopping.
The only new restaurants opening in Kew Gardens are new editions of failed fast food chains.
All on Queens Boulevard.
There are no Super Markets for 10 long blocks. Then there is one. Then nothing.
On Queens Boulevard where the shops are there is not enough space for shops.
How can you accommodate more customers working at or visiting the Jail?
There are not enough delis and coffee shops.
There is no area for opening shops near the planned jail.

3) Quality of life

As a result of the above there will be more people on the streets. With no place to go to. And people worried about it.
That does not help a community.
We have a brand new Hotel/Apartment building next block that is rented to homeless for allegedly 5,000

a month.

Cars outside do not match the place. Or the neighborhood.

The permanent homeless population is growing though. They are near the subway and government buildings 24/7.

4) Property values and Queens status

Kew Gardens has the potential of being the most sought after part of Queens. And NYC.

Proximity to Corona park, Forest park, highways and trains, makes it very desirable.

It is still not overcrowded and maintains a family oriented atmosphere. Not many places in NYC can claim that.

How can a 1500 bed jail help to maintain that? What is the benefit to the community?

Furthermore, what is the effect on property values on a vastly single housing community?

5) Where is the money coming from?

One big question is what is to become of Riker's island?

In the long run is it to be sold for condos and development?

Who pays for 29 stories 1500000 Sq. feet facilities?

Why are not the new jails build on Rikers?

Why do we need new Jails and not fix Rikers?

The sort time allotted for planning such a major intrusion in a community is bound to have devastating effects.

Please reconsider.

Respectfully

Constantin Maragoudakis

"

Moshe Marcus

mmz.marcus@gmail.com

"Dear Mr. Fiedler,

As a current homeowner in Kew Gardens and a member of the KGCA, I am writing you with the utmost concern regarding the proposed jail to accommodate the relocation of the Rikers complex. It is simply unconscionable that the City would locate a jail complex within walking distance of a neighborhood filled with young families and children. All of a sudden, I will now have to worry about letting my children walk or bike around the neighborhood, especially in the evening time (when they return from school). My wife and I are paying in excess of

10,000 a year in property taxes, on a home we bought less than three years ago. Contrary to the patent falsehoods averred in support of the jail, I did not move into Kew Gardens so that I might find a job at a local jail, nor would I buy a home that is within walking distance to one; my property value will absolutely take a significant hit.

Simply put, the whole project is either absurdly misguided at best, or at worst a cynical ploy to develop the land on the Rikers complex:

- 1) There is a reason Rikers Island was initially chosen as the site for the City's jails; violent offenders do not belong within urban areas, period. That is the main reason federal and state prisons are in rural areas. It is simply unsafe for the local citizens.
- 2) The humanitarian problems in Rikers are real; the City should fix them. The notion that the City is incapable of running a jail complex in one place, but magically will be able to do so in another, is simply laughable on its face. The residents of Kew Gardens should not be made to suffer for the City's incompetence and corruption.
- 3) The Kew Gardens and Forest Hills neighborhoods are already suffering enough from the City's misguided attempts to address the plight of homelessness in NYC. Home break-ins, loiterers, unsanitary piles of garbage and human excrement on some streets and underground walk-ways are a blight on the neighborhood. Enough is enough.

There is no way anybody in their right mind would support a local neighborhood jail in Kew Gardens. This is not upstate NY; this is primarily a middle-class community where most residents have a stable source of employment, and are not counting on a jail complex to provide them jobs as wardens, C.O.'s, and custodial staff. Please ask yourself honestly, would you like this jail complex to be built a ten minute walk from your family home? What would the residents of the Mayor's neighborhood in Park Slope say about a proposed jail site right nearby? Do you think it would become another selling point for a trendy and family-friendly neighborhood, and recruit young families because it will be ""a source of employment""? If the Mayor feels so strongly about this, he should propose the jail relocate to Park Slope, preferably ten minutes from his residence. I'm sure it would sail right through.

It is clear as daylight that the City plans on ramming this through against the wishes of Kew Gardens residents. I add my voice in strenuous and vociferous opposition to these malevolent plans.

Sincerely,
Michael Marcus

115-25 Curzon Road

"

Mari/Marty R

mari.r.marty@gmail.com

"To whom it may concern Sir or Madam,

This plan is greatly flawed, as there is no firm date to close rikers. As the locations cause many issues, in particular the proposed location in Mott Haven.

This location has only one mode of public transportation, the local 6. This train is often overcrowded, the temperature controls have issues year round. The stations near the location, only have one entrance and exit, no wheelchair access, toll booth clerk s only on the Manhattan bound side. There are no buses that go to that area.

The space intended as a turn in lane will cause, traffic to back up for exists 48-50. As well as traffic heading for the Bruckner on ramp.

The area indicated as industrial, has had private homes for over 9 decades. Check the city records.

Two of the factories are elementary schools. There are 3 elementary schools, 1 high school, and 3 daycares within 3 blocks of the proposed location.

We have a law that limits the distance between adult stores and schools. However we want to place jails, near our children. What message are we sending to NYC children.

The psychological impact this will have for generations. This jail has no place in our neighborhood.

"

Veevee Martinez

veevee@blackandpink.org

"Howard Fiedler

I'm a resident of the Bronx. I'm commenting against the building of new jails in the Boroughs. My reason for opposing the building of these jails is a morality argument.

As a member of the minority communities, my concern of the jails built is that it will only enhance the school to prison pipeline. As we all know children are easily influenced by their environment, also the community businesses and standards depend on the neighborhood's good reputation. In building jails in minority communities will only add to the gentrification crisis already dismembering the communities financial infrastructure, which will lead to the rise of crimes and destructions of families.

Having a prison in your community paints a bias picture that this community is only good for the harboring of criminals. Having jails so close to home will bring embarrassment to the children whose families members are in that jail. It will lead to the bullying of those children and to mental, emotional and at times physical agony.

Seeing prisons in their communities will send a message to the children that that is all they're destined for. That anybody from this community only deserves to go to jail. Therefore, the blame for the influence of crime would belong to the officials allowing these jails who only send the message of desertion and loss of hope of the said community, in return the influence of the school to prison pipeline.

Instead of jails, why not utilize those resources to the betterment of the communities instead of destroying the positive future of the communities. I do believe that we can all agree that public schools are not all they should be. The implementation of community resources for the betterment of life, as in tutoring, handicap friendly recreational and public spaces, and so forth.

In conclusion, we should be able to agree that the building of these jails in these communities populated majorly by minorities, only proves the government's bias towards the non-white population and its abandonment of the minority communities by purposely building the school to prison pipeline, maybe not a physical structure, but definitely a very real one nonetheless. If your priorities lie with the community you will understand the negative impact these jails will have in them. I beg you to think of the people affected by these actions and to not proceed with this plan.

"

Juan Martinez

info@email.actionnetwork.org

"

Howard Fiedler,

I do not approve any part of the Draft Scope of Work. After reviewing the plan, it is clear that it would cause significant environmental damage and health hazards on the sites where it is proposed. These new jails will not solve the crux of the issue: that most people held on Rikers are detained because they are too poor to pay bail. Over 75

are eventually released because they are not found guilty of crime. Mr. Fiedler, I am asking you to take a moral stance against further working on the architecture of this building. You have the power to halt its construction and encourage the city to instead invest in solutions to incarceration which include restorative justice. Incarceration does not have to be the only way. Please, reject this plan now.

Subject: Proposed Kew Gardens Jail Comment

Dear Sir/Madam,

As residents of Kew Gardens, my family and I were deeply disturbed to learn of the proposal to build a prison in Kew Gardens to take in prisoners from the proposed closure of Riker's Island. The proposed facility is within walking distance of our home, so overnight we have suddenly seen a possible downturn in the safety and desirability of our neighborhood. We are especially concerned for the safety of our child. Although Council Member Koslowitz claimed that this facility was ideal because the old jail already exists, the Mayor's recent proposal states that a new building will have to be constructed costing the taxpayers money when a facility already exists on Riker's Island that is not near homes and schools.

We ask you to help ensure that this fixture not become a part of our neighborhood. To us, Kew Gardens represents families, community, an art fair, a film festival, parks, and a new bookstore. It does not represent prisons.

Sincerely,

Glenn Mathes

"Howard Judd Fiedler AIA.
Director of Design Unit, NYC Department of Correction
75-20 Astoria Blvd Ste 160,
East Elmhurst, NY 11370

Dear Mr. Fiedler,

I am writing to you to express my concerns regarding the proposed jail in Kew Gardens.

Kew Gardens is a small community with approximately 20000 household. The proposed facility will hold 1500 inmates. In addition, there will be many others coming to the jail daily, including visitors, jail employees, police, and delivery to name a few. This will overrun the small residential community. The main concerns I have for this proposed jail is the safety and overcrowding of the adjacent communities.

First, our streets are already crowed with Queens Boulevard, Jacky Robinson Parkway, Grand Central Parkway, and Van Wick Expressway. Many aggressive drivers already are going through small residential streets as ""short-cut"". The streets will become even more dangerous for pedestrians and drivers as the traffic increases due to this very large proposed jail. The traffic on Queens Boulevard and Union Turnpike are already very heavy. Again, this jail complex will exasperate the traffic congestion and hazards to the pedestrians in the area.

Second, our public transportation system is already overcrowded in the area. Subways and busses are packed. LIRR had to add an extension to the platform due to overcrowding in both Kew Gardens and Forest Hills. Again, jail complex in this size will only increase the problems with overcrowded public transportation in the area.

Third, there are schools very close to the proposed jail complex. Children should be kept away from a very large scale jail, holding 1500 inmates. We need to make sure streets remain safe for them to walk to school. As seen in the areas near Rikers, people affiliated to gangs and other criminal records tend to hover near jail facilities. That is absolutely not acceptable in a residential neighborhoods where there are families with children and elderly live. The city has not provided any specific plans to for safety. Without any substantial plans to maintain the safety of the neighborhood, the safety of the neighborhood will be compromised.

Four, the city maintains that the facility will bring economic boom to the neighborhood. The proposed facility will be very undesirable for the residential real estate value. This will result in decreased property values for the homeowners in the area. I am not sure how that can be seen as an economic boom. It is opposite of that for many middle class people who worked to buy a real estate in the area.

Overall, the proposed jail facility is not a sustainable in Kew Gardens without major setback to the community. Such setbacks include safety, overcrowding, traffic and public transportation problems, and loss economic gain for local residents. The facilities should be placed in a non-

residential areas where safety is not going to be an issue. The problems in the Rikers Island will not disappear just because they relocated the jails in four boroughs. The same people reside and work in the facilities. The fundamental problems should be taken care of, instead of spreading the problems all over the city.

Thank you.

Sincerely,

Ryoko Mathes

Lourdes Mejia-Rios

lmmrios5@gmail.com

"Although I appreciate this administration's concern with conditions in the Rikers Island jails, I do not agree that building four new jails in our neighborhoods is the answer.

There is ample room in the current location to develop the type of "humane" facility being presented. Major corporations all over New York City are re-inventing office space using the footprint they are currently in. The argument that Rikers's reputation makes it impossible to reinvent it in the space where it is today rings patently false. Times Squares remains exactly where it's always been, its look, feel and reputation completely changed. Our bridges, tunnels and neighborhood have been renamed. Let's do the same with Rikers: develop it anew and rename it. But, most importantly, train the personnel who work there so that they develop better ways to accomplish their job and provide them with the support they need.

Kew Gardens with its lovely, tree-lined streets is a community of families young and old. There are at least four schools within blocks of the proposed 29-story, 1,510-bed jail. This is not a transient neighborhood. People have lived here for decades and it's not unusual to hear neighbors inquiring about each other's children and parents. We have independently owned shops like a local bagel store that has been around for over 20 years, a bakery, an ale house and a quaint movie theatre.

It seems that the existence of the court house has given this administration license to overcrowd this area further without any regard to the impact to the community. An additional parking facility will not benefit us. Quite the contrary. As a community we already contend with large amounts of people who need access to the courthouse, the law firms and the bail bond facilities. It was even deemed a good idea to add a second homeless shelter to the area. This massive jail facility will only add to the traffic, congestion, noise and dirt. As things stand today, cars are regularly double parked along Queens Boulevard. This will make the traffic even worse. Persons who don't live here and don't care throw garbage on our streets. Mentally ill homeless people act aggressively as we're trying to walk home from the subway.

Besides the parking facility, at no point has this community been told what the city plans to do to alleviate these issues or the new ones that will be created. What assessments have been done to show that our streets can take the additional car and foot traffic, that our infrastructure can support a facility of this magnitude? None that we've seen. What is planned for the street level of this facility? Will chain stores be brought in that will negatively impact our mom-and-pop shops?

The other thing no one has been told is what is going to happen to the land that Rikers is on today. It seems like our neighborhoods are being sold to the highest bidder so that more condominiums can be built for foreign investors. Those people should never have to see a jail in their community even if they are only here for a week or so a year. However, those of us who live, work and pay taxes here, and who contribute to one of the few middle-class enclaves left in this city where gentrification is the name of the game are left saddled with a jail and all that comes with it.

As a born and bred New Yorker who votes and pays taxes, I ask that this plan be stopped. It's not how I want

10.6 billion of my tax dollars spent. It's not what I want to see done to my neighborhood.

Regards,

Lourdes Mejia-Rios

Subject: Re: Prison Rikers Reorg

Hello:

As a native Brooklyn resident, we are very concerned about having Riker's inmates relocated to our neighborhood. Brooklyn is undergoing a metamorphosis which is a paradox, revitalization in low income areas yet gentrification only benefitting real estate developers and affluent residents. We now have nearly the legalization of marijuana, increased crime and no hospital thanks to Gov Cuomo and DeBlasio. The booming population has NYU Langone Cobble ER, a dangerous and unethical ER.

Cobble Hill and neighboring areas have lost the safety of its once intimate community. Thanks to bi-partisan politics, we now have an overpriced, dense neighborhood with ongoing construction and malfeasance of real estate developers pushing out rent stabilized and control tenants for luxury condos. The last straw is having a prison in Brooklyn with hardened criminals.

Rikers is the appropriate location to punish criminals; Brooklyn should not be the sanctuary location to house dangerous criminals with inmates' "families" visiting the Brooklyn prison- now able to smoke pot openly polluting our streets with marijuana. Carroll Park has minority teens from other areas smoking pot in the morning. We don't need inmates family's crowding our streets possibly increasing more crime.

Liberals are spending too much time on legalizing drugs, upholding black lives matter when all lives matter including black lives, reducing police stop and frisk for the right reasons, introducing injection site stations for heroin and focusing on mass incarceration.

In the 80-90s, the Brooklyn detention had escaped prisoners. The city shall be held legally responsible should Riker's inmates escape and harm residents. Brooklyn does not need to be burdened with more construction and higher taxes to support criminals.

Plum Island is the perfect location for Riker criminals. Should the city build a prison, it will lose residents because we will fight the city and move should the prison be built. We are tired of the ridiculous Liberals wanting to remove the Christopher Columbus Statue, yet have no problem welcoming hardened criminals/thieves/rapists/sexual predators into our neighborhood.

We don't welcome a prison of this magnitude 1.4M sq feet; once again-we will group together and fight the city should a prison be built. Keep criminals in Riker's island where they belong. Each day on the subway to work, I fear crime is increasing with pan handlers aggressively demanding money. We don't need more criminals in Brooklyn.

I was a Democrat but have left the party over these issues. Please don't build Riker's in Brooklyn. Ultimately, high tax paying citizens will leave New York and we will stop supporting NYC.

Thank you,

Concerned Resident

John Miller

lownoon.john@gmail.com

"Dear Howard Just Fiedler,

Here is a copy of the statement I presented on October 25 at the scoping meeting for the 80 Centre Street jail:

I am here tonight to speak out against Mayor de Blasio's nightmare plan to build a gargantuan, 40-storey prison at 80 Centre Street. This plan has nothing to do with prison reform and everything to do with a land grab for Riker's Island. DeBlasio deliberately pushed this process through in the dead of August without necessary input from residents of our neighborhood, most of whom strongly oppose it. We demand that the mayor and Margaret Chin withdraw the scope and start listening to our community.

Why do we need to build a new prison in our neighborhood? Proponents of the prison, those who want to silence us, those who have taken away our signs before, have called our refusal to accept this ridiculous proposal a NIMBY syndrome. NIMBY means "not in my back yard." We already have a prison in our front yard. And we have two in our back yard. A new prison would take us up to four altogether. Our back yard would be nothing but prisons and police checkpoints. We the people of Chinatown are not perpetrators of NIMBY-ism; we are the victims of it. We refuse to bear the undue burden of an unfair process.

DeBlasio and Margaret Chin have sold out our community to developers and real estate interests. If Margaret Chin refuses to oppose this prison unequivocally, we need to replace her with someone who will. We demand democracy. No new jails in Chinatown!

Sincerely,

John Miller

"

Christopher Milson

CMilson@halstead.com

"Dear Mr: Fiedler:

I object most strongly to plans to construct a prison on Union Tpke in Kew Gardens.

There is insufficient infrastructure to support an influx of people to this neighborhood.

Trains ion E and F are already crowded and standing room only at park times

Q46 Q44 and other buses on Queens Blvd are already jammed.

Parking is already a total nightmare in this entire neighborhood, and into Forest Hills. I cannot find parking at many time of the day. Imagine how this neighborhood will become with even more traffic.

I don't want a prison in this largely residential neighborhood. As it is, the city cannot keep the streets clean, the sidewalks in good repair, and generally the area is not well looked after.

Imagine if there are thousands of additional people transiting through the neighborhood. It will be a disaster.

There are plenty of neighborhoods in Queens that could benefit from a prison. Kew Gardens is not one of them.

I object most strongly to this proposal.

"Respected members,

Hope you are doing well. I'm a concerned resident of the Kew Gardens neighborhood and urge you to please not build a prison in our area. If moving the prisoners in and out of courts is that difficult, consider taking the courts to Rikers. Our neighborhood is already crippled with falling infrastructure and this prison will help no one in our community, no economy will be lifted here. We are law abiding citizens with honest earnings and we deserve to live in safe neighborhoods with peace of mind. I understand that the Mayor cares for homeless and prisoners but that doesn't mean that you all stop caring for the middle class. We are the ones who pay a lot of taxes and get little benefits and we elect officials to protect us not threaten our way of living. There's already a Homeless Shelter Hotel in our area and the homeless families were put in there without our consent.

Again, no meetings were held when you came up with this entire prison architecture and we weren't even considered before you finalized this project plan. What kind of democracy is this? I ask you to put yourselves in our shoes and think how would you feel if this was imposed on you. The money you will put in this prison can be used to transfer courts closer to prisons or reforming Rikers. I know you understand very well that the Judicial System needs to change not the location of the prison.

I ask you all to please consider the horrible consequences of what you are about to do to our community, economy, and our area. I hope you will do the right thing.

Thank you!

Sincerely,
A very concerned resident

Subject: 80 Centre Street Courthouse Jail

Howard Fiedler

These are my objections to the proposed courthouse jail:

[1- 80 Centre Street](#) and all Municipal Buildings sit atop of Collect Pond. Years ago this was the water source for Manhattan. It was 48 acres and at some points 60 feet deep.

In time it was filled in but the springs that fed the pond still exist and are still active.

A New York Times article states that [60 Centre Street](#) has basement pumps as what is called the Pearl River is flowing. In fact when the Federal Courthouse was built a bridge was spanned across the river that flows beneath. Unfortunately Collect Pond and Little Connect Pond and a canal are directly beneath 80 Centre. The soil is called black sand and is a mixture of sand and muck. New construction would have to go very deep into the bedrock as the soil cannot support the building. Unfortunately Pile Driving which was forbidden at the [500 Pearl Street](#) is the only way to anchor the new building. I believe there is legal precedent as Chatham Towers prevailed in the courts. Pile Driving might undoubtedly have detriment effects on surrounding building foundations. I don't believe the City would build an unsafe building but it's the unknown and future effects that concern me. If the flowing Pearl River is disturbed what new route will it take. Chatham Towers has seen ground movement that has changed the level of the newly constructed Courthouse guard shelter.

You might remember that Gold and Spruce Streets had ground water issues soon after the Federal Courthouse was completed. There were also sinking ground issues when James Madison Park was built. Water seeks its own level and flow-where will the river flow next if the new building disrupts its current path.

2- The new building will have a 125 car garage built beneath it. But is this sufficient to park all the employees working in the jail. So where will the overflow park-on our streets with placard in there windshields. The community is already inundated by illegal parking we don't need more.

3- Public transportation is already at full capacity. How will it accommodate the increases in visitors to the jail. We live with the worst bus line in NYC. The 103 Bus is never on time. There is a 45 minute wait in the afternoon and the electronic arrival sign on the Park Row never worked. The closing of Hogan Place and Baxter street will put an over capacity of vehicles on Worth Street. Prisoners will now be coming from upstate prisons to the new jail.

4- I attended the two NYC information meetings and find them fraudulent and deceptive. Although many renderings of the new building were presented none were of the buildings height or the shadow it would cast on Columbus Park. The 40 story jail will block [afternoon sun](#) and during the winter there would be no [afternoon sun](#) at all. There would be detrimental effects on the trees and plantings. No doubt the children would suffer from colder winter temperatures. No wonder the city did not present the elevations.

5- Demolition of the existing [80 Centre Street](#) Complex would release asbestos, lead and other pollutants into the atmosphere blanketing Columbus Park and the many residential building in Chinatown. There would be increased traffic from construction vehicles on Worth Street already suffering from the much delayed water pipe fiasco.

6- An alternate Site. There is poorly used extensive property owned by NYC on Pike Street running from Henry to Madison Streets- a whole city block. This NYC Department of Water one story building just parks cars and trucks. There is little or no traffic. The M-15 and Select Bus stop there. It requires no zoning changes and already has the monstrous Path Mark tower nearby. The Bronx Jail proposal is 2 miles from the courts. A new building here can house new courts.

"To: Howard Judd Fiedler A1A

Director of Design Unit

NYC Department of Correction

Dear Sir:

We support your plan to replace an unused jail in Kew Gardens - a mile from our house - with a new one,

as part of the Rikers Island closure proposal.

Parking is a real problem in this area, so any parking spaces removed to build the new jail should definitely

be replaced on-site.

Security is also paramount.

Our support accepts as true the City's assertion that the purpose of this decentralized approach is to

house and rehabilitate inmates who live in Queens so that their families can reach them more easily.

We do not want this facility to become the host site for the other boroughs' jail populations.

Likewise, we are taking at face value the City's representation that such a plan will save all NYC taxpayers money in the not-so-long run.

If those issues are addressed satisfactorily to our elected representatives, your plan makes good sense to us.

Sincerely,

Elizabeth V. and Thomas J. Mooney

rosinamorales518@gmail.com

"Dear Mr Fiedler:

I'm a concerned resident of Jackson Heights, NY 11372, and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails.

Jails should not be in such a close proximity to residential areas or near a school. Not only are there schools in walking distance, most kids in Queens commute alone, without an adult. There are also teen volunteers that work at the court house. No parent would feel comfortable having their child walk past a jail every day.

Queens is also a very congested area. The number of visitors on a daily basis will add to congestion on already overcrowded subways and buses, as well as adding unnecessary additional traffic in the area. The city capped the number of ride share vehicles that are allowed, this jail will only increase the number of vehicles on the road and add to the riders on the buses and trains.

Please consider relocating to a more remote location, not near a residential area or near schools.

Thank you for your time.

Regards,
Rosina Morales

RE: New York City Borough-Based Jail System Environmental Assessment Statements (EAS)
CEQR No.: 18DOC001Y

Dear Mr. Fiedler,

I am writing to express my opposition to the proposed Borough-Based Jail System plan. I write to you as a lifelong New Yorker, current resident of Brooklyn Community District 2 (where the proposed 275 Atlantic Avenue expansion site is located), and an urban planner. I oppose building any new jails, and I insist on closing Rikers now. The City has failed to demonstrate that it has adequately considered alternatives to the construction of new and expanded jail facilities, as described in "[Smaller, Safer, Fairer: A Roadmap to Closing Rikers Island](#)" and the Environmental Assessment Statement, that meet its stated goal to close the jail on Rikers Island and "safely reduce" the jail population.

First, as an urban planner, I find that the Department of Correction has failed to conduct sufficient environmental review by neglecting to publicly disclose and evaluate alternative scenarios, including non-construction alternatives. The public has not been provided adequate information about the potential impacts of a scenario, for instance, in which Rikers is closed and no new beds are added to the jail system. The public does not know how the city arrived at its 10-year timeframe for the plan nor to what extent it considered and evaluated the potential impacts over a different time period. It is not possible to conduct a meaningful public environmental review process without an adequate assessment of alternatives. The minimum City Environmental Quality Review requirements are not a sufficient standard for effective policy-making and city planning.

Absent thorough public analysis of alternatives, the City failed to demonstrate that its proposed plan will meet its stated purpose to create a smaller jail system, with the goal "to truly end the harms of mass incarceration." (*Smaller, Safer, Fairer*, p. 4) In particular:

- **The plan neglects an effective strategy for reducing the jail population: preventing arrests.** 55% of the City's pretrial jail admissions population is being incarcerated for misdemeanors (or, 35% of the total jail admissions) (*Smaller, Safer, Fairer*, p. 50). The City offers no evidence that policing low-level offenses promotes public safety. In fact, the plan notes the coinciding decreases in "major crime" and the daily jail population (*Smaller, Safer, Fairer*, p.

12). On the other hand, there is extensive evidence¹ that policing and incarceration perpetuate poverty and compound its risks, and has demonstrable negative effects on the human psyche and health of communities. If the City's goal is indeed to "operate the smallest jail system possible without compromising public safety," it must start by ending the policing of Black and Latinx existence.

- **Proposed reforms are slow and modest in scope.** The City's own presentation of the facts justifies ending Broken Windows policing. Instead, the plan emphasizes costly and time-intensive reforms, such as flight-risk training and assessment tools for judges, which expand the reach of the criminal justice system all while under the banner of shrinking it. While other states like California and municipalities like Washington, D.C. eliminated cash bail altogether, the DOC's plan tepidly calls for "making it easier to pay bail." (*Smaller, Safer, Fairer*, p. 20).

- **The plan lacks clear goals for reductions in the *total annual jail admissions*, not just the daily jail population.** The plan's goals are tied to reduction of the daily jail population (or, the number of beds). Yet, as the DOC clarifies, 1 bed can represent between 1 and 365 human beings incarcerated throughout the year. By focusing on reductions in the daily jail population, in tandem with the goal to reduce sentences, the City could potentially meet its publicly-stated goals while in fact increasing jail admissions, particularly among people charged with misdemeanors. I do not support any plan to add beds to the jail system, which is plainly counter to goals of reducing the number of people in jail; any plan must include clear goals to which the public can hold the City accountable.

Finally, expansion of jails is a terrible abuse of precious public land and dollars; New York City must divest from the carceral state and invest in communities. What New York City residents need is safe, decent housing that doesn't rent-burden them, and access to public transit, health and social services, and education. A supportive housing complex on 275 Atlantic Avenue, as one potential alternative, could permanently house low-income people at a lower cost than jailing them, and reduce jail recidivism. The City is disposing of city-owned land that is currently being used for community gardens for the development of income-targeted housing; how did it select those properties over these sites now slated for jail expansion? Our public officials are stewards of public health, safety, and welfare, but have failed to demonstrate how the proposed borough-based jail expansion plan advances that mandate.

Sincerely,

Sylvia Morse
Brooklyn, NY 11201

¹ Scholars and non-partisan public policy organizations who have researched and documented the negative social, economic, psychological impacts of mass policing and incarceration include but are far from limited to [Michelle Alexander](#), [Angela Davis](#), [Ruth Wilson Gilmore](#), [Prison Policy Initiative](#), the [John D. and Catherine T. MacArthur Foundation](#), [Justin Feldman](#), and [Alex S. Vitale](#).

Ryuji Mukae

rmukae@gmail.com

"Hi Howard,

Dr. Ryuji MUKAE here.

In my capacity of a resident of Kew Gardens, Queens, I will state my opinion below, regarding the Draft Scope of Work.

The planned construction of a new jail in Kew Gardens is totally unacceptable for the following reason:

For starters, we, the residents of Kew Gardens, have been paying city tax as any good citizens are supposed to do. No issue about that. It is not an issue either that a part of that our tax money has been used for the maintenance of Rikers Island. The issue is that Rikers Island has been ranked as one of the ten worst correctional facilities in the United States, according to Mother Jones Magazine (May 2013). In other words, our tax money for Rikers Island has actually been wasted, not utilized effectively and efficiently.

Secondly, we were dismayed that a mid-size hotel was built in our neighborhood ("Comfort Inn Kew Gardens:"12332 82nd Ave., Kew Gardens), worsening the parking/traffic conditions in our neighborhood, which is residential. But what was shocking to us was that we found out from a local news report that the hotel had turned into a shelter for the homeless without our knowledge! This conversion was done with no consultation with the residents of Kew Gardens and the surrounding areas. Since the conversion, we have witnessed loitering and trashing, and sleeping overnight on the stairs of the vacant building adjacent to the hotel. This has demonstrably deteriorated the quality of life in Kew Gardens.

Finally, as if the above was not enough, the city is now imposing upon the residents of Kew Gardens the construction of a huge new jail in our neighborhood! A person of modicum intelligence can tell you that the construction of a jail in the neighborhood would have a negative impact on the area in many ways. It is beyond my comprehension that the city has claimed that adding a jail in the neighborhood would financially and socially benefit the neighborhood in question.

To sum up, we the residents of Kew Gardens have been asked by the city to shoulder a triple burden of social welfare/law-enforcement services. This burden is disproportionate and unfair, thus violating the Fairness Doctrine of democratic governance. Therefore, I am vehemently opposed to the jail construction in Kew Gardens. May I kindly suggest that the city upgrade and improve upon the existing Rikers Island facilities so that they may be more efficient and more humane in rehabilitating inmates and reintegrating them into the community?

Thank you.

Best,

Ryuji MUKAE, Ph. D.
Kew Gardens, NY

"

R S

rmulak@hotmail.com

"

Dear Howard Fiedler,

The proposed Jail in Kew Gardens SHOULD NOT AND CAN NOT BE BUILT in condensed primarily residential communities. The Kew Gardens is one of the oldest and historic communities that will be destroyed with construction of the Mega-jail which would be a mini-city within a city. I am certain that you have received many objections to the mayors plan to build a jail in every borough and I outlined some that might be new or same concerns.

1. The cost to build mega-jail will exceed the proposed

10B estimate as you would need to spend another

10 to

20B on the transportation, utilities, security infrastructures to support mega-jail and all the traffic and visitors that will come with it. The tax payers should not be forced to pay for such ill and poor conceived project. The mayor's office needs to do study to redevelop existing Rikers jails at the fraction of the cost. This option can't be ignored.

2. Investing 5MM for each bed (based on realistic cost of the project + infrastructure expansion which will be around

30B) is not financially beneficial for anyone. You can't expect the tax payers to pay for each bed for the price of the mansion. There are better ways to spend tax payers money.

3. In the event of major incident such as plane/helicopter flying into the jail (we all have seen it happened) or anything else that might have a significant impact on the building infrastructure, the prisoners will have to be evacuated to outside which might result in easy escape during panic as Kew Gardens surrounded by all major highways and known for quick escape routes.

4. Many of the inmates at Rikers affiliated with gangs and influx of visitors could potentially include gang members which will cause significant security concerns for surrounding neighborhoods. The local precinct 102 is already overwhelmed and not equipped or staffed to deal with more crime.

5. The quality of life will be severely damaged.

6. The values of homes will plummet and real estate taxes which city depends on will fall.

7. KW already dealing with Unbearable traffic where all local roads and near by highways are heavily congested during rush hours. Brining more than few thousand people daily to KW will simply devastate the area. More visitors, buses with inmates and tracks that will be servicing Jail will simply bring the traffic to a stand still.

8. The kids that go to school within close proximity to proposed jail will be possibly exposed to violence that prison will bring with it. Would you want to jail built next to your

house and your kids exposed to horrific images that jail will bring with it? I think NOT. The kids will be psychologically damaged.

9. The mega construction jail will trigger lawsuits against the city for lost home values and quality of life. The damages will be in be hundreds of millions of dollars. The buyers already staying away from KW.

10. The current transportation infrastructure on the bring of collapse in Kew Gardens as it has not been upgraded for more 70 years. F and E trains at union turnpike are constantly over crowded and break diwn regularly. Not enough buses to service existing volume of commuters. With new jail there would be the need to expand or build new train lines, more buses, etc. This will be unrealistic task as it would take billions and decades to accomplish. The prison cant be built without investing into transportation and utilities infrustructure first.

11. Building jails in condensed residential areas will not solve the problem which currently exists in correctional system. You will simply transfer many problems from one place and spread it across all boroughs. You will make NY as Rikers island and will drive economy and tourism into the ground. Essentially killing NY. What do you think will happen when 4 jails are not enough? You will decide to build more and more and essentially there will be nothing left out of NY except for jails as people will fled and relocate to other states.

12. The correctional system needs to change and it has to start at Rikers not at our neighborhoods. Rebuild Rickers jails and save billions doing so and without destroying the city.

13. THERE ARE NO ECONOMICAL OR ANY OTHER BENEFITS FOR RESIDENTS OF KEW GARDENS, FOREST HILLS OR BRIARWOOD for building the mega jail. IT WILL ONLY BRING DESTRUCTION AND CHAOS .

PLEASE CONSIDER ALL OPTIONS AND REJECT MAYORS PLAN TO BUILD MEGA JAIL IN KEW GARDENS AND IN OTHER BOROUGHES. YOU CANT RAISE KIDS AND GROW COMMUNITY NEXT TO JAIL. PLEASE DONT ALLOW NEW YORK TO BE TURNED INTO ONE MEGA JAIL.

Regards

Rudy.

Subject: NO JAIL in Kew Gardens

Dear City Officials,

The proposed Jail in Kew Gardens SHOULD NOT AND CAN NOT BE BUILT in condensed primarily residential communities. The Kew Gardens is one of the oldest and historic communities that will be destroyed with construction of the Mega-jail which would be a mini-city within a city. I am certain that you have received many objections to the mayors plan to build a jail in every borough and I outlined some that might be new or same concerns.

1. The cost to build mega-jail will exceed the proposed

10B estimate as you would need to spend another

10 to

20B on the transportation, utilities, security infrastructures to support mega-jail and all the traffic and visitors that will come with it. The tax payers should not be forced to pay for such ill and poor conceived project.

2. You plan to invest 3MM to 5MM for each bed which is the cost of a mansion. This is insane and illegal. There are better ways to spend tax payers money.

3. In the event of major incident such as plane/helicopter flying into the jail (we all have seen it happened) or anything else that might have a significant impact on the building infrastructure, the prisoners will have to be evacuated to outside which might result in easy escape during panic as Kew Gardens surrounded by all major highways and known for quick escape routes.

4. Many of the inmates at Rikers affiliated with gangs and influx of visitors could potentially include gang members which will cause significant security concerns for surrounding

neighborhoods. The local precinct 102 is already overwhelmed and not equipped or staffed to deal with more crime.

5. The quality of life will be severely damaged.

6. The values of homes will plummet and real estate taxes which city depends on will fall.

7. KW already dealing with Unbearable traffic where all local roads and near by highways are heavily congested during rush hours. Brining more than few thousand people daily to KW will simply devastate the area. More visitors, buses with inmates and tracks that will be servicing Jail will simply bring the traffic to a stand still.

8. The kids that go to school within close proximity to proposed jail will be possibly exposed to violence that prison will bring with it. Would you want to jail built next to your house and your kids exposed to horrific images that jail will bring with it? I think NOT. The kids will be psychologically damaged.

9. The mega construction jail will trigger lawsuits against the city for lost home values and quality of life. The damages will be in be hundreds of millions of dollars. The buyers already staying away from KW.

10. The current transportation infrastructure on the bring of collapse in Kew Gardens as it has not been upgraded for more 70 years. F and E trains at union turnpike are constantly over crowded and break diwn regularly. Not enough buses to service existing volume of commuters. With new jail there would be the need to expand or build new train lines, more buses, etc. This will be unrealstic task as it would take billions and decades to accomplish. The prison cant be built without investing into transportation and utilities infrustructure first.

"

Dear Howard Fiedler,

I am a resident of Queens. I am angry and dismayed to learn of the proposal to build 4 new jails in NYC, including in my borough. This is an unacceptable use of my tax dollars. These jails are unnecessary, expensive and harmful to so many communities.

NYC is supposed to be a sanctuary city. Jails are not sanctuaries. They are breeding grounds for trauma, abuse, violence and the revolving door for poor Black and Latino people to be criminalized, imprisoned and impoverished. With absolutely no impact on addressing and prevent crimes from actually happening.

No new jails in NYC! Not now. Not next year. Not ever!

Sincerely,
Roksana Mun

"

Natalie Naculich

nnaculich@gmail.com

"Good evening:

In regards to the borough-based jails proposal,

I fully support the immediate closing of the jails on Rikers Island. I also strongly oppose the opening of any new jails in New York City. Jail does not keep people safe or solve the problems we face in New York.

The City of New York needs to:

*

End cash bail and pre-trial detention.

*

Invest in community resources. Invest in public schools and actual affordable housing.

*

End broken windows policing and all practices which the NYPD uses to harass communities of color.

*

Decriminalize poverty, homelessness, mental illness, and substance use.

The current proposal from the city demonstrates that the Mayor and his officials are committed to racist over-policing and to caging people of color. I am staunchly against the city proposal to open new jails. We can close Rikers without opening new jails.

Sincerely,

Natalie Naculich, Washington Heights

"

Rene Naider

renenaider@rocketmail.com

"Dear Mr Fiedler, my name is Rene, I'm a concerned resident of Kew Gardens, NY 11415, and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails.

I strongly oppose the construction of this edifice.

The Mayor by not informing the community as they must, creates a net of lies that will greatly impact the community. He's acting like Donald Trump and his crew, and this action or series of actions will have consequences, we will vote him out during the next election.

On the other hand, it causes dismay again that the people who 'govern' us are lazy, they do not want to think out of the box or do a thorough research; all they want to do is to rush their agenda, just exactly as the Republicans did by imposing Kavanaugh on the Supreme Court.

If this is the way of proceeding, I am glad to let you know that our communities are ready to fight this outrageous imposition, the same way we have fought Donald Trump.

Why Mr. Di Blasio will not consider Park Slope and its neighboring areas as a good prospect for this mega jail? Prospect park is a big park!

Extremely concerning is that this mega jail is going to be so close to a couple of elementary schools and a private middle school? Are they serious??

It's always the same, as long it is not their children's schools or their neighborhood, they do not care.

By the way, this is precisely a good way of dehumanizing people's children, people's communities; as long as ""it's US"", let THEM have it.

Thank you Mr. Di Blasio!

The city has not considered yet any bad 'side-effect' brought on by this project in terms of: public transportation like MTA failing trains and buses, street parking, massive addition of commuters (inmates' relatives and Correction's employees 24/7)????

Moreover, the mega jail will hold a hospital that will be a center to treat inmates from the 5 BOROUGHS!!!!

This colossal concentration of resources on Briarwood, Kew Gardens and Forest Hills it's out of proportion, and it cannot be sustained or absorbed by our residential communities. It will cause expected and increasing deterioration to a basic structure that is not meant to support a massive monster.

I urge the Mayor and the developers to look at this project beyond any profit, beyond any rushed agenda.

In an overly dark time like this, imposing a project of such nature will be devastating to our communities' health and well-being.

Sincerely
Rene N.

"I am a full time resident of Brooklyn and I am writing to provide my feedback on the NYC Borough-Based Jail System after reviewing the ""New York City Borough-Based Jail System Draft Scope of Work"". I believe that (1) the planned Brooklyn jail is grossly oversized, (2) the city's proposal fails to include a jail for Staten Island, (3) the oversized jail would have a dramatically negative impact on the surrounding area in Brooklyn and (4) the process has lacked transparency.

Jessie Ngok

jessiengok@gmail.com

"Dear Howard Fiedler,

My name is Jessie Ngok and a life-long resident of Queens. I am here opposing the New York City Borough-Based Jail System proposed by the City of New York. The city claims that the borough-based jails will be safer, and fairer jails to replace Rikers Island. Yet currently, 75-80

of people held at Rikers are awaiting trial, some for years, mostly because they cannot afford bail. Our current jail system is effectively punishing innocent people just for being poor. Building more jails will not eliminate the actual issues that Rikers presents: inhumane violence, sexual assault, lack of mental health support, ripping families away from their children and children away from their families. Rather it is diverting resources away from resources the communities: like reforming our current bail system/ending cash bail, creating alternative to incarceration programs (especially for people facing mental health and substance use issues), ending the school-to-prison pipeline by providing viable opportunities for low-income students of color, ending broken windows policing, and more.

With regards to land use, zoning public policy, the site area of study needs to be extended to include the entire neighborhood. The current study area effectively only studies the impact of construction on the courthouses, highway, and cemetery.

Best,
Jessie Ngok

"Howard Fiedler,

I am a Manhattan resident and I strongly oppose the Mayor's plan to build 4 new jails in New York City. I am for closing Rikers NOW.

This plan is toxic, environmentally unhealthy, and a poor investment that would waste resources. Both incarcerated people and nearby residents would be subject to abuse by the police and corrections officers. This plan will only create more Rikers.

Instead, we need to end jailing by ending pre-trial detention for everyone, which cages mostly poor people and people of color who have not even been convicted of anything yet.

Instead of a jail, Chinatown needs affordable housing and free space for community programs.

Instead of a jail, Mott Haven needs displacement prevention and community healthcare. Instead

of a jail, Brooklyn needs truly affordable housing for the working and middle class Black and Latinx families currently being pushed out of their neighborhoods by gentrification. Instead of a jail, Queens needs services for immigrants and elders and a guarantee of true sanctuary. If the City is going to re-zone this four sites over massive community objection, why not re-zone them to provide services that our communities actually need?

Listen to your constituents and do not proceed with this plan.

Sincerely,

Tanya

Dear Mr. Fiedler,

The proposed jail quite simply does not belong in a residential neighborhood such as Kew Gardens. Indeed, a nearly 2 million square foot, 29 story complex with 1510 inmates - 2 blocks from 2 public elementary schools & close to a private middle - high school - presents many safety concerns.

Thank you for your attention to this urgent matter.

Very truly yours,
Noelle Nightingale

"Hello,

I am a resident of Downtown Brooklyn and I oppose the expansion of the the House of Detention as it has been proposed. I remember when this was proposed before, in 2010 I think, and voted down.

I think it is a big error not to involve the community before this point. I attended the public meeting and it was more of a commercial for the proposal, than a fact-finding endeavor to listen to the community.

Environment review is WAY too limited at 1/4 mile radius, since it could be the 12th tallest building in Brooklyn! The rationale seemed to me to be that violence at Rikers is out of control and it must be closed. So the Mayor should close Rikers. However, it seems to me that the underlying issues are not getting addressed. If the argument for building more prisons is because Riker's must be closed, then let's discuss the treatment of mental health issues and the reform of the Department of Corrections rather than transfer the current dysfunctional system to the other boroughs.

Afterwards, I believe alternative locations should be discussed. Density in Downtown Brooklyn is already maxed out.

Marco Nocella, 96 Schermerhorn, resident of the neighborhood since 2002

BOROUGH-BASED JAIL SYSTEM

DRAFT SCOPE OF WORK FOR AN ENVIRONMENTAL IMPACT STATEMENT
CEQR No. 18DOC001Y

COMMENT SHEET

NAME: T. Urayoan Noel, Ph.D
ADDRESS: 748 E. 137th St. Bronx, NY 10454
EMAIL: TU Noel@gmail.com

COMMENTS:

No new jails should be built not in the Bronx and not in the other boroughs. We have too many people in jail for minor offenses and a crisis in detaining those arrested for months and years. I live 2 blocks from the Mott Haven site and it is already a neighborhood besieged by environmental ills, and with jails nearby.

Written comments on the Draft Scope of Work will be accepted by DOC through **October 15, 2018** and may be submitted at the scoping meetings, by email, or by regular mail to the contact below.

"

COMMENTS:

Kew Gardens jail reconfigurations

- 1) the constant influx of many additional visitors and the likelihood of gang member visitors will contribute to increased crime within surrounding neighborhoods. Our neighborhood has many elderly people which will be easy targets for muggers, robbers and home invasions. We also have a high school three blocks from the proposed jail site also ps99. Why allow these gang members to jeopardize our children. The catch and release program will make it easy for gang members to target these schools.
- 2) 10/17/1972 - Four prisoners escaped from the Kew Gardens jail, police rode through the area with bullhorns warning residents to stay in their homes. 3/5/1987 - Three prisoners escaped from the Kew Gardens jail threatening our neighborhood and our safety.
- 3) I can't see why in these financial times our mayor is willing to spend billions of dollars for an unnecessary expenditure when Rikers island is performing its function in keeping criminals out of our well established neighborhoods. If necessary retrofit Rikers to house more criminals and not destroy our area.
- 4) It will not effect our mayor because of the ten year construction project. He will be gone leaving us with a mess that we won't be able to stop.

"COMMENTS: Kew Gardens jail reconfigurations

1) the constant influx of many additional visitors and the likelihood of gang member visitors will contribute to increased crime within surrounding neighborhoods.

2) The plan only includes 4 boroughs, why isn't the Staten Island in the plan? Although there are those that might argue "It would be too difficult for visitors to travel there from other boroughs", the reverse is also true, it would be just as difficult for visitors from Staten Island to visit all the other boroughs.

3) 10/17/1972 - Four prisoners escaped from the Kew Gardens jail, police rode through the area with bullhorns warning residents to stay in their homes

4) 3/5/1987 - Three prisoners escaped from the Kew Gardens jail

Mr. Su is the witness that Jacky Wong screamed at Mrs. Eng and withheld information for a month - what is he guilty of that he wanted to deny her that information? Was he hoping that the departed subtenant would reject her request that they reimburse her?

We can see how this type of Mean Girl bullying which is not new from a certain level of Chinatown aristocrats would be discouraging for Mr. Phung and make him question how third parties might view this information - ohh maybe he really is a thief and is just covering himself with this press conference. Mr. Phung is pretty strict and scrupulous. Why would he clean out a restaurant in broad daylight as a burglar? Jacky Wong had to have been there to call the cops and Jacky Wong would never work late - he always has to have his lunch on time and refuses to let Mrs. Eng upstairs - before the lawsuit started and if he thinks he is clean - he is wrong. Mrs. Eng is clean and Jack Phung is clean.

There IS a history of him and the board behaving oddly.

Gmail doesn't lie - we can't hack it or graphic design fake emails - we can just open up the account and match each email to these attachments in front of a lawyer or judge and a video camera if Mr. Phung needs them. Good luck.

Dear Mr. Singha,

We have a store at 123 Walker Street and have been screamed at by Mr. Jacky Wong in the past. They are probably supported by the Board members and are suing us but we want to help Mr. Phung while we still can. Because if the board won't pull back Jacky Wong from increasing Mr. Phung's responsibilities then that is a very bad sign.

Is Mr. Phung retiring or is he trying to keep his job? Does he need a character reference from a store tenant? The pharmacy will also probably be his character witness because they are so disgusted by Jacky Wong having him arrested that they no longer refer to Jacky Wong by his name but call him "that person."

The abusiveness and high handedness by the board will probably not be punished. They would not accept our payment of 10 years worth of electric bills when we told them we had

the money deposited and were waiting for the check to clear and instead decided to sue us when the statute of limitations is only for six years but they would not sue us for the electric bills and claimed we owed rent and would not explain. Now they are asking for ten years by not suing for it because Jacky Wong said he had already charged all the stores for our electric bills over ten years and then would just refund future bills on all the stores who now have different tenants. They just wanted to hurt us with legal fees and take the store because our inventory was damaged in the basement from some unknown sewage backup of their sump pump. Our Bruce Lee statues are contaminated with feces and the clay is unglazed so the poo has adhered. And they refuse to give us the contact information for their insurance carrier. He screamed at my mother to trick her to give him \$500 in cash for an unknown electric bill mispayment - for ten years they mistakenly paid our subtenant's bill - he wanted to trick her so he abused her by demanding \$500 and she was willing to pay him - but not knowing what it was about - we have the email trail where they would not tell her and it was so they could collect more than the six years due by statute of limitations.

Then when she collected all ten years from the subtenant and told them so, they sued for UNPAID rent that was untrue and have been dragging out the case since May and refuse to settle, refuse to do the math and refuse to sue for the electric bill instead of unpaid rent which they tried to insinuate that it was in lieu of the larger electric bill so when we asked then can we have a release which the accommodating and departed subtenant had requested, Jacky Wong on the phone refused his attorney and now claims the City Government will not allow them to issue a "general release.

So you have your work cut out for you - they didn't want ten years of electric bills repaid and now want it by demanding \$60,000 in the last court appearance yesterday but refuse to go over the bills to establish that they sued her for the wrong reason.

Is NYC planning on giving the tombs to Chung Pak to manage? Is it going to be housing?

As the tenant of 123 Walker Street, we were told by Jacky Wong that Mrs. Eng's tax share is too low (2 percent) but he refused to give her a copy of the PILOT bill after it doubled from \$300 to \$600. Mrs. Eng was also told that second generation tenants balked after finding out that their real estate tax share had increased without their knowing about it.

There is no point in making Chung Pak suffer the burden of real estate taxes aka PILOT if they are providing Section 8 housing to very grateful old people whom everyday are astonished to be living in a place as nice as Chung Pak including the widow of one tenant who were the only family to be nice to our family after my ornery grandmother was purged by her neighbors because her husband's "second wife" whom he purchased from a tea parlor told the neighbors don't purge me I am a victim of social class, purge her. And her own mother in law supported the idea.

Also, we never saw any increase in crime.

We suspected that Jacky Wong was going to go after both Phipps Houses and Mr. Phung; Phipps Houses is now removed and they set up their own management company and The Mayor is about to announce something about giving The Tombs to them to manage. Mr. To said he was leaving but he is actually with the new management company and witnessed Mr. Jacky Wong scream at Mrs. Eng and they would not explain right away that they had discovered that they had mistakenly paid the Con Ed bill for the store for ten years during the sublease so we had to jump through hoops with no information to find out what was happening. The scary thing is that he asked for \$500 in cash.

Mr. Phung is 71 but looks and acts 50 so maybe a lot of people feel oh well he should just retire but how they treated him and how they dealt with us are bad signs. Nobody cares.

It is unbelievable that they insulted him by having him arrested. He is very respectable and scrupulous.

Our shihwan statues like the window are now speckled with drops of feces on unglazed clay. We think the statues are now ruined because the feces have sunk into the clay.

Good luck to Mr. Phung and his family. We feel pain that something so mean happened to him and his nice wife.

Best wishes,

Jennifer Eng

<cgross@phippsny.org>, Raymond To <rto@phippsny.org>, Jacky Wong

<jwong@chungpakldc.org>, <seng@chungpakldc.org>

So far even though Jackie Wong has not won the lawsuit yet, he has refused to accept the judge ordered rent from Mrs. Eng, refused to remedy the situation with our inventory in the basement being ruined by yet another sewage backup from the sump pump that no one told her about so her Bruce Lee statues are broken and my comic books so we cannot open for business and CURE the issue that your own lawyers claim you have NO PROBLEM allowing us to reopen but ignore the fact that she has been asking for more than ten years why you are charging her as much as six figures and on one bill, 17 milion dollars without explanation and Jackie Wong also told her to NOT WORRY ABOUT IT when she asked him and then after she went to so much trouble with WELLCAR, he claims that for those ten years, Wellcare's electric bills were paid for by ALL the stores in their common charges and that if Wellcare pays Chung Pak, Jackie Wong will just reduce future bills (without refunding departed tenants like Ah Seng whose wife told Mrs. Eng on the street that they take your store and then keep suing you for money).

Those unexplained charges are Chung Pak's fault. Mrs. Eng has her bills showing she paid her rent. She always asked why suddenly she had this huge charge and Charles Gross wrote in EMAIL that he didnt have time to look at it and just gave her a meaningless unsupported printout called his LEDGER entries.

if he fills out a ledger entry for \$17 million dollars does that means he has to pay it?
WHERE Is the documentation that supports that charge?

And does this mean Jacky Wong will contact Ah Seng and his sister and give them refunds for the 10 years they were overcharged for the electric bills?

Lastly, why is Mrs. Eng being told that Mr. Jack. Phuong is arrested thanks to Jackie Wong? He is a human being and he is very devoted to Chung Pak. He cares about everything having to do with the building and is loyal only to the building and has never done anything to favor Mrs. Eng.

Who is going to collect Phipps Houses' management fee? Is it going to be like Wellington Chen's BID where he pays the rent on THREE local Chinatown offices which takes a huge chunk of the funding?

Mrs. Eng will not purchase new inventory to replace what was destroyed in that basement so she cannot open for business but your lawyers walk away for hours making us wait for an answer. She should not have to pay for those legal fees because he is in the building all day with other cases and makes us wait nor should she pay because she has been asking for an accounting for ten years and ignored and when she mails a check advise day of that we are not allowed upstairs with proof of mailing five minutes before the post office closes and you send back that check two months later - she doesn't owe you those fees either.

Charles Gross was told that he could have the store back as early if not earlier than 2014 - they just had to tell her - instead they sue and claim she owes rent when she did not owe rent. She was up to date. So you just wanted to smear her.

Because you refused to just take the store back and look at your own records, you have dragged it out for more months so that she has to pay you but can't open because you destroyed the inventory - check your cameras - she never went down there until May 5th and never went back to move any stock out after she found out what had happened to the Bruce Lee statues. Not only the statues but the comic books, the comic book displays and my green formica shelving was down there and the shelving has disintegrated thanks to the sewage.

That's not a separate claim that is a DEFENSE - we can't open up without inventory thanks to the landlord who is LYING that Mrs Eng owes rent.

We also can't sublease because Jackie Wong said she could not sublease to anyone who didn't pay as much as she did including METROPHARM which offered a few hundred dollars less than the monthly rent to Chung Pak because he said even though you are family, I have to stop you because you can't take less than you have to pay and I will also stop you if your sublease is to an ice cream store.

Mrs. Eng's lease does not have a non compete clause. It also does not limit her to uses that are not in direct competition with other tenants.

On Fri, Jun 22, 2018 at 10:43 AM Osmanthus Inc. <osmanthusinc@gmail.com> wrote:

Mrs. Eng figured out your ledger entries. Chung Pak made a data entry mistake at the very beginning and that is not rent. She has all the photocopies including her immediate questioning of leap in the bill which Rickie and Joe ignored. Also, she would pay rent by the deadline but Chung Pak would not acknowledge until the end of the month or later.

Since she has been asking about this ever since she saw the unexplained charge and also we have been emailing about it for years, we do not agree that we owe legal fees when this was Chung Pak's mistake.

Also, we found someone who had the same statues. Even if Mrs Eng cannot prove the damage caused by Chung Pak to the statues there is no way that Chung Pak will be able to deny the sewage damage to the custom made boxes to the original statues that inspired the subsequent counterfeits. If she moves the boxes, they fall apart. Some of the boxes have been moved upstairs but the bottom ones are in worse condition and she would prefer to leave everything as is so Chung Pak can see the damage for themselves to agree that this is caused by the building's sewage backup. No one could have moved these boxes as they are now INTO the basement because the boxes refuse to remain intact.

Please email the Con Ed bills.

We have several voicemails with absolutely no message left but the sound of a Chinese man in the background. Wellcare has been there since 2006 and Con ed told them they owed no money. Now Con Ed is saying they won't issue a first bill to Mrs. Eng until the next meter reading on May 11th.

If you have Con Ed bills, please email them and she will pay them. You screamed at her on the phone last time that you were going to call Con Ed to lock the meter which would be very expensive. If this is a vacant store rate, the bill cannot be that high and she will pay it if you show her the bills.

Why did Mr. Gross send a pdf that claims she owes since 2008 without giving her any proof of any wrongdoing just like the unexplained charge on her monthly rent bill? Mrs. Eng checked yesterday and says the Chung Pak bill still is not in her mailbox by the way.

Why is Chung Pak claiming that she owes an electric bill when for more than a month they refused to explain why they were asking her for her old meter number and she was told by Con Ed that the building should know the meter number not the tenant?

Bcc: David Johnson <dave.johnson@cushwake.com>

If that \$15,000 is more than six years old, then please wipe it from the bill. Also, what are the other expenses on the bill? Can you prove them? We are making a demand for documentation just like Wellcare has asked for. It's not fair that you ignore her for years when she has requested the proof so she can pay it and not have an outstanding balance.

If you put those electric charges on the bill, you will cause her incredible stress as you have already done in the past months especially with Mr. Jackie Wong screaming at her. Too bad he is not as nice as Mr. Su.

Even if she owed you money, you shouldn't scream at her. She had no idea that the electric bill was never paid and even when he screamed at her - he still would not explain the situation. It was just to intimidate and shame her into writing a \$500 check "for electric bill," correct?

If everyone employed at Chung Pak belongs to one clique

then who will know in the future when those apartments are distributed without bias?

Nobody will be a third party to watch over Chung Pak and to know all the old people are independent and chosen in order from the waiting list.

No one who is not one of the clique can remain at Chung Pak.

Think about it.

We will send more emails showing how they refused to accept the form by the corporate subtenant.

How much is the lease for 121 Walker Street by Edward Cuccia? Departed tenants claimed that new tenants got better deals but they were forced to leave - is that true? Mr. Phung might know those details. It is unheard of for an attorney to pay retail rent for an office space. He is also the broker for the restaurant that they claim Mr. Phung robbed.

On Wed, Oct 24, 2018 at 2:41 PM Osmanthus Inc. <osmanthusinc@gmail.com
<mailto:osmanthusinc@gmail.com> > wrote:

this at least helps Mr. Phung in terms of competing credibility. Mr. Phung is a nobody with a very sweet wife who makes all the old ladies feel good about themselves and patiently listens to their stories about who got purged by their fellow vilagers (#metoo) and how that felt. She never says she has to go - she just listens to them which is therapeutic. Mr. Phung is very good at his job and a lot of condo owners and tenants complain about their buidling supers being corrupt and lazy and Mr. Phung is the opposite.

It's really strange to attack his reputation when he should be allowed to retain that reputation - it's not got a dollar value - why does Jacky Wong want to destroy it?

Very KMT Triad.

123 William Street, 16th Floor
New York, NY 10038
Phone: 646.459.3017

Email: cdp@urbanjustice.org <<mailto:cdp@urbanjustice.org>>

Dear Mr. Singha,

We have a store at 123 Walker Street and have been screamed at by Mr. Jacky Wong in the past. They are probably supported by the Board members and are suing us but we want to help Mr. Phung while we still can. Because if the board won't pull back Jacky Wong from increasing Mr. Phung's responsibilities then that is a very bad sign.

Is Mr. Phung retiring or is he trying to keep his job? Does he need a character reference from a store tenant? The pharmacy will also probably be his character witness because they are so disgusted by Jacky Wong having him arrested that they no longer refer to Jacky Wong by his name but call him ""that person.""

The abusiveness and high handedness by the board will probably not be punished. They would not accept our payment of 10 years worth of electric bills when we told them we had the money deposited and were waiting for the check to clear and instead decided to sue us when the statute of limitations is only for six years but they would not sue us for the electric bills and claimed we owed rent and would not explain. Now they are asking for ten years by not suing for it because Jacky Wong said he had already charged all the stores for our electric bills over ten years and then would just refund future bills on all the stores who now have different tenants. They just wanted to hurt us with legal fees and take the store because our inventory was damaged in the basement from some unknown sewage backup of their sump pump. Our Bruce Lee statues are contaminated with feces and the clay is unglazed so the poo has adhered. And they refuse to give us the contact information for their insurance carrier. He screamed at my mother to trick her to give him

500 in cash for an unknown electric bill mispayment - for ten years they mistakenly paid our subtenant's bill - he wanted to trick her so he abused her by demanding

500 and she was willing to pay him - but not knowing what it was about - we have the email trail where they would not tell her and it was so they could collect more than the six years due by statute of limitations.

Then when she collected all ten years from the subtenant and told them so, they sued for UNPAID rent that was untrue and have been dragging out the case since May and refuse to settle, refuse to do the math and refuse to sue for the electric bill instead of unpaid rent which they tried to insinuate that it was in lieu of the larger electric bill so when we asked then can we have a release which the accommodating and departed subtenant had requested, Jacky Wong on the phone refused his attorney and now claims the City Government will not allow them to issue a ""general release.

So you have your work cut out for you - they didn't want ten years of electric bills repaid and now want it by demanding

60,000 in the last court appearance yesterday but refuse to go over the bills to establish that they sued her for the wrong reason.

Is NYC planning on giving the tombs to Chung Pak to manage? Is it going to be housing? As the tenant of 123 Walker Street, we were told by Jacky Wong that Mrs. Eng's tax share is too low (2 percent) but he refused to give her a copy of the PILOT bill after it doubled from

300 to

600. Mrs. Eng was also told that second generation tenants balked after finding out that their real estate tax share had increased without their knowing about it. COMMENTS:

I think Rikers definitely has to close, but new jails shouldn't be built, specially not ones that are big. There does not need to be new jails, what we need is alternative to jail programs, housing, mental health care, jobs. We need to learn from Roosevelt Island, we need to learn from Rikers, and not open anymore jails!

Written comments on the Draft Scope of Work will be accepted by DOC through **October 15, 2018** and may be submitted at the scoping meetings, by email, or by regular mail to the contact below.

"Dear Mr Fiedler,

I'm a concerned resident of (Jamaica, Queens 11435) and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails. My family and community is just a short walk from the proposed site. A quick ride on Q60 bus. Minutes by Uber/taxi. All of which are accessible to any convict escapee.

My worst nightmare would be an escaped convict, having immediate access in a densely populated area to a hostage, child, victim to rape/hurt/kill/object etc..

An escapee would be seconds away from mass transit in which he/she can disappear within seconds of escaping, hence paragraph above.

More congestion in an area where, finally after decades of being dubbed the Boulevard of Death, would return to same if not worse meaning of the Nickname.

Finally, zoning laws were put in place decades ago. Much thought went into development of communities and safety of residents/citizens/tax payers. We deserve....No, we Demand, our safety and quality of life be considered, preserved and put first!

Thank you.

Best,
Vernalie Velilla

COMMENTS:

It is not a good idea that the money you spending between Bronx, Brooklyn Queens & Manhattan rather than some amount of money, you invest in Rikers Island jail & develop the location according to your requirements (like - transportation - food store, lawers & Attorney Bldg) etc. & keep the justice system fair.

Prisoners are ~~for~~ criminal & should n't be moved to residential place because it effects not only to the community but also in convenience with parking - & property's value too! ~~for~~ Think about this! I know, final authority is you but this is just my opinion as I am the citizen of this country! Thanks-

"Dear Howard Fiedler,

This email is to ask you to consider smaller, less dense facility than what is proposed on Brooklyn Detention Center. As a mom of 7 months old boy and strong love of my neighborhood, newly proposed plan greatly concerns wellbeing of my family and neighborhood. We would really appreciate it if you could re-consider the plan. Thank you.

DRAFT ENVIRONMENTAL IMPACT STUDY ISSUES

Task 1. Project Description

The scope of the proposed draft EIS considers the construction of new jails in Brooklyn, the Bronx, Manhattan and Queens, and compares its environmental impacts to the No Action condition in which no new jails would be built and their sites would remain in their existing condition. The Scoping Document indicates that the proposed project is guided by the principle of “neighborhood integration,” which includes promoting safety and security, designing dignified environments, leveraging community assets, and providing added value and benefits to the surrounding neighborhoods.”

In the absence of real engagement with the communities in which the new jails would be situated, and a proposed action based on a one-size-fits-all approach, the proposed action is fundamentally flawed and violates the basic tenet of seeking to best integrate with the neighborhoods in which the new jails would be located.

By making no distinction to the current or historical distribution of detainees among the five boroughs, the proposed action will likely create new jails that are excessively large for the boroughs in which they will be placed, which will impose unacceptable impacts on those communities. For this reason, we request that DoC revise its scoping approach to consider other alternatives to the proposed action than simply the No Action condition.

More specifically, the EIS should give specific consideration to an alternative that would locate a second jail within the four boroughs slated by the proposed action for a new jail housing detainees that have already been convicted and the addition of a single new jail on Staten Island. It should further take into consideration the number of detainees that must remain close to the court system vs. those who have already been tried and convicted; the number of detainees with special needs and/or mental illness that should be diverted from the jail system before they are arraigned so that they can be placed in more appropriate therapeutic facilities; and the number of detainees whose principal residence is on Staten Island and should be housed in a new jail facility adjacent to that borough’s courthouse.

Task 2. Land Use, Zoning and Public Policy

The project involves a 1.4 million SF building with an FAR of 20 or more. The 2004 Downtown Brooklyn Special District Plan capped FAR at 12 and the current jail facility has an FAR of 3.5 on a site that would presently allow an FAR of 6.5. Given the tremendous density of the proposed facility, the EIS should evaluate such a dramatic change to the City's existing zoning policy and its lack of transitional zoning alongside the adjacent low-rise residential communities, and the alternatives that could be considered to reduce that density to the established zoning.

The project is also within 1/4 mile of Boerum Hill and Cobble Hill, communities whose scale is protected by historic district designation and, in the case of Cobble Hill, by a 50-foot height restriction. The EIS should evaluate the impact of a building that will rise to more than 430 feet on these low-rise neighborhoods.

The EIS should also evaluate the proposed project in terms of its cumulative impact with the redevelopment of the former Long Island College Hospital site that is one block outside the 1/4-mile study area. We believe that the 1/4-mile radius is inadequate and is intentionally set to treat this project in isolation from other developments.

The proposed action provides for mental health services, health care, job training, education and other social services within the Brooklyn jail. The scope does not currently take into account these added services, the number of employees required to provide those services, and the impact their workforce will have on traffic, parking and air quality within the adjacent communities.

Given our objection to the one-size-fits-all approach of the proposed action, and to the failure to consider other alternatives to the No Action condition, we ask DoC to evaluate the proposed action in terms of whether it meets "fair share" standards of allocating detainees within the system according to factors that fairly spreads the burden on each of the boroughs.

Task 3. Socioeconomic Conditions

In considering the impact of the proposed project on indirect business and residential displacement, DOC should evaluate:

- a) how the proposed density of the Brooklyn jail and its operations, including impacts on traffic congestion, will affect neighborhood residents and the ability of local businesses to remain within the study area.
- b) whether the construction of jails of 1,510 beds is based on a thorough analysis of jail operations, within the United States and elsewhere, and whether jails of this magnitude can be safely and humanely operated.
- c) what resources and training facilities are required to address the need for culture change within the city's jail system with respect to how corrections officers handle detainees. This issue should be addressed in the context that the plan does not provide for the creation of such training facilities or training programs.
- d) The EIS should evaluate how the four new jails, including the Brooklyn Detention Center, will impact the large number of detainees with mental health issues, and whether the inclusion of this population within the new jails represents the most efficacious approach to meeting the

needs of this population. The EIS should specifically discuss the approaches that are being used in other cities to divert this population before they enter the criminal justice system and before they are detained within a jail.

Task 4 Community Facilities

The proposed action will create the densest building in Downtown Brooklyn with a unique security environment. In conjunction with the tremendous increase in residential and commercial development in this area, the EIS should evaluate whether the City has the existing fire protection resources in the downtown area to protect the detainees in the event of a large scale fire.

Task 7 Historic and Cultural Resources

Architectural Resources:

The scope should consider the impact of the demolition of the existing Brooklyn Detention Center and the excavation and construction of the new jail facility on the approximately 184 year old railroad tunnel below Atlantic Avenue, the oldest urban railroad tunnel in North America, and the steps that will be undertaken to protect this fragile engineering artifact..

Task 8. Urban Design and Visual Resources.

The EIS should evaluate the impact of the proposed action's unprecedented increase in FAR adjacent to Boerum Hill, Downtown Brooklyn and the transitional zone between low-rise Cobble Hill/Boerum Hill and Downtown Brooklyn on the urban design features of these communities..

Task 10. Water and Sewer Infrastructure

The proposed addition of 1,510 jail detainees to the Brooklyn site and hundreds of uniformed and civilian workers will add significantly to the burden of the existing water and sewer system. This impact should be considered as part of the much larger increase due to existing and planned developments within a larger radius than 1/4 mile, given the addition of approximately 1,000 units of housing on the former Long Island College Hospital site and 166 units on Pier 6 in Brooklyn Bridge Park.

Task 11. Transportation

Travel Demand and Screening Assessment:

The assessment must enumerate and take into account the number of staff in addition to uniformed officers, including employees providing the medical, mental health, job training, reentry and other social services to the detainees, retail workers, visitors to the jail, such as retail consumers, attorneys, and family members. The assessment must project the number of trips they generate, the modal split, and the impact of each of those types of trips on the capacity of the various transportation modes.

The traffic data study area needs to include intersections on Smith Street south of Atlantic to, at minimum, the intersection at Bergen St, and on Atlantic Avenue east of Smith Street to, at minimum, the intersection at 4th Avenue.

The traffic study needs to take into account the impact of other city projects proposed in the area including, but not limited to, the rebuilding of the BQE and the construction of the BQX streetcar.

The traffic study must include an analysis of the transportation of corrections officers and detainees between all courts, precincts, other borough jails, and medical facilities. In addition, it must clearly discuss the number of trips that will be required with respect

to the detainees housed from Staten Island who will be transported to court facilities on Staten Island.

The traffic study must analyze the impact of the volume of use of the proposed loading dock and sally port on Smith Street.

The traffic study must analyze the current NYPD intake process and how it might change under the proposed plan, particularly with respect to the police stopping on State` Street and walking suspects down the ramp into the courthouse to be arraigned. The traffic study must also assess the proposed plan in terms of traffic and parking by DoC and NYPD official vehicles.

The traffic study must analyze the proposed plan for deliveries to ground floor retail uses and their impact on traffic conditions within an expanded study area.

The traffic study must identify specific mitigation measures that will be undertaken to lessen the traffic impacts of the trips generated by the jail facility, including measures to discourage the use of cars and encourage the use of transit. The study should also address the additional traffic resources that the City will provide to ensure that the necessary enforcement actions will be taken.

The traffic study must analyze the Citibike station located on site and the impact of its removal or relocation.

Parking:

The assessment must discuss the basis on which the number of parking spaces to be provided for the Brooklyn jail site was determined, particularly with respect to the number of civilian employees that be using the jail in addition to uniformed officers.

The assessment must discuss the cost and need for providing free employee parking in a transit rich location.

The assessment should consider how DoC buses and vans will be accommodated on the Brooklyn jail site.

Task 12. Air Quality

The assessment must consider the impact of all the visitors to the Brooklyn jail site, including those undertaken by non-uniformed employees providing services within the facility.

Task 14. Noise

The analysis must address noise caused by multiple outdoor areas on every floor and the mitigation measures that will be taken to reduce or eliminate that noise.

Task 16. Neighborhood Character

The proposed site is zoned FAR 6.5 for community use. The surrounding large buildings are all built between FAR 7 and 12. The much larger majority of buildings in the area are built at FAR 3 or lower. The combined size, density, bulk and height of the proposed Brooklyn jail are unprecedented for all of Brooklyn. The analysis must look at the effects of the increase in FAR, the proposed lack of required setbacks and the overall height discrepancies on the character of the adjacent neighborhoods.

Task 17. Construction Impacts.

The study must analyze the proposed plan with respect to how the use of the Brooklyn Courts by detainees, including pre- and post-arraignment, and vehicle needs will be handled during the demolition of the existing Brooklyn jail and the construction of the new jail.

The current Brooklyn Detention Center provides habitat to nesting peregrine falcons. The demolition of the current jail will displace that habitat. We ask that DoC give consideration to mitigation of this displacement, including designing the facade of the new jail to provide opportunities for new nesting sites. More generally, we ask that the assessment be conducted to consider a Natural Resources task in accordance with the CEQR Technical Manual that addresses the peregrine nesting sites but also other additional natural resources that will be affected by the project during construction and when the new jail is being operated.

Task 18. Alternatives

The scoping document considers only the proposed action and the No Action alternative. Reflecting our concerns with the flawed approach of the planning process, and specifically, it lacks of community engagement, and the failure of the proposed

action to successfully integrate into the affected communities by ignoring the most optimal distribution of detainees within the five boroughs, we ask that the scope be expanded to consider multiple jail sites within each of the boroughs slated by the proposed action for a new jail and a new jail on Staten Island.

Thank you.

Sincerely,

Heather Park

"With parking in the area at a premium, the recent rebuilding of the municipal parking lot – and the taxpayer dollars to do so – should not be tossed out to be replaced by a jail – a most inappropriate endeavor for this neighborhood. With the many underdeveloped land parcels in and around the city, a more ideal location could, and should be found for the jail, creating jobs and opportunities in previously underutilized areas of the city.

Sincerely,

Mike Pascuzzi

"In regards to the borough-based jails proposal,

I fully support the immediate closing of the jails on Rikers Island. I also strongly oppose the opening of any new jails in New York City. There is no such thing as a humane or safe jail.

The City of New York needs to:

- * End cash bail and pre-trial detention. Community supervision is successful, (you said so yourself in the More Just NYC report).

- * Divest from jails and policing. Invest in community resources. Invest in public schools and actual affordable housing.

- * End broken windows policing and all practices which the NYPD uses to harass communities of color.

- * Decriminalize poverty, homelessness, mental illness, and substance use.

The current proposal from the city demonstrates that the Mayor and his officials are committed to racist over-policing and to caging people of color. I am staunchly against the city proposal to open new jails. We can close Rikers without opening new jails.

Sincerely,

Anne Pasek

Brooklyn

"

CITY HALL MEETING – September 27, 2018
BOROUGH JAILS - by Anna Pastoressa

My son was incarcerated on Rikers Island from 2010 to 2016 while waiting for trial.

Without a trial on the horizon for many years, visits from his family and friends were his only hope.

Visits did not come easily at all because we had to travel so far and for so many years to Rikers Island to face hours of mistreatment and abuse by correction officers before being able to visit him for one hour. It is time to close Rikers Island and end the era of abuse by shutting it down for good.

We were aware that there is a borough jail much closer to home and we begged his attorney several times to help us move my son to the “Tombs” in Manhattan, to no avail.

I don't believe that anyone should be locked up while waiting for trial, but while people still are, they must be given the opportunity to be near home, near their community, near their family and friends who can visit without traveling too far and hopefully without enduring abuse.

Currently there are too many thousands of people locked up waiting for trial and, as a member of the #CLOSERikers campaign, I demand that the thousands be reduced significantly, so that we can eventually end the practice of pre-trial detention completely. There is no reason to keep innocent people locked up waiting for trial. Being arrested does not mean a person is guilty, or dangerous. The focus today is to Close Rikers and reduce the jail population in New York City.

I do have a great concern about the Department of Corrections running facilities where people would be housed. It would defeat the purpose of trying to create new and more humane facilities. After six years of enduring very low levels of professionalism and often abuse by correction officers, I am afraid that even a better designed facility under the management of the Department of Corrections would become another small infamous Rikers jail.

I ask that the Department of Corrections be removed completely from running the facilities that the City of New York is proposing. DOC is too corrupted and, like Rikers, is beyond repair. They would turn into hell holes just like Rikers.

My son is no longer on Rikers Island, but I know what a difference it would have made for me, for my family and for him to have had him closer to home.

Let's move forward with real change: “Close Rikers NOW” and remove the Department of Corrections so that any new facility constructed can focus on healing and restoration. Thank you!

FOR MORE INFORMATION, VISIT: <https://rikers.cityofnewyork.us/nyc-borough-based-jails/>

For years, many formerly incarcerated individuals, their loved ones, activists, social service providers, and others have pointed out that Rikers Island is a violent system that subjugates many who have not even been convicted of a crime yet remain there because of their financial situation; that is a travesty in a legal system that is supposed to presume one's innocence until there is evidence in a trial to prove otherwise. It is a system that has disproportionately harmed communities of color and low-income individuals. After an independent commission assessed the conditions of Rikers and corroborated the former statements, Mayor Bill de Blasio of New York City announced on March 2017 that the City will be closing the jails on Rikers Island within the next 10 years. The Mayor announced in February 2018 that the City will open a smaller system of jails in each borough except Staten Island. In the Bronx, the proposed site for the new jail is in Mott Haven.

Since the City of New York has proposed that a New York Police Department tow pound in Mott Haven as the potential site for a new jail facility, an exploration of whether Mott Haven is the best neighborhood for a jail facility will be conducted.

First, in order to understand where a jail facility would be best suited, the ways that Rikers Island failed must be identified. These reasons can be found in research and reports produced by City of New York officials and other sources on the topic of Rikers Island i.e. A More Just New York; Smaller, Safer, Fairer; A More Just New York: One Year Forward. From these reports, one of the largest failings of Rikers Island is that because of its physical isolation and distance to courthouse. Research must be conducted on what type of neighborhood Mott Haven is and if the citing of a jail on a

piece of property in that specific community is the best use. The following is some of the aspects that I researched.

There is existing data to prove that Mott Haven is a low-income, community of color that already carries the burden of previous city planning choices that have cited more than its fair share of local undesirable land uses (LULU) mainly in the form of waste transfer stations. A case can be made for the City to recognize they should not place another facility that is undesirable if they have recognized that Mott Haven has more than their fair share of undesirable facilities. This can be accomplished by investigating City reports, local journalism, academic journals and articles.

Another potential argument that could dissuade the City from continuing to cite a jail in Mott Haven is if data proves that the site does not accommodate the average Bronx resident in terms of accessibility as well as the site near the Bronx Criminal Courthouse that the Bronx Borough President's office was leaning towards and was one which the City considered. It is a site that fits the City's criteria of to keep incarcerated individuals near courthouses and has the 4, B, D subway line in proximity with the added bonus of the 2 and 5 intersecting with the 4 in the Bronx. On the other hand, the Mott Haven site only has the 6 in proximity and would require all other riders in the Bronx to leave the Bronx, transfer in Manhattan, and then re-enter the Bronx or they would have to transfer via a bus. The MTA Trip Planner can be utilized to compare how long it takes riders from each subway station in the Bronx to get to the Mott Haven site, the site near the Bronx Criminal Courthouse, and Rikers Island.

Additionally, there is a community-based group has proposed a plan of mixed

use development that has engaged various stakeholders in the community and City, which also has the support of the Bronx Borough President. This plan that proposes affordable housing, commercial use, and community facilities should be further evaluated and have a chance to broaden community engagement as a possibility to fulfill the uses that Mott Haven might lack. If the initial reasons why the some City officials and agencies supported this plan can be revisited, then there can be a stronger argument to be made to re-prioritize this plan.

A Brief History of Fair Share Policy and Conditions of the South Bronx

In 1989, “Fair Share” criteria, a set of policies to equitably disperse facilities around New York City, was proposed but the City Council published a report finding that the policies did not accomplish what it sought to bring light to three decades ago. The Council found the that City does not reveal enough data about the current distribution of facilities and how it compares on a neighborhood to neighborhood basis. This makes it difficult for communities to engage in a public debate on facility placement.

The report notes that in New York City and around the country, low-income neighborhoods and communities of color have been subjected to over-concentration of local undesirable land uses (LULUs) and lack desirable facilities. Some factor that have led to today’s reality is deliberate discrimination, residential segregation, perceived lack of power, lower real estate prices, and desirable geographic access.

The Council held an oversight hearing titled, “Fair Share After 20 Years” to assess if the processes that were proposed are accomplishing the goal of distributional equity back in April 2011.

After examining five types of facilities - fire houses, libraries, parks, waste-transfer stations, and residential bed facilities- the Council concluded that the city can achieve distributional equity and set goals to undertake inequity but currently race and neighborhood is still significant in how facilities have been distributed. They produced a report called “Doing Our Fair Share, Getting Our Fair Share: Reforming NYC’s System for Achieving Fairness in City Municipal Facilities” (Doing Our Fair Share report).

South Bronx residents and advocates have been alluding to and fighting for relief from environmental factors that have burdened the community for years and have paved the way for the City to take a closer look ([SSBX](#)). For example, the Sustainable South Bronx group was founded in 2001 with a desire to advocate for parks and green infrastructure to promote environmental justice. Another local group that has done consistent advocacy work is THE POINT CDC which was founded in 1994 and received an EPA Environmental Quality Award for over ten years of dedication to the South Bronx and NYC environmental justice ([THE POINT](#)).

In the Doing Our Fair Share report, it recognized that one of the prime examples of inequitable distribution of City facilities is the historical siting of waste transfer stations (WTS). WTS are the sites where trucks deposit waste for transfer to landfills and recycling facilities. Just over $\frac{3}{4}$ of the total citywide permitted capacity for waste disposal is allocated to stations in just four community districts – Brooklyn 1 (Williamsburg and Greenpoint), Bronx 1 (Mott Haven), Bronx 2 (Hunts Point), and Queens 12 (Jamaica) – that are (or were, at the time of the stations’ sitings) overwhelmingly communities of

color. Residents who live near such a large concentration of WTS are subjected to dirtier air, more truck traffic on residential streets, and more noise, all of which have a negative impact on community health.

In 2015, the South Bronx, North Brooklyn, and Southeast Queens were absorbing 80% of the city's trash which at a cursory glance correlates with a lower life expectancy than other neighborhoods in New York City from a 2015 City report. The South Bronx had been approximately receiving 33% of New York City's trash at their waste transfer stations although the South Bronx has about 6.5% of New York City's population; the South Bronx houses around one-fourth, or 15 of the approximate 63 waste transfer stations ([ICIS](#)). ([Gotham](#)) In a study released by the Transform Don't Trash in NYC coalition in September 2016, community members found PM2.5 up to 7x higher than ambient levels, tallied up to 304 trucks per hour, of which 45% were hauling commercial waste ([Transform, Don't Trash NYC](#)) In November 2016, Senator Ruben Diaz said, "As the Senator representing the South Bronx where asthma rates are the highest in the nation...." ([NYC](#)) acknowledging that the South Bronx not only has some of the highest rates of asthma in New York City but in the nation. A nurse from Lincoln Hospital's Pediatric Emergency Department, on behalf of the New York State Nurses Association, testified that the respiratory ailments caused by pollutants will "continue throughout a child's lifetime into adulthood ([Gothamist 2016](#)).

The following statistics informs what some of the impacts of having a high concentration of waste transfer stations in Mott Haven means for the residents in the community. In 2015, the New York City Department of Health and Mental Hygiene

(DOHMH) published Community Health Profiles of all the neighborhoods in New York City. Community District 1 has some of the highest levels of air pollution and asthma rates among both adults and children. The following is a snapshot of conditions of Mott Haven and Melrose ([DOHMH](#)) :

Mott Haven & Melrose is ranked #1 of 59 neighborhoods in NYC for the highest asthma hospitalization rate in children from 5 to 14 years of age.

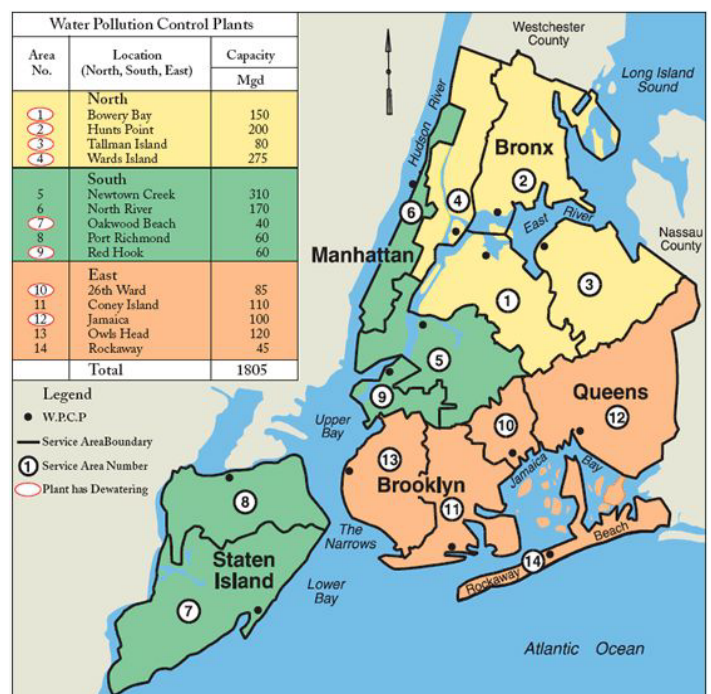

Residential Beds

In addition, the report admitted that inequity does not only derive from decisions implemented before 1989. The top 10 communities that have the highest concentration of residential bed facilities are all communities of color: Queens 14, Manhattan 11, Bronx 3/6, Bronx 11, Bronx 8, Bronx 1/2, Bronx 4, and Brooklyn 16. Once again, Mott Haven is located in community district Bronx 1. Residential beds is an expansive category that covers correction facilities, nursing homes, group foster homes, inpatient health treatment centers, homeless shelters, and transitional housing.

After the Fair Share policies were set in place, from 1999 to 2015, the it is the districts that are communities of color that have seen the largest increase in residential “beds to population” ratios while the three districts that experienced a decrease in density were all majority or near-majority white. Specifically for shelter beds, Bronx Community District 1 has one of the highest concentrations of beds, about five times higher than the city average.

Wastewater

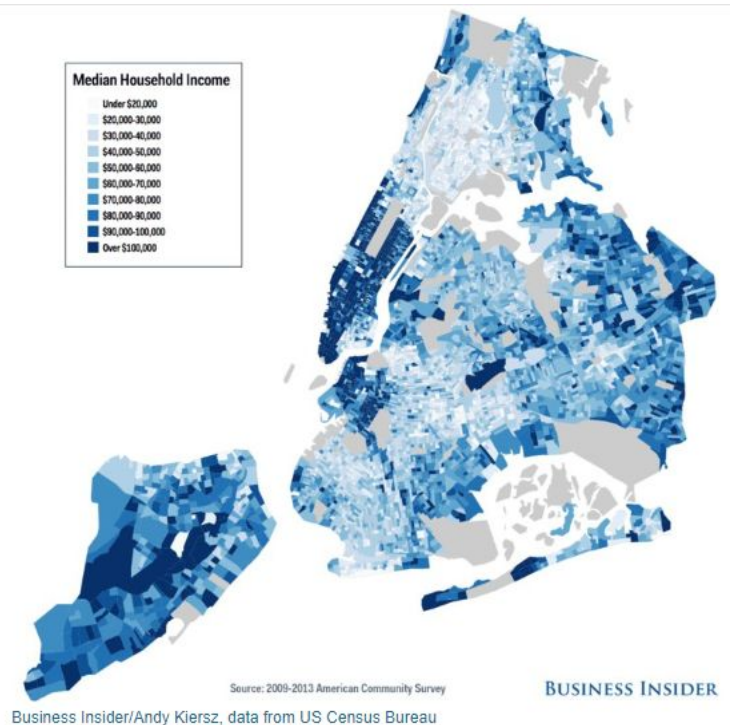

Another thing to take note of is that there is two wastewater treatment plants in the South Bronx: Hunts Point and Wards Island ([DEP](#)). The first map ([NYCDEP Map](#)) shows where the treatment centers are located and the second map shows the

median household income NYC with the lightest color on the lower end of the income spectrum and the darkest blue representing the higher end of the income spectrum

([BusIns](#))

In 2010, Mothers on the Move and 10 South Bronx residents filed a case against the City and the Department of Environmental Protection. For years the neighborhood had to put up with atrocious odors from the Hunts Point sewage plant that repressed street life. It led to the City ending its contract with New York Organic Fertilizer Company that processed half of the sewage sludge from the City's 14

treatment centers; though they can be allowed to pick up the contract if they upgrade technology to mitigate the odors. The City also agreed to identify and proceed in eliminating the source of any odors coming from the Hunts Point Sewage Treatment Plant ([Dolnick](#)). Although these facilities are in Hunts Point, Mott Haven borders that community to the left and its streets also absorb the truck traffic associated with the facilities.

In conclusion, the report recognizes that the Fair Share policies set up in 1989 created ways to make the process of land use decisions more fair and decentralized but it did not really generate increasingly fair outcomes in the City; the South Bronx even

more specifically has been subject to unfair outcomes. It has a higher concentrations of local undesirable land uses (LULUs) like waste transfer stations, residential beds, and wastewater treatment centers in comparison to other neighborhoods in NYC.

Transportation Analysis

One of the reasons the City seriously considered closing Rikers Island is due to the cost of transporting prisoners back and forth from the courts. Additionally, the travel time of loved ones, employees, lawyers, social service providers, and others was taken into consideration as the cost-benefits of closing Rikers was analyzed. It would be time consuming to determine the average travel time from every subway station stop in all of New York City that all potential loved ones, employees, lawyers, social service providers and others might be utilizing. The following data aims to show the average travel time from every subway station in the Bronx to two other sites other than the Mott Haven site. As stated before, the Bronx Borough President's Office suggested that a potential site for the jail should be near the Bronx Criminal Court, in Grand Concourse, Bronx (herein referred to as Bronx Civic Center site). In order to investigate the public transportation accessibility of the Mott Haven site and further to compare it to the Bronx Civic Center, the travel times of each station in the Bronx to each site was determined with the MTA Trip Planner in **Table A**. The subway station in the nearest proximity to the Mott Haven site is the E 143 St Station on the 4 line while the closest subway station to the Bronx Civic Center site is the 161 St - Yankee Stadium station on the 4, B, and D line. In addition, the travel time from every Bronx station to Rikers Island was also taken into consideration to determine how much travel times would change for people

travelling from the Bronx if and when the jails on Rikers Island is closed. With the MTA Trip Planner, the controls that were set are as follows:

Leaving at 12:00 PM (Weekday)

Starts with Train

Travel By Train, Bus

Minimize Transfers

Walks no more than ½ mile

The average time it takes for someone travelling from the Bronx to the closest subway station to the Bronx Civic Center is 25.53225806 minutes while it took an average of 30.56451613 minutes to get to the closest subway station to the Mott Haven site. When rounding up, the average time for someone travelling from the Bronx to the closest subway station to the Bronx Civic Center is 31 minutes, which is 6 minutes faster than to the Mott Haven site at 26 minutes. The average time for someone travelling from the Bronx to Rikers Island is 91 minutes. If you compare, the City proposed site and the Bronx Borough Office suggested site, 6 minutes does not seem like a significant difference. However, most would not argue that the travel time for anyone travelling from the Bronx is significantly reduced if the jails at Rikers Island were closed.

In a Gothamist article entitled, “These 5 Neighborhoods Supply Over A Third of NYC’s Prisoners”, the zip code of where New York City prisoners are from was provided for the year of 2012. The data listed all the zip codes in New York City but **Table B** focuses on the Bronx zip codes and the 2010 Census Population data and the prisoners

from each zip code from 2012. The purpose is to show the number of people incarcerated from each Bronx zip code, the percentage of those incarcerated by zip code, and where those areas are in relation to the proposed jail sites. From there, **Table C** focuses in on the zip codes with the highest numbers of incarceration and the average time it takes to get to each site. This data is from Google Maps by entering each zip code to each proposed site while using the average of the public transportation options. The result will shed light on how long it would take loved ones to visit their family if they lived with or in proximity of the incarcerated individual. **Map A** provides a visualization using ArcGIS to display the numbers of individuals incarcerated based on their zip code from 2012 data along with subway lines. The data indicates that Bronx zip codes 10453, 10456, 10457 had the highest amounts of people incarcerated and in essence provided about a quarter of the total amount of Bronx prisoners. On average, it would take a person from one of those zip codes 27 minutes to the Bronx Criminal Courthouse area but 44 minutes to the Mott Haven site.

Table A: Travel Times from Bronx Subway Stations to Proposed Jail Sites

| | | Bronx CCH | Mott Haven | |

Map A: Inmates from the Bronx in 2012

Diego Beekman Mixed Use Development Plan

320 Concord Ave Bronx, NY 10454 is not only the proposed site of a new jail by the City of New York but also the site of a proposed mixed-use development project by Diego Beekman Mutual Housing Association, HDFC (Diego Beekman).

The Jose de Diego Beekman Houses were developed in 1974 by the U.S. Department of Housing and Urban Development by renovating 38 pre-war apartment buildings. The privately owned Section 8 housing project deteriorated over the years because of owner disinvestment as the issues like the closure of manufacturing companies, closing of Lincoln Hospital, increase in violent crime, and the extensive sale and distribution of drugs in the development plagued the community. Then in the early 1990s, tenants began to organize and formed the Tenants United for Better [Living](#) to address the decrepit conditions. The tenants got the attention of HUD who took back the complex from the private entity that failed to upkeep the apartments. HUD conducted rehabilitation in collaboration with many groups and eventually transferred ownership to a non-profit in 2003; the Diego Beekman Mutual Housing Association, HDFC (Diego Beekman) has a tenant-majority Board of Directors that are committed to working with tenants to continually address quality life issues and maintenance of the site. This deal has left a legacy for others to look at as a model and can be summed up by [Matt Pacenze](#) from the Bronx Bureau, “In what is thought to be the largest tenant takeover of a federal housing project in the country, Beekman’s residents finalized a deal with the federal Department of Housing and Urban Development to take control of their sprawling development’s 38 buildings and 1,200 apartments.”

Diego Beekman has worked on a collaborative plan to continue to further address the socio-economic reality, public safety hurdles, and quality of life issues residents and neighbors face. Some of the things their development plan proposes is:

- ❖ Target PS 65 for enhanced family support services
- ❖ Create 711 apartments for low and moderate income households with 20% for seniors.
- ❖ Retail center with 34,000 sq ft anchor supermarket
- ❖ Create a new multi-story manufacturing building housing 100-200 jobs
- ❖ Build a new service collaborative focused on the Diego Beekman neighborhood that prioritizes family crisis management, youth development, job training, public health interventions, and violence intervention programs.

Diego Beekman produced a report called the Diego Beekman Neighborhood Plan and worked in collaboration with the following stakeholders: The residents of Diego Beekman, New York City Council Speaker Melissa Mark-Viverito, Office of Congressman José E. Serrano, Office of the Bronx Borough President Rubén Diaz, Jr. New York City, Housing & Preservation Development, New York City Department of City Planning, New York City Economic Development Corporation, New York City Council, Division of Community & Economic Development, New York City Department of Health and Mental Hygiene, Bronx Community Board One Manager Cedric L. Loftin, Mother Martha Overall from St. Ann's Episcopal Church, and Concord Avenue Block Association. They conducted a community visioning session led by Curtis+Ginsberg

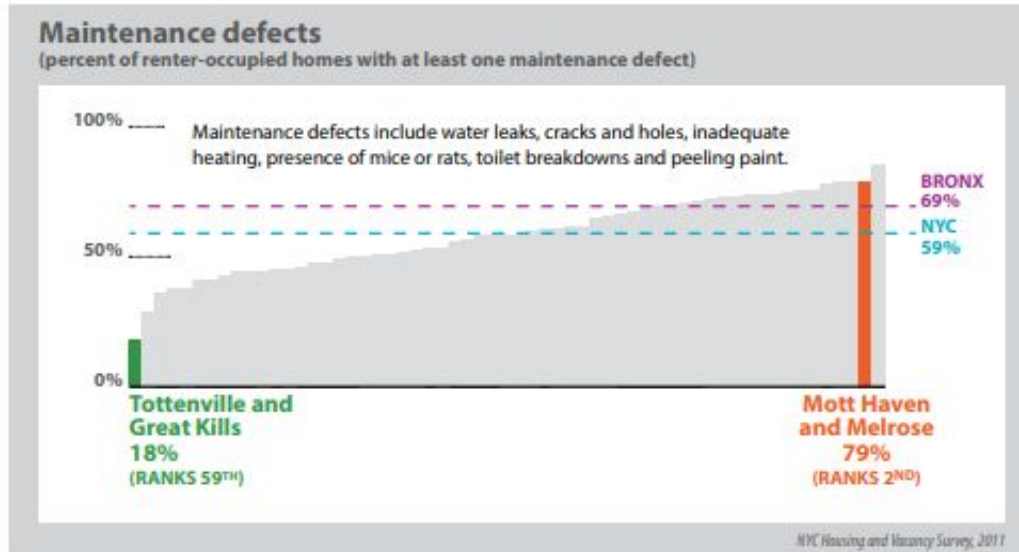

Architects, a resident survey with 151 responses, architectural and financial analysis of key sites. Based on their community engagement process, they found public concern to be at the forefront of concern; job opportunities, social services, youth programs, and better retail followed.

Diego Beekman, Bronx Borough President Ruben Diaz Jr, and U.S. House of Representative Jose E. Serrano announced on September 12, 2018 the emergence of Justice for the Bronx, a coalition whose mission is to stop a new jail from being developed on 320 Concord Avenue in Mott Haven.

Diego Beekman is a local neighborhood institution that has done its due diligence to work with various stakeholders and residents as well as addressing some of the dire issues of the area like poverty and housing. Bronx Community District 1, which encompasses Mott Haven and Melrose, is ranked 2nd of 59 New York City neighborhoods for have the most maintenance defects which include categories such as water leaks, cracks, holes, inadequate heating, presence of mice, toilet breakdowns, and peeling paints.

Housing quality

Poorly maintained housing is associated with negative health outcomes, including asthma and other respiratory illnesses, injuries and poor mental health. **Mott Haven and Melrose** has one of the highest percentages of homes with maintenance defects in the city.

The City Council want to process all the proposed jail sites simultaneously through the ULURP process at the same time so stalling a Bronx site would stall the other sites which could be detrimental to the goal of closing Rikers at least by 2028. There should be time for Mott Haven residents, the City and other stakeholders to analyze, negotiate, modify, and consider the Diego Beekman Neighborhood Plan. The expediency in which Rikers needs to be closed and other sites redeveloped should not be used as a crutch to bulldoze communities in accepting an undesirable land use where it has already been oversaturated with such uses.

The City should not cite a jail in Mott Haven and go back to their search for a site that fits the criteria they identified:

- Proximity to courthouses

- Accessibility to public transportation
- Sufficient size to fit a facility
- City-owned land to expedite development process

Before announcing a site, the City should conduct a listening session in the communities they are considering to put a jail facility so communities really have a chance to provide reasons for their opposition or support and offer alternative ideas. This idea was provided by a long-time activist in the South Bronx, Mychal Johnson.

Another thing the City of New York can consider is the implications of ending pre-trial detention which may drop the numbers low enough where the City would not even need to construct a new jail in the Bronx. Again, the U.S. legal system is supposed to presume one's innocence until there is evidence in a trial to prove otherwise and wealth should not be a factor that gives preferential treatment when it comes to justice.

For the City of New York to close the jails on Rikers Island and push for legislative policy that is driving the incarcerated population to under half their initial populations is commendable and there is a long road ahead to see this accomplished while heading to the ultimate end of a more just New York City. While moving towards that end, the City of New York should lead the country in having an inclusive, just process throughout the journey.

(This public comment is a part of a thesis in progress for Pratt Institute's Masters in City and Regional Planning and was sent in unfinished for expediency and necessity to meet the 10/29 deadline for public comments. The final citations are still in progress.

"Dear Mr. Howard Judd Fiedler

I am writing to express my Strong Opposition to building a jail in Kew Gardens. I am opposed for the following reasons.

- 1) Fear of crime if a prisoner escapes (prisoners do escape jail cells in Rikers Island). True, it's not a frequent occurrence but even if that happens they are caught before they leave Rikers Island. If a prisoner escapes there is a greater chance of him going on a crime or murder spree before he is caught. Even if one person or child falls victim to an escaped prisoner that is one crime that could have been prevented.
- 2) Building jails in Kew Gardens will increase congestion in an already congested neighborhood
- 3) The cost will be billions of dollars. My property taxes on my co-op just increased. The costs of building a jail cell will increase my property taxes even more (so this can be considered taxation without representation). As a co-op owner I am already paying a tax rate that is 3 times as much as affluent home owners that own million dollars homes in exclusive neighborhoods like Park Slope.
- 4) If you are truly so concerned with the welfare of inmates in Rikers Island the quickest and most cost efficient way to change things is to do studies by consultants, psychologists etc on more effective and humane ways of treatment for them. So instead of waiting 5 or 8 or 10 years when the buildings are complete you could start making changes in 3 or 6 or 12 months once consultants or psychologists study this issue and make recommendations
- 5) It would be cheaper to just either renovate building by building (or even tear down and reconstruct the buildings that are in really bad shape) in Rikers Island. This could be done much sooner than 5 or 8 or 10 years so the inmate population would benefit.

Hoping as a voting resident of Queens who pays property taxes my voice matters.

Thank you.

Yours truly,

Wendy Pincus

OCTOBER 15, 2018

Mr. Howard Fiedler

NYC Department of Correction
75-20 Astoria Blvd, Suite 160
East Elmhurst, NY 11370

Dear Mr. Fiedler,

I am writing to comment on the Draft Scope of Work for the proposed Queens facility in the Borough-Based Jail System. The points below detail misleading, incomplete, and inaccurate information that was presented to the residents of Queens at the Public Scoping Meeting on September 26th in Queens Borough Hall. I strongly oppose the proposed Queens facility based on the following points:

- On page 87 of the Environmental Assessment Statement, the answers to Question 9 and all of its sub-questions identify the proposed Queens facility as having hazardous materials. The specific materials cited are underground diesel tanks (including open-status spill related to a former tank) and nearby dry cleaner (State Brownfield site). The fact that something can be categorized as an open-status spill concerns me. I'm more concerned about how this fact was hidden on page 88 of a 91page document without being explicitly cited in the Public Scoping Meeting.
- The proposed Queens facility is serviced by 2 subway lines, the E and F trains. According to information published on <http://dashboard.mta.info>, the on-time performance of the F train has been between 32.2% and 50.9% for the 12 months ending on August 31, 2018. The on-time performance of the E has been between 47.4% and 61.5% for the same period. There is currently no measurement of how many people are left behind to wait for the next train because the train they seek to board is already overcrowded. Page 88 of the Environmental Assessment Statement answers yes to the following questions in 13.b:
 - Would the proposed project result in more than 200 subway/rail or bus trips per project peak hour?
 - If "yes," would the proposed project result, per project peak hour, in 50 or more bus trips on a single line (in one direction) or 200 subway/rail trips per station or line?

Based on the answers published in the EAS, it's clear that both the E and F trains will be adversely impacted.

- On page 88 of the Environmental Assessment Statement, question 14.b asks if the proposed project would result in conditions outlined in Section 220 in Chapter 17 with regard to stationary sources. The yes box is checked. Directly beneath that the sub-question: *If "yes," would the proposed project exceed the thresholds in Figures 17-3, Stationary Source Screen Graph in Chapter 17? (Attach graph as needed).* Both the yes and no boxes were left unchecked. Additionally, a note was added: *See Draft Scope.* I read the Draft Scope of Work from 8/15/2018, the same date as the Environmental Assessment Statement. There is no graph or mention of any air quality conditions resulting from the Queens facility.
- Will moving inmates from Rikers Island really contribute to solving the problem? Clearly, there are issues with defendants being wrongfully held in Rikers Island. Speedier trials and some sort of bail reform are part

of the answer. However, there will still be a population in the city's jails that should not be allowed on the streets while awaiting trial. This is why judges have the authority to remand defendants without bail. An "experiment" is currently being conducted in the Horizon Juvenile Center in the Bronx. According to a report in the New York Daily News on Tuesday, October 2, *Gang members were involved in nine or 10 weekend incidents. A fight between two Bloods members Sunday night quickly escalated to involve 16 teenagers before a dozen correction officers were called in to pull the teens apart.* Another article in the Daily News on Thursday, October 4 states, *Up to 20 city corrections officers were injured in a massive fight at the Horizon Juvenile Center in the Bronx Wednesday morning.* These officers weren't allowed weapons, or even something as non-life threatening as pepper spray. It's clear that moving these juvenile inmates from Rikers Island did not stem the violence. What's even more clear is that politicians and administrators made the executive decision that the assigned corrections officers would be unarmed in any way. These politicians and administrators have likely not spent any time in the shoes of these corrections officers. Therefore, they were making decisions without first hand knowledge and experience. These are the same politicians and administrators that would move adult inmates from Rikers Island to my neighborhood. Based on the results in the Horizon Juvenile Center last week, I do not trust their judgement. I do not want this violence in my neighborhood.

- At the Public Scoping Meeting, one of the slides presented was of the Las Colinas Detention Facility in San Diego, CA. This facility was sited as a model of what we can expect in our neighborhood. This is a complete misrepresentation. The Las Colinas Detention Facility is a 2 story, adult women's jail on a sprawling, 45-acre property. The proposed Queens site would be a 29 story, general population facility sitting on a 5-acre lot. They are 2, completely different facilities and are in no way comparable.
- The Close Rikers Brochure states, "Since the Brooklyn Detention Center reopened in 2012, the average home sale price increased by 14%. According to this webpage on Zillow.com <https://www.zillow.com/brooklyn-new-york-ny/home-values/> the median average sales price in the borough of Brooklyn in December 2012 was \$487k and the August 2018 median average sales price was \$684k. This is a 40% increase. Assuming that the brochure is speaking of the area surrounding the jail, a 14% increase when compared to the borough average of 40% is paltry. In fact, the argument could be made that the jail *prevented* property values from appreciating as much as they should have.

In my points above, I have cited missing information, incomplete data, evidence that this new facility will not solve any problems, a misleading comparison, and contrived data. Based on this, I strongly object to a new jail being constructed in my neighborhood. I urge you to either reconsider your plans or perform a complete, thorough, and honest assessment to present to the taxpayers of Queens County.

Sincerely,

John Pinto

I am responding to the thought of Rikers Island and the idea of placing the jail in four locations through out the city. I think the idea of placing the jails into residential areas is appalling, particularly the one in Brooklyn. This jail will be placed in the busiest area in Brooklyn. The area is one of New York's overcrowded area. The area is flooded with the courts and detention centers in all of New York. The area is booming with growth and why would you want to place the jail at this location. Why not place the jail in your area. Why not close the detention center. And sell the property to private investors to develop a residential building and I am sure you would be able to sell it for at least

100,000,000.00 or perhaps

200,000,000.00. This money would enable you to create a fund to redo Rikers, or move it to a less sparse area. This move to Brooklyn would hurt the Democratic Party and Mayor bill de Blasio for years to come. Why does the Mayor have it placed near his home. This idea is just not a good one for all of Brooklyn. It will be a bad idea for years to come. Please consider my suggestion a good one for the Mayor and the future of the Democratic Party.

"

Crime tips from Eric Rapaport

Crime tips from Eric Rapaport

The following is who I am in relation to law enforcement:

Yes, I am formerly commander and director Rapaport of the CIA. The Central Intelligence Agency fired me so that they could get away with bank frauding me for money I made writing small parts of microsofts product line and for money I made writing various movies, without being prosecuted. The agency also stole 4-5 congressional Medals of Honor from me.

I initiated the Aldrich Ames investigation.

CMH #1 - Colorado cannibal war

CMH #2 - Arizona cannibal war

CMH #3 – Somalia

CMH #4 – The China incident

CMH #5 - All other over sees ops. Iraq, Yugoslavia, Pakistan, Fiji, Panama, Ect.....

Here are your crime tips:

I read that Steven Seagal accused of multiple counts of rape and it is being investigated by Beverly Hills PD.

In 1996? I got Steven Seagal off of rape charges at his request in Aspen for 1 million to the victim.

I suspected that he might kill her and take the money back after he paid so I made sure that her family and CIA Director Tom Roberts had the evidence on the money.

This is true (what I wrote above this line did happen).

Did the following happen?

Did Steven Seagal kill his victim and her family and take the money back with or without CIA director Tom Roberts help?

The following is what Steven Seagal did to me (I have also been a screen written for most of my life)

I wrote Hard to Kill, Marked for Death and The Patriot 1996 - 400k paid - Steven Seagal has refused to turn over any evidence of the payment. The money was deposited into Nationwide bank uptown Blvd. in Albuquerque which is now Bank of America and the bank will not admit that the check ever existed.

I also wrote parts of Above the Law and small amounts of other Steven Seagal movies.

Next Subject:

The only connections between the Seagal case and this case would be Aspen PD and bank fraud.

A very long time ago I wrote, produced and directed a decent amount of Oh God with John Denver.

A very short amount of time before John Denver supposedly died in a plane crash Mr. Denver paid me either 700K or 1 million (I don't remember which figure). I either deposited the money in Bank1 which was at Broadway and Canyon in Boulder or I might have deposited the check at Nationwide bank uptown Blvd. in Albuquerque which is now Bank of America.

It is possibly that whoever bank frauded me for the millions of dollars that I had in each account murdered John Denver. His wife refused to turn evidence on the check or to admit that the check did exist. This would make John Denver's wife guilty of conspiracy to commit murder against her husband and also guilty of conspiracy to commit Bank Fraud / Bank Robbery.

Thank you
Eric Rapaport

"Attention: Howard Fielder

Hello,

I am a BHOD neighbor living just across Boerum Place from the facility. I agree with those who believe that the plan announced by the City is seriously flawed. I join the BDC neighbors in calling for a planning process for a borough-based plan that:

1) is transparent with regard to the assessment that underlies how the City determined its four jail, 6,040 bed proposal and clearly indicates how the City has arrived at a 1.4 million square foot jail for Brooklyn;

2) is reflective of meaningful community engagement;

3) identifies the other alternatives that were considered by the City and Perkins Eastman, but were discarded for purposes of the environmental assessment process; and

4) creates smaller jails that do not impose strong adverse impacts on those who operate the facility and are housed within it, and on the communities in which they are located.

Given the inherent limitations of the City's one-size-fits-all approach, I further request that the City create a separate land use approval process for each of the boroughs so that the proposed facilities' scope and impacts can be more effectively studied. More critically, I request that the scoping and land use approval process be suspended until there is real engagement by the Administration with the communities affected by the plan and before billions of public dollars are spent to create a system that fails its most basic objectives of creating a better, safer and more humane jail system.

Thank you for your consideration.

Casey Reckman

199 State Street

yoner@fastmail.fm

"Hello,

I am writing today as a longtime NYC resident and as a former professor at CUNY to urge you to stop building new jails before closing Rikers. I am hearing that there are plans to build jails BEFORE you close rikers. There should be fewer incarceration centers and not more. Please have the BdB administration show a commitment to closing rikers permanently and then discuss how to deal with crime.

Thank you,

Dr Y Reinberg

Bedstuy, Brooklyn

"

Pam Reinertsen

pamreinertsen@gmail.com

"We have lived in Kew Gardens for 40 years across the street from Queens Borough Hall and the Criminal Court. We are deeply distressed by the deterioration of the quality of life in our community in recent years caused by, among other things, the increasing presence of dangerous homeless people along Queens Blvd. , problems stemming from the hotel/homeless shelter on 82 Ave, overdevelopment, unbearable congestion and increased serious crime on the E and F subway lines, litter and other signs of a neighborhood in decline due to circumstances beyond the control of the residents of this formerly pleasant area.

The death knell for Kew Gardens as a livable community will be the implementation of the inane concept of community jails. There is no logical support for such a proposal. Jails are inhabited by individuals accused of serious crimes who ought to be segregated from residential communities, not woven into the fabric of a community of working class residents.

We have attended community meetings and read extensively about the bases for closing Rikers and placing hugely expensive, expanded detention centers in the midst of our neighborhood. The exorbitant expense of this project and the negative impact on the communities affected negate any argument that Rikers should be shut down and its myriad problems transferred into the midst of residential areas.

Given the muted reaction to or open support displayed by our elected officials to the 21-story hotel which rapidly turned into a homeless shelter, causing devastating deterioration to our quality of life, we often wonder whether NYC's politicians are actively trying to empty the city of middle class taxpayers, leaving behind only the very wealthy and the very poor. What will become of Rikers? A new gated community for the uber rich with panoramic water views of the Manhattan skyline? How did the transfer of the juvenile population of Rikers to the facility in the South Bronx go? A disaster, to put it mildly.

There are problems that need to be resolved on Rikers. Those issues will not be ameliorated by closing the facility and transferring those problems into stratospherically expensive new high rises located within residential communities for criminal detainees or convicts serving short sentences. In the interest of public safety and quality of life for middle class taxpayers, the more sensible solution would be to find a workable solution at Rikers.

We are particularly unsympathetic to any argument that moving a jail filled with dangerous individuals to the boroughs will improve their plight by making it easier for family members and legal counsel to visit. Please. We both commuted to our jobs in lower Manhattan on public transportation for decades. We exercised our judgment and self discipline to ensure that we arrived at work on time. If vans are getting to court late, do what we did. Get up earlier and leave at a time geared toward arriving on time.

Of the many assaults on the working class by this administration, the plan to close Rikers and spend a fortune that could be used on health care, libraries, schools or other projects to enhance the lives of New Yorkers is an unacceptable outrage. This proposal must be rejected. We will devote our time and effort to unseat any elected official who does not vigorously condemn this newest proposed assault on our safety and quality of life.

Pamela and Arthur Reinertsen

"Hello:

As a native Brooklyn resident, we are very concerned about having Riker's inmates relocated to our neighborhood. Brooklyn is undergoing a metamorphosis which is a paradox, revitalization in low income areas yet gentrification only benefitting real estate developers and affluent residents. We now have nearly the legalization of marijuana, increased crime and no hospital thanks to Gov Cuomo and DeBlasio. The booming population has NYU Langone Cobble ER, a dangerous and unethical ER.

Cobble Hill and neighboring areas have lost the safety of its once intimate community. Thanks to bi-partisan politics, we now have an overpriced, dense neighborhood with ongoing construction and malfeasance of real estate developers pushing out rent stabilized and control tenants for luxury condos. The last straw is having a prison in Brooklyn with hardened criminals.

Rikers is the appropriate location to punish criminals; Brooklyn should not be the sanctuary location to house dangerous criminals with inmates' ""families"" visiting the Brooklyn prison- now able to smoke pot openly polluting our streets with marijuana. Carroll Park has minority teens from other areas smoking pot in the morning. We don't need inmates family's crowding our streets possibly increasing more crime.

Liberals are spending too much time on legalizing drugs, upholding black lives matter when all lives matter including black lives, reducing police stop and frisk for the right reasons, introducing injection site stations for heroin and focusing on mass incarceration.

In the 80-90s, the Brooklyn detention had escaped prisoners. The city shall be held legally responsible should Riker's inmates escape and harm residents. Brooklyn does not need to be burdened with more construction and higher taxes to support criminals.

Plum Island is the perfect location for Riker criminals. Should the city build a prison, it will lose residents because we will fight the city and move should the prison be built. We are tired of the ridiculous Liberals wanting to remove the Christopher Columbus Statue, yet have no problem welcoming hardened criminals/thieves/rapists/sexual predators into our neighborhood.

We don't welcome a prison of this magnitude 1.4M sq feet; once again-we will group together and fight the city should a prison be built. Keep criminals in Riker's island where they belong. Each day on the subway to work, I fear crime is increasing with pan handlers aggressively demanding money. We don't need more criminals in Brooklyn.

I was a Democrat but have left the party over these issues. Please don't build Riker's in Brooklyn. Ultimately, high tax paying citizens will leave New York and we will stop supporting NYC.

Thank you,

Concerned Resident

"

Please do not ruin our community in Kew Gardens <x-apple-data-detectors://0> . Please listen our pleas for a safer and less congested neighborhood. Please listen to the mothers who do not want their children living across the street from a prison. Please listen to the women and men who will be scared to walk to the train when it's dark outside. Please do not depreciate our property value and push the middle class down. Please!

You are not thinking about the communities because if you were you'd understand the burden that you are making us carry. You claim that there will be economic development, but economic development is contingent on people's perception. The moment you start construction, my neighbors will start selling their homes and apartment. The concerns and burdens that you are infusing into this community will not lead to economic development. You claim that it will be safe, but you cannot control who comes to visit inmates. You cannot control what inmates do the moment they are released. But you are okay releasing them at my door step? You are okay with releasing a child rapist 2 blocks away from a school while children are coming out school? Think about that the next time your child or grandchild is walking home from school.

You also claim that you will be able to make jails safer for the intimates with the borough based jails. Yet, us residents have heard no discussions of alternative options. If your main concern is really the safety and humane treatment of the inmates, why don't we see studies of why the borough based jails are better than investing in the current jail? Bringing jails to residential areas cannot possibly be the only solution. Why not create jails in more secluded parts of the boroughs? Why aren't we, the people being affected, not being involved in the discussion or the decisions.

Please, protect our community.

Thank you,

From A Concerned Resident

"To Howard Judd Fiedler AIA, Government Representatives, and the Mayor:

The purpose of this email is to say NO to the proposed jail for Kew Gardens.

I have never sent a letter like this, but as a woman and law abiding citizen I have not experienced my rights as being supported or protected by government representatives for many years. This proposed jail to be built in Kew Gardens has gone too far for me to continue to suppress my voice. When can women, or any law abiding citizens, feel safe living here? Many of us cannot even listen to the crime saturated news anymore. This proposal serves as an emotional trigger for victims of crime in these surrounding neighborhoods who have been experiencing PTSD. There are many valid reasons to not build this jail in Kew Gardens. Some of the reasons include:

- * Research does not indicate that a jail for a large population of individuals convicted of crime is beneficial for anyone

- * Closing the prison on Riker's Island, and building a large facility in a relatively safe community is not examining and resolving the issues that occur daily in correctional facilities

- * This proposal can have a significantly negative effect on the health and well-being of the individuals in the surrounding communities and the communities as a whole

- * The rights, protection, and safety of law abiding citizens are being ignored and negated

- * The current stress related to traffic, noise pollution, and lack of safety and security will be increased tenfold

- * Years ago there was a detention center and helicopters were constantly flying over the neighborhood to catch escapees

DO NOT BUILD THIS JAIL IN KEW GARDENS!

"

Nina Riddel

twothousandmilesaway@gmail.com

"In regards to the borough-based jails proposal,

I fully support the immediate closing of the jails on Rikers Island. I also strongly oppose the opening of any new jails in New York City. It would be a huge waste of progress on Rikers to replace it with yet another jail.

Alternatives to locking people up, which would reduce the need for cell, include:

*

Ending cash bail and pre-trial detention. Community supervision is successful, you said so yourself in the More Just NYC report.

*

Divestment from jails and policing. Invest in community resources. Invest in public schools and actual affordable housing. Funding for affordable housing has already been misappropriated by the government to pay for prisons. This must stop.

*

End broken windows policing and all practices which the NYPD uses to harass communities of color.

*

Decriminalize poverty, homelessness, mental illness, and substance use. Treat these conditions and avoid locking up their sufferers.

The current proposal from the city demonstrates that the Mayor and his officials are committed to racist over-policing and to caging people of color. I am staunchly against the city proposal to open new jails. We can close Rikers without opening new jails.

Sincerely,

Nina Riddel, Brooklyn

"

Daniel Rigazzi

danrigazzi@mac.com

"Dear Mr Fiedler,

I'm a long time resident of Kew Gardens and I'm reaching out today to express my opposition to the Queens Jail Proposal.

Kew Gardens is a small residential community. The new jail will be close to two different elementary schools and a middle school. Our subway and bus stops, already overcrowded, will become even more so, and with undesirables. Quite literally, with criminals.

The additional traffic will crowd our already log-jammed roads and highways. Street parking, already an issue, will become impossible.

Why not open this jail in an industrial area of Queens? There are plenty. No one should have to live within walking distance of a large jail. This jail would ruin our beautiful neighborhood.

Thank you.

Best,
Dan Rigazzi

"To whom it may concern:

I'm writing this email to bring my concern for the proposed jail in Kew gardens to light. I have lived in this Kew Gardens neighborhood for approximately 10 years and am a home owner. I have to say that I'm very disappointed with the lack of communication that's been show to the residents of the area. I attended the borough meeting on 9/26 and the forum that was provided was the first for our residents. Although I understand the concern with the jail at Rikers Island, I don't believe the solution is creating jail in the middle of a residential area, with a number of schools within walking distance.

In closing I want to make my point evident that I'm am not in agreement with the proposed jail in Kew Gardens.

Thank you,

Adrian Rios

"

Cal
"

Jose Rodriguez

cabrinihope@gmail.com

"To Whom It May Concern:

1- I unequivocally reject the city's plan to site a new jail at 320 Concord Avenue in the South Bronx, and I oppose the construction of any new jails in New York City.

2- A new jail at 320 Concord Avenue is in direct conflict with locally-driven, grassroots efforts by the Diego Beekman Mutual Housing Association to develop the community in a way that respects the long history of organizing by Bronxites who struggled through years of abandonment and neglect.

3- We don't want a new jail built, period. Over the last 25 years, the city's jail population has fallen from a high of 21,674 in 1991 to under 9,000 earlier this year, accomplished through a combination of falling crime rates and criminal justice reforms. The plan to replace Rikers assumes a need for 5,000 jail beds in ten year as reforms continue. We challenge the city to come up with a more aggressive plan to further reduce the number of people in jail, thus making the need to construct a new facility unnecessary.

4 -We will not accept more spending on infrastructure that coerces and controls when our neighborhood is in desperate need of community-driven development. Our community demands: community centers, the creation of green spaces, living wage jobs, truly affordable housing, and other investments in positive things that would alleviate the conditions that push so many into the criminal justice system.

5 - Building a new jail at any of the proposed sites would have a significant adverse impact on the environment, including with respect to noise, air quality, displacement and traffic, all of which require extensive study pursuant to the City Environmental Quality Review (CEQR), particularly in overburdened communities like the South Bronx.

Finally, I stand with the nearly 2,500 people who have signed a petition against building a new jail at 320 Concord Avenue in the South Bronx. While we applaud the city's plan to close Rikers Island, the answer is not to expand the criminal justice footprint – not in the South Bronx, not anywhere.

Sincerely,

Jose Luis Rodriguez

"

Hrodec R

hrodec@gmail.com

"To : Mr Fiedler

This email is being sent with the strong intent to disapprove the neighborhood jail proposal for Kew Gardens, Queens. I whole heartily agree with every unacceptable item listed in article by The Community Preservation Coalition. Some of those items include the following.

Building a jail complex would be at 2-block proximity to two public elementary schools and very close to 1 private middle-high school – Who in their rightful mind would think building such a complex to host criminals would be suitable next to schools. One would think zoning regulation would mitigate else wise to prevent such to occur.

Heavily over-crowded E, F, M & R trains and the Q60 bus, each with consistently very poor performance records, will become additionally crowded, dysfunctional, unreliable and unpleasant with the addition of the proposed jail-related commuters.

Additionally we already have a homeless shelter that is within the same 2 block radius of the elementary schools. Those that are housed in the facility now called the Umbrella hotel (wonder why this has already gone through 3 names changes) are constantly roaming the streets, pan handling and or loitering.

This is very unwelcoming considering my wife and I are working so hard to provide for our children in an area that is and now potentially 'was' a great place to raise a family if one could afford it. This shows children that no matter how hard one works to provide and live in a great area that maybe outside ones price range can potentially still be no better than that of a housing complex given the people who can potentially be housed adjacent to you.

I close by again stating that is would be another negative impact to our community and to our way of life.

Hector Rodriguez
Resident of Kew Gardens via Kew Gardens Rd

"

AURA ROSENBERG
180 PARK ROW
CHATHAM TOWERS

We, the residents of Chinatown, the Lower East Side, Tribeca and the Financial District, oppose Mayor de Blasio's plans to build a new prison in our neighborhood. We demand that the mayor and Margaret Chin withdraw the scope and listen to us. The claim that this new jail will afford prisoners and detainees more humane conditions is a trick. It's really a decision based solely on real estate interests.

In 2013, Mayor Bloomberg initiated a plan to renovate Riker's. His City Comptroller's office announced a multi-million dollar contract with architects and construction companies working on a "New Rikers Island Facility." Bloomberg's plan would have offered inmates improved programs and mental health services – improvements that we in the Chinatown community applaud.

At the time, Bill DeBlasio said: "if you think that closing Rikers and creating a ... whole lot of other jails without changing the fundamental culture and the approach to corrections is gonna achieve something I think you're missing the reality of what we're facing." Those are DeBlasios's own words!

But by 2015 he halted plans to turn Rikers into a humane facility. Suddenly, he and Margaret Chin decided to build a 40 story jail in our neighborhood. Why was the Rikers renovation abandoned? One answer might be CORRUPTION. It was the Lippman Commission that urged the city to close Riker's. And what did Lippman want? According to Elias Husamudeen, President of the Corrections Officers Benevolent Association, only two people on that commission had any experience with jails: "the majority of people on the committee are real estate developers...the decision has nothing to do with helping detainees and everything to do with business". Moreover, Husamadeen cites a second report overseen by Lippman claiming that the city stands to gain 17 billion dollars if the island is developed for LaGuardia Airport.

Bill DeBlasio and Margaret Chin sold out our community to these interests. Let's stop the 4th jail in Chinatown. If Margaret Chin refuses to listen to us, we need to remove her from office. No new jails in Chinatown!

Rita Orlov Rosenfeld

ritaorlov@gmail.com

"To whom it may concern,

I am writing this to you regarding the borough-based jails proposal. I fully support the immediate closing of Rikers Island but strongly oppose the opening of any new jails in New York City. There is no such thing as a humane or safe jail.

Majority of the people who are sitting in Rikers right now shouldn't even be there in the first place. NYC needs to end cash bail, pre-trial detention, and broken windows policing. By ending these practices, already thousands of people should be released. Instead of spending public money on opening new jails and detaining more people, NYC should be investing in community resources, schools, and alleviating poverty. Instead of arresting people for jumping the turnstile, low-income New Yorkers should be given free metrocards. Not only would this improve the living situation for many, it's a much more productive use of funds than more incarceration. Please divest from jails and increased policing. The way to make NYC safer for everyone is to decriminalize poverty, homelessness, mental illness, and substance use.

The current proposal from the city demonstrates that the Mayor and his officials are committed to racist over-policing and to caging people of color. I am staunchly against the city proposal to open new jails. We can close Rikers without opening new jails, and we will all be better for it.

Sincerely,

Rita

STATEMENT AGAINST NYC'S ROADMAP TO CLOSING RIKERS ISLAND

Albert Saint-Jean , Organizer, Black Alliance for Just Immigration, and resident of Crown Heights and #NoNewJails Member

In 2013 De Blasio won the Mayor's office with the promise of bringing the "tale of two cities" to a conclusion. However, since then he's done nothing but perpetuate that tale into a never ending story. For example, the shutting down of Rikers was a perfect opportunity for the mayor to show himself as a true progressive and spearhead divestment from the prison system and investment into the communities affected by over-policing and mass incarceration. Instead he chose to build more jails after Riker's closing, not solving the problem by any means, but decentralizing it. Not taking the opportunity to address core community needs with Rikers closing is not only displaying disingenuous intent from a "progressive" mayor, but it is also fiscally irresponsible. Here, the priorities do not lie in addressing the root causes of crime and the conditions that led Rikers to its current state. The \$1.4 billion saved from closing the facility itself, and the additional \$10 billion to build more jails can go to a wide range of community centered resources. Currently, Rikers Island is the largest mental health institution in the nation, revealing a gaping hole in the city's mental health infrastructure. Upon a visit to Rikers last month I learned first hand that it is the only place in the city where many people with mental illness can get the treatment they need.

Many youth are also languishing in Rikers, a product of the school to prison pipeline. The city currently spends \$750 million policing schools while crowded classrooms and racial segregation are pervasive throughout the system. Yet after-school programs and extracurricular activities are chronically underfunded. Programs like summer youth could potentially reach all unemployed youth in New York City and employ them year round with a fraction of the money used to close Rikers and from the \$10 billion saved from not implementing the mayor's plan.

The city must understand that Rikers is a microcosm of all the areas in which this society has failed working class and poor Black and Brown New Yorkers. In a city in which crime has been falling for decades, there is no need to invest resources into funneling more Black and Brown New Yorkers into the prison industrial complex. This is an opportunity for the city to address the needs of our communities and reimagine what safety looks like; truly affordable housing, access to healthcare of all kinds, an education system that nurtures our youth, job opportunities, etcetera. End Broken Windows Policing, end cash bail and start investing in the people. Until we do that, the City of New York cannot claim to be progressive or a sanctuary city.

This is why I stand for #NoNewJails.

Alfonse Salamina

aldie1960@aol.com

"

Dear Mr. Fiedler

I am a resident of Kew Gardens and want to express my strong opposition to the building of the 1,510 bed jail or any jail for that matter at 126-02 82 Ave Kew Gardens, NY 11415.

We are a small community and an already very congested one. We have the courthouse on Queens Blvd, the LIRR and subways nearby where many from other parts of our city come to park to travel into Manhattan. Parking here is already difficult and with the new jail and it's visitors, attorneys, police and anyone else that I may not be thinking of will cause even more congestion to an overly congested area.

The community as a whole strongly opposes the jail, as do I and my family. Union Tpke, near the jail is so very congested as are our streets from the many coming to the courts, DOB and offices which surround our area.

I ask that you hear our plea and reconsider your plan to build the jail in our backyard. We don't want it here. The area is already overcrowded and we don't want any more congestion.

Thank you for your time.

Sincerely,

Alfonse Salamina
123 81 Avenue
Kew Gardens, NY 11415

Sent: Wednesday, August 15, 2018 5:42 PM
To: BoroughPlan
Subject: Comment on Draft Scope of Work and Associated Documents

Dear Mr. Fiedler:

I write to express support for moving jails closer to courthouses and closing the outdated facilities on Rikers Island, and to provide the following comments on the Draft Scope of Work published today:

- **On-Site Courtrooms Are Essential:** I am pleased to see that many of the proposed alternatives in the Draft Scope of Work include on-site courtrooms. It is essential that these courts exist at every jail - particularly those that are not close to trial courts - and that they are modern and have sufficient supporting facilities and technology to enable them to work efficiently and ideally through the night to minimize missed work and lost jobs for people arrested overnight. Similarly, facilities should be designed to make it as easy as possible to pay any money bail requirements.
- **Build With Flexibility In Mind:** Options other than start-to-finish incarceration are becoming increasingly popular - for example, day release where a prisoner only spends the night at jail while working outside the jail during the day, weekend-only sentences, or combinations of misdemeanor services and mental health treatment or education. Any design should not preclude innovative sentencing options.
- **Respect Inmates' Humanity:** While incarceration is necessarily not pleasant, a key principle of design should be treating people who may have made mistakes or who may have been going through a crisis with respect, treating them as future productive citizens and not as animals.
- **Include Space For On-Site Social Services:** Too often, jails become fallback housing for homeless people and fallback mental healthcare for people with mental illnesses. Building facilities for social workers, therapists, and other staff to operate on site increases the opportunities to use contacts with the criminal justice system as a chance to help people turn their lives around rather than as an endless cycle. Similarly, sufficient chapel space for all major religions and offices for chaplains are essential.
- **Include Space for On-Site Legal Aid Office:** Building public defender facilities into the jail complex in a separate area facilitates the quick processing of bail and more efficient case preparation to minimize delays due to the defense not being ready to go to trial.
- **Avoid Excessive Parking In Manhattan and Brooklyn:** The Manhattan and Brooklyn proposed jail sites are in transit-rich areas where most employees will arrive by subway or bus. Parking should be kept to a minimum, since encouraging additional driving in these areas creates congestion that may make it difficult for people to be transported to hearings in a timely manner.
- **Brooklyn Facility Should Be Able To Accept Extremely High Security Inmates, In Cooperation With The Federal Government:** The federal government often keeps very high security inmates being tried in Brooklyn federal court incarcerated in Manhattan jails. This frequently leads to bridge blockages due to transfer of inmates from Manhattan to Cadman Plaza and back. The Brooklyn facility should be designed to serve that need so that bridge blockages are unnecessary.
- **Nod to Heritage:** The Civic Center area in Manhattan - formerly Five Points - has a very long history. Any design should consider including interpretive signage or historically-inspired art.

Sincerely,

Joseph M. Sanderson

"Dear Mr. Fiedler:

I write to express support for moving jails closer to courthouses and closing the outdated facilities on Rikers Island, and to provide the following comments on the Draft Scope of Work published today:

* **On-Site Courtrooms Are Essential:** I am pleased to see that many of the proposed alternatives in the Draft Scope of Work include on-site courtrooms. It is essential that these courts exist at every jail - particularly those that are not close to trial courts - and that they are modern and have sufficient supporting facilities and technology to enable them to work efficiently and ideally through the night to minimize missed work and lost jobs for people arrested overnight. Similarly, facilities should be designed to make it as easy as possible to pay any money bail requirements.

* **Build With Flexibility In Mind:** Options other than start-to-finish incarceration are becoming increasingly popular - for example, day release where a prisoner only spends the night at jail while working outside the jail during the day, weekend-only sentences, or combinations of misdemeanor services and mental health treatment or education. Any design should not preclude innovative sentencing options.

* **Respect Inmates' Humanity:** While incarceration is necessarily not pleasant, a key principle of design should be treating people who may have made mistakes or who may have been going through a crisis with respect, treating them as future productive citizens and not as animals.

* **Include Space For On-Site Social Services:** Too often, jails become fallback housing for homeless people and fallback mental healthcare for people with mental illnesses. Building facilities for social workers, therapists, and other staff to operate on site increases the opportunities to use contacts with the criminal justice system as a chance to help people turn their lives around rather than as an endless cycle. Similarly, sufficient chapel space for all major religions and offices for chaplains are essential.

* **Include Space for On-Site Legal Aid Office:** Building public defender facilities into the jail complex in a separate area facilitates the quick processing of bail and more efficient case preparation to minimize delays due to the defense not being ready to go to trial.

* **Avoid Excessive Parking In Manhattan and Brooklyn:** The Manhattan and Brooklyn proposed jail sites are in transit-rich areas where most employees will arrive by subway or bus. Parking should be kept to a minimum, since encouraging additional driving in these areas creates congestion that may make it difficult for people to be transported to hearings in a timely manner.

* **Brooklyn Facility Should Be Able To Accept Extremely High Security Inmates, In Cooperation With The Federal Government:** The federal government often keeps very high security inmates being tried in Brooklyn federal court incarcerated in Manhattan jails. This frequently leads to bridge blockages due to transfer of inmates from Manhattan to Cadman Plaza and back. The Brooklyn facility should be designed to serve that need so that bridge blockages are unnecessary.

* **Nod to Heritage:** The Civic Center area in Manhattan - formerly Five Points - has a very long history. Any design should consider including interpretive signage or historically-inspired art.

Fabio Sborea

fabiosborea@gmail.com

"I am writing to voice my concerns regarding the 29-story inmate facility that the mayor is proposing to construct within the residential neighborhood of Kew Gardens.

1. The proposal is far larger in scale compared to simply renovating the existing facilities in the Kew Gardens location. After hearing about the vast scale of the proposed construction, I am not convinced that the mayor and his staff have adequately studied the impact that such a large structure would inflict upon an already-overburdened transit system within this neighborhood. The subway at Union Turnpike/Kew Gardens is already overcrowded. There is a choke point at the intersection of Union Turnpike and Queens Blvd where crowds of people (waiting to board express buses) and cars (constantly double parked by the subway entrance and the nearby dialysis center) struggle to navigate through the narrow area.

2. Problems do exist within Riker's Island, but a lot of those problems involve the interactions between staff, leadership, and inmates. I have not seen any proposals to address the culture, training, accountability, and interpersonal interactions within the existing correctional facilities on Riker's Island. I am not convinced that merely constructing new buildings would change how correctional staff and inmates are interacting with each other. The proposal simply "relocates" such issues rather than addresses them.

3. Where will the funds for this proposal come from? One can only assume it will come from the tax payers of NYC. Shouldn't those funds be used for something that could benefit ALL residents? Namely, improvements to the city's outdated and crumbling transit system? Or could those funds be put toward more community-oriented endeavors in order to keep NYC residents out of the prison system? Or could they be used toward endeavors that actually reform the justice/prison system as opposed to merely putting "band-aids" on the issue?

4. If the mayor feels the need to steam-roll this project over the residents who live close to the proposed sites, what incentives will the residents receive? Will transportation issues be addressed in compensation for accepting a correctional facility across the street from where we live? Will anything be done to help improve the "desert" of empty storefronts in the surrounding neighborhoods or would the new correctional facility just make these deserts even more barren?

Is there any room for compromise on this matter? Could a smaller-scale correctional facility be built to house inmates with lesser offenses or for people awaiting trial? Could inmates charged with higher offenses remain on Riker's but in refurbished facilities? This could help ease the

traffic, fiscal, and safety concerns that a lot of the Kew Gardens, Briarwood & Forest Hills citizens are having with the proposal as it currently stands.

If the mayor is not open to this suggestion, then it would appear that his proposal is a slap in the face to the tax-paying constituents of the Kew Gardens/Briarwood/Forest Hills neighborhoods as well as the Manhattan, Bronx and Brooklyn neighborhoods that would be effected by their respective jail structures. The fast-tracking of the proposal reeks of something that was made to only benefit construction firms and others who are close to the mayor's inner circle.

Not only do I wish to voice my disapproval of the mayor's actions on this matter, I also plan to voice my disapproval at the voting booth.

-Fabio Sborea

Resident of Kew Gardens, NY

"

Carmine Santaniello

carcs2@aol.com

"Dear Mr Fiedler,

I'm a concerned resident of (name of your town or city - and zipcode) and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails.

Kew Gardens, a community of fewer than 20,000 households, will be devastated, overwhelmed by the mega-city proposed.

A 1510 inmate jail complex two blocks from 2 public elementary schools and very close to 1 private middle-high school absolutely presents problems to young children walking our streets.

Our neighborhoods are already burdened with tremendous motor traffic at the bottle-neck created by four adjacent highways: Grand Central Parkway, Long Island Expressway, Van Wyck Expressway and Jackie Robinson Parkway.

Hundreds of cars and trucks destined for the jail, e.g. deliveries, services, day & night time staff, guards, administrators, medics, legal aids etc. will exacerbate the problems.

The jail would further overload Queens Boulevard at its busiest intersection: the crossings of the four already noted highways.

Aggressive commuter and commercial automobile traffic from all five major thoroughfares already traverse through this interchange – as well as through the narrow, single-lane residential side streets of Kew Gardens, Forest Hills and Briarwood used as alternatives to bypassing highway traffic – thus making the crossings and side-streets unsafe for neighborhood pedestrian traffic.

Our so-called “rich” public transportation consists of the heavily over-crowded E, F, M & R trains and the Q60 bus. Only a stranger would blithely exaggerate our ability to absorb more increases.

These are only the proverbial “tip of the iceberg” issues that impact and concern our communities. A massive city-like jail complex with its enormous construction problems will exacerbate already difficult situations – as well as bring many new problems. Our community and the infrastructure will be altered for the worst.

A small diverse and cohesive community just cannot absorb any of this without eventually being destroyed.

Kew Gardens must not be sacrificed to fulfill the mayor’s apparition!

Thank you.

Best,
Carmine Santaniello

Subject: Riker's problem

A good part of the problem of Riker's Island can be permanently solved by seeing the solutions listed at the bottom of this letter.

BACKGROUND

For someone in a low income bracket or someone who can't afford bail, they are held in prison for almost a year. During that time that person is separated from his kids and spouse. That also means that that income stops and the family may not be able to pay the rent or buy the type of food they usually have. That means the other spouse will have no one to watch the children while they work or are out looking for a job. They probably will have to go on welfare or go to a homeless shelter.

If the children are placed in either child care or pay someone to watch the children that will cost money. And since they don't have money to pay someone, child care may be the alternative. Either case, the children suffer. They face psychological problems of being separated from their parents and thrown into a strange environment. That environment could be a bad environment which will result in crime later on, or it could cause the children to hate the government in later life and cause them to take action against the government.

MONEY

It cost money to support the prisoner for upwards of a year. It costs money for that family to go on welfare. It costs money for child care. If YOU check the figures for these items, they probably exceed

50,000 per prisoner.

New York city has been thinking of closing Rikers Island. Think of the money that would be saved if the average time spent in prison was reduced to a month or two. The population of Rikers Island would be reduced by 75

. Or if the prisons were moved to the boroughs, those prisons would be small in size.

SOLUTION

A) Increase the number of judges

B) Create a new department to handle the red tape and the pretrial information so that a judge will not be required.

C) Do both

This will reduce the time for a trial to a month or two from start to finish.

POINT

Do a financial study (including the psychological, short and long costs) and see how much money the government will save.

John Sendlein

dshaman791@aol.com

dshaman791@aol.com

"I am writing to express my dismay at the proposed mega jail that is supposed to rise behind Borough Hall in Kew Gardens, Queens. Not only is this 30-story behemoth entirely inappropriate for this neighborhood, it also violates any sensible planning for a new jail facility. It will further congest our already congested streets, severely impact parking required not only for jail personnel, but also visitors, and will be an ugly blot on what is a quiet neighborhood of mostly single-family houses famed for its title ""urban village in the Big City."" Why would you wish to destroy this rare gem?

It will also cost billions of taxpayer money better spent on taking a look at the current Riker's Island facilities and seeing what can be done to renovate and humanize the facilities that are currently there.

Even from an inmate's point of view, being housed in a monolithic structure without easy access to the outdoors is in no way an improvement of the Riker's Island experience. I urge you, our elected officials and other concerned citizens to consider the destructive effects this proposed building would have not only on our Kew Gardens neighborhood, but also on the jail inmates you say you are trying to help.

Take the current facilities, renovate them, humanize them, and you will be doing far more good than alienating neighborhoods that include not only ours, but others where these proposed facilities are to rise, in addition to further dehumanizing the conditions these inmates live under.
Diana Shaman

"

Rosmary Sherman

rgalsherman@gmail.com

"This will devastate this community.

The neighborhood can not handle a 29 story building. This will be another Rickers Island, but located in a residential neighborhood. It makes no sense and will destroy the old fashioned grace and spirit of our diverse, close knit community.

No jail in Kew Gardens. It totally defeats the reason for the jail, alleged prison reform?

This was done quietly without community involvement. Shame on you.

Rosemary Sherman

"

yma sherren

ymasherren@me.com

"Howard Judd Fiedler, AIA.

Hon. Council members

We are very upset as are most of the owners and tenants living in the Silver Towers building at 125-10 Queens Blvd <x-apple-data-detectors://0> , we have a homeless shelter behind Borough Hall and recently a homeless hotel just around our corner. Erecting a 29 story jail in our neighborhood would add further deterioration and unpleasantness in our residential area. We have seen industrial areas near Laurel Hill Blvd that would be better suited than any residential locale in Queens.

We are also enraged over the process that seems to have minimized our opportunity to supply input in opposition to what appears to be a pre ordained decision.

We hope that you will speak to your colleagues at the council and be the voice of our opposition. Hard working people who have invested their life savings in this venue surely must have a say in the future of their neighborhood.

How is it that a new jail has to be built here? Why should criminals have what amounts to a brand new accommodations, a free medical facility that most honest working people don't have access to, but will be expected to pay taxes toward this fiasco of a plan.

Have any of you who probably don't own property or have children going to school in this neighborhood even considered the damage to honest productive lives this will bring. Maybe we will all leave the area and take our hard earned taxes with us, then who's going to pay for this silliness.

A new jail won't solve any thing but perhaps speeding up the process of processing prisoners that stay in jail because they can't afford bail or are in for jail for minor reasons may help.

According the mayor, bragging about how the inmate population is shrinking, how is it that there is need for new jail?

Just fix up Rikers Island and stop the corruption.

Sincerely

Yma Sherren
Apt 1011
Silver Towers

To Howard Judd Fiedler, Director of Design Unit at Department of Corrections,

Please vote No regarding the proposed jail complex for Kew Gardens. I have been in Kew Gardens for a little over nine years and it is a disturbing proposal to move a jail facility into a thriving residential neighborhood.

I have read the proposed benefit to those that work at the jail and the inmates, and have seen no viable arguments that demonstrate how those outweigh the needs and rights of the over 50,000 people that make this community home. Increases in congestion and noise associated with the construction and operation of the facility, the added stress on sanitation and water, in conjunction with the risks associated with placing a prison complex adjacent to three public schools are incomprehensible compared with utilizing the existing prison location. Queens has many industrial zoned neighborhoods for the explicit purpose of housing industrial complexes like this, and they should be used for this purpose! It is unethical to place an industrial complex in the middle of a residential neighborhood, in violation of a century of zoning laws designed to stop such practices.

This community has seen what stresses this type of development can/will cause. For example, our neighborhood has already been affected by the Department of Homeless Services placement of homeless individuals in our neighborhood, and been adversely affected. Loitering and crime have increased, residents have more paranoia and anxiety when they commute to work at off-hours, and living expenses have increased to provide greater lighting and camera installations. The proposed industrial complex of a prison will only increase this burden further.

Thank you for your time and please consider residents of this neighborhood,

STATEMENT AGAINST NYC'S ROADMAP TO CLOSING RIKERS ISLAND

Carrie Smith, Resident of District 1, and #NoNewJails Member

My name is Carrie Smith. I am a resident of Council District 1, and I work several blocks away from the proposed Manhattan site. While I applaud the mayor's announcement to shut down Rikers Island, which needs to be done and needs to happen now, I am dismayed by his plan to replace Rikers with four new, "state of the art" jails, including a massive, 40-story facility at the corner of Centre & Worth.

This plan is naive and short-sighted because it assumes that the only way forward is to replace Rikers by building new jails. Rather than acknowledging that the horrors of Rikers are not unique to the island but are instead ingrained in the use of policing and cages to control and punish vulnerable communities, this administration has misguidedly concluded that prettier, newer jails will somehow be different. That by giving them fancy names like "justice centers" or rehabilitation centers", this will mask what they really are: cages for people who cannot afford to pay bail, cages for people with diagnosed mental health issues, cages for our Black and Latinx youth.

Instead of a massive, 10 billion dollar construction project that will lead to greater community trauma and devastation, what we need is a jail closure plan that decarcerates through reducing/eliminating policing and ending pre-trial detention. These actions would allow us to close Rikers tomorrow—not in ten years—AND would mean that we don't need to build any new jails. By divesting public funds away from the DOC and the NYPD, we could instead invest in the things we actually need: meaningful, community-led solutions and life-sustaining resources for the people of New York.

In this critical moment, we have the rare opportunity to not only shut down Rikers Island, but to follow through on building real, transformative opportunities for the people of New York. I urge decision-makers to block the construction of the proposed Manhattan Jail and to join the communities' calls for **No New Jails**.

Steven Sobelsohn

ssobelso@yahoo.com

" To: Howard Fiedler, NYC Department of Corrections

Mr. Feidler,

My name is S. Sobelsohn and I have been a resident of Kew Gardens for the past 56 years. I am writing to you to express my dissatisfaction with the plan the Dept. of Corrections have come up with, to replace the current building, previously housing the Queens House of Detention with a new building housing 2500 inmates. Mr. Feidler, if you knew the area you were proposing this new structure for, you would realize it is NOT the area to do so. The juxtaposition of such a big building, with all the traffic and pedestrians nearby, would be a disaster!

Not only is there the Queens Courthouse nearby, but there is also Queens Boulevard, a major thoroughfare there, as well as Queens Borough Hall. The area is already saturated with large buildings and a site across the street could have another large building placed on it. I do not reject the placement of a facility to house inmates at the old House of Detention, but I question the scope of it. The old facility could be renovated, with fewer prisoners kept there, to lessen the impact of the jail on the community.

I was at the meeting on Sept. 26, in Queens Borough Hall.

It was funny that your representative didn't specifically mention that it was a 29-story building that was proposed and the cost of such a complex wasn't specified. The fact is, Mr. Feidler, that going before the community and NOT telling us the difference between building this building and renovating the current structure is disingenuous. I would like to know why knocking down the current structure and building a new one (or renovating the current Rikers' Island) is not being considered and given as part of the information, to the community.

Finally, Mr. Fiedler, the current municipal parking lot was just finished and its loss, for the time it takes to put up this proposed building, will be a hardship, for the community. People going to the Courthouse as well as Queens Borough Hall use that parking lot and its removal, even for the years it will take to build the new structure is unacceptable! As a Kew Gardens resident, I was wholly against this proposal and urge the Dept. of Corrections to scrap this proposal and start over, maybe with utilizing the current structure to house inmates.

It worked well when it was in operation and could be used again.

Thank you.

"

ces63@mindspring.com

"

Howard Judd Fiedler AIA
Director of Design Unit
NYC Department of Correction

Dear Mr. Fiedler,

I am writing this to tell you of my **STRONG OPPOSITION TO THE PROPOSED JAIL IN KEW GARDENS!**

This is a tragedy in the making. WHY on earth does the city want to build such a monstrosity in the middle of stable, middle class communities? Why does the mayor INSIST on building these prisons also in the other boroughs? He is shoving off the serious problems of Rikers Island onto the rest of the city, instead of dealing with the hard issues regarding controlling violent crime and entrenched criminality.

The area is already trying to deal with a homeless shelter for men that was shoved into the neighborhood within the last two years. The neighborhood badly needed a hotel, yet the Comfort Inn was then promptly turned into a shelter by the city, and is now an ""Umbrella"" hotel. And this within blocks of several public schools filled with children, who, with their parents, must negotiate around these creeps every single day. Forest Park has had an increase in homeless, and vandalism and car/home break-ins are on the increase throughout the area.

I live in Kew Gardens and have to deal with the decline in quality of life every day. Queens Boulevard and the surrounding areas have Manhattan-like traffic congestion as it is. As a pedestrian I have had many close-calls with overly aggressive drivers, and have witnessed pedestrians get hit by cars. I use the Union Tpke bus and subway stops, and now must go around aggressive panhandlers and the homeless, no police officer in sight, before I get on the dysfunctional MTA.

The massive size of this facility by itself will destroy any sense of cohesion and community. It will overwhelm ALL of Kew Gardens, Briarwood, and Forest Hills North by its demands on city infrastructure, on public access, on increased police and fire protection. DeBlasio et al. are destabilizing several of the most stable, vibrant, and diverse communities in Queens.

I am also appalled by the lack of support by our elected Queens officials regarding this issue.

Sincerely,
C Spreizer

"

Kathleen Stack

kathleen@kathleenstack.com

"Dear Mr. Fiedler,

I am writing to express my vigorous disagreement with the plan to expand the Brooklyn House of Detention on Atlantic Avenue by 8 times its existing size to accommodate more than a 1,000 more detainees. While I agree with the need to shut Rikers Island, I do not believe that simply shifting detainees to the five boroughs without a comprehensive look at how to reduce the number of people who are left detained while awaiting trial in the first place is a sensible or humane plan. In addition, if the existing building is expanded according to the released plan, it would lead to a jail being the largest building in height and scale in this part of downtown Brooklyn -- a sad and scary statement about our values. To try to solve this complex problem by simply taking this existing building and multiplying its size to this extent seems like the city is trying to take an easy way out, while leaving a blot on the neighborhood. That it would not actually ease the issue of mass incarceration--especially of people of color--but only scatter the same number of people into many communities--and into massive, dehumanizing structures at that, demonstrates to me that it is a faulty and cynical plan. I vow to strongly oppose this plan moving forward. I hope that the Mayor and city officials will re-think this plan.

Best,

Kathleen Stack
24 First Street
Brooklyn, NY 11231

"

David Stein

monsieurtiger@hotmail.com

"Dear Mr. Fiedler,

As a parent of two small children here in Kew Gardens, and as someone who lives and works in Kew Gardens, I feel I must write to you in opposition to your plan to build a massive prison complex in our neighborhood.

On so many levels this plan is a detriment to the area that we love. The traffic, congestion, pollution, and noise caused by so many extra vehicles would further hinder our ability to get around an already crowded and dangerous traffic interchange. As a pedestrian and sometime driver, I protest the unholy mess this proposal would create.

Also as a subway rider, I know too well how strained the subway and bus service to our area already is. To add a slew of workers and visitors coming to the prison would only hurt an overtaxed system.

On a moral level, to build a monument like this to incarceration will only promote further incarceration. What about instead using the billions of dollars this would cost to invest in mental health care, early childhood, social support, addiction counseling, and education for the people of our city, so they can have a better life, and stay out of prison in the first place.

On an aesthetic level, the proposed structure is so tremendous in scale as to be a blight on the landscape, blocking vistas of Flushing Meadow Park and lowering our quality of life.

While I do believe that we should ""see"" prisons, and I am not necessarily a NIMBY person, I must request that you withdraw this plan.

Sincerely,

David Stein

Stacy Steingart

sgsteingart@gmail.com

"Dear Mr Fiedler,

I'm a concerned resident of Kew Gardens, NY 11415 and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails.

Besides the obvious congestion that will markedly increase in the subways and on Queens Boulevard and its connections to the highways, Kew Gardens is NOT the area to place a jail. We're a small village with a lot of history and this is not how we envision evolving. It's like placing a monstrosity in the middle of quiet and calm. We already have had to endure a high rise apartment building just off Queens Boulevard that because it priced out the citizens of the town seeking new housing became a hotel and also a homeless shelter. No one asked for that. The jail will bring visitors to the prisoners by the 100's if not thousands; how are we supposed to handle that? This entire project makes zero sense. Move the jail elsewhere in Queens where there is actually room for it to exist or another borough entirely. Staten Island or an island in the east or Hudson Rivers would be a much better place for this.

Thank you.

Best,
Stacy Steingart

"

Pat Stokes

pastokes160@aol.com

"Please note i am vehemently opposed to the current plan.
Patricia A..Stokes

"

My name is Susan Suarez; I believe that Riker's island should be closed in order to bring about change and reform in the NYPD, judicial system, and prison systems.

BAIL

The presumption of innocence is widely held to follow from the 5th, 6th, and 14th amendments. However, the case of Coffin v. United States 1895 established the presumption of innocence of persons accused of crimes yet our City marginalizes, and criminalizes the poor who cannot afford bail. The GML 50-e is a political power tool that allows and motivates the City to hold prisoners that are not convicted past the year and 90 days so that they will not be able to file suit against the City.

SPEEDY TRIAL

Section 30.30 of the CPL in New York State imposes a six months time limit on prosecutors to be ready for trial if a defendant is accused of one or more offenses, one of which is a felony. Often prosecutors are able to skirt these laws in order to protect the City from lawsuits. The Prosecutors are motivated to keep defendants in Riker's because of GML 50e until the year and 90 days has elapsed. This I believe is part of what happened to Kalief Browder, who was held in Riker's Island for three years and in solitary confinement for almost two of the three years. By the grace of Jesus, I was not sent to Riker's after being falsely charged with felonies and being dragged for almost a year in the criminal system.

DISCOVERY

New York is one of 4 states where prosecutors and police are not required to provide police reports and other crucial evidence that is known as discovery to people accused or their attorneys until trial begins which could take months or sometimes years after their arrest. Over 95% of cases never make it to trial especially when prisoners are left with no other choice than to take a plea deal.

Reform can be obtained by changing the Penal Law, and take away the NYPD TAX ID THAT CREATES REVENUE FOR THE CITY and gives an incentive to incarcerate minorities for minor offenses.

New York spends 2.5B annually to fill statewide jails with black and brown minorities. We as constituents demand that for our taxes be spent on education, early intervention, mental health, and to rehabilitate prisoners.

verasung@aol.com

"October 29, 2018

Mr. Howard Judd Fiedler, A.I.A.
Administrative Architect
Director of Design Unit
New York City Department of Corrections
75-20 Astoria Blvd., Suite 160
East Elmhurst, NY 11370

Re: Project: Borough Based Jail System
CEQR Number: 18DOC001Y
Location : Manhattan Community District

1: Block 166, Lot 27

80 Centre St., NY, NY 10013

Dear Mr. Fiedler:

I have been a resident of the South Street Seaport for approximately 25 years and am an attorney, formerly an Assistant District Attorney for Kings County, and also a Director of Abacus Federal Savings Bank, a community savings bank which has served the immigrant Chinese community for 34 years in Chinatown, Manhattan.

I have reviewed the Draft Scope of Work and EAS Statement for the above Project and find that said Draft Scope of Work and the EAS Statement are riddled with flawed assumptions and assertions, and lack cogent information. As such, the above Project must cease and desist immediately and be withdrawn. While ending the inhumane conditions at Riker's Island is necessary, the idea to designate in its place the Borough Based Jail System is nothing more than prison redevelopment for profit with no plan for ending the culture which causes the inhumane and immoral conditions at Riker's Island. I support true criminal justice reform where the capacity at the current facilities in each Borough is more than sufficient for the detention of persons thereby obliterating the need for the detention of persons at Riker's Island; and further, where the current facilities in each Borough as built are renovated and reformed to be more humane, smaller, safer, fairer and just.

I respectfully demand that answers to the below and all the other comments from the Public must be provided, evaluated, shared and studied with the community before the Project can move forward:

1. Name the sites for the Borough Based Jails (BBJ) which were being contemplated in Staten Island (SI). Explain why each such site was not chosen. If no sites were ever chosen for SI, state and justify the reasons why.
2. Name the sites for the BBJ which were being contemplated in Manhattan. Explain and justify why said sites were not designated.

3. State the reasons as to how a 400 sq. ft radius perimeter was chosen as the study area around each BBJ. Explain why the study area can not/should not be expanded to a 1,000 sq ft or more radius.
4. What are the results of the Holden Commission promulgated by the Local Law of the City of New York to create a commission to examine the cost of renovating the jail facilities on Rikers Island? Provide the report that the Commission is supposed to issue to the Mayor and the City Council. Provide the names of the membership of said Commission. If the report has not been made, then what is the cost of reforming/renovating Riker's Island to be Smaller, Safer, Fairer? Provide studies as to such costs. If such costs are unknown then such studies must be done prior to commencement of moving forward with the BBJs.
5. If the jail facilities are closed on Riker's Island, state in detail the plans for redevelopment of Riker's Island. Will LaGuardia Airport expand onto Riker's Island? Will private interests develop Riker's Island into housing and retail? Will the State or Federal Government rent and/or purchase the Island? Which government agencies, bodies nonprofits, persons, etc. will control Riker's Island? Will part or all of Riker's Island be turned over to the Public for use? Will the Public have control as to what the best use of the Island should be and will be? Will the Public be able to have input as to what should happen with Riker's Island? If not, why?
6. What will be the cost to build the BBJ's? How is this cost derived? How will the money be raised? Where will the money be obtained/from whom or what entity will the money be borrowed from? Who will be paying for the costs? How will the money be paid back if it is being financed? Provide a detailed budget outlining all the hard and soft costs. Provide a projection and budget for each year of construction of the BBJ. Provide a copy of the business plan. If there is none, the business plan and said budgets must be drawn up and examined by the Taxpayers, Comptroller and other relevant State and City Agencies.
7. How will the contractors/vendors/materials be selected to build the BBJ's? Who will choose the contractor, subcontractor, material suppliers, architect, engineer, and every person/entity involved in the construction, management, financing of this project?
8. Who/which entities, governmental and nongovernmental, will oversee the project? Who/which entities, governmental and nongovernmental will oversee these entities who are overseeing the project?
9. Describe in detail the Fire Safety Plan and Emergency Action Plan for the proposed 40 story high rise BBJ in Manhattan (MBBJ). How will the DOC, Firefighters, Detainees and the Public be safeguarded during fires, natural disasters, terrorist attacks? How will the DOC, Firefighters, Law Enforcement, Detainees and Public be safeguarded in the event of an evacuation of the proposed 40 story high rise MBBJ? Describe how such evacuation will affect the surrounding neighborhoods within a 1 mile radius and what measures will be taken to insure that essential human services will continually be supplied to the Public in such radius area without disruption in the event of said evacuation. Describe how the Detainees will be transported and where the Detainees will be temporarily held if evacuated during such circumstances without impacting their lives and safety as well as the lives and safety of the DOC, Firefighters, Law Enforcement and Public.

10. One of the reasons stated for having a BBJ is to create/make it more accessible for families to visit the Detainees. What studies have been done on the residences of the Detainees currently at Rikers and the Manhattan Detention Center/Tombs? What studies have been done to show that the addresses of said current Detainees are in Manhattan? If no studies have been done, then provide a study of the location of the neighborhoods, cities, boroughs in NYC, states and zip codes for the residences within the past 10 years to current of the Detainees at Rikers and the Manhattan Detention Center/Tombs.

11. What studies have been done on the underground water flowing beneath 80 Centre St and the surrounding areas within a 1000 sq ft radius? Provide all the studies on the underground water flowing beneath said surrounding area.

How deep will the piles be driven for 80 Centre St.? What impact will pile driving have on the surrounding buildings, streets, infrastructure?

12. What other studies have been done on the inground disturbance that will be created during the construction of the BBJ at 80 Centre St.? What inground disturbance will the construction create at the site? If no studies have been done, conduct and provide such studies.

13. Describe what is the City's Waterfront Revitalization Program is and state in detail what impact the proposed MBBJ will have on this Program. Provide a copy of the Consistency Assessment Form.

14. There are three parks which are within the 400 sq ft radius of 80 Centre St: Collect Pond Park, Thomas Paine Park and Columbus Park. Provide a study of the impact that the construction and the proposed MBBJ will have on these three open spaces. Describe in detail how these open spaces will be preserved and remain unharmed during the construction and after.

15. Describe in detail what shadows will be cast and how the shadows created by the 40 story ft. building at 80 Centre St. will affect the said three Parks. Provide a study of all the trees within those Parks, including any other shrubbery and vegetation. Describe how the shadows will affect said trees and plant life. Describe what efforts will be made to protect said trees and plant life.

16. Describe the archaeological and architectural historic resources of and under 80 Centre St. and surrounding buildings within a 1 mile radius. Provide studies of the historic burial grounds (ie African burial grounds) of the site and surrounding sites within a 1 mile radius. Explain how the grounds, below the grounds and historic affects of the building outside and inside will be maintained and preserved. Describe which parts will not be maintained and preserved and why.

17. Describe the impact that a 40 story high rise MBBJ will have on the public space and streetscape within a 1 mile radius.

18. Provide the Phase I environmental study that was performed at the site. How was the vendor chosen? How much did the Study cost? Detail the environmental hazards and describe in detail what will be done to abate such hazards without harm to the Public health. Provide a Phase II Environmental Study. Describe how the environmental hazards for the Phase II will be abated without harm to the Public health.

19. Provide the list of all person/entities involved in the Project, in the past, ongoing and in the future and the list of campaign contributions (amounts and to whom) for same.
20. Provide studies which show what sort of effect the proposed MBBJ will have on the appraisal values of the real estate (commercial, mixed use, residential, etc.) within a 1 mile radius of the site.
21. Provide a list of all the subway stations within a 1 mile radius of the site, and a study as to how many persons use said stations during the different hours of the day. Describe how many additional persons will enter and exit these subway stations due to the construction and operation of the MBBJ.
22. Provide a detailed study of all the traffic and pedestrian streets and intersections within a 1 mile radius of the site, and how many vehicles and pedestrians will traverse said roads, intersections and sidewalks during and after the construction of the MBBJ.
23. Describe in detail the soil disturbance, fill material, and underground/above ground storage tanks within the site and what sort of precautions will be taken to insure the safe removal of same.
24. Describe in detail the greenhouse gas emissions from such a project and conduct a study on the effect of same on the air quality within a 1 mile radius of the site.
25. Provide a detailed study on the noise that the construction and operation of the proposed MBBJ will have on the surrounding population within a 1 mile radius of the site.
26. Conduct and provide the details of a study on the number of schools, senior care facilities, children care facilities, churches/synagogues/places of worship, hospital/health care facilities within a 1 mile radius of the proposed site and the effects of the construction and operation of the MBBJ will have on said facilities.
27. Describe in detail the plans for reducing the population of Detainees to 5,000. What assurances can be made that the numbers of Detainee's shall remain forever to be 5,000 or less. Describe where and how will the overage of persons will be detained if said persons increase to more than what the proposed BBJs can hold.
28. Describe and provide a plan for the management, operation and care of the proposed MBBJ. Include in such plans where, how and when garbage from the MBBJ will be picked up, how the façade, elevators, entrances, parking, etc. shall be maintained.
29. The MBBJ borders the Special Transit Land Use District. What is the Special Transit Land Use District and what effect with the MBBJ have on this.
30. Describe the plans to minimize placard parking surrounding the proposed MBBJ.
31. State why the Local Law Section 19-101.2 was not complied with whereby notice must be given and a hearing must be conducted with the community whenever a major transportation project such as the MBBJ is to be commenced.

32. Conduct a study and provide data of the number of children and seniors who currently utilize the three Parks surrounding 80 Centre St. and how their use will be affected during the construction and operation of the MBBJ.

33. Obtain input from the Landmark's Commission and said Commission's consideration of the Request for Proposal to landmark 80 Centre St.

34. How and which vendor has been chosen thus far for any studies done for this project. State in detail the cost of said studies which have been completed, that are ongoing and contemplated for in the future.

Until the answers to the above and all the other comments by the Public are addressed adequately and to the satisfaction of the community, the Draft Scope of Work must be withdrawn.

Thank you for your kind attention.

Sincerely yours,

Vera Sung

VIA E-MAIL (<mailto:boroughplan@doc.nyc.gov> boroughplan@doc.nyc.gov)

Howard Fiedler

75-20 Astoria Boulevard, Suite 160,

East Elmhurst, NY 11370

Dear Mr. Fiedler,

I am a resident of Tribeca since 2004, a parent of children who go to the local public schools in District 2 and an executive officer of a minority bank based in Chinatown, Manhattan whose mission is to serve the Asian-American population in New York City.. As an individual intricately tied into the Manhattan downtown community. I feel compelled to write to you of the many questions that I have regarding the proposed new jail at 80 Centre Street and the effect it will have on the entire downtown Manhattan community. Despite the information provided publicly, I remain concerned that the neither the benefits, or the costs, of this proposal have not been adequately assessed by the City. And that unless this is corrected by thorough and unbiased research and input from all parties affected by this proposal, this proposal, despite all good intentions, if enacted will have deeply harmful and lasting effects to all parties involved.

Below are some of my questions:

LACK OF COMMUNITY ENGAGEMENT/INPUT

*

The plan to build new jails have been rushed through without real input from the communities they will impact. Notably nowhere on the City's outreach website is there a way to really contact with feedback! <https://rikers.cityofnewyork.us/>

*

What are the Mayor's current plans to remedy the lack of community input and engagement?

*

Currently, all four borough-based jail proposals are considered under one ULURP that will evaluate and assess the placement of these detention centers. Each of the four sites are completely different in environmental and neighborhood characters and will have significantly different impact. Will the City unbundle the single ULURP to have four individual ULURPs?

1.

SITE SELECTION

*

Prior to selecting this site, what other sites were considered in Manhattan?

*

What are the future plans for Riker's Island? If there are development plans, are there any speculative discussions with real estate developers? If yes, what are the City's plans for the revenue from the development? If there are development plans, what are the community benefits to the entire city?

1.

ENVIRONMENTAL CONCERNS

*

Columbus Park is one of the very few green spaces in the area, and is constantly used by children, youth, seniors and families. The proposed plan will impact usage during construction and beyond. What detailed analysis was done on the impact of the site on Columbus Park? What were the results of the full shadowing analysis on the park and the surrounding blocks? Was a historic analysis of Columbus Park completed? If usage of Columbus Park is curtailed during the time of construction of the jail and/or afterwards, what studies have been done to assess alternative and reasonable substitute locations for the various activities taking place in the Park currently, including interleague basketball games, Downtown Community Soccer games for young children, tai-chi and kung-fu classes and other cultural events hosted by non-profit organizations such as movie screenings by the Museum of Chinese in Americas?

*

Why was the study area for non-residential open space analysis for the Manhattan location limited to the current size? Was any study done to justify the analysis to such space? Why didn't the open space analysis take into account indirect effects not only of increased population size, but also of shadows, transportation, construction noise, etc.

*

What studies were completed to measure the impact of noise and sound pollution from the construction to the surrounding neighborhoods both during and after construction? What is the mitigation plan, if any, on such effects?

1.

ECONOMIC & SOCIOECONOMIC IMPACTS

* According to the Draft Scope, a preliminary assessment "using the most recent available data" will determine whether a detailed analysis will be conducted of business and employment trends in the area. a routine review of publicly available data will be insufficient. Chinatown's economy is unique and fragile. Any analysis must include specific outreach to small business owners in Chinatown, and study how construction will impact businesses serving Chinatown's low-income, immigrant community. Have you considered these impacts?

* In Chinatown, assessment of indirect business displacement pressures should take into account any findings from the sections on shadows, transportation, and construction, particularly considering the level of foot traffic and street-level commercial activity near the 80 Centre Street location. There is a strong possibility that negative environmental impacts will adversely impact businesses and the unique commercial character of Chinatown.

1.

TRANSPORTATION & SAFETY CONCERNS

*

Chinatown, because of its proximity to City Hall and 1 Police Plaza, have been burdened beyond its share after 9/11 with the closure of key streets in the neighborhood. What is the City's plan to mitigate, minimize and control street closures, traffic congestion, parking issues, and pedestrian safety?

* Have you considered concerns about the de-mapping of Hogan Place "to facilitate the construction of pedestrian bridges," overall traffic gridlock in the area public safety on blocks that, even under existing conditions, are unsafe for pedestrians? According to the Draft Scope, only 5 intersections in Chinatown would be potentially be studied. This is clearly insufficient and there ought to be a larger study area for both vehicular traffic and pedestrian safety.

* Has the City studied the impact on traffic patterns, parking, and pedestrian safety, especially on the streets by Columbus Park?

* The proposed entrance of 80 Centre Street will be narrowly situated on Hogan Place. City should evaluate how the transportation of detainees with DOC buses may congest the adjacent streets such as Worth, Baxter and Mulberry and its impact on the emergency vehicles passing thru this neighborhood where residents are mainly senior citizens.

* Worth Street is a narrow major East/West artery. Why is the proposal placing a major driveway which appears to slope down and created hazardous driving conditions and key pedestrian walkway, given our current priority for Vision Zero?

* The EIS process must take into account the already strained mass transit system. The addition of the Manhattan facility will increase the volume of an already increasing ridership on the MTA. The EIS currently does not address the increased usage of the subway system and the existing congestion at the nearby subway stations.

* The lack of parking in the area has always been a major problem. When construction starts, the parking problem will be exacerbated. What is the mitigation plan?

*

What study has been done to determine the length of the construction period and whether the construction will cause long-term or short-term health issues for the residents and businesses in the area, including air (asbestos, dust, concrete) and noise pollution?

*

Provide the Phase I environmental study that was performed at the site. How was the vendor chosen? How much did the Study cost? Detail the environmental hazards and describe in detail what will be done to abate such hazards without harm to the Public health. Provide a Phase II Environmental Study. Describe how the environmental hazards for the Phase II will be abated without harm to the Public health.

1.

CRIMINAL JUSTICE REFORM

*

While I believe in criminal justice reform, where is the study done by the City outlining the costs necessary to achieve the goal of reducing the prison population, a condition precedent to this project, such as programming and legal changes, and whether such changes are effective in the long term to maintain the prison population at such levels, even during times of economic downturn?

*

According to the Lippman Commission, the jail population was 9,110 in Feb 2018. The Commission projects that this population could be reduced to less than 5,000 through a number of policy reforms, including state level bail reform which has not occurred. The Mayor's plan is to reduce the population to 7,000 in 5 years, and then to less than 5,000 after. What specific steps will be taken to reduce population to less than 5,000?

*

What is the basis for the decision to construct a new 40-story site rather than renovate existing smaller sites? How is a new site consistent with the stated goal to reduce the jailed population? If the reforms are implemented properly and expeditiously, there should not be any new jails.

*

The Lippman Commission recommends 5 (not 4) borough based jails located in civic centers near courthouses. Why was the fifth site eliminated? ‘

*

Describe in detail the Fire Safety Plan and Emergency Action Plan for the proposed 40 story high rise jail. in Manhattan. How will the DOC, Firefighters, Detainees and the Public be safeguarded during fires, natural disasters, terrorist attacks? How will the DOC, Firefighters, Law Enforcement, Detainees and Public be safeguarded in the event of an evacuation of the proposed 40 story high rise MBBJ? Describe how such evacuation will affect the surrounding neighborhoods within a 1 mile radius and what measures will be taken to insure that essential human services will continually be supplied to the Public in such radius area without disruption in the event of said evacuation. Describe how the Detainees will be transported and where the Detainees will be temporarily held if evacuated during such circumstances without impacting their lives and safety as well as the lives and safety of the DOC, Firefighters, Law Enforcement and Public.

*

What study has been done to assess whether it is convenient for prisoners' families to visit their loved ones in the proposed site? Has any study been done to determine what are the dominant geographies where such families live and whether there is adequate and appropriate transportation for them to travel to the proposed site within a reasonable time period?

1.

BINDING COMMITMENTS TO THE COMMUNITY

*

If there are community benefits, what kind of legally binding agreements will be given to the Chinatown and surrounding communities?

*

How will the proposed benefits be structured to ensure that the next administration does not deem the agreement null and void?

1.

HISTORICAL SIGNIFICANCE

*

The history of this area is over 400 years old, with specific sites associated with the early history of our country. The official Chinatown-Little Italy Historic District's southwest boundary lies directly across the street (Hogan Place) from the Lefkowitz building (80 Centre Street). Aren't there buildings eligible for Landmarks Preservation Commission in this area, specifically the Lefkowitz Building?

*

In addition, shouldn't archaeological surveys be conducted since 80 Centre Street was built BEFORE and prior to the discovery of the African American Burial Ground (which is now part of the National Monument after its late discovery when the Federal Building was excavated that required a special team to conduct its own independent report)?

*

Shouldn't an in-depth analysis of historical records must be reviewed along with field surveys to ensure that historical and archeological sites in the area are protected?

*

Historical record shows that a cemetery was located on the site of 111 Centre Street where the detention facility was located for many years connected with a Bridge of Sigh. Shouldn't a study also be conducted to see what lessons we can all learn for that prior history of that twin building facility?

1.

LACK OF FORESIGHT

*

What is the City's scenario planning where the jail population does not decrease as projected or the next administration redefines incarceration and the opposite occurs? The Draft Scope of Work contains very little about the future of 125 White Street. How do we ensure 125 White Street will not stay as a detention center if 80 Centre Street alone does not meet the need for beds in the future?

I hope that you will consider all of my above questions and the many others that I am sure are being submitted by concerned residents of this City. To date this process has been characterized by a total lack of transparency on the part of City officials, which in turn, has sown seeds of deep suspicion among the communities in this area. This is not reflective of a democratic and progressive city that we have known and love and chosen to be a part of.

Sincerely,

Jill Sung

PS I am including as attachments to this letter, photos taken on Worth Street and the surrounding area this week and last showing the current traffic congestion and the effect on pedestrian and cyclist safety. See my above concerns regarding how this will be exacerbated by the City's proposal.

"

Gloria Scheiman

compliancepro@hotmail.com

"Dear Mr Fiedler,

I'm a concerned resident of Kew Gardens, NY- 11415 and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails.

Our neighborhoods would no longer be safe, nor would they be the crown jewels of Queens, as they currently are. This jail would be a pejorative eyesore and a blight on our residential freedom. Just as that semi-commercial; semi-homeless shelter is. Our children will no longer be able to enjoy the neighborhood without concern as to safety, police sirens going off, inmates escaping-----we have many elderly-owned homes in the neighborhood----what types of locks, doors and windows would they have to install to feel safe in their homes? We could not feel free to walk our streets at night---either coming home from work or walking our dogs. Why would the Mayor choose this exceedingly low-crime neighborhood to construct a jail? Why doesn't he build it where he and his family live and see how it feels? And think what would happen to our property values. We worked long and hard to save to move into this prime neighborhood, where our children could play freely in the parks, attend PS99 (a currently, very safe school), grow up strong, confident, make great contributions to society, and so on and so forth; and to think that it is now proposed to HOUSE a jail. Now what are our kids going to see---inmates parading the grounds, or being booked in and out or WORSE, escaping into our neighborhood-----what type of role-modelling would this be for them? They, nor us, could continue to take civic pride in the place where we live. We are good, law-abiding citizens and we DO NOT WANT THIS ELEMENT IN OUR MIDST . Our neighborhoods are neither suited to nor equipped with the infrastructure required to support the edifice you are proposing. Nor can it support what will be necessitated to sustain and maintain such a structure-----suddenly, the businesses around it, will be tailored to its upkeep/maintenance and gone will be the neighborhood restaurants, cafes, supermarkets, etc., which are hallmarks of an idyllic, quiet neighborhood.

Rikers Island is where this jail belongs and should be because of its isolation, the fact that there are no residential neighborhoods and businesses there and the difficulty of accessing and escaping from it. It does not belong in Queens or any of the boroughs.

I URGE YOU TO NOT PROCEED WITH Mayor DeBlasio's hairbrained, thoughtless proposal.
BY THE WAY, HE JUST LOST MY VOTE!

Thank you.

Best,
M. Surajballi

Lena Sze

lena.sze@gmail.com

"Dear Mr. Fiedler,

I'm writing as a community member and resident who lives within a 5 minute walk of the proposed site at 80 Centre Street for the Manhattan site of the borough-based jails project. I have previously written to my elected officials about my existing concerns about the lack of substantive and good-faith community engagement and the rushed nature of this massive and unprecedented project (unprecedented because the ULURP links four sites across four boroughs and because it is an untested design-and-build process). I am also not convinced that this plan will result in a fairer, more humane, and just jail for the detainees when the root problems at Rikers, it seems to me, are not just matters of design and layout, but social conflicts between various actors and the dehumanizing nature of the criminal justice system more broadly. The latter two aspects would not just change with the design upgrades and "improved facilities" of these proposed jails; if the root causes of poverty and related issues of substance abuse and the problems of violence between detainees themselves and detainees and corrections staff are not addressed, more sunlight and a straight-line view of the cell for the corrections officer will not result in the kind of deep changes to the culture that this design is supposed to instigate and embody.

I am not an urban planner, architect, or designer, but I have some interest and experience along these lines, and have, since August, tried to gather as much information in an open-minded way from various public meetings and town halls and meetings held about the plan. I am also a parent of young children who was raised here myself and a current resident of the community surrounding the Manhattan site, so I have a heightened awareness of the neighborhood history, milieu, and character. In these comments, I would like to focus on substantial impacts that would inform an EIS.

1) Re: The potential for substantial impacts related to land use, zoning, and public policy; My concern in this matter has to do with the proposed change in the FAR. Also, how to justify the demolition of the current site when the existing jails on White Street (North and South Towers) can house 1000 detainees?

2) The potential for substantial impacts related to socioeconomic conditions; The current local economy just to the east and north is largely at this point a service economy, there is a great deal of tourist and Chinese American diaspora traffic during the weekdays and especially the weekends. There is also a tremendous amount of non-profit and other services provided (health care, banking, small mom and pop bakeries) to an aging Chinatown population (Chinatown is a NORC). Chinatown has also been identified as a naturally occurring cultural district by cultural activists and networks, with a wealth of cultural and arts assets and services. How would the proposed jail, being necessarily an inward-facing service provider, contribute to or cater to this dynamic, but fragile, economy? Would it so directly or only in secondary or tertiary ways, if at all?

The government services in the "civic center" economy to the immediate west and south (and a bit north) of 80 Centre is very dispersed.

3) The potential for substantial impacted related to community facilities and services; Charles B. Wang Center is a 5 minute walk north, the senior center/residence on Baxter Street, the day care provided by Charles B. Wang, the array of community services (job training, workforce development, children's art/dance, English language learning) at 70 Mulberry Street

(diagonally across Columbus Park and diagonally facing Hogan Place) would all be directly impacted primarily through the construction and ongoing traffic (see below), not to mention the three local public elementary schools all within a 10 minute walk of the site (PS 124, PS 130, PS 1) as well as the Transfiguration School, a local church/school that is on Mott with an entrance on Mosco.

How to mitigate the impact of the building of this tower on the services, many of them to elderly, families, and young children who rely on access-a-ride vehicles or public school buses within the range of this site?

4) The potential for substantial open space impacts;

The current fenced grass patch on Hogan Place is drab but 80 Centre's plantings along Worth Street, a recent development as the Marriage Bureau has gotten more popular, are a welcome sight to the neighborhood and extend the flora/greenery of the substantial work of Parks Department Staff and community volunteers who plant beautiful flowers and foliage just down the block on Worth.

How would a tower and 20,000 square foot ""community facility"" extend the open space and green space of Columbus Park in a visually unified way?

Diagonally across from 80 Centre Street on the Centre-facing side is Foley Square, the site of massive protests and demonstrations, including recently this summer's march against the immigrant detentions and family separations in which thousands of New Yorkers took part (it began at Foley Square which was filled to the brim and spilled over to every single side street for many streets and made its way over the Brooklyn Bridge). I am very concerned that the traffic and other requisite elements of a jail would not allow for or create barriers to the use of Foley Square as a protest site. How does the site plan to accommodate the space needs/requirements of open assemblies and gatherings as have historically and currently been the case with Foley Square?

5) The potential for substantial shadows impacts;

The tower's height is of great concern. It would directly overshadow Columbus Park, the only green park in the historic core of Chinatown and one of the few patches of open space in this stretch of lower Manhattan. As you know, how sunny a park is, at least for much of the day, is a great contributing factor to how well-used it is by the community. Currently Columbus Park is a lovely and demographically mixed user population, depending on the time of day and the part of the park-- all manner of children and teenagers, parents, and grandparents/caregivers and elderly interacting with the space. There is some amount of a transient or homeless population that also uses the park, but it is largely a park that services members of the local Chinatown community. In what ways would that change with the building of this tower right across from it and overshadowing it? How would the parks department increase resources and Columbus Park's capacity to handle a larger or different population of users?

6) The potential for substantial impacts related to historic and cultural resources;

See above for information related to Columbus Park and Foley Square. I would like to point out that half a block down from 80 Centre Street right around the entrance of the Federal District Court Building on Worth Street is the historic Five Points intersection of the Five Points Neighborhood. There is likely much of important historical and archeological significance in and around the Five Points site, especially anywhere close to the Mission building in that historic neighborhood. Collect Pond was also in/around Foley Square. How does this jail integrate or honor the complicated history and legacy of these neighborhoods?

7) The potential for substantial urban design/visual resource impacts;

The proposed tower would not likely, based on various renderings I have seen, integrate with the immediate neighborhood's architectural character. The trend toward using much glass is a recent

phenomenon rather than the materials used in older classical or art deco styles of the rest of the century-old (roughly) architecture of the buildings in the government/civic center. It would stand out like a sore thumb and be a painful reminder, gleaming in glass, of the failure of the community to impact an EIS and land use process that is steamrolling right over it.

8) The potential for substantial hazardous materials impacts;

The immediate neighborhood to the north was a manufacturing district (on Centre just north of Canal); there were gas stations in many sites in and across lower Manhattan including one that used to be at/around 139 Centre, one or two blocks north of 80 Centre. As I mentioned, Collect Pond was close to the proposed site and it was of course notoriously a site of sewage and various kinds of waste. A very detailed analysis of the site (and immediate vicinity's) pollutants and land use history would be absolutely critical given how overpopulated, industrial, and dense this area of lower Manhattan was for most of the last two hundred years; and how much of these potentially dangerous pollutants a large construction project would dredge up and expose people to.

9) The potential for substantial impacts related to water and sewer infrastructure;

I would expect the water and sewer needs of this proposed jail to be very great, given the 5000 or so beds and the corrections and other staff working there. During the blackout of 2003 and Hurricane/Superstorm Sandy in 2012, the area experienced quite a long period of no utilities and electricity whatsoever. What contingencies are in place in terms of the water, sewer, and electrical needs in these kinds of scenarios? How would that impact other buildings, businesses, and residents in the area?

10) The potential for substantial impacts related to transportation;

Transportation is estimated for the Manhattan site to be approximately (on average) 120 vehicular trips from M-Sat. Traffic studies need to account for the overflow of traffic from the Brooklyn Bridge (1 minute drive from the south), the horrendous congestion on Canal Street (3 minute drive to the north), and the bottleneck side streets on Baxter and Mulberry, where of course traffic just north of Canal is closed because of the Little Italy district but also sometimes because of the San Gennaro Feast in September. Of course Worth Street leading to Centre and Chatham Square is a dangerous traffic crossing and congested as it is. This site could not be placed in a worst site if you tried in terms of heavy existing traffic use. Any greater number of vehicles and vehicular trips, let alone 120, would be a nightmare for the senior citizens and young children crossing the street. Would you be able to integrate the site's traffic impacts in relation to the larger area's traffic conditions, inclusive of Brooklyn Bridge, Canal Street, and Chatham Square?

There is some amount of underground or on-site parking to be made available for corrections staff, but what is the anticipated number of on-site or in-building parking spots? What is the ratio of staff to staff vehicles in current jails? Using that ratio, what would be the number of staff vehicles which would have to find parking outside of 80 Centre, on local streets?

Worth Street around this 80 Centre site is already experiencing a closure of one lane for the next few years due to infrastructure upgrades. How does the timing of the work coincide with this existing project (if it does)?

11) The potential for substantial impacts related to air quality;

As mentioned above, Canal Street is just a hop and skip away from 80 Centre. It is incredibly polluted with air study analyses conducted by city agencies and others over the years (due to the traffic between the Manhattan Bridge on/off ramps and the Holland Tunnel entrance). As we know, air quality does not end when a block ends, any analysis of 80 Centre should take into consideration the already heavy burden put on the communities, including Chinatown, that have these huge streams of vehicular traffic from Canal Street, Bowery, and Worth.

12) The potential for substantial greenhouse gas emissions and climate change;

See point 11 above. I do not know if this is related to climate change, but at any rate, please note that the corner of Worth and Centre (exactly where the Marriage Bureau entrance is housed) on Worth is prone to flooding. Note that the site is in Evacuation Flood Zone 4 in the case of an evacuation, catastrophic flooding being a more and more common occurrence due to climate change. What are the contingency plans should that happen?

13) The potential for substantial impacts related to noise;

The corrections official I heard at one community meeting pointed out that jails tend to be loud, as any place where up to 5000 people are placed in cells, would be. With the substantial traffic already in the area with its noise implications, how would the location control for noise impacts on the rest of the community? On the street-level?

14) The potential for substantial impacts related to public health;

A 5-10 minute drive south east of the proposed site is the only ambulance-serving ER in all of lower Manhattan. Because of the traffic and other congestion problems I have identified above, I am very concerned about the public health implications of huge construction project and then tower (with its uniquely heavy traffic load) clogging up the streets in/around the downtown area. We have lost many hospitals in NYC and Manhattan over recent years. How to justify building a jail tower when we know it would add to the traffic (and thereby cause ambulance delays to the only hospital with an ER nearby)?

15) The potential for substantial impacts related to neighborhood character;

The fact of the matter is that this site is at the border between a couple of different neighborhoods, but the bulk of the residential population impacted would be Chinatown just to the east and north. The proposed tower, a jail, would not integrate well economically and architecturally with that community. It doesn't provide the services or housing the community so desperately needs.

and 16) The potential for substantial construction impacts.

See in particular my point 10 above. I am concerned about the length of the construction, its contribution to traffic, what kinds of materials will be used, how that construction will overlay on existing construction and infrastructure projects in the neighborhood to add to air pollution and degraded air quality.

These comments are related to the 80 Centre Street site of the borough based jail plan project, but my overall larger point likely holds true for the other three boroughs and sites-- namely, that the lack of good faith and substantive community engagement by the city in this process has resulted in an extremely flawed choice of a site, timeline, and process; and that there has been no good explanation thus far offered about how the current plan significantly will improve the culture of jails in NYC except to espouse a view that is mostly design-deterministic.

Thank you in advance for your consideration of these comments.

Sincerely,

Lena Sze

"Hello,

I am writing you today in regard to the Brooklyn House of Detention proposed scope of work.

I am a resident of the neighborhood, and live one block away from the current house of detention.

I am against the current proposal as it will not only dramatically increase the FAR, but will also be completely out of scale with the surrounding buildings.

By having the ONE meeting to address this already formulated plan, with absolutely no community engagement prior, 2 miles away from the actual site, at a very inconvenient time of day, it illustrates how little regard this proposal has for the surrounding community.

The Brooklyn House of Detention has been part of the Boerum Hill community since 1957. While I am not opposed to updating the House of Detention, the proposal you are trying to pass is grossly out of scale with the surrounding environment.

- Size out of character for the neighborhood
- Noise already an issue
- Traffic already an issue
- Construction impact on the area will further exacerbate the above issues

I strongly object to the process that has been followed and ask that this proposal and subsequent process be reconsidered.

I would be more than happy to provide any input in further renditions of this proposal.

Thank you,

Chrissa Theodore

Statement Regarding Proposal of New Jails in New York City
9-27-18

Prisons are slave ships on dry land.

According to a report released in April of this year by a federal monitor, despite new leadership and added resources over the past two years, "The use of force has continued to increase rather than diminish, even as the inmate population has decreased" at Rikers Island. The social arrangement of the modern prison is yet another form of white supremacy that uses ultimate power including authority, influence, coercion, manipulation and force. This power supports institutional procedures that favor the dominant culture a.k.a. white supremacy. There is nothing safe or efficient in opening new facilities that deprive human beings of their humanity. Invest in community resources or face a public that will not rest until state-sponsored torture is banished forever!

Abel Torres

eqqmc2@gmail.com

"Dear Mr Fiedler,

I'm a concerned resident of Forest Hills, 11375 and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails. I am opposed to such proposal because it will not address the root cause of the issues associated with Rikers Island Correctional Facility.

The main issue with New York City jails is the mentality of abuse and corruption by New York City Department of Corrections that has existed since the 1900's and it was exacerbated during the response to the crime wave of the 1980's that overstressed both NYC DOC resources and infrastructures in place at the time. Although the inmate population has decreased, the institutional problems remains. Replacing 1 isolated Jail with 5 mini jails will multiply the problem at least 5 folds as the very same folks who are running Rikers will be running those 5 institutions. However, in the future it will be more difficult to manage 5 separate facilities and more costly.

Although the situation at Rikers is very difficult and expensive, the facility location and isolation from the general population is a superior factor in determining cost benefit ratio compared to building, managing and mitigating the impact of those new facilities to the neighborhoods where they will be located. Between the elimination of parking spaces, the increase traffic in the area (as NYC DOT struggles to maintain a delicate balance between pedestrian safety and traffic flow via the Mayor's Zero Vision program), the likelihood increase in NYC Police Department resources needed in the surrounding areas to deal with the likely increase in crime in the area around the jails and the downward pressure on values that a local jail puts on residential properties nearby and the nightmare and cost of managing separate jails (as opposed to a single location) there is no advantage in following thru with this proposal.

As a homeowner living on Union Turnpike and Queens Boulevard, I can see the detrimental effects that this proposal will create in my neighborhood and in the decline of property values which taken as a whole could also diminish the property tax revenue to the city. Please lets stop the current plan and create a new plan with input from the communities to address the issues at Riker's Island

Thank you.

Best,
Abel Torres
"

Anahid Ugurlayan

anahide@aol.com

"To Whom It May Concern,

I reside in Forest Hills (and I was born and raised in Jackson Heights) and I am writing to strongly oppose the proposed plan to build a jail adjacent to the courthouse. Forest Hills and Kew Gardens are one of the safest neighborhoods in the city. Many families with young children have moved from Manhattan and Brooklyn to our neighborhood because they want to raise their children in a safe environment which is affordable. This jail is in the heart of a residential neighborhood and it will depress housing prices and potentially increase crime. This lot could be put to better use -- e.g., a park, or a community center. At the very least, there should have been a hearing open to the public to inform the community about this ill-advised plan. I strongly urge you to abandon this plan and keep our beautiful neighborhood safe.

Respectfully,

Anahid (Annie) M. Ugurlayan

Jamie Uhrig

jamie.uhrig@gmail.com

"Dear Mr Fiedler,

I am a physician health care service provider on Rikers Island though I write in my personal capacity. As a health professional I support the closure of all jails on Rikers Island as soon as possible.

I live in Manhattan. The proposed site of the new jail at 80 Center Street is well considered. It is close to the Criminal Court, is the same distance from Chinatown as the Manhattan Detention Center, and is close to public transit for detainees, staff, families, and legal support.

If community opposition to a new location is too heated you can rebuild Manhattan Detention Center at its current location. This is a reasonable compromise.

Please proceed as soon as possible. Lives depend on it.

Thanking you in advance,

James Uhrig

Correctional Health Services
New York City Health + Hospitals
"

As it stands, the city's plan to shut down the jails on Rikers Island is the socially, ~~fiscally~~, and morally responsible decision. Likewise, the Brooklyn Detention Center -- nearly 60 years old -- is outdated, and it is indeed time for a change as well. However, this newly-planned, gargantuan jail is not the solution. The Brooklyn Detention Center can house eight hundred and fifteen adult men. This new jail will have the capacity for nearly twice that -- fifteen-hundred and ten inmates. Is this necessary?

There are those who will say "yes," that there are nearly ten thousand people in New York City's jails -- seventy-five hundred of them in Rikers alone. Where will they go? ~~For a great many of them~~, the answer is simple - they will go to their homes, their apartments, and their families. According to the Lippman Commission's report, "A More Just New York City," around 80% of the people incarcerated in New York City's jail system are awaiting the outcome of their case. Why? Because nine out of every ten defendants cannot pay the bail to avoid a jail stay. The average time -- average! -- to a trial verdict is more than twenty months. Just how many people are there who are wasting more than a year of their life locked up without even having been found guilty of a crime?

Some crimes, indeed -- jumping the subway turnstile, petty theft, possessing a small amount of pot or other drugs, and driving with a suspended license -- these alone accounted for over a hundred thousand arrests in 2016. That's more than 40% of all criminal arrests in that year. None of these charges pose a "high risk to the safety of the community," which is a condition that nearly 9 in 10 New Yorkers require in order to hold a person in jail prior to a conviction. In fact, even among detained felony defendants, nearly eight in ten posed only a minimal-to-moderate risk of re-arrest for a violent felony.

This system is unnecessarily overburdened with these pointless jail stays. For people with misdemeanor charges, they spend only seventeen days in jail before the trial on average. In fact, over half of them stay fewer than five days. What is the point of this? Such a system costs serious taxpayer money, and such a stay, though short, can change a person's life forever, and not for the better. Now, I'm not a Brooklynier. I've lived here for under two years. My home is the state of Louisiana, and I am very proud of it -- especially because around a month or so ago a federal judge ruled that the New Orleans system of cash bail was unconstitutional. Now, I don't know if this will lead to a permanent abolition of cash bail in that city, but it is something to be sorely hoped for. Tennessee Williams allegedly said that America has only three cities: New York, San Francisco, and New Orleans -- everywhere else is Cleveland. You are on that list for a reason. The abolition of cash bail would have unimaginable benefits for your communities. As the report clearly lays out, a person's freedom should not be determined by what's in their wallet.

The thing is, so many of these people shouldn't even be at the bail process in the first place. According to the New York Post, the ~~eleven-story~~ Brooklyn Detention Center may be replaced by a potentially forty-story new jail. This is unimaginably large and will be incredibly expensive. Is that the best way to spend this money? New York's crime rate has been dropping for more than twenty years. This can be even further improved with crime prevention strategies like reinvestment into communities -- funding in youth development initiatives, employment programs, ~~neighborhood beautification projects~~, mental health initiatives, and so many more. ~~These changes, in addition to pretrial supervision replacing money bail, diverting low-level~~

misdemeanor cases to the civil system rather than the criminal, and a host of others outlined by the commission report, if fully implemented, would reduce the average daily jail population in New York City to less than five thousand individuals. Less than five thousand. That's just about halving the prison population. Let that sink in.

Brooklyn accounts for just over 22% of the jail population of New York City. Now, 22% of a FULL five thousand is eleven-hundred. And that's 22% of the current number in jail. When there are fewer than five thousand prisoners in this city, Brooklyn might not even need an eleven-hundred bed jail. It certainly won't need one of over fifteen-hundred. Constructing such a large jail sends a strong message about what this city expects of this borough. You need to reject that message. While wrapping up the preface to the report, Jonathan Lippman urged that we let New York City lead the way as it is done so often in the past. By rejecting this unnecessary, massive jail, this is your chance to let Brooklyn lead New York City.

BOROUGH-BASED JAIL SYSTEM

DRAFT SCOPE OF WORK FOR AN ENVIRONMENTAL IMPACT STATEMENT

COMMENTS:

Thank you for taking the time to read this.
as a social worker, I understand & support
the need to strengthen our jail system and the
services provided to the inmates. However, as a new
Kew Gardens home owner, it is difficult to see my
neighborhood change without feeling ~~like~~ like the
residents ^{have} had ^{to} say. We work hard to create a
small town feel and have recently accomodated a
men's homeless shelter (Comfort Inn), although it did
impact our community. There are social services in
this community that I feel can be negatively impacted by
the jail in this neighborhood (as the large structure will take over ^{the feel} ^{of the neighborhood}).
I would like to strengthen the current jail on Rikers Island
and use the money to improve the existing services & structures
(many services that are doing great & impactful work). thank you,

Written comments on the Draft Scope of Work will be accepted by DOC through **October 15, 2018** and
may be submitted at the scoping meetings, by email, or by regular mail to the contact below.

I do agree that we
can use our finances towards
finding ways to make our
criminal justice system
more fair & just
(legalizing marijuana to
& decrease bail costs
since the current system
results in minorities
& those living
in poverty to
reside in
our jails,
unfairly.
This huge amount
of money seems like
it could be used
to make
real change

COMMENTS:

Mayor deBlasio is vindictive and spiteful. Mayor DeBlasio purposely chose locations for ^{new} jails and homeless housing based on percentage of whites in the population to punish based on racism. People of color who work hard and struggle for a better life are being penalized. Freeloaders who live off the system are laughing at us, peeing in our streets, prostituting and selling drugs without consequences. Why not build new jails in depressed or industrial areas? or in Park Slope by DeBlasio's house? Impeach DeBlasio. He is getting kickbacks from the "Comfort Inn". Attorney General - please investigate.

Written comments on the Draft Scope of Work will be accepted by DOC through **October 15, 2018** and may be submitted at the scoping meetings, by email, or by regular mail to the contact below.

RE: 80 Centre Street (Louis Lefkowitz Building) CEQR Draft Scope of Work Comments

September 20, 2018

Dear Mr. Fiedler,

When Governor Al Smith laid the cornerstone for Lower Manhattan's monumental Louis Lefkowitz building at 80 Centre Street, he bellowed the following:

**"I pray to God it may stand here through
the ages as a testimonial to the people
of this great commonwealth."²**

The magnificent Lefkowitz lived up to Smith's prayer. Designed to complement and complete – but not overwhelm – Manhattan's civic center, the Lefkowitz splendidly and harmoniously served the public from 1930 until today.³

The new millennium brought festive new duties to the Lefkowitz's stone doorstep. Among other things, the handsome Lefkowitz is now home to the Manhattan Marriage Bureau. Each year,

thousands of couples climb its distinctive stone stairs, pass under its carved eagle friezes, and enter its ornate inner lobbies to make their affection official.

This duty earned the Lefkowitz a special place in the hearts of LGBTQ New Yorkers. According to the *Times*, 293 newly eligible pairs wed there on the first day same-sex marriage became legal.⁴

“Getting married in a place with such historical significance made me feel like I was a part of something,” explained Sarah Factor, who tied the knot with her wife Julie Mayrin shortly after same-sex marriage became legal.⁵

“When we were finally able to marry, we came to the Lefkowitz,” added Mayrin, matter-of-factly. “Going up those stairs was symbolic for me as a native New Yorker.”⁶

Sarah Factor and Julie Mayrin wait inside the Lefkowitz Building to be married.

But the Lefkowitz now needs a little love of its own:

Though marriage is supposed to be forever, your agency proposes giving this temple of love an ugly divorce. As written, the Department’s plans leave the door open to gutting – or even demolishing – the beloved Lefkowitz to build a more humane jail for those facing trial in Manhattan.⁷

Mass incarceration is among our society’s greatest sins, and the Department of Correction is correct to upend an intolerable status quo. With its large floor plates, outdated upper offices, and proximity to the criminal courts, it would be smart and simple to reuse certain parts of the Lefkowitz for pre-trial detention.

The Department can do all of this without evicting soon-to-be newlyweds and eviscerating a deeply admired New York structure.

As Mayrin sees it, the Mayor’s plan would “destroy a monument.” And neighbors, elected officials, and concerned New Yorkers are beginning to agree:

There is still time to get things right. It just takes a few vows from your agency and other city officials.

I. Don’t Mess With The Building

After almost ninety years of devoted service, the Lefkowitz deserves to be honored – not demolished. Any proposed redevelopment should be strictly limited to a tasteful conversion, restoration, and renovation.

As part of this process, the Department should preserve (1) all five sides of the Lefkowitz’s façade; (2) its roofline, and; (3) its first-floor public interiors, including (a) each and every one of the ornate lobby corridors; (b) the long Worth Street marriage hall, and; (c) the Al Smith memorial adjacent to the Centre Street entrance. The Department could further demonstrate good faith by petitioning the Landmarks Preservation Commission for landmark status over the preserved spaces described above.

Rumblings abound with respect to a proposed residential or commercial tower atop the Lefkowitz. Such a tower would be wrongheaded given the fact that a vacant, city-owned lot lies ready, willing, and able to serve as a sensible alternate site just steps away.⁹ Today, the lot is used solely for surface parking of a mere handful of city vehicles.

If it absolutely must construct a tower above the Lefkowitz, the Department should situate the incursion east of Baxter Street. This would preserve the symmetry of the Foley Square cityscape that Lefkowitz architect William Haugeard worked so hard to

preserve.¹⁰ It would also maintain the view of 100 Centre Street's distinctive Art Deco ziggurat, which stands in full view to Foley Square's visitors over the Lefkowitz Building's Centre and Worth Street rooflines.

II. Don't Mess With The Marriages

The Department proposes shifting District Attorney offices from the Lefkowitz to the extant jails north of 100 Centre.¹¹ This poetic gesture brought a smile to my face – and to the faces of many other interested citizens.

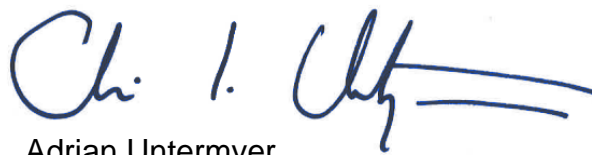

I implore you to embrace another equally poetic gesture: Let the marriages continue within the Lefkowitz's Worth Street hall. If the jail's security perimeter is designed properly, the two facilities can coexist peacefully and harmoniously, thereby keeping love and levity in the neighborhood for good.

In addition to preserving a veritable monument within the LGBTQ community, this move would serve as an enduring gift to inmates, correction officers, employees, and neighbors. By allowing marriages to continue in their rightful place within the Lefkowitz, the Department would allow a spirit of happiness to temper the anguish that hovers around even the best-designed correctional facilities.

The Department of Correction's Borough Jail proposal marks a once-in-a-generation opportunity to improve the lives of untold thousands. It would be senseless to condition these gains on the loss of a beloved New York City structure. As such, I urge you to adopt the above comments as you continue the planning process.

I thank you for your time, attention, and, hopefully, your dedication to preserving, improving, and celebrating a beloved New York structure.

Respectfully submitted,

A handwritten signature in blue ink, appearing to read "Chi. I. Untermeyer", with a stylized flourish extending to the right.

Adrian Untermeyer

"Dear Mr. Howard J. Fiedler,

I am a concerned resident of Jamaica, Queens 11435 and am reaching out to you today to express my opposition to the Queens Jail Proposal.

My home is a mere 7 minute commute from the proposed site for the prison. I do not see how building a prison in such a densely residential neighborhood is a sound idea. While prison escapes are not frequent, THEY DO HAPPEN and the site selected is near several transportation routes.

The site proposed is right off of the Grand Central Parkway, which could allow an escapee (if in a vehicle) to easily arrive at LaGuardia airport. The E and F trains are also a few steps away from the proposed site, which would allow an escapee to disappear in minutes within the NYC MTA. The Q110 bus is just a few blocks away from the site chosen, which goes to JFK airport. There are other numerous MTA buses in the area which could also allow for ease of transportation in case of an escape. The Long Island Railroad is a 10 minute commute from your proposed site. In addition, Kew Gardens already suffers from congestion and traffic courtesy of the courthouses and a dialysis center on Queens boulevard; the addition of such a facility would be a further burden for commuters to bear and have a negative impact on the residents of the neighborhood.

While I understand the need to close Rikers Island, and agree that smaller, borough-based jails would allow inmates to remain in contact with family members by making visitation more feasible, I strongly suggest selection of a different site. Perhaps expanding the Queensboro Correctional Facility already in Long Island City or building your new facility further along Van Dam Street can be considered as many blocks in the surrounding areas are desolate with only occasional car traffic to be had, and little to no residents or retail businesses to impinge upon.

I strongly suggest the reconsideration of the site that has been selected for this project as it will absolutely have a negative impact on the lives of the residents of Kew Gardens and the many surrounding neighborhoods.

I thank you for your time.

Best,
Lesleyann Velilla

"

Howard Fiedler,

I am writing to express my dismay at the Draft Scope of Work about the jails plan. As New York City resident, I do not support the city's plan to build four new jails in Kew Gardens, Boerum Hill, Manhattan's Chinatown, and The South Bronx. It is a severely misguided and misinformed plan that will not solve any of the issues that arose on Rikers. A few years after the new jails are built, they will only become as worse as Rikers. You need to encourage the city to invest

10 billion towards restorative justice work and towards the transformation of the decrepit housing system and public education system. Yes, that is outside of your official position, but as architect, you have the power to move the plan towards true alternatives that can solve the problem of incarceration. The future of New York City depends on you taking action to reject this Draft Scope of Work. Please take action to do so.

"Dear Mr Fiedler and Representatives,

I AM a concerned resident of Kew Gardens-11415, reaching out to express my opposition of the Queens Jail Proposal and other NYC Borough Jails.

I oppose bringing in proven criminal, delinquent and mentally insane people into my working-middle class residential neighborhood!

Already our community is burdened with housing mentally unstable homeless people at a hotel in the immediate area! <<https://www.dnainfo.com/new-york/20171003/kew-gardens/kew-gardens-hotel-comfort-inn-the-kew>>

PLEASE DO NOT BE PART OF THE PROBLEM IN FURTHER DESTROYING MIDDLE CLASS RESIDENTIAL NEIGHBORHOODS.

PLEASE DO YOUR PART TO FIX THE RIKERS MESS NOW!

PLEASE DO YOUR PART TO PLACE CRIMINAL & MENTALLY INSANE PEOPLE ON AN ISLAND <https://en.wikipedia.org/wiki/List_of_smaller_islands_in_New_York_City> NOT DIRECTLY CONNECTED TO NYC BOROUGHES! CONSIDER RIKERS (IMPROVED), GOVERNORS ISLAND, RANDALLS & WARDS ISLAND, etc. <https://en.wikipedia.org/wiki/List_of_smaller_islands_in_New_York_City> !

PLEASE DO YOUR PART TO HELP SET PROGRAMS IN PLACE TO REHABILITATE PEOPLE RATHER THAN JUST CAGE THEM!

USE MY TAX DOLLARS TO HELP PEOPLE IN NEED, RATHER THAN FURTHER LINING THE POCKETS OF REAL ESTATE CONSTRUCTION DEVELOPERS WITH OUR HARD-EARNED TAXPAYER MONEY!

Do your best to help restore our neighborhoods as safe places to live and work!

Thank you in advance for your civil service.

Sincerely,

--ELLI

Denise Stockman

denise.stockman@gmail.com

"Dear Mr Fiedler,

I'm a concerned resident of Kew Gardens (11415) and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails.

The neighborhood of Kew Gardens already has a massive problem with traffic and (lack of) street parking. This new complex would bring a large number of visitors and employees and make the situation much worse. More traffic would also lower the air quality.

Since my apartment faces in that direction, I am concerned that the exceptionally tall building would be out of place and block views.

I have a daughter who attends the nearby school, PS99. She has been asking when she will be allowed to walk to school alone. Eventually, she will be walking to the subway to go to middle school. I am concerned that she will encounter visitors to the jail who have intent to harm young girls. I am also concerned about my own safety walking to and from the subway.

The neighborhood has already absorbed a new homeless shelter. Rising rents and poor property management has driven away local businesses. This neighborhood seemed like a good investment when we bought here, but many city policies have lowered the quality of life, We only ask that more burden be shared by all neighborhoods.

Please take these concerns into account when discussing this plan.

Thank you.

Best,
Denise Wallace

Re: Objection to NYC Borough-Based Jail System Proposal

Dear Mr. Fiedler,

Hersha Hospitality Trust owns the hotel located at 85 Smith Street, adjacent to the existing Brooklyn House of Detention. Since opening in 2008, the hotel has developed strong community roots through its “stay local” positioning. While we support the intent of a multi-borough prison system, upon review of the proposed plans announced by the Administration, we stand in opposition to the current plan. The proposed building in Downtown Brooklyn will have an undesirable impact on the economic and environmental dynamics in the neighborhood and in addition, the proposal fails to address the underlying issues surrounding Rikers.

Proposal Shortcomings

While the intent of a multi-borough plan is to establish a more humane and safer prison system in New York City, the proposal contains several critical flaws and oversights. The current proposal does not call for a prison site on Staten Island, neglecting one of the five boroughs. Additionally, the proposal does not allow for the necessary flexibility in population size, inherently creating similar overcrowding that currently troubles Rikers. Finally, the design of the new prisons does not provide solutions for inadequate officer training and prisoner mental health issues.

Brooklyn Site Challenges

In Brooklyn, the proposed expansion changes the FAR from 3.5 to 20, making the 1.4 MSF building the largest in Downtown Brooklyn (the plot’s current zoning is limited to 6.5¹). While the structure would be extremely large, the proposed prison would not offer sufficient space should the Brooklyn detainee population grow over time. Such overcrowding would result in similar problems which plague Rikers today.

Business Interruption

In addition to impeding the aesthetic of the neighborhood, the extended construction period, targeted to wrap in 2027, would cause significant business interruption to local businesses, including the 85 Smith Street hotel. The construction of the 1.4 MSF building would bring several years of scaffolding, road closures, and reduced pedestrian traffic to Downtown Brooklyn. Additionally, challenges to execute construction effectively are likely to arise as the nearby BQE (Brooklyn Queens Expressway) expansion is planned to overlap with the Brooklyn prison project.

In conclusion, as the planning has been rushed and non-collaborative, we respectfully request that the Administration suspend the scoping and land use approval. We seek a proposal that incorporates considerations from affected communities, creates a plan to sustain the charm of the flourishing Brooklyn neighborhood, and addresses the complex challenges plaguing Rikers.

Kurt Walters

kurt@kurtwalters.com

"Dear Mr. Fiedler,
and others who may have access to this e-mail,

My name is Kurt Walters.

I own an apartment at 199 State Street, a block away from the proposed new Brooklyn Detention Center. I have lived here for over nine years.

Though I support a new Detention Center, that fits with the neighborhood, and contributes to ALL of our livelihoods.

I do NOT agree with the current proposed plan that would include a 40 story building.

NO matter how well it is designed to fit into the community and neighborhood, it will be substantially taller than anything around it. A looming monolith of negativity for all to see. This alone is cause for major concern.

I have had the chance to talk to others in the neighborhood; the size and height of the proposed facility is what causes the greatest concern.

Please consider the above.

Sincerely,

Kurt Walters

"

Tadd Wamester

twamester@yahoo.com

"To Whom It May Concern,

I am writing both as an individual resident of Kew Gardens and also officially as an elected Director of the Georgian House Owners Corporation, a 121 unit cooperative apartment building at 118-11 84th Ave, Kew Gardens, NY 11415.

I would like to voice my strong opposition to the proposed plan on behalf of my family and the Georgian House Owners Corporation. I have spoken to dozens of my neighbors and the full board of the corporation are against this plan that would negatively affect the quality of life for residents and students in the 90

residential neighborhood.

Kew Gardens is a community of neighbors. We live here because it is peaceful and green, and we are an engaged community, a working-class community.

We live relatively far from the hustle and bustle of Manhattan or Brooklyn Center, and we know that well whenever we travel to either of those places on the crowded (and often very slow) J, E, or F trains. The Q10 and Q60 busses have long lines, but we wait with our neighbors from other communities like Richmond Hill, Forest Hills and Briarwood. However, we all know that our subways, busses, and busy streets cannot handle the extreme increase in traffic and ridership that would be caused by this ill-thought plan. We already have so much traffic from the court and borough buildings, city agencies...our residential neighborhood cannot take more traffic without it very negatively affecting our neighbors.

This 29 story massive eye-sore would loom over us from above, visible wherever we were in the area and ruin the character of the residential neighborhood.

Also, there are multiple public and private schools within a ""stone's throw"" of the JAIL. Popular parks and playgrounds. This is INSANE!

On behalf of myself, my husband Thomas Mitchell, and on behalf of the Georgian House Owners Corporation residents I wholeheartedly reject this plan.

NO JAIL IN KEW GARDENS!

Sincerely,
Tadd Wamester
Director, Georgian House Owners Corporation

Resident: 118-11 84th Ave Apt 619, Kew Gardens, NY 11415

Councilman Levin,

I am extremely concerned about the proposal to demolish and rebuild the Brooklyn jail. The length of time for construction and the towering size are disturbing.

Why was the neighborhood association not allowed to give their input during the design process? And why is such a large facility trying to be crammed into one, small city block? It is my understanding that the current warden of the Brooklyn Detention center has stated that problems exist once a jail exceeds 600-800 detainees. Since this facility can hold 800 detainees as it is, why can't the plan be two-fold: 1) renovate this facility, 2) build another facility for the 710 remaining beds. Since this is a major change in how New York City handles incarceration, I think a more thoughtful approach with more input needs to be taken. Having four, massive jails in the middle of residential neighborhoods does not seem like the best approach. Why hasn't having 8 - 10 smaller jails spread throughout the city been considered? Or why hasn't the idea of having small jails near courts and one larger facility on a plot of land that can handle it been considered? There seem to be many alternatives that have not been examined. If the city is going to spend such a high amount of money on this project, shouldn't we be certain we have explored all possibilities?

I know that the Brooklyn Stakeholders have put forth a position statement. I urge you to take their concerns seriously. Your constituents are asking to have meaningful input in this process - something the Mayor assured us would happen, which has not happened yet.

Thank you,
Alison Warner

Thomas Warns

thomaswarns@gmail.com

"Hello,

I live in Rego Park, near where the proposed jail in Queens is going to be built. I cannot more strongly urge you to reconsider this illogical plan to place a jail in the middle of a vibrant residential neighborhood.

No one wants a jail right by their home - regardless of what our idiot Mayor says, there will be negative externalities suffered by people that live near the jail. Children will not be safe with criminals walking around in high concentrations. Property values in the neighborhood will plummet. And this boondoggle will cost billions of dollars to build.

Rikers Island is the perfect location for a jail - you couldn't ask for a better spot! The criminals get to stay on their own island with just one way in and one way out, away from the law-abiding people, which improves safety. If there are concerns about the dated facilities at Rikers, the City should be able to spend a fraction of the money it wants to build five jails throughout the city on fixing up Rikers instead. Fix up Rikers if you must, but keep the criminal away from families with children, like mine. Why does the Mayor care more about criminals than he does about children?

Please don't import crime, drugs, and criminals into our neighborhoods. Please don't destroy our neighborhood from the inside. If Mayor deBlasio is so deadset on neighborhood jails, I propose that the jail for Manhattan be sited next to Gracie Mansion, and the jail for Brooklyn be sited next to his fancy gym in Prospect Park. What's good for the goose is good for the gander, right?

Best,

Tom

Subject: opposition to reopen jail in kew gardens

Dear officers,

We are writing to express our strong opposition to the proposed reopening and expansion of a jail facility at 126-02 82nd Ave, Kew Gardens. We respectfully ask for considering choosing another site for the jail for the following reasons:

1. The proposed address is too close to so many schools and kids' playgrounds. The following schools are all within walking distance of the proposed address, with closest only 5 minutes' walk: Kew-Forest School, Preschool of America Daycare, Our Lady Queen of Martyrs Catholic Academy, elementary schools P.S. 101, P.S. 196 and P.S. 144, Archbishop Molloy High School etc. As parents, the thought of detainees and just released sex offenders or child predators wandering around the neighborhood is frightening. Not to mention the rare but potential impact of gang activities, or violent fights happening so close to kids' schools and playgrounds.
2. Another potential risk is the increase of people with weapons in the neighborhood. This will increase the probability of massive shooting in nearby schools and playgrounds. People just released from the jail would be wondering around the neighborhood with kids playing around which would be very worrisome to the parents.
3. Both the communities of Kew Gardens and Forest Hills will suffer tremendous economic loss. A lot of parents and local business will move out the communities, resulting in a crash of nearby housing markets.
4. Road infrastructure nearby will not be able to handle the dramatic increase in traffic that will occur after the proposed expansion. The nearby Queens Boulevard is already one of the deadliest streets in the city. We support the effort to close Rikers Island and the goals of making our municipal jails more humane. However, the choice of 126-02 82nd Ave Kew Gardens is very inappropriate. We strongly suggest reconsidering another site.

Thanks and regards,
Yu Wei

"Dear Ms. Douglas:

I recently heard about the proposed plan to close Rikers and erect jails in the 4 boroughs. I live in Kew Gardens and I am firmly opposed to this plan. For one, this plan was formulated WITHOUT any significant input from our community, despite what the Mayor's office stated in various press releases. I am a member of Community Board 9 and no one has had the opportunity to hear details of this plan or offer input. The plan will have very serious consequences for our community including, increased traffic, congestion, noise etc. The size of the proposed structure will violate the zoning requirements that currently exist. The estimated cost of over

10 Billion dollars (not including the usual cost overruns) will prohibit the city from dealing with our very dilapidated infrastructure, including our subway, bridges, schools, etc. I can assure you that our community board will oppose this plan after they finally get an opportunity to see what is in it.

Rikers needs to be rehabilitated (at a fraction of the cost of this plan). More important, the entire criminal justice system does need to be reformed and the violent culture in our jails must be addressed. This can happen with minimal cost but it will take strong, thoughtful and competent leadership.

Sincerely,

Seth P. Welins, Ph.D.

Bryan Welton

weltonbryan@gmail.com

"To Whom it May Concern,

My name is Bryan Welton, and I am a supporter of the No New Jails NYC Coalition. Although I do not live in the immediate neighborhood where the current jails and proposed expansions are sited, as a Flatbush resident and someone who was briefly jailed at the Brooklyn Detention Complex in 2012, I hope to speak to the environmental hazard and harm of jail expansion.

Rather than provide for public safety, I have experienced first-hand how NYC's Department of Corrections organizes and concentrates vulnerability and violence. For that reason, I encourage the immediate and permanent closure of the Rikers Island jail complex, and I oppose the proposed expansion of the DOC's borough-based jail system. As a student of environmental health at CUNY, I believe the city's emphasis on neighborhood aesthetics, infrastructural pressures, and property values too narrowly defines the scope of environmental hazard and harm. The Brooklyn Detention Complex and Rikers are both equally toxic and damaging places that no reform, much less architectural re-design, can remedy.

The violence the DOC is incapable of abating at Rikers is not the consequence of distance or design. Rather, it results from the power DOC officers and administrators exercise over the people they confine. While jailed at the Brooklyn Detention Complex, I experienced first-hand the jail environment and its impact. The jail denied privacy, mobility, and adequate attention and care for health conditions. I witnessed guards ignore desperate requests for necessities such as water and medication. Over time, I observed the declining state of people under confinement. The sociality and concern among the people I shared a cage with was strained to a breaking point by these conditions, and mental health crises were exacerbated by the guards' contempt. The resulting stresses, illnesses, and injuries would not be limited to the people imprisoned in the Brooklyn Detention Complex, the impact of the jail environment and experience imposed an additional burden on the people in our community that care for us. The determinants of violence in the DOC were not the aesthetic of the jail's exterior or the color of the walls inside, it was the power relations of imprisonment itself.

The city's design for expanding the DOC's borough-based jail system ignores this issue of power by foregrounding cosmetic reform. The euphemistic branding and the fantasy promoted of a jail as a "good neighbor" obscures the cruel reality of human caging and its impact on communities. Moreover, the plan for building four new jails remains silent about the mechanism that fills them: policing. In doing so, the city fails our communities by wasting this political opportunity for making meaningful change; choosing to invest ten billion dollars toward building more cages rather than increasing the capacity and scope of supportive community-based services that address the underlying issues of poverty, interpersonal conflict, and mental health. This plan would further cement the city's commitment to policing and imprisonment as a crude response to complex social, economic, and political problems.

The city has an opportunity and political mandate to close Rikers. Having attended two of the four scoping hearings and witnessed the public's powerful opposition to the city's expansion plan, it is clear that there is no need or consensus to replace the Rikers Island jail complex with

more cages in any borough. Rather, I saw residents insisting that criminal justice priorities be replaced by an agenda that advances human health and freedom for their communities. Ten billion dollars should be invested in building a more capacious system of supports that secure the basic needs of New Yorkers, toward preventing, mitigating, and undoing harm and establishing conditions where healthy communities flourish.

Sincerely,
Bryan Welton
Brooklyn, NY 11230

"Ladies and Gentlemen:

I am writing to express my deep concerns regarding the environmental impact of the proposed Queens Jail.

My Husband and I are both life-long New Yorkers and have lived directly across the street from the proposed Jail site for the past four years.

Our concerns of the Environmental Impact are as follows:

Negative impact on green spaces surrounding Borough Hall. The propose Jail would be 29 stories tall and would significantly reduce if not completely cut off the amount of sunlight reaching the Borough Hall Lawn (behind Borough Hall) as well as the gardens that surround the building.

Removal of 82nd Avenue. The streets within the proposed campus are already congested by traffic and parked vehicles. Removing a section of the street will only exacerbate congestion.

Sewage and Drainage. The proposed Jail will house 1500+ inmates. Additionally there would be hundreds of officers, staff, visitors, etc. There are currently several large residential buildings being constructed across from the proposed Jail on 134th Street. How will the current sewage infrastructure accommodate an influx of such a huge number of people?

Trash. This proposed facility will produce a huge amount of trash. Where will it be stored? How will it be removed? Will we be woken every night by trucks removing trash?

Public Transportation and Pedestrian Congestion. This is a major transportation hub! The subways and busses that converge here are already overcrowded. Long lines of people waiting for the busses snake down Queens Blvd. and Kew Gardens Road.

Film and TV Production. The existing jail and Criminal Courthouse are extremely popular with Film and TV Production. Productions use the jail and courthouse area approximately two to three days per week. They park their trucks and production vehicles on 82nd Avenue and along Queens Blvd. Where will these vehicles park during construction of the proposed jail as well as after completion?

Construction. The proposed jail would take several years to construct and would be a massive project. During what hours will construction take place? What steps will be taken to shield the surrounding residential buildings and business from construction noise, debris and dust?

Parking During Construction. During construction of the proposed Jail, the 302 spots in the current Municipal lot will be lost. Additionally, the 300+ spots on the surrounding streets (82nd Ave., 126th St., 132nd St. and Grand Central Pkwy) Street will be lost during the years of construction. WHERE WILL THESE OFFICERS, STAFF AND VISITORS PARK DURING THE YEARS OF CONSTRUCTION? This area of Queens Blvd. and the surrounding side streets are already heavily congested with vehicles searching for free or low cost metered parking. This area cannot accommodate any additional vehicular traffic.

24/7. The proposed jail will operate 24hours a day and 7 days a week. What noise and intrusive bright lights will disturb residents during the evening hours? Will loud trucks making deliveries or picking-up trash come and go all night long? Will inmates be transported on busses or other vehicles during the night? Jails are traditionally lit with very bright external lights. How will the lights be curbed to prevent intrusion into the surrounding residences?

Traffic Congestion and Parking. Traffic congestion in this area has soared in recent years. Trucks making deliveries and vehicles transporting to and from the Dialysis Center opposite Borough Hall are constantly double and sometimes triple parked. Frequently bringing traffic on Queens Blvd. to a standstill. Drivers visiting Borough Hall, The Courthouse and local businesses constantly clog the local streets while circling in search of free or low cost Meter Parking. Meanwhile the new Municipal lot sits 2/3 empty because it is so expensive. Parking has become so contentious that I have personally witnessed drivers threatened over spots.

In addition to all the concerns mentioned above I must include the 20 story homeless shelter that sits opposite the proposed jail. Since the opening of this shelter there has been a tremendous increase in aggressive panhandling and garbage on the street. The worst accompaniment to the opening of the homeless shelter is drugs. Drug dealers and users constantly inhabit the corner of 82nd Avenue and Queens Blvd.

In conclusion, I am very disturbed how quickly this project is being pushed through the approval processes, with very little input from the community. I am shocked that so many of our elected officials are supporting this terribly ill-conceived project. Perhaps if they lived directly across the street from the proposed jail as we do, they would feel differently. I will be sharing this e-mail with all of our elected officials.

Please feel free to contact me if you require any additional information and please confirm receipt of this email.

Sincerely,

Robert E. Weston

2018

120 82 Avenue
Kew Gardens,

October 21,

Howard Judd Fiedler AIA.
Director of Design Unit, NYC Department of Correction
75-20 Astoria Blvd Ste 160,
East Elmhurst, NY 11370
VIA EMAIL : boroughplan@doc.nyc.gov <mailto:boroughplan@doc.nyc.gov>

Dear Mr. Fiedler,

We are writing to you to express our firm opposition to the current plan to expand the jail facilities in Kew Gardens, Queens. While we are in total agreement that the situation in Rikers Island needs to be remedied, the massive expansion of the facilities in Kew Gardens is not an acceptable solution.

In reviewing the Littmann Commission report it was clear that not one local community organization in representing the residents of the surrounding communities was included. Speaking to the elected officials is not the same since it assumes that our interests are aligned, which is not always the case. The lack of community involvement during the planning phase speaks volumes. Bringing the community into the process at the very last moment does not provide any time to research and respond to the myriad problems that this facility will cause.

The size of this facility, together with all the ancillary services, employees and visitors will overwhelm our neighborhood and exacerbate already strained services. There was nothing in your plan that realistically addresses the issues of mass transit and parking congestion that will result. The inclusion of additional parking spaces is not an answer since its location and cost will result in people looking for free parking alternatives. In many of the side streets we already have cars blocking our driveways and in some cases actually parking in the driveway proper without permission due to constrained parking.

Our public transportation is overburdened as it is given the long lines for the buses and the crowded subway platforms and trains on the E and the F lines. The addition of this facility will only exacerbate this condition.

It seems that every presentation we have had has focused solely on the facility and not the impact to the community at large. The expedited process that the mayor has put in place to ram this through has made it clear that apparently the community impact and overall cost of the facility is of little consequence.

As such strongly request that you pay attention to the damage that you are going to do this community and work with us to find a more suitable site for this jail.

Sincerely

Adam Whiteman & David BenJoseph.

"

STATEMENT AGAINST NYC'S ROADMAP TO CLOSING RIKERS ISLAND

Kei Williams, Co-Director of Programming & Facilitation at Movement Netlab, and resident of District 33, #NoNewJails Member

[Thank you for holding this meeting, and granting me the opportunity to speak tonight.]

There is no way we can talk about building new jails without talking about safety. In essence, the City's proposal is not to close Rikers but to replace Rikers with four new state-of-the art facilities that normalizes incarceration and pushes the perception that crime has a place in our communities -- that we can just package it away without being intentional about safety.

The downtown facility located on Atlantic Avenue -- the very facility that is being discussed at this meeting tonight -- was closed, and then reopened in 2008. In just 10 years, it has become "one of the most dangerous" jails in the city. The Brooklyn Detention Complex has seen a spike in "slashings" in just the last three years¹. How can the City or Mayor de Blasio defend and explain to Brooklynites, like myself, how expanding this facility and developing three additional ones would not result in more dangerous situations like this? What is the guarantee that we will not end up with four new jails that are simply new Rikers?

These are not just the concerns of residents, employers, activists, and community members. New York State has considered closing Rikers, because of the City's inability to provide safe conditions for inmates and those who work on the Island. The Commission of Correction found that despite increased scrutiny from state and federal investigators in recent years, violent incidents have risen from 2016 to 2017². Correction officers from Rikers have been implicated in the deaths, rapes, and other violent attacks of inmates³. And just earlier this year, Mayor Bill de Blasio's plan to transfer young inmates failed, leaving teenage inmates at risk of more violent interactions with adult inmates⁴. We have seen over and over again how the Mayor goes back on his word, enacts policies with negative impacts, and lacks transparency around this proposal of expanding prisons in New York City.

Not only do these new jails fail to guarantee increased safety for incarcerated people, but they would also continue the legacy of harm to families of incarcerated people and NYC communities at large. New York City jails have a history of harming families of incarcerated people. If we are looking at what is happening across this nation, with the #MeToo movement, we cannot ignore that 50 women filed legal proceedings against sexual misconduct experienced at the hands of correctional officers just last year.⁵ The Department of Corrections

⁵ <https://www.newsweek.com/rikers-island-corrections-officers-accused-sexually-assaulting-visitors-777378>

has taken ineffective efforts to reduce this harm, with no actual decrease in abuse to visitors. Additionally, the proposals of these jails has come unilaterally at the hands of De Blasio, cutting out key community voices who are able to best assess the impact these new facilities would have on their communities. This startling take on “transparency” undermines the ability of community leaders, like Bronx Borough President Ruben Diaz Jr.’s, ability to best inform what safety looks like for their communities.⁶ Without accountability to local communities and the impact jails have on New Yorkers, the city cannot claim that any new jails will have any positive impact on the safety of New Yorkers.

Finally, under the Mayorship of Bill De Blasio, New York City has been proud to claim an unprecedented increase in safety, reporting that “crime will have declined for 27 straight years, to levels that police officials have said are the lowest since the 1950s.”⁷ But what message does the opening of four new jails send to New Yorkers about the safety of our city? The opening of these facilities normalizes incarceration as a localized response to crime, without actually increasing the safety of New Yorkers or reducing the harmful legacy of New York’s jails on both incarcerated people and our communities at large. One thing we all agree upon tonight – New York City must close Rikers. We cannot allow the City to railroad us into creating four new jails. Let’s close Rikers in a way that safe for every single New Yorker.

⁶ <https://www.amny.com/news/new-bronx-jail-1.16773231>

STATEMENT AGAINST NYC'S ROADMAP TO CLOSING RIKERS ISLAND

M.J. WILLIAMS, lawyer, business owner, and resident of District 33, #NoNewJails Member

myst
I agree that we Close Rikers forever. But New York City does not. The City admits it is powerless to close Rikers alone. In its plan, closing Rikers is only a goal, not a commitment.¹

In the meantime, the City is **RUSHING** to build new jails.

The City will only reach the so-called goal of closing Rikers, if the jail population decreases. And the City's plan to reduce the number of people it jails is going to fail. So if the City approves the construction of new jails based on its wrong-headed plan, New York will end up with Rikers **AND** four new jails.

The City's plan will fail because it ignores the source of its jail population: **arrests**. Half of NYPD arrests end in dismissed, dropped, or acquitted cases.² Those are bad arrests from go. **Where is the commitment to eliminate bad arrests? Where is the commitment not to arrest our neighbors for petty crimes, for mental illness, for homelessness, for poverty?** The police control how many New Yorkers end up in jail, obviously. But NYPD isn't at the table. NYPD isn't part of the plan. Why?

The City's plan to reduce jail population will also fail because it avoids the causes of petty crime, poverty, mental illness, homelessness, and violence. As others have testified, our neighbors that fill Rikers from BedStuy, East New York, Brownsville cope with starved schools, unstable housing, displacement from gentrification, lack of jobs and child care, underfunded medical and mental health services. **Why isn't the City investing billions in taking care of our neighbors, instead of setting them up for jail and prison? Why isn't the City divesting from extracting New Yorkers from these communities and putting them in jail?**

Rikers is a hellhole. But EVERY single jail is a hellhole. No architect can design away, no new coat of paint can cover up the misery, horror, and violence of locking people in jail as they wait for trial. New jails should not be in **anyone's** backyard.

I am against this plan and building more jails, because the City's plan will fail. NYC will end up with 4 new jails **AND** Rikers. The police will continue to fill jails with New Yorkers targeted by unnecessary, predatory arrests - even as crime drops - unless the Mayor and City Council commit to changing the nature and breadth of policing in this City. The City should not build new jails as any part of closing Rikers. And it should scrap its current plan because this plan will fail.

This is why I stand for #NoNewJails.

Rae

raewink@gmail.com

"Dear Borough Based Jail Plan Team,

Thank you for hosting last night's Brooklyn meeting. I thoroughly enjoyed hearing so many different perspectives and seeing everyone come together to voice their passion about an issue that truly affects us all. My name is Rae and I am a registered nurse, writer, editor, and Brooklyn resident.

Rikers needs to be closed for the health and safety of the New Yorkers who are being held there. I was especially interested in the testimony last night from a gentleman who had been previously held at Rikers and who feels strongly about investing in safer communities and alternatives to incarceration rather than building new jails. Hearing his first-hand perspective from personal experience was enlightening and evidence of the importance of public meetings like this with city officials.

Allocate the proposed borough-based jail construction funds to invest in making New York City a model of decarceration and restorative justice, as it is a model in so many other ways. Invest in the immediate work to reduce New York's jail and prison population. All the positive programming such as increased access to good healthcare that you discussed happening in the new jails can happen in and after the current jails, as you work to transition away from locking away people and toward investing in safer communities. Invest in community programs that reduce crime and incarceration. Invest in restorative justice initiatives. Invest in holding community meetings where you can elicit and listen to feedback and ideas along the way, as many stakeholders suggested last night, to avoid being potentially blindsided by overwhelming public rejection of a unilateral proposal.

Thank you for listening.

Best,

Rae Winkelstein, MFA, MSN, BSN, BA, RN

"Dear Mr. Fiedler,

I am a Queens resident (for the past ten years) and I would like to offer my comments on the Borough Jails Draft Scope of Work.

I strong support the closing of the Rikers Island jails. I believe the best use of our public funds is to invest them in reducing the incarcerated population and preventing incarceration.

I understand that the planned borough jails would have better programming and be constructed in a way that will offer more humane living conditions. This would be an improvement on the current situation, of course, but it would cost a significant amount of money that I believe will be better spent in reducing and preventing incarceration. The sooner we invest in those things, the sooner we will see results. That is why, after careful thought and consideration, I do not support the construction of the borough jails. Ultimately, what has been demonstrated to be effective in restoring and maintaining healthy communities and raising healthy children is preventing and reducing incarceration, not changing its form.

I also want to point out that the efforts made to involve the community in the planning process were not adequate. I know there are many people who would have liked to offer their well-informed, educated and insightful opinions who did not do so because they had no idea that the borough jails were in the planning stages, and had no idea that their input was wanted or needed. Had you made a greater effort to involve ALL of the Queens community, or at least a larger cross-section of it, you would have received valuable feedback and been able to reach a conclusion that better reflected the needs and values of our community.

Thank you for taking the time to consider my input and that of other community members.

Best wishes,

Katie Winkelstein-Duveneck

"Dear Mr. Fiedler:

I am writing as a resident of Kew Gardens to let you know that I STRONGLY OPPOSE the plan to build a 1,510 bed jail at 126-02 82 Avenue, Kew Gardens. As you are probably aware, Kew Gardens is centrally located between both LGA and JFK, the Queens Courthouse and we are surrounded by highways. The location is overly populated as it is right now and congestion is overwhelming for our residents. I strongly oppose the building of the jail in Kew Gardens as it will cause even more congestion.

Parking is a real problem in Kew Gardens. Visitors to the new jail will surely search for parking which is a problem already for our residents. Our community opposes the jail and we hope you hear us.

Thank you for your time and consideration.

Mia Wong

mw3456@nyu.edu

"Dear Howard Fiedler,

Given that jails have high social and economic costs on communities (DoC's 2017 budget was 1.4 billion dollars, NYC spent 5.2 billion on policing, 950 million on criminal courts) and that the borough-based jail plan will cost the city

10 billion, I don't see the necessity of building 4 new jails. Why don't you end pretrial detention and then you won't need to build 4 new jails.

Additionally, incarceration is economically ruinous for individuals, families, and communities. Jail perpetuates a culture of racial violence, why are we spending so much on jails. Why can't we put that money toward community facilities and services, not jails???

Sincerely,

A concerned citizen,

Mia Wong

Subject: Regarding reopening and expansion of a jail facility at 126-02 82nd Ave, Kew Gardens

Dear officers,

I am writing to express my strong opposition to the proposed reopening and expansion of a jail facility at 126-02 82nd Ave, Kew Gardens. I respectfully ask for considering choosing another site for the jail for the following reasons:

1. The proposed address is too close to so many schools and kids' playgrounds in the area. The following schools are all within walking distance of the proposed address, with the closest within only 5 minutes' walk: Kew-Forest School, Preschool of America Daycare, Our Lady Queen of Martyrs Catholic Academy, elementary schools P.S. 101, P.S. 196 and P.S. 144, Archbishop Molloy High School etc. As a parent, the thought of just released criminals wondering around in the neighborhood is frightening. Not to mention the rare but potential impact of gang activities, or violent fights happening so close to kids' schools and playgrounds.
2. Both the communities of Kew Gardens and Forest Hills will suffer tremendous economic loss. A lot of parents and local business will move out the communities, resulting in a crash of nearby housing markets.
3. Road infrastructure nearby will not be able to handle the dramatic increase in traffic that will occur after the proposed expansion. The nearby Queens Boulevard is already one of the deadliest streets in the city.

I support the goals motivating the effort to close Rikers Island. However, the choice of 126-02 82nd Ave Kew Gardens is very inappropriate, and I strongly suggest reconsidering another site.

Thanks and regards,

"

Howard Fiedler,

My community needs access to affordable housing, education, healthcare, and stable income, not new jails. For this reason, I refuse to support the city's Draft Scope of Work. I can never endorse any plan to expand the number of jails in this city, when it should invest the

10 billion in resources that better serve what communities need. Please retract the proposal and work with grassroots organizations to address the root causes of incarceration. I urge you to scrap this plan and instead look to alternatives that have been proven to work, such as ending cash bail and pretrial detention, while investing in the thriving of all over-policed communities. Thank you.

Subject: Oppose the new jail plan at Kew Gardens Queens

Hi there,

As a resident living close to the proposed new jail address at **Kew Gardens Queens**, I strongly oppose this poorly designed plan. New jail will ruin our safety, the local economy and bring the whole community down with it. Quoted by a popular blogger saying: "I never understood how shutting down the facility could be expected to address the problems that stemmed from bad management. It's not like the land was cursed. Is there any guarantee that starting over elsewhere would lead to a different conclusion?" Please focus on **improve the bad jail management system** instead of burning tax payer's money and ruin other communities across the city.

Regards,

Mike Yang

BOROUGH-BASED JAIL SYSTEM

DRAFT SCOPE OF WORK FOR AN ENVIRONMENTAL IMPACT STATEMENT
CEQR No. 18DOC001Y

COMMENT SHEET

NAME: Carolyn Yao

ADDRESS: 42-11 Broadway Fl.2 Astoria, NY 11103

EMAIL: cyao42@gmail.com

COMMENTS:

I implore the mayor's office to consider that incarceration is an environmental hazard in itself. Building new people cages, anywhere, is ~~an~~ a dangerous environmental act. This proposed jail means the city intends to put more people in cages out of convenience. The environmental effect of jails is that children are born with jail cells ready for them, the effect is that communities become weaponized, and in the ~~the~~ most damning and tragic case, people die. Jails means people spend their lives in terror in their own neighborhoods. It also means trauma, ~~and~~ and murderous negligence, on inmates, past, present, and future. This is not just a question of which neighborhoods/sites are OK, this is about why the city needs any more jails, anywhere. Jails ~~are~~ cast a death spell onto city residents, and the city has not done anything new to transition inmates out of ~~into~~ a permanent state of incarceration.

Written comments on the Draft Scope of Work will be accepted by DOC through **October 15, 2018** and may be submitted at the scoping meetings, by email, or by regular mail to the contact below.

COMMENT SHEET

NAME: Ying Yu Situ

ADDRESS: 604 E. 17th St. Bklyn, NY 11226

EMAIL: ysitu1211@gmail.com

COMMENTS:

I grew up in Chinatown & went to school here. My mother worked here for 10 years. We do not need jails in Chinatown or anywhere else in the city. Spending 10 billion dollars of taxpayer money to build more jails (instead of what de Blasio committed to - shutting it ALL down) takes away from what our communities sorely need - affordable housing, jobs, ~~ex~~ healthcare, community space, mental health needs - ~~these things keep ppl out of jails~~ ^{these things keep ppl} (eliminating the NGED ^{at all} for jail) and give them chances to live.

85% of ppl in Rikers currently are awaiting trial & their trials & push back of trial dates pushes ppl who aren't even guilty to plea guilty just to put an end to an indefinite sentence. Ppl are incarcerated for being poor, for being from neighborhoods where they are overpoliced & thrown into jails b/c of bias, entire lies (Kalief Browder, rest in power), & an unjust system that continues to criminalize black & brown communities. As

Someone who is from Chinatown & grew up here, we cannot stand to have this jail built, which supports continued criminalization of poor communities of color & puts them at continued risk. Chinatown does not stand with that.

Written comments on the Draft Scope of Work will be accepted by DOC through **October 15, 2018** and may be submitted at the scoping meetings, by email, or by regular mail to the contact below.

"To Whom it May Concern,

My name is Zamira Yuldasheva, I am a resident of Boerum Hill. I live with my family next door to the Brooklyn Jail on Atlantic Ave.

I am absolutely against the plan of redeveloping the jail building in our neighborhood. Although I do understand that people staying in that building might have an unpleasant experience, I believe that the city government must protect the interests of its law-abiding citizens in the first place.

I have many concerns regarding this redevelopment plan. One of them is pollution caused by the nearby construction. Many people living in this neighborhood have little children who are especially sensitive to air quality. The construction work will most certainly create a hazardous condition which might affect our children's health negatively. Moreover, the construction will also increase noise pollution. We have many professionals in the neighborhood and personally, the last thing I would want to listen to in the evening is the sound of drilling or sawing outside of my apartment building. It will affect not only my emotions but also physical state as I won't be able to enjoy my quiet evenings and weekends.

Considering the size and significance of this redevelopment plan, our neighborhood will lose its charm. Boerum Hill is historic district. Most of the housing built between 1840-1870. Boerum Hill is known for its independent boutiques, restaurants and rows of brownstones. Boerum Hill is our home. And I believe it is our right as residents of our lovely neighborhood to vote collectively against this plan and I am sure my fellow neighbors will share this opinion with me.

Zamira Yuldasheva.

Dear Howard Fiedler,

I am an NYC resident in the Bronx (Co-Op City). I do not support nor do I see a logically humanitarian reason for building new prisons. The closing of Riker's and the demands behind it weren't a plead for new cages. On the contrary, the people demand the freedom of their loved ones. The building new prisons only bring contribution to the violence and poverty within the community. The tax-payer money that is being used to build new corrals for human cattle, could be used for the betterment of the community and crime prevention programs. They could be used to build better schools or fund the resources for better education and leisure programing for children to keep them occupied from making mistakes. So please reconsider your priorities and don't become a puppet of those behind the commercialized prison system.

Jeffrey Zimmer

jeffrey.w.zimmer@gmail.com

"Hello Mr Fiedler, please add the following comments and questions to the public docket:

1.) All nearby roads, Queens Boulevard / Hoover Ave / Union Tpke are absolutely jammed on a good day. The limitation of the surrounding street grid will choke traffic. Please provide NYC DoT traffic studies of the surrounding streets and realistic traffic increase estimates (e.g.

of Rikers staff, increased visitors)

2.) What has additional water/sewer load on the system? Please provide DEP and/or Dept of Sanitation estimates of additional resource flows.

3.) This area of Queens has brownouts / outages every summer, the area cannot sustain additional electrical load. Please provide a ConEd impact assessment regarding the utility resourcing in the area and additional peak capacity

4.) My daughter's school, PS99, is right up the road. At this point, my main concern is traffic backups and frustrated / aggressive drivers (I personally saw cars driving *on the sidewalk* across from the school along 83rd Rd.)

5.) When the previous jail was in operation, there was at least once incident of escaped prisoner running up the hill into the Kew Gardens development. Have you collected any input from Principal Foglio at P.S.99?

Thanks, and good luck sifting through all the comments you must be getting right now.

Jeffrey Zimmer

"

I have lived 27 years in Forest Hills, a safe and family-friendly residential neighborhood. My home is located near the boundary of Forest Hills with Kew Gardens and just a few blocks away from the site of the proposed jail. I am very concerned that the location of such a large corrections facility just blocks away from a school and close to a busy subway station will be detrimental to our quality of life. In particular, because of the large size of the facility envisaged, our neighborhood is very likely to experience the following problems:

- a. Increased traffic and demand for parking in an already overcrowded area where street parking is scarce;
- b. Increased use of the subway lines leading to the Union Turnpike-Kew Gardens-station and further overcrowding of trains;
- c. negative effects on property values.

Furthermore, to ensure security in the neighborhood, it will be important to maintain high levels of experienced staffing in the jail and it is not clear that the Department of Corrections is able to do so.

For those reasons, I oppose the plans to build a jail on Queens Blvd and 82nd St.

I appreciate your attention to this matter.

Hania Zlotnik

"Questions and Comments regarding jail at 80 Centre Street in Manhattan

1. The proposed building/tower appears to exceed floor area ratio and building bulk / massing regulations. Please provide a detailed explanation with technical drawings showing what the design is and how it was generated.
2. The proposed tower will cast a shadow over Columbus Park and its playgrounds making them unusable in the colder months. Please provide shadow studies and details as to expected shade coverage.
3. Please provide detailed information as to scope of demolition.
4. I have concerns about asbestos and the release of toxic materials during demolition. Please provide a detailed plan. What will the city do precisely to ensure safety of the neighborhood and its residents?
5. Please provide detailed renderings of the proposed design from all sides including an aerial.
6. We need to know exact materials for the proposed design - how light, dark or reflective they are.
7. Please provide a section in both EW and NS directions showing the building in context.
8. What is the expected pattern of street closure for the work ire construction? Which street, when and for how long?
9. Please provide names of corrections experts who have consulted on this plan.
10. Jails need separate ie sequestered areas for persons with toxic diseases etc that require extra separation, a separate hvac system etc. Please provide a volumetric breakdown of the proposed facility (not only square footage).
11. What is the plan for release of prisoners? Will it be in the neighborhood? Currently prisoners are released in LIC at 5am once weekly, and serving newly released inmates, the area is rife with prostitution, drugs and other illegal activity, inappropriate for a family neighborhood.
12. The Correction Officer's Union has shown itself to operate akin to organized crime (the media has reported at length of their crimes, organized to be covered up etc). What are the plans to address this in a new location - 80 Centre? When members of this Union park illegally, what will prevent them from doing so, and what will be the repercussions?
13. What is the expected traffic flow of admittance, drop off, prisoner, police and civilian movement? How will the streets accommodate this?
14. What is the plan if an inmate escapes?
15. What is the plan if there is a prison riot? How will the neighborhood be affected?
16. How will existing infrastructure absorb this additional load? What new sewers etc need to be put in?
17. How will toxic waste be removed ie if someone has a toxic contagious disease?
18. The building is next to the subway. What are the expected disruptions to the subway service?
19. It was reported that long standing conflicts with the juvenile jail system continued at the new relocated location. What is the plan so that this does not happen with the much larger adult population?
20. What is the plan if the prison population grows? Will there be excess space of that which is needed? If so how much? And if not, where do those extra people go?

"To the Mayor's Office of Environmental Coordination and the Department of Corrections:

The proposed jail plan that is currently being reviewed is a disaster for the health of people living in New York City and continues to deepen issues of racial discrimination, family separation, and environmental racism. Rikers must be shut down immediately as it has created the conditions for innumerable atrocities in the past century.

In terms of the scope of work for the environmental review process, I find it very unsettling that this project is not being treated as a residential construction project while we know that the average time for someone in Rikers is at least 6 months to a year. People who will be forced to live in the new jails will be denied of their health across many fronts, which are indisputably linked to the health vulnerabilities they face due to their socioeconomic conditions and the failure of standard healthcare while outside of jail, which make them uniquely prone to sickness while incarcerated.

This is on top of the types of medical issues that people develop while incarcerated, both physical and psychological, that deeply impact them beyond their stay in jail. The final scope of work and DEIS must include another section on the health impacts of incarceration on the people inside the proposed facilities. This must examine the history of the lack of medical care provided at Rikers, the threat to incarcerated people's wellbeing that DOC guards pose, and the psychological health impacts of isolation and confinement. This also must include the trauma that incarcerated people have to deal with in terms of sexual assault perpetrated by the NYPD and DOC officers, and the way that trans and queer people are uniquely punished while incarcerated.

Additionally, in the section on air quality and wastewater systems, the EAS refers to the Phase 1 Assessment which is not publicly available. From numerous issues with poorly prepared jail expansions in California creating huge wastewater treatment spills, including Fresno and San Luis Obispo as notable examples, I am extremely worried about this happening in New York City. Wastewater spills most obviously effect people incarcerated in the jails, but also create devastating ecological effects and seriously affect the daily lives of people living near the jail wastewater spills. The wastewater assessment needs to be carried out thoroughly, and all documents need to be publicly available so that not just the consultants and DOC can consider the risks posed by this jail expansion project.

Finally, a disproportionate number of jail and prison sites in the country are chosen because they are unfit for residential development because of hazardous chemicals present. While many terminal and long-term illnesses that affect incarcerated people are poorly documented, we do know that there is an unusually high incidence of cancer of people who are incarcerated in this country, and when coupled with poor medical care has devastating outcomes. I am very concerned about spending 10 billion dollars on a project that has been linked to causing and exacerbating terminal illness.

The toxic impacts of jails cannot be boiled down to a few issues that fit into the way the scope of work report quantifies risk to human and ecological health. The writing and research methods of the final scope of work and DEIS must be shifted to accurately reflect the harms that this jail will exacerbate, starting with the health effects on people who will be incarcerated. This must be done by examining the health issues of people living in the neighborhoods that are currently over-policed and those who are most likely to end up in NYC jails.

If carried out, this jail expansion plan will continue the histories of violence and ill health that the NYC Department of Corrections is known for. Rikers must be shut down immediately and the Mayor's office must find a new plan for decarceration in NYC.

Sincerely,

Ian Alexander

This also must include the trauma that incarcerated people have to deal with in terms of sexual assault perpetrated by the NYPD and DOC officers, and the way that trans and queer people are uniquely punished while incarcerated.

Additionally, in the section on air quality and wastewater systems, the EAS refers to the Phase 1 Assessment which is not publicly available. From numerous issues with poorly prepared jail expansions in California creating huge wastewater treatment spills, including Fresno and San Luis Obispo as notable examples, I am extremely worried about this happening in New York City. Wastewater spills most obviously effect people incarcerated in the jails, but also create devastating ecological effects and seriously affect the daily lives of people living near the jail wastewater spills. The wastewater assessment needs to be carried out thoroughly, and all documents need to be publicly available so that not just the consultants and DOC can consider the risks posed by this jail expansion project.

Finally, a disproportionate number of jail and prison sites in the country are chosen because they are unfit for residential development because of hazardous chemicals present. While many terminal and long-term illnesses that affect incarcerated people are poorly documented, we do know that there is an unusually high incidence of cancer of people who are incarcerated in this country, and when coupled with poor medical care has devastating outcomes. I am very concerned about spending 10 billion dollars on a project that has been linked to causing and exacerbating terminal illness.

The toxic impacts of jails cannot be boiled down to a few issues that fit into the way the scope of work report quantifies risk to human and ecological health. The writing and research methods of the final scope of work and DEIS must be shifted to accurately reflect the harms that this jail will exacerbate, starting with the health effects on people who will be incarcerated. This must be done by examining the health issues of people living in the neighborhoods that are currently over-policed and those who are most likely to end up in NYC jails.

If carried out, this jail expansion plan will continue the histories of violence and ill health that the NYC Department of Corrections is known for. Rikers must be shut down immediately and the Mayor's office must find a new plan for decarceration in NYC.

"To the Mayor's Office of Environmental Coordination and the Department of Corrections:

The proposed jail plan that is currently being reviewed is a disaster for the health of people living in New York City and continues to deepen issues of racial discrimination, family separation, and environmental racism. Rikers must be shut down immediately as it has created the conditions for innumerable atrocities in the past century.

In terms of the scope of work for the environmental review process, I find it very unsettling that this project is not being treated as a residential construction project while we know that the average time for someone in Rikers is at least 6 months to a year. People who will be forced to live in the new jails will be denied of their health across many fronts, which are indisputably linked to the health vulnerabilities they face due to their socioeconomic conditions and the failure of standard healthcare while outside of jail, which make them uniquely prone to sickness while incarcerated.

This is on top of the types of medical issues that people develop while incarcerated, both physical and psychological, that deeply impact them beyond their stay in jail. The final scope of work and DEIS must include another section on the health impacts of incarceration on the people inside the proposed facilities. This must examine the history of the lack of medical care provided at Rikers, the threat to incarcerated people's wellbeing that DOC guards pose, and the psychological health impacts of isolation and confinement. This also must include the trauma that incarcerated people have to deal with in terms of sexual assault perpetrated by the NYPD and DOC officers, and the way that trans and queer people are uniquely punished while incarcerated.

Additionally, in the section on air quality and wastewater systems, the EAS refers to the Phase 1 Assessment which is not publicly available. "The Jail complex does not belong in the Kew Gardens residential community!

It would totally overwhelm and alter for the worse the social and economic character of this 100-year-old historic community, a community in which we know our neighbors and meet them daily on the streets.

A jail complex simply cannot and should not be two blocks from two public elementary schools and very close to 1 private middle-high school!

Additionally we have no infrastructure in the already burdened with tremendous motor traffic highways: Grand Central Parkway, Long Island Expressway, Van Wyck Expressway and Jackie Robinson Parkway. Hundreds of cars and trucks destined for the jail, e.g., deliveries, services, day & night time staff, etc. will exacerbate the problems.

The jail would further overload Queens Boulevard at its busiest intersection: the crossings of the four already noted highways.

Aggressive commuter and commercial automobile traffic from all five major thoroughfares already traverse through this interchange – as well as through the narrow, single-lane residential side streets of Kew Gardens, Forest Hills and Briarwood, used as alternatives to bypassing highway traffic – thus making the crossings and side-streets unsafe for neighborhood pedestrian traffic.

Our so-called “rich” public transportation consists of the heavily over-crowded E, F, M and R trains and the Q60 bus. Only a stranger would blithely exaggerate our ability to absorb more increases.

We, the residents of Kew Gardens, are against the jail complex in our community!

"

Madeline Berger

mebergerny@gmail.com

"Dear Mr. Fiedler and Borough President Katz:

The plan to build a 29-story, 1,500 inmate, major prison complex in Kew Gardens must take into account the longterm impact on the neighboring communities, not just prison-related goals. Placed in the proposed location, Kew Gardens, Kew Gardens Hills and parts of Briarwood WILL be destroyed. The very reliable and diverse group of tax papers that make-up these communities and on whom the city relies will ultimately leave the area.

This location does not REALLY serve the inmate population and their families simply because it is nearby transportation. Adjacency to the current criminal courthouse is a silly excuse -- Trials can be shifted to other Queens courthouses.

These communities maintain a citywide reputation as ""safe"" and are now populated largely by young families, single women and the elderly -- What are you thinking!? Two blocks from two public elementary schools and nearby to a middle-high school absolutely presents problems to young children who walk to and from school and play on their bikes. There is also a large (historic) nearby cemetery which seems like a prison security concern along with the transportation hub.

These areas are already burdened with tremendous motor traffic at the bottle-neck created by four adjacent highways: Grand Central Parkway, Long Island Expressway, Van Wyck Expressway and Jackie Robinson Parkway. Hundreds of cars and trucks destined for the jail, e.g. deliveries, services, garbage, day and night staff shifts, etc. will exacerbate the problems. There is already a well-known hot-issue parking problem in the area.

The jail would further congest Queens Boulevard at its busiest intersection: the crossings of the four already noted highways.

Aggressive commuter and commercial automobile traffic from all five major thoroughfares already traverse through this interchange – as well as through the narrow, single-lane residential side streets of Kew Gardens, Forest Hills and Briarwood used as alternatives to bypassing highway traffic – thus making the crossings and side-streets unsafe for neighborhood pedestrian traffic. How are the neighborhood subway station, bus stops fire house, etc. to truly support this facility?

For a hundred years, Kew Gardens has demonstrated a real willingness to accept and negotiate a variety of change, but this is too much. Respectfully, I must remind you that Mayor De Blasio will not be in office forever, but these communities will have to forever live -- or die -- with your decisions.

Please find another site that will better serve all of us.

Madeline Berger

Madeline Berger

mebergerny@gmail.com

"Dr. Mr. Fiedler and Borough President Katz:

Placement of a prison complex in Kew Gardens is ultimately a bad plan. Not only will it overwhelm the surrounding residential communities of Kew Gardens, Briarwood and Kew Gardens Hills, it does not achieve the mayor's goal to really locate prisons within their communities. Simply placing the complex near public transportation in Queens does not fulfill the intention. Also, there are other court houses in Queens where criminal cases can be assigned. To conclude that this prison has to be co-located with the building currently hosting criminal cases is silly. Also, as you know, there are a number of schools, many seniors, a cemetery, etc. all in the immediate area of the site under discussion.

Finally, there is no doubt such a complex would destroy these hard-working diverse communities. Such a move will encourage these serious tax payers residents to abandon NYC and NYS. Kew Gardens has been assaulted by developers, a homeless shelter, and more and has always demonstrated willingness to accept change and compromise, But, this is too much. Respectfully, your priorities need to be set straight -- This mayor will not be mayor forever.

Please abandon this short-sighted plan and identify more suitable locations.

Madeline Berger

"

Marie-Pascale Chauvel

marie.pascale.chauvel@gmail.com

"Dear Mr Fiedler,

I'm a concerned resident of Kew Gardens 11415 and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails.

This 1.9 million square foot, 29-story complex will be too large for our very small Kew Gardens neighborhood. The jail complex would be at a 2-block proximity to two public elementary schools and very close to middle and high schools. A jail should not be in such close proximity to children. This is inappropriate.

Motorist traffic, destined for the jail, would further overload Queens Boulevard at its busiest intersection. The amount of aggressive commuter and commercial automobile traffic would make the crossings and side-streets unsafe for the neighborhood pedestrians.

We already have a street-parking shortage, this jail will only cause further stress as hundreds of daily jail-related employee and visitor vehicles try to park in our very small neighborhood. The heavily over-crowded E, F, M & R trains and the Q60 bus, each with consistently very poor performance records, will become additionally crowded, dysfunctional, unreliable and unpleasant with the addition of the proposed jail-related commuters.

Kew Gardens has so much rich history, it is a neighborhood filled with families who love living here. Building this jail would destroy our community and bring along many new problems. Please do not build this jail. Everyone in Kew Gardens, Forest Hills and Briarwood are opposed to the Mayor's proposal.

Thank you.

Best,
Marie-Pascale Chauvel

Peter Hack

petermhack@gmail.com

"A 1.9 million square foot, 29-story high Jail complex does not belong in primarily residential communities (CB 9 is 90.54

residential). It would totally overwhelm and alter for the worse the social and economic character of this 100-year-old historic Kew Gardens community, a community in which we know our neighbors and meet them daily on the streets.

Kew Gardens, a community of fewer than 20,000 households, will be devastated, overwhelmed by the mega-city proposed.

A 1510 inmate jail complex two blocks from 2 public elementary schools and very close to 1 private middle-high school absolutely presents problems to young children walking our streets.

Our neighborhoods are already burdened with tremendous motor traffic at the bottle-neck created by four adjacent highways: Grand Central Parkway, Long Island Expressway, Van Wyck Expressway and Jackie Robinson Parkway.

Hundreds of cars and trucks destined for the jail, e.g. deliveries, services, day & night time staff, guards, administrators, medics, legal aids etc. will exacerbate the problems.

The jail would further overload Queens Boulevard at its busiest intersection: the crossings of the four already noted highways.

Aggressive commuter and commercial automobile traffic from all five major thoroughfares already traverse through this interchange – as well as through the narrow, single-lane residential side streets of Kew Gardens, Forest Hills and Briarwood used as alternatives to bypassing highway traffic – thus making the crossings and side-streets unsafe for neighborhood pedestrian traffic.

Our so-called “rich” public transportation consists of the heavily over-crowded E, F, M & R trains and the Q60 bus. Only a stranger would blithely exaggerate our ability to absorb more increases.

These are only the proverbial “tip of the iceberg” issues that impact and concern our communities. A massive city-like jail complex with its enormous construction problems will exacerbate already difficult situations – as well as bring many new problems. Our community and the infrastructure will be altered for the worst.

A small diverse and cohesive community just cannot absorb any of this without eventually being destroyed.

"

jcps319@gmail.com

jcps319@gmail.com

"To whom it may concern:

Mayor DeBlasio's ill-advised closing of Riker's Island, which has served this city well for many years, and kept inmates well away from communities, is now impacting Kew Gardens, as he proposes to put a new jail right in our community.

A 1.9 million square foot, 29-story high Jail complex does not belong in primarily residential communities (CB 9 is 90.54

residential). It would totally overwhelm and alter for the worse the social and economic character of this 100-year-old historic Kew Gardens community, a community in which we know our neighbors and meet them daily on the streets.

Kew Gardens, a community of fewer than 20,000 households, will be devastated, overwhelmed by the mega-city proposed.

A 1,510 inmate jail complex, two blocks from 2 public elementary schools and very close to 1 private middle-high school, absolutely presents problems to young children walking our streets.

Our neighborhoods are already burdened with tremendous motor traffic at the bottleneck created by four adjacent highways: Grand Central Parkway, Long Island Expressway, Van Wyck Expressway and Jackie Robinson Parkway.

Hundreds of cars and trucks destined for the jail, e.g., deliveries, services, day & night time staff, etc. will exacerbate the problems.

The jail would further overload Queens Boulevard at its busiest intersection: the crossings of the four already noted highways.

Aggressive commuter and commercial automobile traffic from all five major thoroughfares already traverse through this interchange – as well as through the narrow, single-lane residential

side streets of Kew Gardens, Forest Hills and Briarwood, used as alternatives to bypassing highway traffic – thus making the crossings and side-streets unsafe for neighborhood pedestrian traffic.

Our so-called “rich” public transportation consists of the heavily over-crowded E, F, M and R trains and the Q60 bus. Only a stranger would blithely exaggerate our ability to absorb more increases.

The City’s brochure, describing the jail as a community asset and implying that it would increase property values, defies reason.

These are only the proverbial “tip of the iceberg” issues that impact and concern our communities. A massive city-like jail complex with its enormous construction problems will exacerbate already difficult situations – as well as bring many new problems. Our community and the infrastructure will be altered for the worst. A small diverse and cohesive community just cannot absorb any of this without eventually being destroyed.

Kew Gardens must not be sacrificed to fulfill the Mayor’s apparition.

residential). It would totally overwhelm and alter for the worse the social and economic character of this 100-year-old historic Kew Gardens community, a community in which we know our neighbors and meet them daily on the streets.

Kew Gardens, a community of fewer than 20,000 households, will be devastated, overwhelmed by the mega-city proposed.

A 1,510 inmate jail complex, two blocks from 2 public elementary schools and very close to 1 private middle-high school, absolutely presents problems to young children walking our streets.

Our neighborhoods are already burdened with tremendous motor traffic at the bottleneck created by four adjacent highways: Grand Central Parkway, Long Island Expressway, Van Wyck Expressway and Jackie Robinson Parkway.

Hundreds of cars and trucks destined for the jail, e.g., deliveries, services, day & night time staff, etc. will exacerbate the problems.

The jail would further overload Queens Boulevard at its busiest intersection: the crossings of the four already noted highways.

Aggressive commuter and commercial automobile traffic from all five major thoroughfares already traverse through this interchange – as well as through the narrow, single-lane residential side streets of Kew Gardens, Forest Hills and Briarwood, used as alternatives to bypassing highway traffic – thus making the crossings and side-streets unsafe for neighborhood pedestrian traffic.

Our so-called “rich” public transportation consists of the heavily over-crowded E, F, M and R trains and the Q60 bus. Only a stranger would blithely exaggerate our ability to absorb more increases.

The City’s brochure, describing the jail as a community asset and implying that it would increase property values, defies reason.

"To whom it may concern:

Writing in regards to Proposed Jail in Kew Gardens. I live in Briarwood. Right behind the court house, across the street. Not only has there been on going construction in this area for over 5 years, fixing the highways, roads and bridges; adding to the construction and noise pollution is a good enough reason to STOP the building of the jail. Also, vacating Rikers Island to promote real estate value to build luxury apartments is not fair for our community. PLEASE STOP THE PROPOSAL AND CONSTRUCTION. THANK YOU.

HERE'S A BRIEF OUTLINE OF THE SCOPING ISSUES re the physical, social, economic and construction impacts on our community:

A 1.9 million square foot, 29-story high Jail complex does not belong in primarily residential communities (CB 9 is 90.54

residential). It would totally overwhelm and alter for the worse the social and economic character of this 100-year-old historic Kew Gardens community, a community in which we know our neighbors and meet them daily on the streets.

Kew Gardens, a community of fewer than 20,000 households, will be devastated, overwhelmed by the mega-city proposed.

A 1510 inmate jail complex two blocks from 2 public elementary schools and very close to 1 private middle-high school absolutely presents problems to young children walking our streets.

Our neighborhoods are already burdened with tremendous motor traffic at the bottle-neck created by four adjacent highways: Grand Central Parkway, Long Island Expressway, Van Wyck Expressway and Jackie Robinson Parkway.

Hundreds of cars and trucks destined for the jail, e.g. deliveries, services, day & night time staff, guards, administrators, medics, legal aids etc. will exacerbate the problems.

The jail would further overload Queens Boulevard at its busiest intersection: the crossings of the four already noted highways.

Aggressive commuter and commercial automobile traffic from all five major thoroughfares already traverse through this interchange – as well as through the narrow, single-lane residential side streets of Kew Gardens, Forest Hills and Briarwood used as alternatives to bypassing highway traffic – thus making the crossings and side-streets unsafe for neighborhood pedestrian traffic.

Our so-called “rich” public transportation consists of the heavily over-crowded E, F, M & R trains and the Q60 bus. Only a stranger would blithely exaggerate our ability to absorb more increases.

These are only the proverbial “tip of the iceberg” issues that impact and concern our communities. A massive city-like jail complex with its enormous construction problems will exacerbate already difficult situations – as well as bring many new problems. Our community and the infrastructure will be altered for the worst.

A small diverse and cohesive community just cannot absorb any of this without eventually being destroyed.

"

Laura Krakoff

lakrakoff@gmail.com

"Howard Judd Fiedler, AIA:

The proposed project for a 29-story, 1.9 million square foot, 1510 inmate jail complex in Kew Gardens would be an unmitigated and unnecessary disaster for the neighborhood. This predominately residential community already suffers from the burdens of an an overtaxed infrastructure and horrendous traffic congestion due to overcrowded major highways, main roads and narrow local streets in the area, which would only be made exponentially worse by the jail project. The disruption that the construction alone would bring would also be devastating to Kew Gardens.

In addition to these stresses would be the risks the jail population would pose to neighborhood residents, in particular the children who study in the three nearby schools and other pedestrians who also have to navigate the dangerously crowded streets.

There is no need to subject the Kew Gardens community to such an assault, when a better solution is available. It would be criminal to let this project be completed, when a thorough renovation and overhaul of Rikers would serve the same purpose and accomplish it more economically and efficiently. This option must be re-examined more seriously. There may be no ideal answer for the jail problem, but building a new jail in Kew Gardens would most certainly be the worst.

Thank you.

Laura Krakoff

lindaivon

lindaivon@aol.com

"Dear Mr Howard Fiedler

The Jail complex does not belong in the Kew Gardens residential community!

It would totally overwhelm and alter for the worse the social and economic character of this 100-year-old historic community, a community in which we know our neighbors and meet them daily on the streets.

A jail complex simply cannot and should not be two blocks from two public elementary schools and very close to 1 private middle-high school!

Additionally we have no infrastructure in the already burdened with tremendous motor traffic highways: Grand Central Parkway, Long Island Expressway, Van Wyck Expressway and Jackie Robinson Parkway. Hundreds of cars and trucks destined for the jail, e.g., deliveries, services, day & night time staff, etc. will exacerbate the problems.

The jail would further overload Queens Boulevard at its busiest intersection: the crossings of the four already noted highways.

Aggressive commuter and commercial automobile traffic from all five major thoroughfares already traverse through this interchange – as well as through the narrow, single-lane residential side streets of Kew Gardens, Forest Hills and Briarwood, used as alternatives to bypassing highway traffic – thus making the crossings and side-streets unsafe for neighborhood pedestrian traffic.

Our so-called “rich” public transportation consists of the heavily over-crowded E, F, M and R trains and the Q60 bus. Only a stranger would blithely exaggerate our ability to absorb more increases.

We, the residents of Kew Gardens, are against the jail complex in our community!

Very concern citizen

barry wollner

brdwollner@aol.com

", A message from Barry Wollner
a Resident of Briarwood/Forest Hills for over 35 years

Please respect the impact a building of this size will have on our neighborhood. People have already been relocating from one of the best areas in Queens because of the lack of parking, overcrowded subways and the drastic increase in traffic especially during rush hour. Rush hour will begin at 6 am and end after 9 pm. Subway platforms currently at capacity will have people on the staircases. The economic impact on the city due to middle class flight and train delays will be tremendous. Work with the Community to develop a building that is contextual in size and appropriate for our neighborhoods. A 1.9 million square foot, 29-story high Jail complex does not belong in primarily residential communities (CB 9 is 90.54

residential). It would totally overwhelm and alter for the worse the social and economic character of this 100-year-old historic Kew Gardens community, a community in which we know our neighbors and meet them daily on the streets. "To the Mayor's Office of Environmental Coordination and the Department of Corrections, Mr. Fielder:

I am writing to state my opposition to the city's proposed jail expansion. I oppose building any new jails, and I insist on closing Rikers now. Rather than diverting money from social programs and community resources to build new jails that will harm our communities, we need to focus on the source of the problem: policing. The impact on public policy of the new jail plan will be to lock us in to policing and incarceration into the future. Criminalizing poverty, homelessness, mental health, substance use, sex work, immigration, and being a person of color gives the NYPD outsized and unwarranted power to surveil our most vulnerable community members, with disastrous results. Recent changes to policing in NYC are too little, too late and embed racial disparities even in the "reforms." The 2017 budget for the NYPD was

5 billion dollars. With those resources, the NYPD preys on working-class people of color every day to fill beds on Rikers Island, The Manhattan and Brooklyn Detention Complexes, and The Boat. It will fill the beds of these new jails too. Serious, meaningful changes have to start with the police, and until that happens we will not be safe.

Sincerely,

Ngozi Alston

Diana Bowers-Smith

dianabowers@gmail.com

"To the Mayor's Office of Environmental Coordination and the Department of Corrections:
I am writing to state my opposition to the city's proposed jail expansion.

I am a public librarian and a third generation Brooklynite who has dedicated her life to the Brooklyn community. I can tell you from my extensive firsthand knowledge of this borough, including doing prison library work at Rikers, that excessive policing and mass incarceration have massively damaged our community. The impact of this city's harsh policing and high incarceration rates will have a negative impact on New Yorkers for generations. More jails is no solution, and will only continue to deepen issues of racial discrimination, family separation, and environmental racism. Rikers must be shut down immediately as it has created the conditions for innumerable atrocities in the past century.

I oppose building any new jails, and I insist on closing Rikers now. Rather than diverting money from social programs and community resources to build new jails that will harm our communities, we need to focus on the source of the problem: policing. The impact on public policy of the new jail plan will be to lock us in to policing and incarceration into the future. Criminalizing poverty, homelessness, mental health, substance use, sex work, immigration, and being a person of color gives the NYPD outsized and unwarranted power to surveil our most vulnerable community members, with disastrous results. Recent changes to policing in NYC are too little, too late and embed racial disparities even in the "reforms." The 2017 budget for the NYPD was

It will fill the beds of these new jails too. Serious, meaningful changes have to start with the police, and until that happens we will not be safe.

Mayor de Blasio, please put your money where your mouth is and stop enabling the racist, militaristic NYPD. You love to tout your progressive values and NYC's status as a "sanctuary" city, yet we have some of the highest levels of segregation, family separation, and state-sanctioned atrocities in the nation. Actions speak louder than words. I implore you to consider the health and well-being of the citizens of New York City above the profits of the prison industrial complex.

Thank you,
Diana Bowers-Smith

"Jails Don't Build Communities

To the Mayor's Office of Environmental Coordination and the Department of Corrections:

I am writing to state my opposition to the city's proposed jail expansion. I oppose building any new jails, and I insist on closing Rikers now. Jails and prisons are infrastructural nightmares. The city's plan would make jails central aspects of all city planning for hundreds of years, instead of n community spaces and resources. Making us go to police and jails for access to public services like rehabilitation is violent and exclusive and puts new power in the hands of a Department of Corrections which has a well-documented and long history of violence. DOC can never be capable, due to its nature and role, of administering services fostering New Yorkers' health or wellbeing. The city's plan makes our neighborhoods monuments to mass incarceration and centers human caging in our urban planning and design. Jails and their surrounding areas put community members in proximity to violent and abuse police and corrections officers, and transform neighborhood character by incorporating dehumanizing and austere "security" like razor wire, police barricades, and austere, imposing buildings designed to separate us from our community members locked inside. Just like we look back on Rikers Island 75 years later with shock and dismay that we could ever have thought it was a "modern, humane" jail, so too will we look back at these detention complexes in horror. Close Rikers now without opening new jails.

Sincerely,

Recent changes to policing in NYC are too little, too late and embed racial disparities even in the "reforms." The 2017 budget for the NYPD was

5 billion dollars. With those resources, the NYPD preys on working-class people of color every day to fill beds on Rikers Island, The Manhattan and Brooklyn Detention Complexes, and The Boat. It will fill the beds of these new jails too. Serious, meaningful changes have to start with the police, and until that happens we will not be safe.

Sincerely,

Sarah Lurie
Carroll Gardens, Brooklyn

"To the Mayor's Office of Environmental Coordination and the Department of Corrections:

I am writing to state my opposition to the city's proposed jail expansion. I oppose building any new jails, and I insist on closing Rikers now. Rather than diverting money from social programs and community resources to build new jails that will harm our communities, we need to focus on the source of the problem: policing. The impact on public policy of the new jail plan will be to lock us in to policing and incarceration into the future. Criminalizing poverty, homelessness, mental health, substance use, sex work, immigration, and being a person of color gives the NYPD outsized and unwarranted power to surveil our most vulnerable community members, with disastrous results. Recent changes to policing in NYC are too little, too late and embed racial disparities even in the "reforms." The 2017 budget for the NYPD was

5 billion dollars. With those resources, the NYPD preys on working-class people of color every day to fill beds on Rikers Island, The Manhattan and Brooklyn Detention Complexes, and The Boat. "To the Mayor's Office of Environmental Coordination and the Department of Corrections:

New York City should divest from jails and invest in communities. NYC must close the 10 jails on Rikers Island immediately without building new jails. Jails have high social and economic costs for communities. In 2017, the budget for the Department of Corrections was

1.4 billion; the NYPD budget was

5.2 billion, and the city spend nearly

1 billion on criminal courts. It costs over

200,000 to incarcerate one person for one year on Rikers Island, and

140,000 to incarcerate one person for one year across NYC jails. Meanwhile, the Department of Education spent

14,500 per student per year. By prioritizing incarceration to the tune of

7 billion per year, the City demonstrates its lack of concern for socioeconomic conditions in the Bronx, Brooklyn, Queens, and Manhattan. Instead of a jail, Chinatown needs affordable housing and free space for community programs. Instead of a jail, Mott Haven needs displacement prevention and community healthcare. Instead of a jail, Brooklyn needs truly affordable housing for the working and middle class Black and Latinx families currently being pushed out of their neighborhoods by gentrification. Instead of a jail, Queens needs services for immigrants and elders and a guarantee of true sanctuary. If the City is going to re-zone this four sites over massive community objection, why not re-zone them to provide services that our communities actually need? NYC lives in the shadows of mass incarceration and its apparatuses of enforcement, including the violence and dehumanization of Rikers Island. The borough-based jail plan merely redistributes the shadows, it does not eliminate them.

Sincerely,
Josh Adler

"

Howard Fiedler,

Rikers costs over

2.4 billion to run annually. It costs over

200,000 to incarcerate someone for a year. Moreover, over 75

of those people are released because they're found not guilty. It is clear to me that Rikers and incarceration at large is ineffective, costly, and cruel. The mayor is making the right move to propose to close Rikers by 2027, but this Draft Scope of Work is misguided. I cannot support the four new jails construction across the boroughs. It will once again lead the city to invest more money in the inefficiency of jailing when the mayor can do more to resource alternatives to incarceration, such as restorative justice and ending pretrial detention. He will only take action if key actors, such as yourself, Mr. Fiedler, take a moral stance against the plan. Please, work on large-scale projects that are not this one. This plan needs to stop immediately starting with rejection of the Draft Scope of Work. Thank you.

Jade Levine

jade.c.levine@gmail.com

"To the Mayor's Office of Environmental Coordination and the Department of Corrections:

The City of New York should not be building new jails. It is time for the City to fulfill its potential to help its citizens, to divest from jails and invest in community infrastructure now. It is possible for the city to fulfill its promise to close jails on Rikers Island and simultaneously not build new jails in communities that will be deeply affected by building projects, increased policing, and the social costs of jails.

It costs over

200,000 to incarcerate one person for one year on Rikers Island, and

140,000 to incarcerate one person for one year across NYC jails. Meanwhile, the Department of Education spent

14,500 per student per year. By prioritizing incarceration with

7 billion per year of the City's budget, the City demonstrates its lack of concern for socioeconomic conditions in the Bronx, Brooklyn, Queens, and Manhattan.

Chinatown needs affordable housing and community space for its elders and youth, not a new jail. Mott Haven needs resources that will help fight displacement of long-term residents. Brooklyn needs a commitment to affordable housing, not a jail. Queens, the most diverse zip codes in the US, needs immigrant services and education for its youth, not a jail. Communities have come out in full force to protest the rushed construction of these jails; we are willing to engage in real, thorough discussion about the issues that face these communities the most.

Sincerely,
Jade Levine (10027)

"Comments on the Draft Scope of Work submitted pursuant to the City's Rules of Procedure for CEQR (18DOC001Y)

To the Mayor's Office of Environmental Coordination and the Department of Corrections:

I am writing to oppose the construction of new and/or greatly enlarged detention facilities around the city. Although there seems to be a commitment on the part of city officials to closing Rikers over a long time frame, there's no guarantee that that will happen, and developing more jails in the meantime is an implicit commitment to filling those buildings as well. Over 80

of people on Rikers at any given time are pre-trial detainees and haven't been convicted of a crime at all. Changing the ways that the city puts people into the criminal justice system would have far more of a salutary benefit to all New Yorkers than building new jails (no matter how many shiny coffee bars are in their ground floors) ever will.

For example, the New York Police Department continues to use an illegal quota system to issue summons and make arrests, often of young people of color, especially black men. The American system of cash bail means that people who can't afford astronomical amounts of money must remain in detention regardless of the seriousness of the crime with which they've been charged (again, not convicted), causing economic and employment problems for themselves, childcare issues for their families, and general stress and mental anguish for their loved ones. This is not a healthy system, and it's not one that has a good track record of making reparations to people who have been harmed by those who end up jailed.

In terms of investment, the money that the city spends on the NYPD (

5.2 billion), the Department of Corrections (

1.4 billion in 2017), criminal courts (almost

1 billion), and incarcerating people (over

200,000 annually for one person in Rikers) would be better spent on education, social services, housing, healthcare, and parks. Having a more livable city that responds to the needs of its residents of all incomes, citizenship statuses, and abilities would obviate the need to build more detention and incarceration spaces.

By decriminalizing poverty, changing the culture of policing in NYC, investing in transformative justice, and eliminating pretrial detention we could close Rikers without opening any new jails.

Thank you,

Melissa Morrone
Brooklyn, NY

Maureen Silverman

maureensilverman@gmail.com

"To Mayor's Office of Environmental Coordination and Department of Corrections -Howard Fiedler:

I am writing to state my opposition to the city's proposed jail expansion. I oppose building any new jails, and I insist on closing Rikers now. Jails and prisons are toxic for people and communities. Rikers Island is a perfect example of environmental racism: sited on a former landfill, the conditions there are hazardous to incarcerated people and workers alike. The new jail plan can't guarantee a toxicity-free environment because of how the sites are being zoned and where they are located. In general, jails deprive poor and working people of color of access to healthcare and safe housing and exacerbate existing racial health disparities. Jails harm the health of incarcerated people and make them more vulnerable to sickness due to malnutrition, barriers to healthcare, lack of autonomy over movement and bodily care, and stress. Trans and gender nonconforming people who are incarcerated are denied medically-necessary care and subjected to incredibly high rates of sexual violence and harassment. Jails tear communities and families apart by disappearing loved ones, taking a massive psychological toll on incarcerated people and their families. Jails also harm the mental and physiological health of people who work in them, who come into contact with the same toxic environmental conditions as incarcerated people and suffer psychological distress from their work. We should spend ten billion dollars on community resources like schools, childcare services, healthcare, drug counseling, food programs, and public space. Not new jails.

Build Communities Not Borough Jails

To the Mayor's Office of Environmental Coordination and the Department of Corrections:

I oppose building any new jails, and I insist on closing Rikers now. Jails and prisons are infrastructural nightmares. The city's plan would make jails central aspects of all city planning for hundreds of years, instead of community spaces and resources. Making us go to police and jails for access to public services like rehabilitation is violent and exclusive and puts new power in the hands of a Department of Corrections which has a well-documented and long history of violence. DOC can never be capable, due to its nature and role, of administering services fostering New Yorkers' health or wellbeing. The city's plan makes our neighborhoods monuments to mass incarceration and centers human caging in our urban planning and design. Jails and their surrounding areas put community members in proximity to violent and abuse police and corrections officers, and transform neighborhood character by incorporating dehumanizing and austere "security" like razor wire, police barricades, and austere, imposing buildings designed to separate us from our community members locked inside. Just like we look back on Rikers Island 75 years later with shock and dismay that we could ever have thought it was a "modern, humane" jail, so too will we look back at these detention complexes in horror. Close Rikers now without opening new jails.

Ending Pretrial Detention

I oppose building any new jails, and I insist on closing Rikers now. We need to end jailing by ending pre-trial detention for everyone. Keeping people locked in cages while they wait for trial is economically ruinous for working class families and communities and does not keep anyone safe. Court fines and surcharges, bail, and loss of work take tolls on individuals, loved ones, and our whole city. Even being incarcerated for 24 hours can cause people to lose their jobs, children, and homes. Incarceration creates economic, social, and public health crises for NYC's Black and Latinx communities. We need to divest from incarceration and invest in the community resources that truly keep all New Yorkers safe, healthy, and in our neighborhoods & communities. By decriminalizing poverty, changing the culture of policing in NYC, investing in transformative justice, and eliminating pretrial detention we could close Rikers immediately without opening new jails. I urge the city to take this course of action.

End Policing to End Incarceration

I oppose building any new jails, and I insist on closing Rikers now. Rather than diverting money from social programs and community resources to build new jails that will harm our communities, we need to focus on the source of the problem: policing. The impact on public policy of the new jail plan will be to lock us in to policing and incarceration into the future. Criminalizing poverty, homelessness, mental health, substance use, sex work, immigration, and being a person of color gives the NYPD outsized and unwarranted power to surveil our most vulnerable community members, with disastrous results. Recent changes to policing in NYC are too little, too late and embed racial disparities even in the "reforms." The 2017 budget for the NYPD was

5 billion dollars. With those resources, the NYPD preys on working-class people of color every day to fill beds on Rikers Island, The Manhattan and Brooklyn Detention Complexes, and The Boat. It will fill the beds of these new jails too. Serious, meaningful changes have to start with the police, and until that happens we will not be safe.

Divest from Jails to Invest in Communities

New York City should divest from jails and invest in communities. NYC must close the 10 jails on Rikers Island immediately without building new jails. Jails have high social and economic costs for communities. In 2017, the budget for the Department of Corrections was

1.4 billion; the NYPD budget was

5.2 billion, and the city spend nearly

1 billion on criminal courts. It costs over

200,000 to incarcerate one person for one year on Rikers Island, and

140,000 to incarcerate one person for one year across NYC jails. Meanwhile, the Department of Education spent

14,500 per student per year. By prioritizing incarceration to the tune of

7 billion per year, the City demonstrates its lack of concern for socioeconomic conditions in the Bronx, Brooklyn, Queens, and Manhattan. Instead of a jail, Chinatown needs affordable housing and free space for community programs. Instead of a jail, Mott Haven needs displacement prevention and community healthcare. Instead of a jail, Brooklyn needs truly affordable housing for the working and middle class Black and Latinx families currently being pushed out of their neighborhoods by gentrification. Instead of a jail, Queens needs services for immigrants and elders and a guarantee of true sanctuary. If the City is going to re-zone this four sites over massive community objection, why not re-zone them to provide services that our communities actually need? NYC lives in the shadows of mass incarceration and its apparatuses of enforcement, including the violence and dehumanization of Rikers Island. The borough

Sincerely,

Sample Comment 6: The city should re-zone land based on community needs

To the Mayor's Office of Environmentalists Coordination and the Department of Corrections:

The public good won't be served by jails, whether those jails are on Rikers Island, or in Brooklyn, Queens, the Bronx, and Manhattan. The city should devote public land to the public good rather than jailing and punishing people. For example, NYC has an affordable housing and homelessness crisis--there are currently 62,000 homeless people in the city, including 15,000 families with 20,000 children. Private land development continues to push working class people out of their communities, neighborhoods, and homes. Gentrification, lack of affordable housing, and the criminalization of poverty go hand-in-hand. The city should prioritize using land to solve the housing crisis. We want these civic assets without cages in our neighborhoods. The jails will re-configure neighborhood space, density, traffic, and land use without providing real solutions to our community issues like better education, affordable housing, health care, etc. Further, data on stress, policing, and incarceration shows that communities

"

Howard Fiedler,

My community needs access to affordable housing, education, healthcare, and stable income, not new jails. For the environmental hazardous impacts, increased congestion to the surrounding area, on top of no clear plan to truly close Rikers and reduce the number detained to 5,000 by 2027, I cannot in my conscience support the Draft Scope of Work. I refuse to endorse this plan to expand the number of jails in this city, when it should invest the 10 billion dollars in resources that better serve what communities need, such as affordable housing. As administrative architect, you are in a unique position to retract the proposal and listen to grassroots organizations addressing the root causes of incarceration, such as Common Justice. I urge you to refuse further continuation of this plan and instead look to alternatives that have been proven to work, such as ending cash bail and pretrial detention, while investing in the thriving of all our communities.

Howard Fiedler,

My community needs access to affordable housing, education, healthcare, and stable income, not new jails. For the environmental hazardous impacts, increased congestion to the surrounding area, on top of no clear plan to truly close Rikers and reduce the number detained to 5,000 by 2027, I cannot in my conscience support the Draft Scope of Work. I refuse to endorse this plan to expand the number of jails in this city, when it should invest the 10 billion dollars in resources that better serve what communities need, such as affordable housing. As administrative architect, you are in a unique position to retract the proposal and listen to grassroots organizations addressing the root causes of incarceration, such as Common Justice. I urge you to refuse further continuation of this plan and instead look to alternatives that have been proven to work, such as ending cash bail and pretrial detention, while investing in the thriving of all our communities.

Calvin Miceli-Nelson

calvin.micelinelson@gmail.com

"To the Mayor's Office of Environmental Coordination and the Department of Corrections:

I am writing to state my opposition to the city's proposed jail expansion. I oppose building any new jails, and I insist on closing Rikers now. The city's plan would make jails central aspects of all city planning for hundreds of years, instead of community spaces and resources. Making the community go to police and jails for access to public services like rehabilitation is violent and exclusive and puts new power in the hands of a Department of Corrections which has a well-documented and long history of violence. DOC can never be capable, due to its nature and role, of administering services fostering New Yorkers' health or wellbeing.

In general, jails deprive poor and working people of color of access to healthcare and safe housing and exacerbate existing racial health disparities. Jails harm the health of incarcerated people and make them more vulnerable to sickness due to malnutrition, barriers to healthcare, lack of autonomy over movement and bodily care, and stress. Trans and gender nonconforming people who are incarcerated are denied medically-necessary care and subjected to incredibly high rates of sexual violence and harassment. Jails tear communities and families apart by disappearing loved ones, taking a massive psychological toll on incarcerated people and their families. We should spend ten billion dollars on community resources like schools, childcare services, healthcare, drug counseling, food programs, and public space. Not new jails.

The public good won't be served by jails, whether those jails are on Rikers Island, or in Brooklyn, Queens, the Bronx, and Manhattan. The city should devote public land to the public good rather than jailing and punishing people. For example, NYC has an affordable housing and homelessness crisis--there are currently 62,000 homeless people in the city, including 15,000 families with 20,000 children. Private land development continues to push working class people out of their communities, neighborhoods, and homes. Working and middle class Black and Latinx families are currently being pushed out of their neighborhoods by gentrification. Gentrification, lack of affordable housing, and the criminalization of poverty go hand-in-hand. If the City is going to re-zone this four sites over massive community objection, why not re-zone them to provide services that our communities actually need?

We need to divest from incarceration and invest in the community resources that truly keep all New Yorkers safe, healthy, and in our neighborhoods & communities. By decriminalizing poverty, changing the culture of policing in NYC, investing in transformative justice, and eliminating pretrial detention we could close Rikers immediately without opening new jails. I urge the city to take this course of action.

Sincerely,

Rai Montalvo

Howard Fiedler,

My community needs access to affordable housing, education, healthcare, and stable income, not new jails. For the environmental hazardous impacts, increased congestion to the surrounding area, on top of no clear plan to truly close Rikers and reduce the number detained to 5,000 by 2027, I cannot in my conscience support the Draft Scope of Work. I refuse to endorse this plan to expand the number of jails in this city, when it should invest the 10 billion dollars in resources that better serve what communities need, such as affordable housing. As administrative architect, you are in a unique position to retract the proposal and listen to grassroots organizations addressing the root causes of incarceration, such as Common Justice. I urge you to refuse further continuation of this plan and instead look to alternatives that have been proven to work, such as ending cash bail and pretrial detention, while investing in the thriving of all our communities.

Howard Fiedler,

My community needs access to affordable housing, education, healthcare, and stable income, not new jails. Please use the proposed jail money to provide health counseling, amending the bail laws, and more lower courts for quicker resolution of the cases, most of which are not major and result in unnecessary incarceration only for failure to make bail. For the environmental hazardous impacts, increased congestion to the surrounding area, on top of no clear plan to truly close Rikers and reduce the number detained to 5,000 by 2027, I cannot in my conscience support the Draft Scope of Work. I refuse to endorse this plan to expand the number of jails in this city, when it should invest the 10 billion dollars in resources that better serve what communities need, such as affordable housing. Icelyn Reads

ireid2270@gmail.com

"To the Mayor's Office of Environmental Coordination and the Department of Corrections:

The public good won't be served by jails, whether those jails are on Rikers Island, or in Brooklyn, Queens, the Bronx, and Manhattan. The city should devote public land to the public good rather than jailing and punishing people. For example, NYC has an affordable housing and homelessness crisis--there are currently 62,000 homeless people in the city, including 15,000 families with 20,000 children. Private land development continues to push working class people out of their communities, neighborhoods, and homes. Gentrification, lack of affordable housing, and the criminalization of poverty go hand-in-hand. The city should prioritize using land to solve the housing crisis. We want these civic assets without cages in our neighborhoods. The jails will re-configure neighborhood space, density, traffic, and land use without providing real solutions to our community issues like better education, affordable housing, health care, etc. Further, data on stress, policing, and incarceration shows that communities subjected to policing, state violence, immigration enforcement, and detention have worse health outcomes than other communities. Rather than jails, the city needs re-zone land to support community facilities rather than large-scale jail projects.

Sincerely,

Queen E

Howard Fiedler,

New York City needs access to affordable housing, education, healthcare, and stable income, not new jails!

The City should invest the 10 billion dollars in resources that would go towards building more jails into more urgent needs, such such as affordable housing.

As administrative architect, you are in a unique position to retract the Draft Scope of Work proposal, which New Yorkers oppose, and listen to grassroots organizations addressing the root causes of incarceration, such as Common Justice.

Please abandon the Draft Scope of Work proposal and look to alternatives that have been proven to work, such as ending cash bail and pretrial detention, while investing in the thriving of all our communities.

For the environmental hazardous impacts, increased congestion to the surrounding area, on top of no clear plan to truly close Rikers and reduce the number detained to 5,000 by 2027, I cannot in my conscience support the Draft Scope of Work. I refuse to endorse this plan to expand the number of jails in this city, when it should invest the 10 billion dollars in resources that better serve what communities need, such as affordable housing. As administrative architect, you are in a unique position to retract the proposal and listen to grassroots organizations addressing the root causes of incarceration, such as Common Justice. I urge you to refuse further continuation of this plan and instead look to alternatives that have been proven to work, such as ending cash bail and pretrial detention, while investing in the thriving of all our communities.

"To whom it may concern,

I'm a registered voter and resident in Kew Gardens living between Austin street and Kew Gardens road. Putting me just blocks from the courthouse.

I was shocked and surprised to hear of plans to build a prison in our community. My elderly parents and my young nephews live within a few blocks from my residence. And while some might try to assure me of the safety and security of these facilities, I've already experienced helicopters patrolling the skies with floodlights pointed at the ground... presumably in search of someone who slipped through.

Both the danger to myself and my family, the noise and inconvenience that comes along with a prison environment, and it's impacts to my property value are all reasons to oppose this plan in the strongest way.

Please tell me how I can further work to voice my opinion and work to end this planned facility opening.

Respectfully,
E. Hatem

"Dear Mr Fiedler,

I'm a concerned resident of Kew Gardens 11415 and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails.

Kew Gardens has always been a safe, family friendly neighborhood. We moved here specifically for these values. Putting a jail here will completely destroy this. Nobody will feel safe. Nobody will want to live here. Nobody will want to move here. Property value will go down. I can guarantee my family, as well as all of our neighbors will move, which would be a real pity because Kew Gardens is a beautiful neighborhood. Please reconsider destroying and ruining our neighborhood.

Thank you.

Best,

Kevin Burns

kevin.t.burns@gmail.com

"Howard Judd Fiedler,

I live in Kew Gardens. I stand AGAINST the proposed to build a new jail in Kew Gardens.

The scale of the jail is way out of line and the project went forward without community input, despite assertions to the contrary.

I am dismayed and concerned that the plan proposes a parking garage under the facility. Are you serious? Do you have amnesia? Have you not been paying attention?

A parking garage under the jail puts all of us at risk in these troubled times. If you cannot get that, here is shorthand: BOOM!

That alone tells me this is a poorly conceived plan.

I urge the reform of terrible conditions at Rikers which make it a living hell for inmates, guards and other workers. It is the job of the Department of Corrections to correct that. This proposal is NOT the way to do that.

Thank you.

Kevin Burns,
Kew Gardens, NY

"To the attention of Howard J. Fiedler, A.I.A., Director of Design Unit, NYC Dept of Corrections

Dear Mr. Fiedler,

I have lived in Kew Gardens for over 50 years and have observed many changes in the neighborhood. Despite the changes, it has always remained a wonderful place to live -- an oasis in the big city. The thought of seeing a 29 or 30 story jail behind Borough Hall, less than

a thousand feet from my home is intolerable. To place such a facility in the middle of a residential neighborhood would destroy it. The people who live here are, rightly, utterly opposed to such an intrusion. I understand that the cost of building this and similar facilities in 4 boroughs may be as high as

30 billion, and that seems like an outrageous amount of money.

I accept that Riker's island needs reform but I believe a much better result can be achieved for all by spending that money -- or less -- at Riker's to provide a more humane environment for prisoners than housing them in huge multi-story structures like those which are currently proposed.

I am strongly opposed to the high-rise jail proposed for Kew Gardens.

Sincerely, Zdenek A. Capek, P.E.

Elia Cole

ecole613@gmail.com

"Dear Mr Fiedler,

We are concerned residents of Kew Gardens, NY 11415 and we are reaching out today to express our opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails.

There already is so much traffic in our Kew Gardens community early morning, mid-day and afternoons, just driving from Kew Gardens to Fresh Meadows takes almost 25 min. whereas just a few years ago it took 10 min. We have been living here about 30 years and see these disturbing changes that detract to the quality of our community.

Also, the noise level has been increasing with new highway construction and pipe replacements. Transportation in this area is much more dangerous and too many people are already impatient and driving irresponsibly.

The subway trains E & F are so crowded and the bus line is very long whenever we take public transportation at the Kew Gardens Road & Queens Blvd. station. Parking on the street during the day is already impossible unless you have your own driveway. We need to circle around endlessly sometimes not finding a spot at all!!

There are areas that are less congested and much more appropriate that are not being utilized, ie: Creedmore Hospital further down Union Turnpike. or perhaps in the Howard Beach Area. I am sure City Planners can research this to find less congested neighborhoods that are more viable

Thank you.

Best,
Elaine and Lawrence Cole
"

Jim Covell

jimhc3@gmail.com

"Howard,

I am writing to express my strong opposition to the Queens Jail. I don't think it would be good for the local community and I don't think it would be a good use of taxpayer money.

I don't want my daughter going to an elementary school next to a jail. I have safety concerns about a jail being in a residential area. The jail could bring undesirable people to visit those in the jail. There would be even more traffic in the area. The building would be taller than zoning allows.

The new jail would be very expensive; the money would be better spent rehabilitating Rikers Island. An island is the best place for a jail since it's away from other people and it's harder to escape from. A new jail is not the solution to the problems on Rikers Island.

Thanks,

Jim Covell, PE
Kew Gardens, Queens, NY

"Dear Mr Fiedler,

I'm a concerned resident of Astoria, Queens 11103 and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails.

What is the plan for the current Rikers facility? Perhaps more tall glass unaffordable residential towers?? There is enough overdevelopment.

Having a jail in a neighborhood is irresponsible and dangerous. I completely oppose this plan.

Thank you.

Best,

Cristina M. Bagatta

"

Lisa Danser

danser.lisa@gmail.com

"Dear Mr Fiedler,

I'm a very concerned resident of Kew Gardens in zip code 11415, who has lived here for 20 years and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails.

As a mother and an educator in the NYC public school system, I am horrified that the city would consider putting a 29 story jail in such close proximity to two elementary schools and a middle school. How on earth can any parent, teacher, or any concerned citizen of this community ever feel safe letting their kids walk home from school or when they old enough, use the public transportation at Union Turnpike again knowing that violent criminals will be housed and released within blocks of our neighborhood? Kew Gardens, Briarwood and Forest Hills are family centered communities where people have chosen to raise their children in a safe, peaceful and beautiful part of this city. This is absolutely not a viable plan and will ruin this community. The city must find an industrial area that does not endanger children and a hardworking middle class community.

Thank you.

Best,
Lisa Danser

"Attention:

Howard Judd Fiedler, AIA

Director of Design Unit, NYC Dept. of Corrections

Re: MEGA JAIL in Kew Gardens, NY

Dear sir,

As a long time resident of Kew Gardens, myself and my neighbors are horrified at the MEGA JAIL that's being proposed for our community. Not only for what it is but for the environmental damage it will bring to this community.

Kew Gardens is a residential community of families and not a place to bring a MEGA JAIL with it's additional congestion, unwanted traffic, less than desirable visitors, and not to mention hideous MEGA JAIL structure. Existing zoning laws do not permit such massive structures for a reason - to protect the community and quality of life that has existed here for over a century.

There is no justifiable reason to build this MEGA JAIL in Kew Gardens. There are obviously other better suited locations away from residential communities, hardworking families and citizens where this can go instead penalizing the Kew Gardens community and voters. We sincerely hope that you will bring a rationale and respectful judgement in support of the Kew Gardens, Forest Hills and Briarwood communities. Thank you for attention to this matter.

Sincerely,

F. Diaz

Kew Gardens / Richmond Hill resident for over 40 years.

I'm a concerned resident of Kew Gardens zip code 11415 and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails.

We already have a hotel that has been housing homeless men and then homeless families.

The human and traffic congestion that this will bring to a solid neighborhood is untenable. We have already seen the negative changes that this administration has made to this neighborhood. W do not need any more.

Thank you.

Best,
Frances Holzman
"

Eileen Hudon

eileenhudon@yahoo.com

"To Whom It May Concerned:

I am staunchly opposed to the construction of a correctional facility in Kew Gardens or any other residential community in NYC. In particular, Kew Gardens is an incredibly congested area combining a number of apartment buildings, residential homes and small businesses. Its' central location to local highways and easy acces of NYC transit as well as the LIRR, combined with the quality schools in the area make it a desirable place to live. I urge you to reconsider these proposed jails throughout the city. While our great metropolis draws millions of visitors each year, we need to do more to encourage residents to remain in the city and to honor the integrity of our blended neighborhoods. Once again, I urge every proponent of this plan to determine if they would want such a structure in their communities.

Shannon K

kimballshannon@gmail.com

"Dear Mr Fiedler,

I'm a concerned resident of Kew Gardens 11415 and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails.

My home is approx 5 minutes from the Proposed Jail. Presently between Court traffic, School traffic and normal commuter traffic, Queens Blvd is extremely congested and impossible to run daily errands between the hours of 3-7pm. Increasing the congestion will make it impossible and will impact business owner such as myself, increasing allotted time for simple tasks such as banking, post office, etc. I cant imagine how many staff it would require to operate a facility large enough to hold 1510 people and then taking the daily deliveries into consideration. Setting aside the traffic concern, I purchased my home in Kew Gardens to fulfill the ""suburb"" neighborhood experience while still living within the city limits. I feel safe in my neighborhood and being that its a small community most people know each other and look out for each other. I invested my savings and energy into making my home a value to this community. Building a 1.9 Million Square foot facility 5 minutes from my home will absolutely have a negative impact on the community that my neighbors and myself have worked to create. I will also add that I live alone and the thought of a Jail, 5 minutes from my home makes me feel unsafe. The proposed Queens Jail is not taking the community of Kew Gardens into consideration. Please consider US and how it will impact our lives.

Thank you,

Shannon Kimball

"

"Attention Mr Fiedler:

For many reasons, the proposed jail in Kew Gardens is a huge mistake. It would destroy our small community. Clearly it would worsen the social and economic character of our neighborhood.

It would bring many new problems

Our community would be overwhelmed by the traffic involved in providing services for the complex. The jail would be just two blocks away from two elementary schools and one middle school. The public transportation, the E and R trains are already very overcrowded.

Our small community is diverse and cohesive, it could not absorb the mega project

Sincerely ,
Mel Kivel

pkivel@aol.com

"Dear Mr Fiedler,

I'm a concerned resident of Kew Gardens and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC jails.

Myself and my neighbors are concerned that this jail would overwhelm our community. It would be too close to two public elementary schools and a private middle school.

The traffic problems created by cars and trucks servicing the jail would cause additional congestion in an already congested area.

Our community cannot absorb this and our community will be destroyed.

By trying to solve one problem, this plan would create many many more problems.

Thank you.

Best,
Phyllis Kivel

Lisa Kremer

lisayoga@gmail.com

"Dear Mr Fiedler,

I grew up in Kew Gardens (11415), and my senior citizen mother still lives in this peaceful, green neighborhood of NYC. I am reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails. Below are just a couple of reasons.

Safety: People choose Kew Gardens for its peacefulness and beauty. Children attend schools very close to the proposed prison. If there are laws in place that prohibit sex offenders to live a certain distance from a school, are there no laws regarding prison facilities?

Transportation:

The E & F lines to Queens are among the most crowded lines in the subway system. Do we need more people crowded onto the already groaning trains and platforms?

Face it: This proposal is ABSURD! I invite DeBlassio to get his gym-sculpted tuchus on the E & F line once in his charmed life just to begin to understand. He can also take a stroll in the neighborhood just to get a feeling for the proximity between this proposed monstrosity and neighborhood schools. There are many other places in NYC that are not smack in the middle of a quiet neighborhood with major transportation issues. How about Park Slope for starters? Oh no, that wouldn't fly... for the same reasons it should not in Kew Gardens. And also because...I wonder why?

Thank you,
Lisa Kremer

Thank you.

"Dear Mr Fiedler,

I'm a concerned resident of Kew Garden Hills, New York 11367 and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails.

Please do NOT allow this to become a reality. I strongly believe that jails for dangerous criminals should not be placed in neighborhoods with families. It would destroy local communities. It is urgent that you do everything in your power to assist the local citizens in opposing the Queens Jail Proposal.

Thanks so much,
Annette Mandis

"

Cindy Martinez

cinmartinez81@yahoo.com

"Dear Director Fiedler:

My name is Cindy Martinez. I'm a resident of Kew Gardens, and I'm writing you regarding the proposal of the jail in my community. I strongly oppose it. I vehemently oppose it. I don't want criminals in my neighborhood. I certainly don't want added traffic to the already horrendous nightmare of traffic we already experience in Kew Gardens. Speaking of traffic, we don't need any more foot traffic on the already snarled E,F and bus lines. This jail is a ridiculous and disgusting idea, and what makes it more disgusting is that those in favor decided to do it without input from the community. What kind of shady business is that? How is this working for us, the community? Maybe you aren't concerned about our way of life, but I moved to Kew Gardens to get away from the nonsense, and for you all to just throw a jail in our neighborhood and try to make it appealing is such bullshit. I don't care about the proximity to the courts. I don't want criminals near me, near my businesses, near the schools. I'm not even a parent, and the first thing I thought of is the safety of our children. There are so many concerns I have regarding this stupid proposal. Here are my thoughts: I don't want the damn jail in my neighborhood! I don't want criminals near me! I think this is a stupid idea. Go use the money to fix Rikers instead or send them up far away. Did you pick Kew Gardens because you thought that we would be so accepting of this? I can tell you that this resident doesn't agree with this.

Thank you for your time.

Sincerely,
Cindy Martinez

"Dear Mr Fiedler,

I'm a concerned resident of Kew Gardens 11415 and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails.

Since moving to this community 5 years ago i have seen nothing but poor decisions that negatively effect the community. From approving and building the Comfort Inn which attracts homeless, drug users, and peddlers on my once quiet street. The decision to add more negative buildings to our community will, with no doubt, force my wife and I (and other under-30 couples) to find a new area to live. We should not be sweeping these issues into productive neighborhoods. This is not right and I will make sure that my vote is given to people who are against this proposal.

Thank you.

Best,
Drew M. Mihalik

Thank you,
Drew M. Mihalik

Thomas Mitchell

thomemitch@gmail.com

"To whom it may concern,

I am writing as a resident of Kew Gardens in strong opposition to the proposed jail. In speaking with my family and neighbors, I must register my opposition to the jail being built in my neighborhood.

Kew Gardens sits at the intersection of 5 major thoroughfares and traffic is already a major issue in the neighborhood, especially in Queens Boulevard, and that traffic spills over in to the small side streets, causing traffic and safety issues.

The subway lines are already over packed and cannot handle the influx that would be necessary if the jail were opened here.

The jail will also be very close to a number of churches, public and private schools. The safety of our residents and children need to be first and foremost.

I close in strong opposition to the proposed jail on behalf of myself, my husband, my friends and neighbors here in Kew Gardens. NO JAIL IN KEW GARDENS!!!

Thank you,

Thomas Mitchell

"Dear Mr Fiedler,

I'm a concerned resident of Kew Gardens, Queens, NY and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails. Our community is a small residential neighborhood. We can not support a jail facilities for 1500 + people. The community is already seriously overcrowded and congested. You need to build this gigantic structure in an area that isn't congested - that has land around it! This proposed structure is huge and totally out of scale with the neighborhood. It would dominate Kew Gardens.

I am extremely disappointed that Mayor de Blasio (a person I voted for in 2 elections) has come up with this type of plan for Kew Gardens.

Thank you.

Elizabeth Morris
Kew Gardens, NY
"

Matthew Nadelson

drivenspirit@outlook.com

"Dear Mr Fiedler,

I'm a concerned resident and property owner in Kew Gardens NY, 11415. I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails.

A humongous jail has no place in a quiet residential community like Kew Gardens. Besides the obvious concerns about crime a jail might bring, there will be a massive increase in congestion and parking woes, which already are very severe in the neighborhood. This is precisely what has happened in Brooklyn when the Brooklyn Detention Center reopened in 2012.

As it is, developers are building new apartment buildings in my neighborhood without providing ample parking spaces. There is also already lot of transient traffic related to the court that eats up street parking. The last thing we need is a behemoth that will bring more of the same without any clear plan to alleviate such woes.

In addition, our neighbors have reported a huge increase in harassment and petty crime since homeless single men began being housed at a hotel in the neighborhood. Like this proposal, that plan was sprung on us with little warning or chance for public feedback.

Most importantly, there is nothing to gain from closing Rikers Island and moving inmates all over the city. How will turning one prison into several solve any of the problems Rikers has? It just feels like a way to punish hard working New Yorkers. We don't need to walk by a prison every day to see the ills of the prison system. Keeping inmates on an island away from the general public makes logical sense, and there is nothing really logical about this plan to instead throw them into residential communities while calling it "reform".

Thank you for your time.

Sincerely

Matthew Nadelson

laura nusscaneda

nusscaneda@yahoo.com

"Dear Mr Fiedler,

I'm a concerned resident of Kew Gardens (11415) and I'm reaching out today to express my opposition to the Queens Jail Proposal. I am not against a community jail, as I understand its necessity. Additionally, the long history of serious problems at Riker's Island make me amenable to the idea of community jails in each of the boroughs. However, the size and scope of the proposed jail here in Kew Gardens is of serious concern to me. A 29 story jail is much too large for this community. There is great congestion in the Queens Blvd area as well as at the local subway and bus stations. The community does not have adequate resources and space to integrate such a large structure into the community. The size of the Brooklyn Detention Center on Atlantic Ave seems much more appropriate to the community.

I sincerely hope that our representatives do the right thing and act in the best interest of the local community. A 29 story mega jail is absolutely not in its best interest.

Thank you.

Best,

Laura Nuss-Caneda

"Dear Mr Fiedler,

I'm a concerned resident of Kew Gardens, 11418 and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails.

I have young children that walk/take subway to school, and my greatest concern is their safety. How can they be safe with so many criminals in the area. Another safety concern is the addition to traffic in already dense, and small area. Please do not destroy our safe community with this horrendous plan. This is not the place or community to have a gigantic jail in the middle of it. Please consider YOUR own CHILDREN walking in an area where they will be walking past a jail. How would they FEEL? Would they feel SCARED? Our children would feel scared. PLEASE DO NOT BUILD A JAIL AROUND YOUNG CHILDREN THAT WALK TO SCHOOL! Thank you for hearing my concerns as a parent and as a member of this community.

Thank you.

"Dear Mr Fiedler,

I'm a concerned resident of Kew Gardens and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails.

<<https://gallery.mailchimp.com/888778088ce3cb1da2ebf5f1f/images/bea5396c-0791-49ea-9e07-b83e4e1d8643.jpg>>

Let us put this proposal in perspective for you.

Above is a Google Earth image showing exactly where the City plans to build this mega-jail. You can see the plot near Queens Boulevard and Union Turnpike in Kew Gardens <x-apple-data-detectors://1> - at the junction of Forest Hills, Briarwood and Kew Gardens Hills by the Union Turnpike Subway stop.

The area rendered in RED shows, to scale, what the Mayor's Office is requesting as the build envelope by special permit, for the proposed Queens Jail in Kew Gardens. To be clear, what this simply means is that they require a ""special permit"" because it is previously unheard of to put something of this gargantuan scale in our residential community.

Zoning and building laws that exist, do not permit such massive structures to be built here for many obvious and practical reasons. These laws were well thought-out and hard fought for in past decades, in order to protect our residential communities, and have worked well to both develop and define the character of this unique neighborhood.

The Mayor's Office simply doesn't respect any of that.
Thank you.

Best,
Joe Pfifferling

"Dear Mr Fiedler,

I'm a concerned resident of Kew Gardens 11415 and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough.

While our neighborhood is considered not large enough to have our own zoned Middle/High public schools or public library, for some strange reason city administration decided we have appropriate infrastructure to support 1,500+ resident jail. It's very naive to expect a neighborhood that was built in the beginning of 20th century, with narrow roads and already extremely scarce parking, to accommodate such large facilities.

Having court houses and Queens Borough Hall in Kew Gardens put a considerable stress on our historical neighborhood as is.

I also strongly believe that breaking a large jail into several smaller ones is not going to solve corrections facilities crisis at all, it's just going to spread the crisis throughout all NYC boroughs. The problem is not in Rikers, it's in corrections system, that was faulty for years.

Please take all of the above into your consideration. Queens Jail is a rushed and not well thought out idea, just a small and shabby bandaid, which is not going to help a large old wound to heal.

Thank you.

Best,
Yelena Poretskaya

"Dear Mr. Fiedler,

I am a concerned resident of Kew Gardens (11415), a life-long Democrat who votes in each and every election, and I'm reaching out today to express my opposition to the Queens Jail Proposal.

That the City is planning to place a structure of this size and use in a residential neighborhood, and within walking distance of three schools, is short-sighted and simply unacceptable.

Although my neighbors and I understand the need to replace Rikers, we believe there must be other sites that are available, that make more sense, and that do not require the waiving of zoning restrictions—which are, after all, in place for good reason.

Please do not allow this proposal to be rushed through to approval without considering all other possibilities.

Thank you.

Very truly yours,

Rosmary Sherman

rgalsherman@gmail.com

"Dear Sir:

We have lived in Kew Gardens for 39 years. We raised our children here, participated in community development projects and devoted time and energy toward working to make this diverse close knit community a place where all are welcome and where the quality of life continues to improve with each new generation.

This is a neighborhood where children, parents, store owners and residents know each other by their first name.

We live, play, and work together. We have strong bonds. We support each other and respect and love Kew Gardens.

Today this is becoming rare in NYC as small business are being pushed out and big buildings and real estate developers are taking over the landscape and changing the community to reflect a steril, impersonal environment.

The Kew Gardens residential neighborhood cannot support a 29 story prison. It will destroy Kew Gardens as we know it. It makes no sense to "plop" a highrise prison in the middle of a community where its unique architecture supports the urban village cohesion of the neighborhood.

Please, reconsider this disastrous decision. This plan did not involve the voice of people of the who live here or did the planners look at the impact it will have on the future of our neighborhood for years to come. Thank you.

This prison must not go up!

Sincerely,

Rosemary and Lewis Sherman
Long time Kew Gardens residents

"Dear Mr Fiedler,

I'm a concerned resident of Richmond Hill. I am bordering kew gardens. and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails.

This is a massive building that would completely alter the neighborhood. I am requesting in the strongest terms that you do not allow this to destroy our neighborhood.

Thank you.

Daron Sillman

"

CARMEN SILVA

applp0@hotmail.com

"As a long time resident of Forest Hills and now Kew Gardens I am deeply concerned with the relocation of New York City's worst criminals. By relocating these inmates in residential areas, this will not only effect traffic with visiting relatives, but the safety of our neighborhoods as well. This will also effect the value of our homes, who would want to move here knowing there's a jail near by! People move here because of our safe streets and great schools.

It's been mentioned that jails will be opened in the boroughs of Queens, Brooklyn, Manhattan and The Bronx, what happened to Staten Island!!

If Bill wants to break up Rikers, why doesn't he build one near he's home in Park Slope!

What's going to happen with Rikers Island? ""Oh, I know how about building a luxury building for his wealthy friends, it is prime real estate""!

Please stop the building of ""smaller jails"" in our communities.

"

Diane Cohen

disilversmith@gmail.com

"To Whom It May Concern:

As a longtime Kew Gardens resident, I would like to voice my concern and disappointment that such a massive and ill-conceived Jail Complex is being contemplated for my beloved neighborhood.

Its massive size, close proximity to schools and the massive amount of traffic and congestion it will bring to an already overburdened area truly defy reason.

Please, please table this idea for this area that has already seen so much neglect and lack of regulatory oversight for real neighborhood issues.

Sincerely,

Diane Silversmith

" Dear sir ,I am resident of Kew Gardens for the past 7-8 years and I love this community . Recently I have been hearing about jail in Kew Gardens . Just to let you know I am totally against this . Jail in a residential community is a total disaster .It would make the things worse for the residents as it is only few blocks from an elementary school and 2 private schools . It presents a problem for the young children walking on the streets . Jail is going to compromise with the safety of residents and young children . Jail is going to decrease property value bc no family would like to live in a neighborhood where jail exists. I think our politicians need to take this matter seriously and think about some other place for jail .

Thanks

gustracc@aol.com

"Mr. Howard Fiedler

Dear Sir:

We in Kew Gardens understand the situation at Rikers Island. What we do not understand is to why you want to build a new Jail en residential KG.

Quoting from Deborah Cranes, a resident of KG, from a letter to the editor of the Queens Chronicles:

“ There is a lot that just screams for better use. That is, Creedmoor Psychiatric Center in Queens Village. It can house up to 7000 inmates, housing now few hundred. Aside from having space to accommodate a large population this site offers ample parking and there is room to install the new maximum security needed.”

Deborah Crane continues saying: “Neighbors in KG are very unhappy with the current situation involving outpatients urinating, defecating and exposing themselves on the streets. As a resident of KG I do not relish the congestion and other problems that will come along with the proposal to quadruple the space of the QHD and the disruption that will come with the construction.”

Sincerely

Gustav Tracchia

82-67 Austin Street, Apt 205

Kew Gardens, NY 11415

"Dear Mr Fiedler, I'm a concerned resident of (New Hyde Park NY 11040) and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails.

This proposal is an outrage to the hard working taxpayers & homeowners of Queens.

Rikers Island should remain where it is.

A huge complex in an already crowded area will over burden the traffic in Kew Gardens.

Thank you.

John H Ulrich

"

Andrea J. Ulrich

andreajulrich@gmail.com

"Dear Mr. Fiedler,

As a co-op owner in Kew Gardens I am devastated to learn of this potential drastic change to my neighborhood. It would be a massive industrial complex sandwiched between residential neighborhoods. Traffic is dense, especially during rush hour.

While I support reducing the population of Riker's Island, if closing it completely means placing large industrial prisons in people's neighborhoods I can not support that plan. Riker's is out of the way of the population of the city for a reason. If Riker's must be closed, certainly there must be areas of the city sufficiently away from vital residential neighborhoods where jails can be constructed.

It goes against all current zoning laws in the area. It would be an eyesore as well as create problems for the many schools in the area regarding traffic and children walking to/from school.

Thank you for taking my opposition to this proposal into account.

Andrea J. Ulrich

andreajulrich@gmail.com <mailto:andreajulrich@gmail.com>

"

David B. Varney

dbvnyc@gmail.com

"Dear Mr Fiedler,

I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails.

I'm a long term concerned resident of Kew Gardens 11415, I reside on 83rd Ave directly opposite the Criminal Courthouse. I am very well versed in the daily comings and goings of the clients and staff of that building. I am witness every-day to disruption, intimidation, fights, anti social behavior that emanates from that building and the associated bail bonds offices and criminal attorney offices, let alone legal aid office. This behavior goes on every day till at least 01.30 AM I am a believer in fair justice for all, and I believe that every person has the right to due process. I am not anti system or anti human beings. The criminal justice system is in dire need of fixing as are so many other systems and services in NYC and State. Not only this, the total disrespect that the court staff & police officers show to our community by parking illegally everywhere, often causing dangers to foot passengers and other drivers where normal people like me would be ticketed at the drop of a hat! Residents and their visitors are forced out and are not able to park. Traffic congestion is beyond a joke in this area already, especially at the bottom of 83rd Avenue & Queens Blvd. No matter how many complaints are made to DOT officials, nothing is done. We, the people who live here 24/7/365, are treated as 2nd class citizens and unimportant when we complain.

Adding a prison to the area is simply going to compound the already serious problems. More staff to work at the prison and their cars. More humans and car congestion! More loud and disrespecting human beings! More cars and more congestion. More clients who really don't care about us the residents. Just stand at the bottom of 83rd Avenue and Queens Blvd on any working day, between 7:30 am to 11 AM and listen and observe the noise and disrespect we are forced to put up with. When we try and suggest solutions like removing the parking down 8rd Avenue occupied by court staff & police, to allow better traffic flow, we don;t get our complaints answered or told our views don;t first your plan.

To be quite honest, the whole courthouse should be moved away from residential homes. I do not support the idea of now placing a jail there. You must take note of our views.

If it is to go ahead, I am quite sure there will be no extra police foot patrols to regulate the behavior, Court officers and police will continue to illegally park. You are simply going to make the residents feel even more unsafe and irrelevant than we do already.

Thank you.

Best,
D B Varney.

Richard Vollkommer

Vollkommerr@aol.com

"Dear Mr Fiedler,

I'm a concerned resident of Kew Gardens, NY , 11415) and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough jails.

The proposed Kew Gardens jail is within 2 blocks of 2 schools. We have just come off of a 2 year period of homeless people living in the hotel across the street. They caused enough issues, and they weren't even criminals.

Thank you.

Best,
Richard Vollkommer

Chris Wallace

cwallace1967@verizon.net

"Dear Mr Fiedler,

I live in Kew Gardens, and am writing to you with great concern regarding the Queens Jail Proposal. I am thoroughly opposed to the plan, and very unhappy with the way it is being pushed forward without true consideration for the surrounding community.

This is a long-established residential area. It is not, in any sense (including existing legal zoning restrictions), meant for this kind of massive development—and especially not a gigantic jail. Apart from exacerbating problems like parking and traffic, it will most definitely not improve the safety of the neighborhood.

My child attends PS99. As you doubtless know, Mayor DeBlasio—in secret—opened a men's homeless shelter right around the corner from where children, including my daughter, walk to and from school each day.

Now this. A mega-jail complex? What does the Mayor have against Kew Gardens—and its families?

This is a terrible thing to do to our neighborhood. This community has been through many struggles recently; battling the MTA to keep our historic bridge from being razed, and begging local leadership for help in closing an inappropriately planned shelter. Now we are defending ourselves again: from the Mayor's ill-considered idea to ""close Riker's"—instead of fixing the institutional problems within the Department of Corrections itself.

Mayor DeBlasio and borough leaders— I am pleading with you—as a resident, homeowner, parent, and fellow New Yorker— not to go forward with this proposal.

Thank you.

Best,
Chris Wallace

"

Patricia M. Welch

Patricia.M.Welch@hofstra.edu

"Dear Mr Fiedler,

I'm a concerned resident of Kew Gardens NY 11415 and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails.

There are many reasons why I am writing to voice my opposition to situating a massive A 1.9 million square foot, 29-story high Jail complex in Kew Gardens Queens. A building of this size and scope does not belong in a primarily residential communities (CB 9 is 90.54

residential). Kew Gardens and neighboring communities would suffer terribly if this over-development is allowed to happen.

The neighborhood is already burdened by traffic, as a result of its location by the Grand Central Parkway, the Van Wyck, the Jackie Robinson Parkway, and the LIE. The additional traffic caused by a building of the proposed size will overwhelm already overcrowded roads. (Example: at 6:30 pm, it can take 15 minutes to drive from the QB exit off the grand central parkway along the access road to The light at Park Lane.)

The jail would further overload Queens Boulevard at its busiest intersection: the crossings of the four already noted highways.

Aggressive commuter and commercial automobile traffic from all five major thoroughfares already traverse through this interchange – as well as through the narrow, single-lane residential side streets of Kew Gardens, Forest Hills and Briarwood used as alternatives to bypassing highway traffic – thus making the crossings and side-streets unsafe for neighborhood pedestrian traffic.

In addition, public transportation (E, F subway, Q10 bus) are running above capacity for much of the day, and feature some of the worst delays in the entire system. The presence of the jail would exacerbate this already bad situation. (Example: at 7 am, it is impossible to get a seat on the subway bound for Manhattan, and the crowding only gets worse.)

It is also unconscionable to consider building a 1510 inmate jail complex two blocks from 2 public elementary schools and very close to 1 private middle-high school, as it absolutely presents problems to young children walking to school.

I hope you value the input of residents and reconsider this ill advised plan to build a massive jail in a residential neighborhood, as it would would destroy all that makes it a good place to live. Please speak out against it and vote against any development of this scale.

Sincerely,
Patricia Welch

Paul Winter

pwinter@steinmetzinternational.com

"Dear Mr. Fiedler

As a longtime resident of Kew Gardens, I strongly object to this proposed project. We are a residential closely knit neighborhood with historic significance. This project would totally destroy/devastate the fabric/character of our neighborhood.

Please stop this now.

Thank you

Paul Winter

Please stop the plan immediately.

Addendum: I live in Manhattan, but I don't want new jails in any borough. Based on available evidence, it appears possible to shutter Rikers, maintain current levels of public safety, and not build any new jail space at all. When Cincinnati closed its jail in 2008 (2/3 of available jail beds), Cincy PD began treating arrest like a commodity. Felony arrest rates and violent crime rates both fell by 40

. Police said that they viewed arrest like a "commodity," and this perception -- limited currency -- led police to make fewer yet more impactful arrests.

NYPD has shown that they will not respond to the will of the public. I think that the closure of Rikers, and refusal to replace those jail beds with any new facilities, will lead to a practice change that lessens the criminal justice involvement that burdens NYC's most vulnerable communities today.

The city govt released an action plan for closing Rikers that aims for 5000 people held in NYC jails by the late 2020s. Why not just drop that number to 3000 or 4000, and house them in the existing 3-4k jail beds outside of Rikers?

"

Howard Fiedler,

Rikers costs over

2.4 billion to run annually -- that's over

200,000 per person--over 75

of whom are released because they're found not guilty. The mayor is making a right step in finally closing Rikers by 2027, but the administration is misguided. I cannot support this Draft Scope of Work about the new jails. It proposes investing even more of the city's money in expensive, ineffective jails when the mayor can do more to resource alternatives to incarceration, such as restorative and transformative justice processes. Please stop the plan immediately.

"

Howard Fiedler,

Rikers costs over

2.4 billion to run annually. It costs over

200,000 to incarcerate someone for a year. Moreover, over 75

of those people are released because they're found not guilty. It is clear to me that Rikers and incarceration at large is ineffective, costly, and cruel. The mayor is making the right move to propose to close Rikers by 2027, but this Draft Scope of Work is misguided. I cannot support the four new jails construction across the boroughs. It will once again lead the city to invest more money in the inefficiency of jailing when the mayor can do more to resource alternatives to incarceration, such as restorative justice and ending pretrial detention. He will only take action if key actors, such as yourself, Mr. Fiedler, take a moral stance against the plan. Please, work on large-scale projects that are not this one. This plan needs to stop immediately starting with rejection of the Draft Scope of Work. Thank you.

"

Howard Fiedler,

I strongly oppose every aspect of the Draft Scope of Work about the jails plan across four boroughs. If you just look at Rikers, detaining innocent people there has caused them to lose their jobs and housing. Over 75

of those detained at Rikers are released because they're found not guilty. That's proof in itself that jailing people, mostly because they cannot afford bail, is inefficient and frankly costly and cruel. Your plan to design new jails in this city will not fix those issues. Please take action to morally oppose moving forward with this Draft Scope of Work. Urge the mayor's administration to stop expanding new jails in this city. Please reinvest your time and resources to policies and practices that support all of our communities. You can do so, Mr. Fiedler. Thank you.

"

Howard Fiedler,

No one should be held a single night in jail simply because they cannot afford bail.

This proposal is shameful, and the monies proposed to fund new jails should be used to revitalize communities of color, not further punish them for the past mistakes of their city's government.

I strongly oppose every aspect of the Draft Scope of Work on the new jails. For decades, detaining innocent people on Rikers have made them lose their jobs and housing. Over 75

"

Howard Fiedler,

Rikers costs over

2.4 billion to run annually -- that's over

200,000 per person--over 75

of whom are released because they're found not guilty. The mayor is making a right step in finally closing Rikers by 2027, but the administration is misguided. I cannot support this Draft Scope of Work about the new jails. It proposes investing even more of the city's money in expensive, ineffective jails when the mayor can do more to resource alternatives to incarceration, such as restorative and transformative justice processes. Please stop the plan immediately.

Howard Fiedler,

I strongly oppose every aspect of the Draft Scope of Work on the new jails. For decades, detaining innocent people on Rikers have made them lose their jobs and housing. Over 75

of those detained at Rikers are released because they're found not guilty. Your plan to design new jails in this city will not fix the fact that most people are held because they are too poor to pay bail. How can you morally even consider moving forward with this Draft Scope of Work? I am writing to tell you and Mayor de Blasio's administration to stop expanding new jails in this city. Please reinvest your money, time and resources to policies and plans that support all of our communities.

"

Howard Fiedler,

Rikers costs over

2.4 billion to run annually. It costs over

200,000 to incarcerate someone for a year. Moreover, over 75

of those people are released because they're found not guilty. It is clear to me that Rikers and incarceration at large is ineffective, costly, and cruel. The mayor is making the right move to propose to close Rikers by 2027, but this Draft Scope of Work is misguided. I cannot support the four new jails construction across the boroughs. It will once again lead the city to invest more money in the inefficiency of jailing when the mayor can do more to resource alternatives to incarceration, such as restorative justice and ending pretrial detention. He will only take action if key actors, such as yourself, Mr. Fiedler, take a moral stance against the plan. Please, work on large-scale projects that are not this one. This plan needs to stop immediately starting with rejection of the Draft Scope of Work. Thank you.

of whom are released because they're found not guilty. The mayor is making a right step in finally closing Rikers by 2027, but the administration is misguided. I cannot support this Draft Scope of Work about the new jails. It proposes investing even more of the city's money in expensive, ineffective jails when the mayor can do more to resource alternatives to incarceration, such as restorative and transformative justice processes. Please stop the plan immediately.

NB: There is no shortage of decent, humane, progressive, community-building on which NYC should spend its resources. That's No. 1.

No. 2 is that if justice was given political priority, money, and muscle, we would stop needing HUMAN WAREHOUSES endlessly and unconscionably treating SOME human beings like pariahs who have no rights.

The same goes for the Draft Scope of Work. Have you no decency? It is ENOUGH already.

You may be certain that I not only care; I pay taxes! I have a voice in public affairs. Thank you.

Sincerely,

Pilar A. Enright

"

Howard Fiedler,

I strongly oppose every aspect of the Draft Scope of Work on the new jails. For decades, detaining innocent people on Rikers have made them lose their jobs and housing. Over 75

of those detained at Rikers are released because they're found not guilty. Your plan to design new jails in this city will not fix the fact that most people are held because they are too poor to pay bail. How can you morally even consider moving forward with this Draft Scope of Work? I am writing to tell you and Mayor de Blasio's administration to stop expanding new jails in this city. Please reinvest your money, time and resources to policies and plans that support all of our communities.

Howard Fiedler,

I strongly oppose every aspect of the Draft Scope of Work about the jails plan across four boroughs. If you just look at Rikers, detaining innocent people there has caused them to lose their jobs and housing. Over 75

of those detained at Rikers are released because they're found not guilty. That's proof in itself that jailing people, mostly because they cannot afford bail, is inefficient and frankly costly and cruel. Your plan to design new jails in this city will not fix those issues. Please take action to morally oppose moving forward with this Draft Scope of Work. Urge the mayor's administration to stop expanding new jails in this city. Please reinvest your time and resources to policies and practices that support all of our communities. You can do so, Mr. Fiedler. Thank you.

Howard Fiedler,

I strongly oppose the Draft Scope of Work on the new jails. For decades, detaining innocent people on Rikers have made them lose their jobs and housing. Over 75

of those detained at Rikers are released because they're found not guilty. Your plan to design new jails in this city will not fix the fact that most people are held because they are too poor to pay bail. I am writing to tell you and Mayor de Blasio's administration to stop expanding new jails in this city. Please reinvest your money, time and resources to policies and plans that support all of our communities.

10 billion tax payer money is better spent on improvements to other infrastructure, including schools, NYCHA buildings, creating housing for homeless, hospitals, parks, libraries. Make needed capital improvements and offer job training + educational programs in existing correctional facilities to benefit prisoners, protect corrections officers, and help families of prisoners. Thank you.

Howard Fiedler,

Close Rikers immediately and do not open any new jails because there is no such thing as humane or safer cages. Jails lead to more policing, especially in neighborhoods where communities of color reside. Stop this plan immediately. Borough-based jails is not the solution and do not have to be built in order to close Rikers. This plan is racist and capitalist. As a community member of Manhattan's Chinatown, this issue is very dear to me and I see the direct negative consequences of this racist plan on the lives of this community and many others across the borough, specifically the lives that are already marginalized.

Rikers costs over

"

Howard Fiedler,

My community needs access to affordable housing, education, healthcare, and stable income, not new jails. For the environmental hazardous impacts, increased congestion to the surrounding area, on top of no clear plan to truly close Rikers and reduce the number detained to 5,000 by 2027, I cannot in my conscience support the Draft Scope of Work. I refuse to endorse this plan to expand the number of jails in this city, when it should invest the 10 billion dollars in resources that better serve what communities need, such as affordable housing. As administrative architect, you are in a unique position to retract the proposal and listen to grassroots organizations addressing the root causes of incarceration, such as Common Justice. I urge you to refuse further continuation of this plan and instead look to alternatives that have been proven to work, such as ending cash bail and pretrial detention, while investing in the thriving of all our communities.

Howard Fiedler,

I strongly oppose every aspect of the Draft Scope of Work on the new jails. For decades, detaining innocent people on Rikers have made them lose their jobs and housing. Over 75

of those detained at Rikers are released because they're found not guilty. Your plan to design new jails in this city will not fix the fact that most people are held because they are too poor to pay bail. How can you morally even consider moving forward with this Draft Scope of Work? I am writing to tell you and Mayor de Blasio's administration to stop expanding new jails in this city. Please reinvest your money, time and resources to policies and plans that support all of our communities.

Howard Fiedler,

Rikers costs over

2.4 billion to run annually -- that's over

200,000 per person--over 75

of whom are released because they're found not guilty. The mayor is making a right step in finally closing Rikers by 2027, but the administration is misguided. I cannot support this Draft Scope of Work about the new jails. It proposes investing even more of the city's money in expensive, ineffective jails when the mayor can do more to resource alternatives to incarceration, such as restorative and transformative justice processes. Please stop the plan immediately.

Howard Fiedler,

Rikers costs over

2.4 billion to run annually. It costs over

200,000 to incarcerate someone for a year. Moreover, over 75

of those people are released because they're found not guilty. It is clear to me that Rikers and incarceration at large is ineffective, costly, and cruel. The mayor is making the right move to propose to close Rikers by 2027, but this Draft Scope of Work is misguided. I cannot support the four new jails construction across the boroughs. It will once again lead the city to invest more money in the inefficiency of jailing when the mayor can do more to resource alternatives to incarceration, such as restorative justice and ending pretrial detention. He will only take action if key actors, such as yourself, Mr. Fiedler, take a moral stance against the plan. Please, work on large-scale projects that are not this one. This plan needs to stop immediately starting with rejection of the Draft Scope of Work. Thank you.

"

Howard Fiedler,

I strongly oppose every aspect of the Draft Scope of Work about the jails plan across four boroughs. If you just look at Rikers, detaining innocent people there has caused them to lose their jobs and housing. Over 75

of those detained at Rikers are released because they're found not guilty. That's proof in itself that jailing people, mostly because they cannot afford bail, is inefficient and frankly costly and cruel. Your plan to design new jails in this city will not fix those issues. Please take action to morally oppose moving forward with this Draft Scope of Work. Urge the mayor's administration to stop expanding new jails in this city. Please reinvest your time and resources to policies and practices that support all of our communities. You can do so, Mr. Fiedler. Thank you.

"

Howard Fiedler,

My community needs access to affordable housing, education, healthcare, and stable income, not new jails. For the environmental hazardous impacts, increased congestion to the surrounding area, on top of no clear plan to truly close Rikers and reduce the number detained to 5,000 by 2027, I cannot in my conscience support the Draft Scope of Work. I refuse to endorse this plan to expand the number of jails in this city, when it should invest the 10 billion dollars in resources that better serve what communities need, such as affordable housing. As administrative architect, you are in a unique position to retract the proposal and listen to grassroots organizations addressing the root causes of incarceration, such as Common Justice. I urge you to refuse further continuation of this plan and instead look to alternatives that have been proven to work, such as ending cash bail and pretrial detention, while investing in the thriving of all our communities.

of whom are released because they're found not guilty. The mayor is making a right step in finally closing Rikers by 2027, but the administration is misguided. I cannot support this Draft Scope of Work about the new jails. It proposes investing even more of the city's money in expensive, ineffective jails when the mayor can do more to resource alternatives to incarceration, such as restorative and transformative justice processes. Please stop the plan immediately.

"

Howard Fiedler,

I strongly oppose every aspect of the Draft Scope of Work on the new jails. For decades, detaining innocent people on Rikers have made them lose their jobs and housing. Over 75

of those detained at Rikers are released because they're found not guilty. Your plan to design new jails in this city will not fix the fact that most people are held because they are too poor to pay bail. How can you morally even consider moving forward with this Draft Scope of Work? I am writing to tell you and Mayor de Blasio's administration to stop expanding new jails in this city. Please reinvest your money, time and resources to policies and plans that support all of our communities.

"

Howard Fiedler,

Rikers costs over

2.4 billion to run annually. It costs over

200,000 to incarcerate someone for a year. Moreover, over 75

of those people are released because they're found not guilty. It is clear to me that Rikers and incarceration at large is ineffective, costly, and cruel. The mayor is making the right move to propose to close Rikers by 2027, but this Draft Scope of Work is misguided. I cannot support the four new jails construction across the boroughs. It will once again lead the city to invest more money in the inefficiency of jailing when the mayor can do more to resource alternatives to incarceration, such as restorative justice and ending pretrial detention. He will only take action if key actors, such as yourself, Mr. Fiedler, take a moral stance against the plan. Please, work on large-scale projects that are not this one. This plan needs to stop immediately starting with rejection of the Draft Scope of Work. Thank you.

Howard Fiedler,

I strongly oppose every aspect of the Draft Scope of Work on the new jails. For decades, detaining innocent people on Rikers have made them lose their jobs and housing. Over 75

of those detained at Rikers are released because they're found not guilty. Your plan to design new jails in this city will not fix the fact that most people are held because they are too poor to pay bail. How can you morally even consider moving forward with this Draft Scope of Work? I am writing to tell you and Mayor de Blasio's administration to stop expanding new jails in this city. Please reinvest your money, time and resources to policies and plans that support all of our communities.

"

Howard Fiedler,

Rikers costs over

2.4 billion to run annually -- that's over

200,000 per person--over 75

of whom are released because they're found not guilty. The mayor is making a right step in finally closing Rikers by 2027, but the administration is misguided. I cannot support this Draft Scope of Work about the new jails. It proposes investing even more of the city's money in expensive, ineffective jails when the mayor can do more to resource alternatives to incarceration, such as restorative and transformative justice processes. Please stop the plan immediately.

"

Howard Fiedler,

Rikers costs over

2.4 billion to run annually. It costs over

200,000 to incarcerate someone for a year. Moreover, over 75

of those people are released because they're found not guilty. It is clear to me that Rikers and incarceration at large is ineffective, costly, and cruel. The mayor is making the right move to propose to close Rikers by 2027, but this Draft Scope of Work is misguided. I cannot support the four new jails construction across the boroughs. It will once again lead the city to invest more money in the inefficiency of jailing when the mayor can do more to resource alternatives to incarceration, such as restorative justice and ending pretrial detention. He will only take action if key actors, such as yourself, Mr. Fiedler, take a moral stance against the plan. Please, work on large-scale projects that are not this one. This plan needs to stop immediately starting with rejection of the Draft Scope of Work. Thank you.

"

Howard Fiedler,

Dear Mayor DiBlasio,

I am concerned by the project to open four new jails. I would like to see money allocated to renewing the afterschool programs that Mayor Bloomberg cut and that i was once a Teaching Artist in. Afterschool programs in public housing are very useful and as a Teacher I saw the positive effect. I feel these programs need to be funded and also mentorship programs for Teens need to be developed.

Rikers costs over

2.4 billion to run annually. It costs over

200,000 to incarcerate someone for a year. Moreover, over 75

of those people are released because they're found not guilty. It is clear to me that Rikers and incarceration at large is ineffective, costly, and cruel. The mayor is making the right move to propose to close Rikers by 2027, but this Draft Scope of Work is misguided. I cannot support the four new jails construction across the boroughs. That's proof in itself that jailing people, mostly because they cannot afford bail, is inefficient and frankly costly and cruel. Your plan to design new jails in this city will not fix those issues. Please take action to morally oppose moving forward with this Draft Scope of Work. Urge the mayor's administration to stop expanding new jails in this city. Please reinvest your time and resources to policies and practices that support all of our communities. You can do so, Mr. Fiedler. Thank you.

"

Howard Fiedler,

Rikers costs over

2.4 billion to run annually. It costs over

200,000 to incarcerate someone for a year. Moreover, over 75

of those people are released because they're found not guilty. It is clear to me that Rikers and incarceration at large is ineffective, costly, and cruel. The mayor is making the right move to propose to close Rikers by 2027, but this Draft Scope of Work is misguided. I cannot support the four new jails construction across the boroughs. It will once again lead the city to invest more money in the inefficiency of jailing when the mayor can do more to resource alternatives to incarceration, such as restorative justice and ending pretrial detention. He will only take action if key actors, such as yourself, Mr. Fiedler, take a moral stance against the plan. Please, work on large-scale projects that are not this one. This plan needs to stop immediately starting with rejection of the Draft Scope of Work. Thank you.

"

Howard Fiedler,

I strongly oppose every aspect of the Draft Scope of Work on the new jails. For decades, detaining innocent people on Rikers have made them lose their jobs and housing. Over 75

of those detained at Rikers are released because they're found not guilty. Your plan to design new jails in this city will not fix the fact that most people are held because they are too poor to pay bail. How can you morally even consider moving forward with this Draft Scope of Work? I am writing to tell you and Mayor de Blasio's administration to stop expanding new jails in this city. Please reinvest your money, time and resources to policies and plans that support all of our communities.

"

Howard Fiedler,

I strongly oppose every aspect of the Draft Scope of Work about the jails plan across four boroughs. If you just look at Rikers, detaining innocent people there has caused them to lose their jobs and housing. Over 75

of those detained at Rikers are released because they're found not guilty. That's proof in itself that jailing people, mostly because they cannot afford bail, is inefficient and frankly costly and cruel. Your plan to design new jails in this city will not fix those issues. Please take action to morally oppose moving forward with this Draft Scope of Work. Urge the mayor's administration to stop expanding new jails in this city. Please reinvest your time and resources to policies and practices that support all of our communities. You can do so, Mr. Fiedler. Thank you.

No new jails unless the old ones are uninhabitable. More services for inmates as human beings and strong training and vigilance for guards who may need to keep inmates safe and unmolested. Surveillance and sanctions for any illegal or tortuous actions by the guards. More programs for rehabilitation and training for the inmates.

"

Howard Fiedler,

Rikers costs over

2.4 billion to run annually. It costs over

200,000 to incarcerate someone for a year. Moreover, over 75

of those people are released because they're found not guilty. It is clear to me that Rikers and incarceration at large is ineffective, costly, and cruel. The mayor is making the right move to propose to close Rikers by 2027, but this Draft Scope of Work is misguided. I cannot support the four new jails construction across the boroughs. It will once again lead the city to invest more money in the inefficiency of jailing when the mayor can do more to resource alternatives to incarceration, such as restorative justice and ending pretrial detention. He will only take action if key actors, such as yourself, Mr. Fiedler, take a moral stance against the plan. Please, work on large-scale projects that are not this one. This plan needs to stop immediately starting with rejection of the Draft Scope of Work. Thank you.

Howard Fiedler,

Rikers costs over

2.4 billion to run annually. It costs over

200,000 to incarcerate someone for a year. Moreover, over 75

of those people are released because they're found not guilty. It is clear to me that Rikers and incarceration at large is ineffective, costly, and cruel. The mayor is making the right move to propose to close Rikers by 2027, but this Draft Scope of Work is misguided. I cannot support the four new jails construction across the boroughs. It will once again lead the city to invest more money in the inefficiency of jailing when the mayor can do more to resource alternatives to incarceration, such as restorative justice and ending pretrial detention. He will only take action if key actors, such as yourself, Mr. Fiedler, take a moral stance against the plan. Please, work on large-scale projects that are not this one. This plan needs to stop immediately starting with rejection of the Draft Scope of Work. Thank you.

"

Howard Fiedler,

While I support closing Rikers, I'm against building more jails. Instead, we need to reduce the number of accused/ arrested persons jailed simply because they cannot afford bail. Most of these persons (75

) will be found innocent; meanwhile, they may well have lost their jobs and been unable to support their families.

This is cruel, unusual, and unnecessary punishment. Mr. Fiedler, the jail complexes on Rikers Island were created as jail reform. The atrocities perpetrated there clearly show that new jails to replace old ones never solve the root of the problem. Rather than continuing to criminalize and warehouse Black and Latino people in facilities that are hazardous to their health, I am urging you to take a stance for moral justice and refuse to move forward with this plan.

Most people are incarcerated in this city for being too poor to afford bail. But--you have the power to help them. And, save the City tons of money otherwise spent on building jails we don't need so long as we reform the bail system.

Thank you for listening,

Nancy Simmons

"

Howard Fiedler,

I strongly oppose the Draft Scope of Work about the four-boroughs jails plan.
Just look at Rikers: many innocent detainees lose jobs and housing. Over 75

of those detained at Rikers are released because they're found not guilty.
What we need to change/ reform is the bail system. Only really potentially dangerous persons, accused of serious crimes, should be jailed; persons who've committed various sorts of misdemeanors or were just in the wrong place at the wrong time or are otherwise probably innocent should not be jailed just because they can't afford to pay bail.
Or, lessen the bail to, like,

50. Except that's obviously not going to cover the cost of imprisoning folks for all the time it takes to finally get around to seeing a judge, etc.
In Colonial days, persons accused of crimes were put in work houses where they farmed or made furniture or otherwise paid for their upkeep. Even sometimes made money as well. Communities didn't waste big money on incarceration.
Nor should we--especially since 75

of these folks are found innocent!!!
I realize that the current bail system supports much of the jail system, monetarily. That is, it's a very high tax laid on persons accused of/ arrested for crimes that 75

of them aren't guilty of. This, indeed, is ""taxation without representation""--exactly a root cause of what we now call the ""American Revolution.""
It's time for a new revolution, against a revolting jail system in this country.
Yours very truly,
Nancy Simmons

Howard Fiedler,

Rikers costs over

2.4 billion to run annually -- that's over

200,000 per person--over 75

of whom are released because they're found not guilty. The mayor is making a right step in finally closing Rikers by 2027, but the administration is misguided. I cannot support this Draft Scope of Work about the new jails. It proposes investing even more of the city's money in expensive, ineffective jails when the mayor can do more to resource alternatives to incarceration, such as restorative and transformative justice processes. Please stop the plan immediately.

"

Howard Fiedler,

I strongly oppose every aspect of the Draft Scope of Work on the new jails. For decades, detaining innocent people on Rikers have made them lose their jobs and housing. Over 75

of those detained at Rikers are released because they're found not guilty. Your plan to design new jails in this city will not fix the fact that most people are held because they are too poor to pay bail. How can you morally even consider moving forward with this Draft Scope of Work? I am writing to tell you and Mayor de Blasio's administration to stop expanding new jails in this city. Please reinvest your money, time and resources to policies and plans that support all of our communities.

"

Howard Fiedler,

Rikers costs over

2.4 billion to run annually. It costs over

200,000 to incarcerate someone for a year. Moreover, over 75

of those people are released because they're found not guilty. It is clear to me that Rikers and incarceration at large is ineffective, costly, and cruel. The mayor is making the right move to propose to close Rikers by 2027, but this Draft Scope of Work is misguided. I cannot support the four new jails construction across the boroughs. It will once again lead the city to invest more money in the inefficiency of jailing when the mayor can do more to resource alternatives to incarceration, such as restorative justice and ending pretrial detention. He will only take action if key actors, such as yourself, Mr. Fiedler, take a moral stance against the plan. Please, work on large-scale projects that are not this one. This plan needs to stop immediately starting with rejection of the Draft Scope of Work. Thank you.

John Adams

info@email.actionnetwork.org

"

Howard Fiedler,

I am writing to express my dismay at the Draft Scope of Work about the new jails plan. As New York City resident, I do not support Mayor de Blasio and the Department of Correction's plan to build four new jails in Kew Gardens, Boerum Hill, Manhattan's Chinatown, and The South Bronx. It is an atrocious plan that will not solve any of the issues that arose on Rikers. In fact, the city needs to instead invest

10 billion towards restorative justice work and towards the transformation of the decrepit housing system and public education system that is causing all of the social issues communities of color face. Rescind the plan now.

Howard Fiedler,

I am writing to express my dismay at the Draft Scope of Work about the jails plan. As New York City resident, I do not support the city's plan to build four new jails in Kew Gardens, Boerum Hill, Manhattan's Chinatown, and The South Bronx. It is a severely misguided and misinformed plan that will not solve any of the issues that arose on Rikers. A few years after the new jails are built, they will only become as worse as Rikers. You need to encourage the city to invest

10 billion towards restorative justice work and towards the transformation of the decrepit housing system and public education system. Yes, that is outside of your official position, but as architect, you have the power to move the plan towards true alternatives that can solve the problem of incarceration. The future of New York City depends on you taking action to reject this Draft Scope of Work. Please take action to do so.

Howard Fiedler,

I am writing to express my dismay at the Draft Scope of Work about the jails plan. As New York City resident, I do not support the city's plan to build four new jails in Kew Gardens, Boerum Hill, Manhattan's Chinatown, and The South Bronx. It is a severely misguided and misinformed plan that will not solve any of the issues that arose on Rikers. A few years after the new jails are built, they will only become as worse as Rikers. You need to encourage the city to invest

10 billion towards restorative justice work and towards the transformation of the decrepit housing system and public education system. Yes, that is outside of your official position, but as architect, you have the power to move the plan towards true alternatives that can solve the problem of incarceration. The future of New York City depends on you taking action to reject this Draft Scope of Work. Please take action to do so.

"

Howard Fiedler,

Somebody's relative stands to gain a bundle off the city's plan to build four new jails in Kew Gardens, Boerum Hill, Manhattan's Chinatown, and The South Bronx.

What other excuse could there be for such a severely misguided and misinformed plan that will not solve any of the issues that arose on Rikers.

There's something wrong with a city that finds construction and real estate to be the solution to everything. A school is failing? Tear it down and build a new one. A jail is failing? Tear it down and build a new one.

Who owns the land the new jails will be built on? How much will they make?

Who will be the developers? How much will they make?

Who will be the construction companies? How much will they make?

You need to encourage the city to invest

10 billion towards restorative justice work and towards the transformation of the decrepit housing system and public education system. Yes, that is outside of your official position, but as architect, you have the power to move the plan towards true alternatives that can solve the problem of incarceration. Howard Fiedler,

I am writing to express my dismay at the Draft Scope of Work about the new jails plan. As New York City resident, I do not support Mayor de Blasio and the Department of Correction's plan to build four new jails in Kew Gardens, Boerum Hill, Manhattan's Chinatown, and The South Bronx. It is an atrocious plan that will not solve any of the issues that arose on Rikers. In fact, the city needs to instead invest

10 billion towards restorative justice work and towards the transformation of the decrepit housing system and public education system that is causing all of the social issues communities of color face. Rescind the plan now.

Howard Fiedler,

I am writing to express my dismay at the Draft Scope of Work about the jails plan. As New York City resident, I do not support the city's plan to build four new jails in Kew Gardens, Boerum Hill, Manhattan's Chinatown, and The South Bronx. It is a severely misguided and misinformed plan that will not solve any of the issues that arose on Rikers. A few years after the new jails are built, they will only become as worse as Rikers. You need to encourage the city to invest

10 billion towards restorative justice work and towards the transformation of the decrepit housing system and public education system. Yes, that is outside of your official position, but as architect, you have the power to move the plan towards true alternatives that can solve the problem of incarceration. The future of New York City depends on you taking action to reject this Draft Scope of Work. Please take action to do so.

"

Howard Fiedler,

Communities like mine in a progressive and forward thinking city like New York do not need new jails! Instead, invest our 10 billions in permanent low income and truly affordable housing, education, healthcare, and income opportunities -- quality of life improvements for everyone that will only serve to greatly reduce the need for jails. With no clear plan to truly close Rikers and reduce the number of detainees, I cannot support the Draft Scope of Work. You are in a unique position to retract the proposal and listen to grassroots organizations addressing the root causes of incarceration, and the quality of life remedies outlined above. I urge you to discontinue this plan and develop alternatives that have been proven to work, end cash bail and pretrial detention while respecting and investing in all communities.

I am writing to express my dismay at the Draft Scope of Work about the new jails plan. As New York City resident, I do not support Mayor de Blasio and the Department of Correction's plan to build four new jails in Kew Gardens, Boerum Hill, Manhattan's Chinatown, and The South Bronx. It is an atrocious plan that will not solve any of the issues that arose on Rikers. In fact, the city needs to instead invest

10 billion towards restorative justice work and towards the transformation of the decrepit housing system and public education system that is causing all of the social issues communities of color face. Rescind the plan now.

Howard Fiedler,

I am writing to express my dismay at the Draft Scope of Work about the jails plan. As New York City resident, I do not support the city's plan to build four new jails in Kew Gardens, Boerum Hill, Manhattan's Chinatown, and The South Bronx. It is a severely misguided and misinformed plan that will not solve any of the issues that arose on Rikers. A few years after the new jails are built, they will only become as worse as Rikers. You need to encourage the city to invest

10 billion towards restorative justice work and towards the transformation of the decrepit housing system and public education system. Yes, that is outside of your official position, but as architect, you have the power to move the plan towards true alternatives that can solve the problem of incarceration. The future of New York City depends on you taking action to reject this Draft Scope of Work. Please take action to do so.

Howard Fiedler,

New York City or the boroughs are not the ideal locations for incarceration housing such as jails or prisons. As you know already, space in New York and its boroughs is at a premium, people pay exorbitant amounts of money to live in NYC and its surrounding areas, therefore placing jails or prisons is a direct insult to law abiding citizens here and hard working Americans. Furthermore, it will effect the quality of life in these areas and as a tax payer I vehemently oppose this action and feel that I have a right to vote in where my taxpayer money is allocated. Also, the NYCHA debacle is a more important project that has been consistently neglected by your administration. These poor people have been neglected by our city. Help NYCHA before starting any other priject in New York.

I am writing to express my dismay at the Draft Scope of Work about the jails plan. As New York City resident, I do not support the city's plan to build four new jails in Kew Gardens, Boerum Hill, Manhattan's Chinatown, and The South Bronx. It is a severely misguided and misinformed plan that will not solve any of the issues that arose on Rikers. A few years after the new jails are built, they will only become as worse as Rikers. You need to encourage the city to invest

10 billion towards restorative justice work and towards the transformation of the decrepit housing system and public education system. Yes, that is outside of your official position, but as architect, you have the power to move the plan towards true alternatives that can solve the problem of incarceration. The future of New York City depends on you taking action to reject this Draft Scope of Work. Please take action to do so. This is a bad idea on so many levels. This project is unacceptable and needs to be abandoned for the sake of New York City and it's law abiding tax payers.

Howard Fiedler,

I am writing to express my dismay at the Draft Scope of Work about the jails plan. As New York City resident, I do not support the city's plan to build four new jails in Kew Gardens, Boerum Hill, Manhattan's Chinatown, and The South Bronx. It is a severely misguided and misinformed plan that will not solve any of the issues that arose on Rikers. A few years after the new jails are built, they will only become as worse as Rikers. You need to encourage the city to invest

10 billion towards restorative justice work and towards the transformation of the decrepit housing system and public education system. Yes, that is outside of your official position, but as architect, you have the power to move the plan towards true alternatives that can solve the problem of incarceration. The future of New York City depends on you taking action to reject this Draft Scope of Work. Please take action to do so.

Emily Roldan

info@email.actionnetwork.org

"

Howard Fiedler,

I strongly oppose every aspect of the Draft Scope of Work about the jails plan across four boroughs. If you just look at Rikers, detaining innocent people there has caused them to lose their jobs and housing. Over 75

of those detained at Rikers are released because they're found not guilty. That's proof in itself that jailing people, mostly because they cannot afford bail, is inefficient and frankly costly and cruel. Your plan to design new jails in this city will not fix those issues. Please take action to morally oppose moving forward with this Draft Scope of Work. Urge the mayor's administration to stop expanding new jails in this city. Please reinvest your time and resources to policies and practices that support all of our communities. You can do so, Mr. Fiedler. Thank you.

Howard Fiedler,

I am writing to express my dismay at the Draft Scope of Work about the jails plan. As New York City resident, I do not support the city's plan to build four new jails in Kew Gardens, Boerum Hill, Manhattan's Chinatown, and The South Bronx. It is a severely misguided and misinformed plan that will not solve any of the issues that arose on Rikers. A few years after the new jails are built, they will only become as worse as Rikers. You need to encourage the city to invest

10 billion towards restorative justice work and towards the transformation of the decrepit housing system and public education system. Yes, that is outside of your official position, but as architect, you have the power to move the plan towards true alternatives that can solve the problem of incarceration. Howard Fiedler,

I am writing to express my dismay at the Draft Scope of Work about the new jails plan. As New York City resident, I do not support Mayor de Blasio and the Department of Correction's plan to build four new jails in Kew Gardens, Boerum Hill, Manhattan's Chinatown, and The South Bronx. It is an atrocious plan that will not solve any of the issues that arose on Rikers. In fact, the city needs to instead invest

10 billion towards restorative justice work and towards the transformation of the decrepit housing system and public education system that is causing all of the social issues communities of color face. Rescind the plan now.

Howard Fiedler,

I am writing to express my dismay at the Draft Scope of Work about the jails plan. As New York City resident, I do not support the city's plan to build four new jails in Kew Gardens, Boerum Hill, Manhattan's Chinatown, and The South Bronx. It is a severely misguided and misinformed plan that will not solve any of the issues that arose on Rikers. A few years after the new jails are built, they will only become as worse as Rikers. You need to encourage the city to invest

10 billion towards restorative justice work and towards the transformation of the decrepit housing system and public education system. Yes, that is outside of your official position, but as architect, you have the power to move the plan towards true alternatives that can solve the problem of incarceration. The future of New York City depends on you taking action to reject this Draft Scope of Work. Please take action to do so.

Rosslind Wriddle

info@email.actionnetwork.org

"

Howard Fiedler,

My community needs access to affordable housing, education, healthcare, and stable income, not new jails. For the environmental hazardous impacts, increased congestion to the surrounding area, on top of no clear plan to truly close Rikers and reduce the number detained to 5,000 by 2027, I cannot in my conscience support the Draft Scope of Work. I refuse to endorse this plan to expand the number of jails in this city, when it should invest the 10 billion dollars in resources that better serve what communities need, such as affordable housing. As administrative architect, you are in a unique position to retract the proposal and listen to grassroots organizations addressing the root causes of incarceration, such as Common Justice. I urge you to refuse further continuation of this plan and instead look to alternatives that have been proven to work, such as ending cash bail and pretrial detention, while investing in the thriving of all our communities.

Howard Fiedler,

I am writing to oppose the draft scope of work for its environmental impacts. Hazardous contaminants will be present at each proposed jail site. Because the jails are zoned as community facilities rather than residential land use, high quality and safe living conditions are not prioritized for the 1,500 people who will be living in each of the jail facilities. Thus, the jails will not be built with the same regulations that protect residential sites from hazardous material. Instead of these toxic jail sites that will overly congest the areas they are sought to be built in, the city needs to invest in truly sustainable alternative solutions. Mr. Fiedler, the jail complexes on Rikers Island were created as jail reform. The atrocities perpetrated there clearly show new jails to replace old ones never solve the root of the problem. Rather than continuing to criminalize and warehouse Black and Latino people in facilities that are hazardous to their health, I am urging you to take a stance for environmental justice and morally refuse to move forward with the plan. When most people are incarcerated in this city for being too poor to afford bail, you have the power to help them. Thank you.

Thus, the jails will not be built with the same regulations that protect residential sites from hazardous material. Instead of these toxic jail sites that will overly congest the areas they are sought to be built in, the city needs to invest in truly sustainable alternative solutions. Mr. Fiedler, the jail complexes on Rikers Island were created as jail reform. The atrocities perpetrated there clearly show new jails to replace old ones never solve the root of the problem. Rather than continuing to criminalize and warehouse Black and Latino people in facilities that are hazardous to their health, I am urging you to take a stance for environmental justice and morally refuse to move forward with the plan. When most people are incarcerated in this city for being too poor to afford bail, you have the power to help them. Thank you.

Howard Fiedler,

I am writing to oppose the draft scope of work for its environmental impacts. Hazardous contaminants will be present at each proposed jail site. Because the jails are zoned as community facilities rather than residential land use, high quality and safe living conditions are not prioritized for the 1,500 people who will be living in each of the jail facilities. Thus, the jails will not be built with the same regulations that protect residential sites from hazardous material. Instead of these toxic jail sites that will overly congest the areas they are sought to be built in, the city needs to invest in truly sustainable alternative solutions. Mr. Fiedler, the jail complexes on Rikers Island were created as jail reform. The atrocities perpetrated there clearly show new jails to replace old ones never solve the root of the problem. Howard Fiedler,

I am writing to oppose the draft scope of work for its environmental impacts. Hazardous contaminants will be present at each proposed jail site. Because the jails are zoned as community facilities rather than residential land use, high quality and safe living conditions are not prioritized for the 1,500 people who will be living in each of the jail facilities. Thus, the jails will not be built with the same regulations that protect residential sites from hazardous material. Instead of these toxic jail sites that will overly congest the areas they are sought to be built in, the city needs to invest in truly sustainable alternative solutions. Mr. Fiedler, the jail complexes on Rikers Island were created as jail reform. The atrocities perpetrated there clearly show new jails to replace old ones never solve the root of the problem. Rather than continuing to criminalize and warehouse Black and Latino people in facilities that are hazardous to their health, I am urging you to take a stance for environmental justice and morally refuse to move forward with the plan. When most people are incarcerated in this city for being too poor to afford bail, you have the power to help them. Thank you.

Howard Fiedler,

Over 75

of people detained at Rikers are released because they're found not guilty. Some for years lose their jobs and housing, while the city had insufficient reason to hold them in the first place. New jails in this city will not fix the fact that most people are held because they're too poor to pay bail. Reinvest the money to actual policies and plans that help our communities thrive.

Howard Fiedler,

I am writing to oppose the Draft Scope of work for the city's proposed jails plan. Jails and prisons are toxic for everyone incarcerated and the surrounding communities. Rikers Island is a clear example of a complex ridden with environmental health hazards, built on a former landfill. The Draft Scope of Work cannot guarantee a toxic-free environment because of how the sites are being zoned and where they are located. Even though the mayor says the conditions will be safer, jails historically, over these hundreds of years, have deprived poor and working people of color of access to healthcare and safe housing and exacerbated existing racial health disparities. Jails harm the health of incarcerated people and make them more vulnerable to sickness due to malnutrition, barriers to healthcare, lack of autonomy over movement and bodily care, and stress. Additionally, transgender and gender nonconforming people who are incarcerated are denied medically-necessary care and subjected to incredibly high rates of sexual violence and harassment.

Jails also harm the mental and physiological health of people who work in them, who come into contact with the same toxic environmental conditions as incarcerated people and suffer psychological distress from their daily work. As administrative architect, you have the power to halt this Draft Scope of Work and urge the city to spend the

10.6 billion on community resources like public schools, childcare services, healthcare, drug counseling, and food programs. We cannot solve old jails with new ones. It will only be a matter of time until the new jails become another Rikers.

Howard Fiedler,

I am writing to oppose the draft scope of work for its environmental impacts. Hazardous contaminants will be present at each proposed jail site. Because the jails are zoned as community facilities rather than residential land use, high quality and safe living conditions are not prioritized for the 1,500 people who will be living in each of the jail facilities. Thus, the jails will not be built with the same regulations that protect residential sites from hazardous material. Instead of these toxic jail sites that will overly congest the areas they are sought to be built in, the city needs to invest in truly sustainable alternative solutions. Mr. Fiedler, the jail complexes on Rikers Island were created as jail reform. The atrocities perpetrated there clearly show new jails to replace old ones never solve the root of the problem. Rather than continuing to criminalize and warehouse Black and Latino people in facilities that are hazardous to their health, I am urging you to take a stance for environmental justice and morally refuse to move forward with the plan. When most people are incarcerated in this city for being too poor to afford bail, you have the power to help them. Thank you.

It makes more sense to reform Rikers (to release those who no longer belong in jail for minor drug charges from years ago and possible others) than to create new jails in residential areas in New York City. This is not using common sense!!!

spp pps

sppny@hotmail.com

"Dear Mr Fiedler,

I'm a concerned resident of Kew Grdens-11418 and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails.

My main concern is for the welfare and safety of the inmates and staff who will be in that huge building. There are only a few a balcony type recreation areas for 1500 inmates. By law (and for health reasons)they should be entitled to more outdoor space and longer periods of outdoor recreation, as currently provided at Rikers-and most other jails in the country. More important, should there be a fire or some other reason for evacuation, how will 1500 inmates and hundreds of staff be quickly and safely evacuated from this huge building? Where would all these people wait while the emergency is taken care of? Will these inmates be in a secure holding area? It seems like no one in the NYC Gov't thought of these important issues The cost of these 4 jails is astronomical. We can't find enough money to repair our subways. Why are we going to spend over

10 billion on jails. It would cost a lot less to renovate Rikers, and there would be much safer, low rise jails and lots of open space for recreation on Rikers Island.

We do need criminal justice reform and the entire criminal justice system needs to be changed. This is a first step for treating inmates with some degree of respect and safety. The buildings are of secondary importance.

Thank you.

Best,

Seth P. Welins, Ph.D.

Instead of these toxic jail sites that will overly congest the areas they are sought to be built in, the city needs to invest in truly sustainable alternative solutions. Mr. Fiedler, the jail complexes on Rikers Island were created as jail reform. The atrocities perpetrated there clearly show new jails to replace old ones never solve the root of the problem. Rather than continuing to criminalize and warehouse Black and Latino people in facilities that are hazardous to their health, I am urging you to take a stance for environmental justice and morally refuse to move forward with the plan. When most people are incarcerated in this city for being too poor to afford bail, you have the power to help them. Thank you.

Howard Fiedler,

I am writing to oppose the draft scope of work for its environmental impacts. Hazardous contaminants will be present at each proposed jail site. Because the jails are zoned as community facilities rather than residential land use, high quality and safe living conditions are not prioritized for the 1,500 people who will be living in each of the jail facilities. Thus, the jails will not be built with the same regulations that protect residential sites from hazardous material. Instead of these toxic jail sites that will overly congest the areas they are sought to be built in, the city needs to invest in truly sustainable alternative solutions. Mr. Fiedler, the jail complexes on Rikers Island were created as jail reform. The atrocities perpetrated there clearly show new jails to replace old ones never solve the root of the problem. "

Howard Fiedler,

I am writing to oppose the Draft Scope of Work detailing the city's proposed jail expansion. I strongly oppose building any new jails and I insist that Rikers is closed immediately. Instead of reforming Rikers by building new jails, the city needs to end jailing by reforming pre-trial detention. Keeping people locked in cages while they wait for trial is a punishment for being too poor to pay bail. This further exacerbates the problem for working class families and does not keep anyone safe. Court fines, bail, and loss of work take major tolls on individuals, loved ones, and our whole city. Even being incarcerated for 24 hours can cause people to lose their jobs, children, and homes. Incarceration creates economic, social, and public health crises for Black and Latino communities. We need to instead invest in the community resources that truly keep all New Yorkers safe, healthy, and in our neighborhoods & communities. Decriminalizing poverty, eliminating pretrial detention, and investing in transformative justice could close Rikers within the proposed 10 years without opening new jails. There are alternative solutions, Mr. Fiedler. Please, I urge you to move the city to reject this Draft Scope of Work and rethink more effective solutions to reducing the number detained to 0. Thank you for your consideration.

michelle boule

michelle.boule@gmail.com

"To the Mayor's Office of Environmental Coordination and the Department of Corrections:

I am writing to state my opposition to the city's proposed jail expansion.

I request that the money be put to use for social programs that integrate people back into the folds of community--giving people tools to participate and also know that each of us has something to contribute to life here.

Sometimes people just need to be called back.

Sometimes crime is a reminder that we are doing something wrong in our social systems.

I truly don't believe that people in their deepest selves are bad. Everyone has goodness in them, when given a chance and an environment to share and discover that. From my understanding, prisons are not currently doing that.

I was so inspired by this interview with Judge Pratt <<https://www.youtube.com/watch?v=EM5JZXvkWtE>> , where she talks about reforming our prison/justice system through respect. If we can bring respect into the picture and treat people through the lens of the potential of what they can be, I believe we can effect real change.

Thank you for your time and for making choices that best serve and respect our *entire* community.

Best,
Michelle Boulé

"In regards to the borough-based jails proposal:

I fully support the immediate closing of the jails on Rikers Island. I also strongly oppose the opening of new jails in New York City. While I can see the appeal in opening jails in communities where there families can more easily visit, this proposal ignores that closing Rikers is an opportunity to enact real reform and free New York City from an antiquated system of bail and jail that has disproportionately hurt communities of color and the poor.

The City of New York should seize this opportunity to:

*

End cash bail and pre-trial detention. Community supervision is successful, you said so yourself in the More Just NYC report.

*

Divest from jails and policing. Invest in community resources that increase quality of life and prevent crime. Invest in public schools, after school programs, affordable housing, drug treatment programs, mental health clinics, and job training for good union jobs.

*

End broken windows policing and all practices which the NYPD uses that overwhelmingly effect communities of color.

*

Decriminalize substance use, homelessness, mental illness, poverty, and being an immature youth--ie, end the school to prison pipeline.

The current proposal from the city only demonstrates that the Mayor and his officials are committed to continuing the practices that lead to over-policing and caging people of color. Imagine the message that no new jails would send: a commitment to real justice reform.

I am staunchly against the city proposal to open new jails. We can close Rikers without opening new jails.

Sincerely,

Elizabeth Burrows, LMSW

Miarosa Ciallella

mc4004@barnard.edu

"Hello

I am writing to state my opposition to the city's proposed jail expansion. I oppose building any new jails, and I insist on closing Rikers now. Jails and prisons are toxic for people and communities. Rikers Island is a perfect example of environmental racism: sited on a former landfill, the conditions there are hazardous to incarcerated people and workers alike. The new jail plan can't guarantee a toxicity-free environment because of how the sites are being zoned and where they are located. In general, jails deprive poor and working people of color of access to healthcare and safe housing and exacerbate existing racial health disparities. Jails harm the health of incarcerated people and make them more vulnerable to sickness due to malnutrition, barriers to healthcare, lack of autonomy over movement and bodily care, and stress. Trans and gender nonconforming people who are incarcerated are denied medically-necessary care and subjected to incredibly high rates of sexual violence and harassment. Jails tear communities and families apart by disappearing loved ones, taking a massive psychological toll on incarcerated people and their families. Jails also harm the mental and physiological health of people who work in them, who come into contact with the same toxic environmental conditions as incarcerated people and suffer psychological distress from their work. We should spend ten billion dollars on community resources like schools, childcare services, healthcare, drug counseling, food programs, and public space. Not new jails.

Sincerely,
Mia Ciallella

To the Mayor's Office of Environmental Coordination and the Department of Corrections:

I am writing to state my opposition to the city's proposed jail expansion. I oppose building any new jails, and I insist on closing Rikers now. Rather than diverting money from social programs and community resources to build new jails that will harm our communities, we need to focus on the source of the problem: policing.

The impact on public policy of the new jail plan will be to lock us in to policing and incarceration into the future. I have seen this in my past work in youth-serving non-profits and as a social worker and mental health provider. Criminalizing poverty, homelessness, mental health, substance use, sex work, immigration, and being a person of color gives the NYPD outsized and unwarranted power to surveil our most vulnerable community members, with disastrous results. Recent changes to policing in NYC are too little, too late and embed racial disparities even in the "reforms." The 2017 budget for the NYPD was

5 billion dollars.

With those resources, the NYPD preys on working-class people of color every day to fill beds on Rikers Island, The Manhattan and Brooklyn Detention Complexes, and The Boat. It will fill the beds of these new jails too. Serious, meaningful changes have to start with the police, and until that happens we will not be safe.

Sincerely,
Taryn Crosby, LMSW
Brooklyn Resident

"To the Mayor's Office of Environmental Coordination and the Department of Corrections:

I am writing to state my opposition to the city's proposed jail expansion. I oppose building any new jails, and I insist on closing Rikers now. We need to end jailing by ending pre-trial detention for everyone. Keeping people locked in cages while they wait for trial is economically ruinous for working class families and communities and does not keep anyone safe. Court fines and surcharges, bail, and loss of work take tolls on individuals, loved ones, and our whole city. Even being incarcerated for 24 hours can cause people to lose their jobs, children, and homes. Incarceration creates economic, social, and public health crises for NYC's Black and Latinx communities. We need to divest from incarceration and invest in the community resources that truly keep all New Yorkers safe, healthy, and in our neighborhoods & communities. By decriminalizing poverty, changing the culture of policing in NYC, investing in transformative justice, and eliminating pretrial detention we could close Rikers immediately without opening new jails. I urge the city to take this course of action.

Sincerely,

Natalie Cruz

Nicolette Dakin

nicolette.dakin@gmail.com

"Good morning,

I am writing in regards to the new plan for borough-based jails proposal,

As a social worker in Brooklyn, it is clear how important it is to close Rikers Island immediately. As importantly, it is clear that we cannot continue to perpetuate the same system with borough-based jails.

Instead of building more prisons, we should be reducing the percentage of New Yorkers that find themselves incarcerated. We should be ending cash bail, putting an end to broken-windows policing that disproportionately targets people of color.

We should be investing in schools, housing, and healthcare, rather than incarcerating New Yorkers who are impacted by homelessness, substance use, or mental illness.

I work with these communities. I have seen the trauma caused by incarceration, the frustration of men who find it impossible to find work or housing, individuals who have gone too long without appropriate treatment.

We don't need to keep doing this to our community members. This is not protecting New Yorkers. This is punishing our most vulnerable. We can close Rikers without opening new jails.

Sincerely,

--

Howard Fiedler,

Bring justice to our ""justice"" system - not new jails.

- Abolish pre-trial detention of non-violent suspects
- Stop jailing because someone can't pay bail.
- Stop jailing because the court system can't handle the vast number of people unjustly incarcerated who had the courage to refuse a plea deal when innocent.
- Stop incarceration for non-violent crime -
- Stop jailing the impoverished when wealthy ""white-collar"" criminals not only remain free but are allowed to continue to damage our society

I oppose the Draft Scope of Work detailing the city's proposed jail expansion. I strongly oppose building any new jails and I insist that Rikers is closed immediately. Instead of reforming Rikers by building new jails, the city needs to end jailing by reforming pre-trial detention. Keeping people locked in cages while they wait for trial is a punishment for being too poor to pay bail. This further exacerbates the problem for working class families and does not keep anyone safe. Anna E Kreienberg

anna.kreienberg@nyu.edu

"To the Mayor's Office of Environmental Coordination and the Department of Corrections:

I am writing to state my opposition to the city's proposed jail expansion. I oppose building any new jails, and I insist on closing Rikers now. Rather than diverting money from social programs and community resources to build new jails that will harm our communities, we need to focus on the source of the problem: policing. The impact on public policy of the new jail plan will be to lock us in to policing and incarceration into the future. Criminalizing poverty, homelessness, mental health, substance use, sex work, immigration, and being a person of color gives the NYPD outsized and unwarranted power to surveil our most vulnerable community members, with disastrous results. Recent changes to policing in NYC are too little, too late and embed racial disparities even in the "reforms." The 2017 budget for the NYPD was

5 billion dollars. With those resources, the NYPD preys on working-class people of color every day to fill beds on Rikers Island, The Manhattan and Brooklyn Detention Complexes, and The Boat. It will fill the

beds of these new jails too. Serious, meaningful changes have to start with the police, and until that happens we will not be safe.

Sincerely,

Anna Kreienberg

Howard Fiedler,

I am writing to oppose the Draft Scope of Work detailing the city's proposed jail expansion. I strongly oppose building any new jails and I insist that Rikers is closed immediately. Instead of reforming Rikers by building new jails, the city needs to end jailing by reforming pre-trial detention. Keeping people locked in cages while they wait for trial is a punishment for being too poor to pay bail. This further exacerbates the problem for working class families and does not keep anyone safe. Court fines, bail, and loss of work take major tolls on individuals, loved ones, and our whole city. Even being incarcerated for 24 hours can cause people to lose their jobs, children, and homes. Incarceration creates economic, social, and public health crises for Black and Latino communities. We need to instead invest in the community resources that truly keep all New Yorkers safe, healthy, and in our neighborhoods & communities. Decriminalizing poverty, eliminating pretrial detention, and investing in transformative justice could close Rikers within the proposed 10 years without opening new jails. There are alternative solutions, Mr. Fiedler. Please, I urge you to move the city to reject this Draft Scope of Work and rethink more effective solutions to reducing the number detained to 0. Thank you for your consideration.

Hillary Maltz

hillary.maltz@gmail.com

"Hello,

In regards to the borough-based jails proposal,

I fully support the immediate closing of the jails on Rikers Island. I also strongly oppose the opening of any new jails in New York City. There is no such thing as a humane or safe jail.

The City of New York needs to:

- * End cash bail and pre-trial detention. Community supervision is successful, you said so yourself in the More Just NYC report.
- * Divest from jails and policing. Invest in community resources. Invest in public schools, rehabilitation and actual affordable housing.
- * End broken windows policing and all practices which the NYPD. Mayor DeBlasio believes in broken windows policing even though it has been largely discredited by social theorists. It is used to harass communities of color.
- * Decriminalize poverty, homelessness, mental illness, and substance use.

The current proposal from the city demonstrates that the Mayor and his officials are committed to racist over-policing and to caging people of color. The people incarcerated at Rikers are our family, loved ones, community members and friends. I am staunchly against the city proposal to open new jails. We can close Rikers without opening new jails.

Sincerely,

Hillary Maltz, Bed-Stuy Brooklyn

Howard Fiedler,

I am writing to oppose the Draft Scope of Work detailing the city's proposed jail expansion. I strongly oppose building any new jails and I insist that Rikers is closed immediately. Instead of reforming Rikers by building new jails, the city needs to end jailing by reforming pre-trial detention. Keeping people locked in cages while they wait for trial is a punishment for being too poor to pay bail. This further exacerbates the problem for working class families and does not keep anyone safe. Court fines, bail, and loss of work take major tolls on individuals, loved ones, and our whole city. Even being incarcerated for 24 hours can cause people to lose their jobs, children, and homes. Incarceration creates economic, social, and public health crises for Black and Latino communities. We need to instead invest in the community resources that truly keep all New Yorkers safe, healthy, and in our neighborhoods & communities. Decriminalizing poverty, eliminating pretrial detention, and investing in transformative justice could close Rikers within the proposed 10 years without opening new jails. There are alternative solutions, Mr. Fiedler. Please, I urge you to move the city to reject this Draft Scope of Work and rethink more effective solutions to reducing the number detained to 0. Thank you for your consideration.

Carrie Smith

heycarrieann@gmail.com

"To the Mayor's Office of Environmental Coordination and the Department of Corrections:

I am writing to state my opposition to the city's proposed jail expansion. I oppose building any new jails, and I insist on closing Rikers, the Brooklyn Detention Center, and the Tombs now. We need to end jailing by ending pre-trial detention for everyone. Keeping people locked in cages while they wait for trial is economically ruinous for working class families and communities and does not keep anyone safe. Court fines and surcharges, bail, and loss of work take tolls on individuals, loved ones, and our whole city. Even being incarcerated for 24 hours can cause people to lose their jobs, children, and homes. Incarceration creates economic, social, and public health crises for NYC's Black and Latinx communities. We need to divest from imprisonment and invest in the community resources that truly keep all New Yorkers safe, healthy, and in our neighborhoods & communities. By decriminalizing poverty, changing the culture of policing in NYC, investing in transformative justice, and eliminating pretrial detention we could close Rikers immediately without opening new jails. I urge the city to take this course of action.

Sincerely,

Carrie Smith

Howard Fiedler,

We don't need new jails. We need immediate detention reform that releases non-violent arrestees without the money for bail. The poor should not be locked up.

So, I am writing to oppose the Draft Scope of Work detailing the city's proposed jail expansion. I strongly oppose building any new jails and I insist that Rikers is closed immediately. Instead of reforming Rikers by building new jails, the city needs to end jailing by reforming pre-trial detention. Keeping people locked in cages while they wait for trial is a punishment for being too poor to pay bail. This further exacerbates the problem for working class families and does not keep anyone safe. We need to divest from incarceration and invest in the community resources that truly keep all New Yorkers safe, healthy, and in our neighborhoods & communities. By decriminalizing poverty, changing the culture of policing in NYC, investing in transformative justice, and eliminating pretrial detention we could close Rikers immediately without opening new jails. I urge the city to take this course of action.

Sincerely,
Elaine Wang, Queens

Howard Fiedler,

I am writing to oppose the Draft Scope of Work detailing the city's proposed jail expansion. I strongly oppose building any new jails and I insist that Rikers is closed immediately. Instead of reforming Rikers by building new jails, the city needs to end jailing by reforming pre-trial detention. Keeping people locked in cages while they wait for trial is a punishment for being too poor to pay bail. This further exacerbates the problem for working class families and does not keep anyone safe. Court fines, bail, and loss of work take major tolls on individuals, loved ones, and our whole city. Even being incarcerated for 24 hours can cause people to lose their jobs, children, and homes. Incarceration creates economic, social, and public health crises for Black and Latino communities. We need to instead invest in the community resources that truly keep all New Yorkers safe, healthy, and in our neighborhoods & communities. Decriminalizing poverty, eliminating pretrial detention, and investing in transformative justice could close Rikers within the proposed 10 years without opening new jails. There are alternative solutions, Mr. Fiedler. Please, I urge you to move the city to reject this Draft Scope of Work and rethink more effective solutions to reducing the number detained to 0. Thank you for your consideration.

Julie Xu

xujulief@gmail.com

"To the Mayor's Office of Environmental Coordination and the Department of Corrections:

I am writing to state my opposition to the city's plan to expand jailing facilities. I oppose building new jails and I also insist that Rikers be closed not. There are countless studies that have shown that jails and prisons do not do the work that is needed for someone to heal and get on the right path. They are toxic for people, their families, and communities in general.

The new jail plan cannot guarantee a toxicity-free environment because of how the sites are being zoned and where they are located. The city's plan would make jails central aspects of all city planning for hundreds of years instead of spaces for community and resources. The Department of Corrections has a well-documented and long history of violence. DOC can never be capable, due to its nature and role, of administering services fostering New Yorkers' health of well-being. The city's plan makes our neighborhoods monuments to mass incarceration and centers human caging in our urban planning and design.

Jails and their surrounding areas put community members in proximity to violence and abusive police and corrections officers and transform neighborhood character by incorporating dehumanizing and austere ""security"" like razor wire, police barricades, and imposing buildings meant to separate us from our community members locked inside. Just like we look back on Rikers Island 75 years later with shock and dismay that we could ever have thought it was a ""modern, humane"" jail, so too will we look back at these detention complexes in horror. Close Rikers now without opening new jails.

Sincerely,
Julie Xu, resident of Brooklyn 11216

Howard Fiedler,

I am writing to oppose the Draft Scope of work for the city's proposed jails plan. Jails and prisons are toxic for everyone incarcerated and the surrounding communities. Rikers Island is a clear example of a complex ridden with environmental health hazards, built on a former landfill. The Draft Scope of Work cannot guarantee a toxic-free environment because of how the sites are being zoned and where they are located. Even though the mayor says the conditions will be safer, jails historically, over these hundreds of years, have deprived poor and working people of color of access to healthcare and safe housing and exacerbated existing racial health disparities. Jails harm the health of incarcerated people and make them more vulnerable to sickness due to malnutrition, barriers to healthcare, lack of autonomy over movement and bodily care, and stress. Additionally, transgender and gender nonconforming people who are incarcerated are denied medically-necessary care and subjected to incredibly high rates of sexual violence and harassment.

Jails also harm the mental and physiological health of people who work in them, who come into contact with the same toxic environmental conditions as incarcerated people and suffer psychological distress from their daily work. As administrative architect, you have the power to halt this Draft Scope of Work and urge the city to spend the

10.6 billion on community resources like public schools, childcare services, healthcare, drug counseling, and food programs. We cannot solve old jails with new ones. It will only be a matter of time until the new jails become another Rikers.

Howard Fiedler,

Find alternative. Caging people is inhumane and there are more just approaches to addressing suspected and actual crimes. Treating people justly would be a good start. Fix housing, provide mental health services are two ways to begin. I am writing to oppose the Draft Scope of work for the city's proposed jails plan. Jails and prisons are toxic for everyone incarcerated and the surrounding communities. Howard Fiedler,

I am writing to oppose the Draft Scope of work for the city's proposed jails plan. Jails and prisons are toxic for everyone incarcerated and the surrounding communities. Rikers Island is a clear example of a complex ridden with environmental health hazards, built on a former landfill. The Draft Scope of Work cannot guarantee a toxic-free environment because of how the sites are being zoned and where they are located. Even though the mayor says the conditions will be safer, jails historically, over these hundreds of years, have deprived poor and working people of color of access to healthcare and safe housing and exacerbated existing racial health disparities. Jails harm the health of incarcerated people and make them more vulnerable to sickness due to malnutrition, barriers to healthcare, lack of autonomy over movement and bodily care, and stress. Additionally, transgender and gender nonconforming people who are incarcerated are denied medically-necessary care and subjected to incredibly high rates of sexual violence and harassment.

Jails also harm the mental and physiological health of people who work in them, who come into contact with the same toxic environmental conditions as incarcerated people and suffer psychological distress from their daily work. As administrative architect, you have the power to halt this Draft Scope of Work and urge the city to spend the

10.6 billion on community resources like public schools, childcare services, healthcare, drug counseling, and food programs. We cannot solve old jails with new ones. It will only be a matter of time until the new jails become another Rikers.

Jails also harm the mental and physiological health of people who work in them, who come into contact with the same toxic environmental conditions as incarcerated people and suffer psychological distress from their daily work. As administrative architect, you have the power to halt this Draft Scope of Work and urge the city to spend the

10.6 billion on community resources like public schools, childcare services, healthcare, drug counseling, and food programs. We cannot solve old jails with new ones. It will only be a matter of time until the new jails become another Rikers.

Howard Fiedler,

I am writing to oppose the Draft Scope of work for the city's proposed jails plan. Jails and prisons are toxic for everyone incarcerated and the surrounding communities. Rikers Island is a clear example of a complex ridden with environmental health hazards, built on a former landfill. The Draft Scope of Work cannot guarantee a toxic-free environment because of how the sites are being zoned and where they are located. Even though the mayor says the conditions will be safer, jails historically, over these hundreds of years, have deprived poor and working people of color of access to healthcare and safe housing and exacerbated existing racial health disparities. Jails harm the health of incarcerated people and make them more vulnerable to sickness due to malnutrition, barriers to healthcare, lack of autonomy over movement and bodily care, and stress. Additionally, transgender and gender nonconforming people who are incarcerated are denied medically-necessary care and subjected to incredibly high rates of sexual violence and harassment.

Jails also harm the mental and physiological health of people who work in them, who come into contact with the same toxic environmental conditions as incarcerated people and suffer psychological distress from their daily work. As administrative architect, you have the power to halt this Draft Scope of Work and urge the city to spend the

Robert Krause

robertkrauseny@cs.com

"

Howard Fiedler,

My community needs access to affordable housing, education, healthcare, and stable income, not new jails. For the environmental hazardous impacts, increased congestion to the surrounding area, on top of no clear plan to truly close Rikers and reduce the number detained to 5,000 by 2027, I cannot in my conscience support the Draft Scope of Work. I refuse to endorse this plan to expand the number of jails in this city, when it should invest the 10 billion dollars in resources that better serve what communities need, such as affordable housing. As administrative architect, you are in a unique position to retract the proposal and listen to grassroots organizations addressing the root causes of incarceration, such as Common Justice. I urge you to refuse further continuation of this plan and instead look to alternatives that have been proven to work, such as ending cash bail and pretrial detention, while investing in the thriving of all our communities.

Jay Lebowitz

jaylebowitz1@gmail.com

"To the Mayor's Office of Environmental Coordination and the NYC Department of Corrections:

I am writing to voice my total opposition to the latest proposal for prison expansion. I vehemently oppose the building of any new prisons, and I insist on closing Rikers now.

Prisons are 100

toxic for all people and all communities. The prison system makes inmates vulnerable to sickness due to malnutrition, intentional deprivation of basic healthcare, and intentional deprivation of nearly all inmate autonomy. Inmates are denied medically-necessary procedures and are regularly subjected to sexual violence. Prisons tear communities and families apart, taking a severe psychological toll on inmates and their loved ones.

Keeping people locked in cages is economically-ruinous, especially for working-class families. Court fines, bail payments, and loss of hours at work all add up very quickly. Even being incarcerated for 24 hours can cause people to lose their children, homes, and jobs. As of 2017, it costs

140,000 to incarcerate one person for one year across NYC jails. These expenses are draining NYC taxpayers, very much including working-class taxpayers, of their hard-earned money.

The newest prison expansion plan merely reorganizes this oppressive system, it does not eliminate it. Again, I vehemently oppose the building of any new prisons and I insist on closing Rikers now.

Thank you for your time and attention.

Sincerely,
Jay Lebowitz

In general, jails deprive poor and working people of color of access to healthcare and safe housing and exacerbate existing racial health disparities. Jails harm the health of incarcerated people and make them more vulnerable to sickness due to malnutrition, barriers to healthcare, lack of autonomy over movement and bodily care, and stress. Trans and gender nonconforming people who are incarcerated are denied medically-necessary care and subjected to incredibly high rates of sexual violence and harassment. Jails tear communities and families apart by disappearing loved ones, taking a massive psychological toll on incarcerated people and their families. Jails also harm the mental and physiological health of people who work in them, who come into contact with the same toxic environmental conditions as incarcerated people and suffer psychological distress from their work. We should spend ten billion dollars on community resources like schools, childcare services, healthcare, drug counseling, food programs, and public space. Not new jails.

Sincerely,

Shromona Mandal

New York City 10003

Howard Fiedler,

I am writing to oppose the Draft Scope of work for the city's proposed jails plan. Jails and prisons are toxic for everyone incarcerated and the surrounding communities. Rikers Island is a clear example of a complex ridden with environmental health hazards, built on a former landfill. The Draft Scope of Work cannot guarantee a toxic-free environment because of how the sites are being zoned and where they are located. Even though the mayor says the conditions will be safer, jails historically, over these hundreds of years, have deprived poor and working people of color of access to healthcare and safe housing and exacerbated existing racial health disparities. Jails harm the health of incarcerated people and make them more vulnerable to sickness due to malnutrition, barriers to healthcare, lack of autonomy over movement and bodily care, and stress. Additionally, transgender and gender nonconforming people who are incarcerated are denied medically-necessary care and subjected to incredibly high rates of sexual violence and harassment.

Jails also harm the mental and physiological health of people who work in them, who come into contact with the same toxic environmental conditions as incarcerated people and suffer psychological distress from their daily work. As administrative architect, you have the power to halt this Draft Scope of Work and urge the city to spend the

10.6 billion on community resources like public schools, childcare services, healthcare, drug counseling, and food programs. We cannot solve old jails with new ones. It will only be a matter of time until the new jails become another Rikers.

Jails also harm the mental and physiological health of people who work in them, who come into contact with the same toxic environmental conditions as incarcerated people and suffer psychological distress from their daily work. As administrative architect, you have the power to halt this Draft Scope of Work and urge the city to spend the

10.6 billion on community resources like public schools, childcare services, healthcare, drug counseling, and food programs. We cannot solve old jails with new ones. It will only be a matter of time until the new jails become another Rikers.

Howard Fiedler,

I am writing to oppose the Draft Scope of work for the city's proposed jails plan. Jails and prisons are toxic for everyone incarcerated and the surrounding communities. Rikers Island is a clear example of a complex ridden with environmental health hazards, built on a former landfill. The Draft Scope of Work cannot guarantee a toxic-free environment because of how the sites are being zoned and where they are located. Even though the mayor says the conditions will be safer, jails historically, over these hundreds of years, have deprived poor and working people of color of access to healthcare and safe housing and exacerbated existing racial health disparities. Jails harm the health of incarcerated people and make them more vulnerable to sickness due to malnutrition, barriers to healthcare, lack of autonomy over movement and bodily care, and stress. Additionally, transgender and gender nonconforming people who are incarcerated are denied medically-necessary care and subjected to incredibly high rates of sexual violence and harassment.

Jails also harm the mental and physiological health of people who work in them, who come into contact with the same toxic environmental conditions as incarcerated people and suffer psychological distress from their daily work. As administrative architect, you have the power to halt this Draft Scope of Work and urge the city to spend the

10.6 billion on community resources like public schools, childcare services, healthcare, drug counseling, and food programs. We cannot solve old jails with new ones. It will only be a matter of time until the new jails become another Rikers.

Talia Sandwick

talía.sandwick@gmail.com

"To the Mayor's Office of Environmental Coordination and the Department of Corrections:

I am writing to state my opposition to the city's proposed jail expansion. I oppose building any new jails, and I insist on closing Rikers now. Jails and prisons are toxic for people and communities. Rikers Island is a perfect example of environmental racism: sited on a former landfill, the conditions there are hazardous to incarcerated people and workers alike. The new jail plan can't guarantee a toxicity-free environment because of how the sites are being zoned and where they are located. In general, jails deprive poor and working people of color of access to healthcare and safe housing and exacerbate existing racial health disparities. Jails harm the health of incarcerated people and make them more vulnerable to sickness due to malnutrition, barriers to healthcare, lack of autonomy over movement and bodily care, and stress. Trans and gender nonconforming people who are incarcerated are denied medically-necessary care and subjected to incredibly high rates of sexual violence and harassment. Jails tear communities and families apart by disappearing loved ones, taking a massive psychological toll on incarcerated people and their families. Jails also harm the mental and physiological health of people who work in them, who come into contact with the same toxic environmental conditions as incarcerated people and suffer psychological distress from their work. We should spend ten billion dollars on community resources like schools, childcare services, healthcare, drug counseling, food programs, and public space. Not new jails.

Additionally, transgender and gender nonconforming people who are incarcerated are denied medically-necessary care and subjected to incredibly high rates of sexual violence and harassment.

Jails also harm the mental and physiological health of people who work in them, who come into contact with the same toxic environmental conditions as incarcerated people and suffer psychological distress from their daily work. As administrative architect, you have the power to halt this Draft Scope of Work and urge the city to spend the

10.6 billion on community resources like public schools, childcare services, healthcare, drug counseling, and food programs. We cannot solve old jails with new ones. It will only be a matter of time until the new jails become another Rikers.

Howard Fiedler,

I am writing to oppose the Draft Scope of work for the city's proposed jails plan. Jails and prisons are toxic for everyone incarcerated and the surrounding communities. Rikers Island is a clear example of a complex ridden with environmental health hazards, built on a former landfill. The Draft Scope of Work cannot guarantee a toxic-free environment because of how the sites are being zoned and where they are located. Even though the mayor says the conditions will be safer, jails historically, over these hundreds of years, have deprived poor and working people of color of access to healthcare and safe housing and exacerbated existing racial health disparities. Jails harm the health of incarcerated people and make them more vulnerable to sickness due to malnutrition, barriers to healthcare, lack of autonomy over movement and bodily care, and stress. Additionally, transgender and gender nonconforming people who are incarcerated are denied medically-necessary care and subjected to incredibly high rates of sexual violence and harassment.

Jails also harm the mental and physiological health of people who work in them, who come into contact with the same toxic environmental conditions as incarcerated people and suffer psychological distress from their daily work. "To the Department of Corrections:

The proposed jail plan that is currently being reviewed is a disaster for the health of people living in New York City and continues to deepen issues of racial discrimination, family separation, and environmental racism. Rikers must be shut down immediately as it has created the conditions for innumerable atrocities in the past century. The new jails being proposed are somehow even more discriminatory and wasteful, continuing to funnel young, poor and innocent people from our communities into the penal system every day to be dehumanized and lose opportunities. But this time you want to add a shopping mall? Make a sweetheart deal for developers while you continue to cage our neighbors? That is absolutely unacceptable and the city will not stand for it. End cash bail, end racist policing, and invest in programs that the most vulnerable among us actually need.

Howard Fiedler,

The trouble it seems to me, is that when effective rehabilitation on a broad scale is not provided, the result is to want to build more prisons. A real effort should be made to provide sufficient funds for rehabilitation not more prisons.

I am writing to oppose the Draft Scope of work for the city's proposed jails plan. Jails and prisons are toxic for everyone incarcerated and the surrounding communities. Elissa Carmona

elissacarmona@gmail.com

"To Whom It May Concern:

1- I unequivocally reject the city's plan to site a new jail at 320 Concord Avenue in the South Bronx, and I oppose the construction of any new jails in New York City.

2- A new jail at 320 Concord Avenue is in direct conflict with locally-driven, grassroots efforts by the Diego Beekman Mutual Housing Association to develop the community in a way that respects the long history of organizing by Bronxites who struggled through years of abandonment and neglect.

3- We don't want a new jail built, period. Over the last 25 years, the city's jail population has fallen from a high of 21,674 in 1991 to under 9,000 earlier this year, accomplished through a combination of falling crime rates and criminal justice reforms. The plan to replace Rikers assumes a need for 5,000 jail beds in ten year as reforms continue. We challenge the city to come up with a more aggressive plan to further reduce the number of people in jail, thus making the need to construct a new facility unnecessary.

4 -We will not accept more spending on infrastructure that coerces and controls when our neighborhood is in desperate need of community-driven development. Our community demands: community centers, the creation of green spaces, living wage jobs, truly affordable housing, and other investments in positive things that would alleviate the conditions that push so many into the criminal justice system.

5 - Building a new jail at any of the proposed sites would have a significant adverse impact on the environment, including with respect to noise, air quality, displacement and traffic, all of which require extensive study pursuant to the City Environmental Quality Review (CEQR), particularly in overburdened communities like the South Bronx.

Finally, I stand with the nearly 2,500 people who have signed a petition against building a new jail at 320 Concord Avenue in the South Bronx. While we applaud the city's plan to close Rikers Island, the answer is not to expand the criminal justice footprint – not in the South Bronx, not anywhere.

Sincerely,

Elissa Carmona

We challenge the city to come up with a more aggressive plan to further reduce the number of people in jail, thus making the need to construct a new facility unnecessary.

4 -We will not accept more spending on infrastructure that coerces and controls when our neighborhood is in desperate need of community-driven development. Our community demands: community centers, the creation of green spaces, living wage jobs, truly affordable housing, and other investments in positive things that would alleviate the conditions that push so many into the criminal justice system.

5 - Building a new jail at any of the proposed sites would have a significant adverse impact on the environment, including with respect to noise, air quality, displacement and traffic, all of which require extensive study pursuant to the City Environmental Quality Review (CEQR), particularly in overburdened communities like the South Bronx.

Finally, I stand with the nearly 2,500 people who have signed a petition against building a new jail at 320 Concord Avenue in the South Bronx. While we applaud the city's plan to close Rikers Island, the answer is not to expand the criminal justice footprint – not in the South Bronx, not anywhere.

Sincerely,
Mary Hemings

"To Whom It May Concern:

1- I unequivocally reject the city's plan to site a new jail at 320 Concord Avenue in the South Bronx, and I oppose the construction of any new jails in New York City.

2- A new jail at 320 Concord Avenue is in direct conflict with locally-driven, grassroots efforts by the Diego Beekman Mutual Housing Association to develop the community in a way that respects the long history of organizing by Bronxites who struggled through years of abandonment and neglect.

3- We don't want a new jail built, period. Over the last 25 years, the city's jail population has fallen from a high of 21,674 in 1991 to under 9,000 earlier this year, accomplished through a combination of falling crime rates and criminal justice reforms. The plan to replace Rikers assumes a need for 5,000 jail beds in ten year as reforms continue. We challenge the city to come up with a more aggressive plan to further reduce the number of people in jail, thus making the need to construct a new facility unnecessary.

4 -We will not accept more spending on infrastructure that coerces and controls when our neighborhood is in desperate need of community-driven development. PS - If anything, the jail space can be located in or near the Bronx Criminal Courts. That makes the most sense logistically, and might (might!) motivate the court system to honor the rights of accused people to a speedy trial and/or reasonable bail!!!

Howard Fiedler,

Closing Rikers is an overdue major step for this city. However, the city's proposal to open four new borough-based jails severely fails to address the problems the city is seeking to remedy by closing Rikers. The proposed plan in the Draft Scope of Work will only redistribute it and make matters worse. I cannot support this Draft Scope of Work. New cages cannot reform old ones, you must know that. The city needs to address the issues of over-policing and criminalization of poverty in communities of color, and look at true proven reform such as ending cash bail and pretrial detention. I am writing to ask that the administration retract the proposal and instead invest in alternatives to resource Black and Brown communities. Thank you.

Howard Fiedler,

Closing Rikers is right for the city. However, opening four new borough-based jails is not. It fails to address the problems the city is seeking to remedy by closing Rikers. In my opinion, the proposed plan will only make matters worse.

As a native-born New Yorker and a constituent, I cannot support this Draft Scope of Work. New ""cages"" cannot reform old ones. The city needs to address the issues of over-policing and criminalization of poverty in communities of color, and look at true proven reform such as ending pretrial detention and cash bail. I urge the administration to retract the proposal and instead invest in alternatives which will equitably benefit communities of color. Thank you for all you do for all of us.

Howard Fiedler,

Closing Rikers is an overdue major step for this city. However, the city's proposal to open four new borough-based jails severely fails to address the problems the city is seeking to remedy by closing Rikers. The proposed plan in the Draft Scope of Work will only redistribute it and make matters worse. I cannot support this Draft Scope of Work. New cages cannot reform old ones, you must know that. The city needs to address the issues of over-policing and criminalization of poverty in communities of color, and look at true proven reform such as ending cash bail and pretrial detention. I am writing to ask that the administration retract the proposal and instead invest in alternatives to resource Black and Brown communities. Thank you.

Closing Rikers is an overdue major step for this city. However, the city's proposal to open four new borough-based jails severely fails to address the problems the city is seeking to remedy by closing Rikers. The proposed plan in the Draft Scope of Work will only redistribute it and make matters worse. I cannot support this Draft Scope of Work. New cages cannot reform old ones, you must know that. The city needs to address the issues of over-policing and criminalization of poverty in communities of color, and look at true proven reform such as ending cash bail and pretrial detention. I am writing to ask that the administration retract the proposal and instead invest in alternatives to resource Black and Brown communities. Thank you.

"

Howard Fiedler,

Hard working people who obey the law and work hard for a decent living in the boroughs do not need their taxpayer dollars spent on jails in the boroughs where they live. Perhaps putting their taxes to work on a brand new subway system where they can actually breathe & get to work on time would be a better use of their

10billion. What about the repairs for the low-income housing neglected by NYCHA, which is a total disgrace. Take care of these law abiding citizens first that you have neglected while protecting the NYCHA administrators who lied about repairs. Closing Rikers is an overdue major step for this city. However, the city's proposal to open four new borough-based jails severely fails to address the problems the city is seeking to remedy by closing Rikers. The proposed plan in the Draft Scope of Work will only redistribute it and make matters worse. I cannot support this Draft Scope of Work. New cages cannot reform old ones, you must know that. The city needs to address the issues of over-policing and criminalization of poverty in communities of color, and look at true proven reform such as ending cash bail and pretrial detention. I grew up in Chinatown, and I still have family and friends that live there. I don't want to visit the neighborhood I love with the thought that there is a new jail there. I think it's a waste of tax dollar, resource and man power to build new jails in the city. If you have the money and the resource, please use it in areas that are needed. I am writing to ask that the administration retract the proposal and instead invest in alternatives to help improve the communities. Thank you.

The proposed plan in the Draft Scope of Work will only redistribute it and make matters worse. I cannot support this Draft Scope of Work. New cages cannot reform old ones, you must know that. The city needs to address the issues of over-policing and criminalization of poverty in communities of color, and look at true proven reform such as ending cash bail and pretrial detention. I am writing to ask that the administration retract the proposal and instead invest in alternatives to resource Black and Brown communities. Thank you.

Howard Fiedler,

Closing Rikers is an overdue major step for this city. However, the city's proposal to open four new borough-based jails severely fails to address the problems the city is seeking to remedy by closing Rikers. The proposed plan in the Draft Scope of Work will only redistribute it and make matters worse. I cannot support this Draft Scope of Work. New cages cannot reform old ones, you must know that. The city needs to address the issues of over-policing and criminalization of poverty in communities of color, and look at true proven reform such as ending cash bail and pretrial detention. I am writing to ask that the administration retract the proposal and instead invest in alternatives to resource Black and Brown communities. Thank you.

Howard Fiedler,

This is a matter that I am strongly against in the malpractices of the incarceration system of NYC! Making new prisons as a solution to the uncivil practices of our prison system will, actually , worsen the problem!! ""These are lives that are purposefully and slowly destroyed. If you want to reform the prison system, please don't auction it as a money making institution, please!

Closing Rikers is an overdue major step for this city. However, the city's proposal to open four new borough-based jails severely fails to address the problems the city is seeking to remedy by closing Rikers. The proposed plan in the Draft Scope of Work will only redistribute it and make matters worse. I cannot support this Draft Scope of Work. New cages cannot reform old ones, you must know that. The city needs to address the issues of over-policing and criminalization of poverty in communities of color, and look at true proven reform such as ending cash bail and pretrial detention. I am writing to ask that the administration retract the proposal and instead invest in alternatives to resource Black and Brown communities. Thank you.

"

Howard Fiedler,

My community needs access to affordable housing, education, healthcare, and stable income, not new jails. For this reason, I refuse to support the city's Draft Scope of Work. I can never endorse any plan to expand the number of jails in this city, when it should invest the

10 billion in resources that better serve what communities need. Please retract the proposal and work with grassroots organizations to address the root causes of incarceration. I urge you to scrap this plan and instead look to alternatives that have been proven to work, such as ending cash bail and pretrial detention, while investing in the thriving of all over-policed communities. Thank you.

Howard Fiedler,

My community needs access to affordable housing, education, healthcare, and stable income, not new jails. For this reason, I refuse to support the city's Draft Scope of Work. I can never endorse any plan to expand the number of jails in this city, when it should invest the

10 billion in resources that better serve what communities need. Please retract the proposal and work with grassroots organizations to address the root causes of incarceration. I urge you to scrap this plan and instead look to alternatives that have been proven to work, such as ending cash bail and pretrial detention, while investing in the thriving of all over-policed communities. Thank you.

Howard Fiedler,

My community needs access to affordable housing, education, healthcare, and stable income, not new jails. For this reason, I refuse to support the city's Draft Scope of Work. I can never endorse any plan to expand the number of jails in this city, when it should invest the

10 billion in resources that better serve what communities need. Please retract the proposal and work with grassroots organizations to address the root causes of incarceration. I urge you to scrap this plan and instead look to alternatives that have been proven to work, such as ending cash bail and pretrial detention, while investing in the thriving of all over-policed communities. Thank you.

Speeding up the justice system should be added to doing away with the cash bail system. Seventy-five percent of people incarcerated at Rikers Island are found not guilty at trial. We don't need more jails; we need a more efficient, humane, and equitable justice system.

Thank you.

Howard Fiedler,

My community needs access to affordable housing, education, healthcare, and stable income, not new jails. For this reason, I refuse to support the city's Draft Scope of Work. I can never endorse any plan to expand the number of jails in this city, when it should invest the

10 billion in resources that better serve what communities need. Please retract the proposal and work with grassroots organizations to address the root causes of incarceration. I urge you to scrap this plan and instead look to alternatives that have been proven to work, such as ending cash bail and pretrial detention, while investing in the thriving of all over-policed communities. Thank you.

Howard Fiedler,

My community needs access to affordable housing, education, healthcare, and stable income, not new jails. For this reason, I refuse to support the city's Draft Scope of Work. I can never endorse any plan to expand the number of jails in this city, when it should invest the

10 billion in resources that better serve what communities need. Please retract the proposal and work with grassroots organizations to address the root causes of incarceration. I urge you to scrap this plan and instead look to alternatives that have been proven to work, such as ending cash bail and pretrial detention, while investing in the thriving of all over-policed communities. Thank you.

Benjamin Adler

info@email.actionnetwork.org

"

Howard Fiedler,

I strongly oppose the plans in the Draft Scope of Work about the new jails. The NYC Department of Correction is failing to address the problems that caused the atrocities on Rikers in the first place. Research has shown again and again that the conditions of jails create and perpetrate violence. Imprisonment tears people away from support systems they depend on for health and wellbeing. No matter how close the jails are to actual communities, nothing can solve the problems that incarceration creates. There is no such thing as a humane or rehabilitative cage. Please revoke this plan to build four new jails across four boroughs immediately.

Thank you.

"

Howard Fiedler,

I strongly oppose the plans in the Draft Scope of Work about the new jails. The NYC Department of Correction is failing to address the problems that caused the atrocities on Rikers in the first place. Research has shown again and again that the conditions of jails create and perpetrate violence. Imprisonment tears people away from support systems they depend on for health and wellbeing. No matter how close the jails are to actual communities, nothing can solve the problems that incarceration creates. There is no such thing as a humane or rehabilitative cage. Please revoke this plan to build four new jails across four boroughs immediately.

Thank you.

"

Howard Fiedler,

I strongly oppose the plans in the Draft Scope of Work about the new jails. FIRST and FOREMOST, the Justice system from the kkkops to the prosecutors, to the legal aid attorneys, to the judges to the prison system and it's correctional officers. It is ABSOLUTELY RACIST and PURPOSELY structured that way to target minorities and people of poverty. ESPECIALLY since 90

of the crimes are ""VICTIMLESS CRIMES"". The days of the fascist Giuliani and Bloomberg regimes are OVER FINALLY! The NYC Department of Correction is failing to address the problems that caused the atrocities on Rikers in the first place. Research has shown again and again that the conditions of jails create and perpetrate violence. Imprisonment tears people away from support systems they depend on for health and wellbeing. No matter how close the jails are to actual communities, nothing can solve the problems that incarceration creates. It is absolutely a legalized 21 century labor force for the kkkapitalism and kkkorporate greed. There is no such thing as a humane or rehabilitative cage. Please revoke this plan to build four new jails across four boroughs immediately.

Thank you. Guido Colacci

"

Howard Fiedler,

I strongly oppose the plans in the Draft Scope of Work about the new jails. The NYC Department of Correction is failing to address the problems that caused the atrocities on Rikers in the first place. Research has shown again and again that the conditions of jails create and perpetrate violence. Imprisonment tears people away from support systems they depend on for health and wellbeing. No matter how close the jails are to actual communities, nothing can solve the problems that incarceration creates. There is no such thing as a humane or rehabilitative cage. Please revoke this plan to build four new jails across four boroughs immediately.

Thank you.

Howard Fiedler,

th Draft Scope of Work about the new jails. The NYC Department of Correction is failing to address the problems that caused the atrocities on Rikers in the first place. Research has shown again and again that the conditions of jails create and perpetrate violence. Imprisonment tears people away from support systems they depend on for health and wellbeing. No matter how close the jails are Please stop this madness. Better to promote REHABILITATION FOR ALL PRISONERS THAT can be helped by schooling and JOB TRAINING. All violent inmates Will need extra care along with Professional help.

Thank you.

I strongly oppose the plans in the Draft Scope of Work about the new jails. The NYC Department of Correction is failing to address the problems that caused the atrocities on Rikers in the first place. Research has shown again and again that the conditions of jails create and perpetrate violence. Imprisonment tears people away from support systems they depend on for health and wellbeing. No matter how close the jails are to actual communities, nothing can solve the problems that incarceration creates. There is no such thing as a humane or rehabilitative cage. Please revoke this plan to build four new jails across four boroughs immediately.

Thank you.

No matter how close the jails are to actual communities, nothing can solve the problems that incarceration creates. There is no such thing as a humane or rehabilitative cage. Please revoke this plan to build four new jails across four boroughs immediately. In addition this proposal is to build the new jails in my neighborhood. I live two blocks from the courts. The expense is mainly to make it more convenient to transport prisoners to the courts. The money should be used to help solve the many problems we have in New York, affordable housing, transportation, better schools etc:
Thank you.

"

Howard Fiedler,

4 new jails? That does not address the issues of incarceration & imprisonments of people who cannot raise bail money, yet linger in jails for years until their trials. That alone rewards those who won the economic lottery. It would make us a better society, if we educated those in prisons to give them employment & a better opportunity when they are released. Separate out the chronic offenders from the general population. Having gyms instead of classes, created a stronger, more connected criminal. I strongly oppose the plans in the Draft Scope of Work about the new jails. The NYC Department of Correction is failing to address the problems that caused the atrocities on Rikers in the first place. Research has shown again and again that the conditions of jails create and perpetrate violence. Imprisonment tears people away from support systems they depend on for health and wellbeing. No matter how close the jails are to actual communities, nothing can solve the problems that in carceration creates. There is no such thing as a humane or rehabilitative cage. Howard Fiedler,

I strongly oppose the plans in the Draft Scope of Work about the new jails. The NYC Department of Correction is failing to address the problems that caused the atrocities on Rikers in the first place. Research has shown again and again that the conditions of jails create and perpetrate violence. Imprisonment tears people away from support systems they depend on for health and wellbeing. No matter how close the jails are to actual communities, nothing can solve the problems that incarceration creates. There is no such thing as a humane or rehabilitative cage. Please revoke this plan to build four new jails across four boroughs immediately.

Thank you.

Howard Fiedler,

I strongly oppose the plans in the Draft Scope of Work about the new jails. The NYC Department of Correction is complete failure, an absolute shameful organization and absolutely unable the solve the problems that caused the atrocities on Rikers in the first place. Research has shown again and again that the conditions of jails create and perpetrate violence. Imprisonment tears people away from support systems they depend on for health and well being. No matter how close the jails are to actual communities, nothing can solve the problems that incarceration creates. There is no such thing as a humane or rehabilitative cage. Please revoke this plan to build four new jails across four boroughs immediately.

Instead of spending money on this spend money on releasing non-violent offenders in pretrial detention from Rikers and everywhere, and start supervising the NYPD properly, rewrite their rules and codes about arrests, get rid of our utterly incompetent and often corrupt judges, stop nominating unqualified political hacks and terrible lawyers to be judges and so on.

You don't need more jails, you need a proper justice system to replace this third world-level, utterly primitive, garbage American legal system.

If you need an example, take a trip to continental Europe.

Thank you.

Howard Fiedler,

I am a New Yorker - born in Brooklyn, raised in Queens, living in Manhattan.

I strongly oppose the plans in the Draft Scope of Work to spend

10 billion on new jails. The NYC Department of Correction is failing to address the problems that caused the atrocities on Rikers in the first place.

More jails is NOT the answer.

Research has shown again and again that the conditions of jails create and perpetrate violence. Imprisonment tears people away from support systems they depend on for health and wellbeing. No matter how close the jails are to actual communities, nothing can solve the problems that incarceration creates.

Please revoke this plan to build four new jails across four boroughs.

Thank you.

M.J. Williams

info@email.actionnetwork.org

"

Howard Fiedler,

I live in Brooklyn, in District 33, just blocks away from the proposed site of a vastly expanded jail on Atlantic Avenue. I strongly oppose the plans in the Draft Scope of Work about the new jails in every borough. The NYC Department of Correction is failing to address the problems that caused the atrocities on Rikers in the first place. Research has shown again and again that the conditions of jails create and perpetrate violence. Imprisonment tears people away from support systems they depend on for health and wellbeing and a cage is no place to administer social services. No matter how close the jails are to actual communities, nothing can solve the problems that incarceration creates. There is no such thing as a humane or rehabilitative cage. Please revoke this plan to build four new jails across four boroughs immediately and accelerate the plan to close Rikers Island for good. The estimate cost of the City's plan,

10.6 billion, can be invested instead in community-based and citywide resources and infrastructure that will eliminate the need for caging people as they wait for trial. NYC has the option now to invest in job creation, land and housing trusts, workers cooperatives, provide comprehensive mental health services to every New Yorker, decriminalize sex work, treat drug addiction as an illness, not as a crime, and implement other programs that will permanently reduce "criminality" and, above, all criminalization. These non-carceral investments will make all of New York City healthier, stronger, more productive and creative.

Thank you.

"

Howard Fiedler,

As you know, hundreds of New York City residents have gathered at each of the public hearings across four boroughs calling for the Mayor and Department of Correction to stop their plan to use

10 billion to build the jails. As a resident, I vehemently oppose the Draft Scope of Work for the new jails. There is no such thing as a humane jail, no matter how modern it is. Rikers itself was created as a jail to end all jails and look where that has gotten us. Please halt the plan to expand the city's carceral system. While I support the closing of Rikers, I do not support the opening of any new jails. Thank you.

"

Howard Fiedler,

As you know, hundreds of New York City residents have gathered at each of the public hearings across four boroughs calling for the Mayor and Department of Correction to stop their plan to use

10 billion to build the jails. As a resident, I vehemently oppose the Draft Scope of Work for the new jails. There is no such thing as a humane jail, no matter how modern it is. Rikers itself was created as a jail to end all jails and look where that has gotten us. Please halt the plan to expand the city's carceral system. While I support the closing of Rikers, I do not support the opening of any new jails. Thank you.

Howard Fiedler,

As you know, hundreds of New York City residents have gathered at each of the public hearings across four boroughs calling for the Mayor and Department of Correction to stop their plan to use

10 billion to build the jails. As a resident, I vehemently oppose the Draft Scope of Work for the new jails. There is no such thing as a humane jail, no matter how modern it is. Rikers itself was created as a jail to end all jails and look where that has gotten us. Please halt the plan to expand the city's carceral system. While I support the closing of Rikers, I do not support the opening of any new jails. Thank you.

Howard Fiedler,

As you know, hundreds of New York City residents have gathered at each of the public hearings across four boroughs calling for the Mayor and Department of Correction to stop their plan to use

10 billion to build the jails. As a resident, I vehemently oppose the Draft Scope of Work for the new jails. There is no such thing as a humane jail, no matter how modern it is. Rikers itself was created as a jail to end all jails and look where that has gotten us. Please halt the plan to expand the city's carceral system. While I support the closing of Rikers, I do not support the opening of any new jails. Thank you.

Howard Fiedler,

As you know, hundreds of New York City residents have gathered at each of the public hearings across four boroughs calling for the Mayor and Department of Correction to stop their plan to use

10 billion to build the jails. As a resident, I vehemently oppose the Draft Scope of Work for the new jails. There is no such thing as a humane jail, no matter how modern it is. Rikers itself was created as a jail to end all jails and look where that has gotten us. Please halt the plan to expand the city's carceral system. While I support the closing of Rikers, I do not support the opening of any new jails. Thank you.

T.R. Newcomb

tr.newcomb@gmail.com

"Mr. Fiedler -

I am a full time resident of New York City and I am writing to provide my feedback on the NYC Borough-Based Jail System after reviewing ""A ROADMAP TO CLOSING RIKERS"" and the ""New York City Borough-Based Jail System Draft Scope of Work"":

(1) The Brooklyn Jail is grossly oversized: The proposed Brooklyn jail will tower over the adjacent historic districts of Brooklyn Heights, Cobble Hill and Boerum Hill. It is completely unacceptable to build a facility that will be almost nine times larger (1.4 million square feet) than the current jail inside of a residential community. For a new jail to be palatable to the community, a jail must be built on Staten Island, and the height and bulk of the proposed Brooklyn jail must be substantially reduced.

(2) The proposal fails to include a jail for Staten Island: In an obvious omission to meeting the Lippman Commission's recommendations, the city's proposal inexplicably fails to recommend a jail facility on Staten Island, thus forcing Staten Island detainees and their families to make the difficult trek to Brooklyn. That does not accomplish the city's stated goal of helping family members who are "forced to miss work and travel long distances to see their loved ones [and their] attorneys who cannot easily visit their clients to prepare a defense". A jail must be built on Staten Island.

(3) The oversized jail would have a dramatically negative impact on the surrounding area in Brooklyn: The new jail would bring thousands of new workers and visitors to our already traffic-choked area, many by car, every day. During roughly the same time frame in which this new jail would be built, our area will already be afflicted by a ten-year rebuilding of the BQE, a mere four blocks to the west. The city must engage in a rigorous EIS process.

(4) The process has lacked transparency: The Lippman Commission's recommended "conversations with the community" as part of the planning process. But no conversations have occurred prior to the development of the city's plans. As a result, our community lacks trust in this process. The city needs to change its process to initiate a dialogue with the community before proceeding.

Thank you and regards,

T.R. Newcomb

COMMENT ON THE BOROUGH JAIL PLAN

Howard Fiedler
New York City Department of Correction
75-20 Astoria Boulevard
Suite 160
East Elmhurst, NY 11370

In regards to the borough-based jails proposal,

I fully support the immediate closing of the jails on Rikers Island. I also strongly oppose the opening of any new jails in New York City. There is no such thing as a humane or safe jail.

The City of New York needs to:

- End cash bail and pre-trial detention. Community supervision is successful, you said so yourself in the More Just NYC report.
- Divest from jails and policing. Invest in community resources. Invest in public schools and actual affordable housing.
- End broken windows policing and all practices which the NYPD uses to harass communities of color.
- Decriminalize poverty, homelessness, mental illness, and substance use.

The current proposal from the city demonstrates that the Mayor and his officials are committed to racist over-policing and to caging people of color. I am staunchly against the city proposal to open new jails. We can close Rikers without opening new jails.

I fully support the immediate closing of the jails on Rikers Island. I also strongly oppose the opening of any new jails in New York City. There is no such thing as a humane or safe jail.

The City of New York needs to:

- End cash bail and pre-trial detention. Community supervision is successful, you said so yourself in the More Just NYC report.
- Divest from jails and policing. Invest in community resources. Invest in public schools and actual affordable housing.
- End broken windows policing and all practices which the NYPD uses to harass communities of color.
- Decriminalize poverty, homelessness, mental illness, and substance use.

The current proposal from the city demonstrates that the Mayor and his officials are committed to racist over-policing and to caging people of color. I am staunchly against the city proposal to open new jails. We can close Rikers without opening new jails.

Signed:

I want to raise my family
in a community free from the
oppressive police state I was raised
under in the South Bronx in the 90s
My biggest fear is my children of color
being taken from me & incarcerated. Please don't open this
jail. Stop from my front door.

COMMENT ON THE BOROUGH JAIL PLAN

Howard Fiedler
New York City Department of Correction
75-20 Astoria Boulevard
Suite 160
East Elmhurst, NY 11370

In regards to the borough-based jails proposal,

I fully support the immediate closing of the jails on Rikers Island. I also strongly oppose the opening of any new jails in New York City. There is no such thing as a humane or safe jail.

The City of New York needs to:

- End cash bail and pre-trial detention. Community supervision is successful, you said so yourself in the More Just NYC report.
- Divest from jails and policing. Invest in community resources. Invest in public schools and actual affordable housing.
- End broken windows policing and all practices which the NYPD uses to harass communities of color.
- Decriminalize poverty, homelessness, mental illness, and substance use.

The current proposal from the city demonstrates that the Mayor and his officials are committed to racist over-policing and to caging people of color. I am staunchly against the city proposal to open new jails. We can close Rikers without opening new jails.

Signed:

A handwritten signature in black ink, appearing to be "H. Fiedler", written over a horizontal line.

Howard Fiedler,

I strongly oppose every aspect of the Draft Scope of Work about the jails plan across four boroughs. If you just look at Rikers, detaining innocent people there has caused them to lose their jobs and housing. Over 75

of those detained at Rikers are released because they're found not guilty. That's proof in itself that jailing people, mostly because they cannot afford bail, is inefficient and frankly costly and cruel. Your plan to design new jails in this city will not fix those issues. Please take action to morally oppose moving forward with this Draft Scope of Work. Urge the mayor's administration to stop expanding new jails in this city. Please reinvest your time and resources to policies and practices that support all of our communities. You can do so, Mr. Fiedler. Thank you.

"

Howard Fiedler,

I do not approve any part of the Draft Scope of Work. After reviewing the plan, it is clear that it would cause significant environmental damage and health hazards on the sites where it is proposed. These new jails will not solve the crux of the issue: that most people held on Rikers are detained because they are too poor to pay bail. Over 75

are eventually released because they are not found guilty of crime. Mr. Fiedler, I am asking you to take a moral stance against further working on the architecture of this building. You have the power to halt its construction and encourage the city to instead invest in solutions to incarceration which include restorative justice. Incarceration does not have to be the only way. Please, reject this plan now.

"

Howard Fiedler,

I strongly oppose every aspect of the Draft Scope of Work on the new jails. For decades, detaining innocent people on Rikers have made them lose their jobs and housing. Over 75

of those detained at Rikers are released because they're found not guilty. Your plan to design new jails in this city will not fix the fact that most people are held because they are too poor to pay bail. How can you morally even consider moving forward with this Draft Scope of Work? I am writing to tell you and Mayor de Blasio's administration to stop expanding new jails in this city. Please reinvest your money, time and resources to policies and plans that support all of our communities.

Best,
Bernice

I do not approve any part of the Draft Scope of Work. After reviewing the plan, it is clear that it would cause significant environmental damage and health hazards on the sites where it is proposed. These new jails will not solve the crux of the issue: that most people held on Rikers are detained because they are too poor to pay bail. Over 75

are eventually released because they are not found guilty of crime. Mr. Fiedler, I am asking you to take a moral stance against further working on the architecture of this building. You have the power to halt its construction and encourage the city to instead invest in solutions to incarceration which include restorative justice. Incarceration does not have to be the only way. Please, reject this plan now.

Howard Fiedler,

In these technologically sophisticated times, there is no reason to use precious resources and land to build prisons. We have electronic monitoring, which can do as well as any physical building to keep track of purported offenders and make sure they show up for their court date(s).

Therefore, I do not approve any part of the Draft Scope of Work. After reviewing the plan, it is clear that it would cause significant environmental damage and health hazards on the sites where it is proposed. Furthermore, new jails will not solve the crux of the issue: that most people held on Rikers are detained because they are too poor to pay bail. Over 75

are eventually released because they are not found guilty of crime. Mr. Fiedler, I am asking you to take a moral stance against further working on the architecture of this building. You have the power to halt its construction and encourage the city to instead invest in solutions to incarceration which would not only include technological means, but also restorative justice. Incarceration does not have to be the only way. Please, reject this plan now.

"

Howard Fiedler,

I strongly oppose every aspect of the Draft Scope of Work about the jails plan across four boroughs. If you just look at Rikers, detaining innocent people there has caused them to lose their jobs and housing. Over 75

of those detained at Rikers are released because they're found not guilty. That's proof in itself that jailing people, mostly because they cannot afford bail, is inefficient and frankly costly and cruel. Your plan to design new jails in this city will not fix those issues. Please take action to morally oppose moving forward with this Draft Scope of Work. Urge the mayor's administration to stop expanding new jails in this city. Please reinvest your time and resources to policies and practices that support all of our communities. You can do so, Mr. Fiedler. Thank you. Governor's Island is a better place for incarceration than the 5 boroughs. The spaces left in the 5 boroughs should be assigned to affordable housing.

Howard Fiedler,

I do not approve any part of the Draft Scope of Work. After reviewing the plan, it is clear that it would cause significant environmental damage and health hazards on the sites where it is proposed. These new jails will not solve the crux of the issue: that most people held on Rikers are detained because they are too poor to pay bail. Over 75

are eventually released because they are not found guilty of crime. Mr. Fiedler, I am asking you to take a moral stance against further working on the architecture of this building. You have the power to halt its construction and encourage the city to instead invest in solutions to incarceration which include restorative justice. Incarceration does not have to be the only way. Please, reject this plan now. We don't need to add to the problem.

"

Howard Fiedler,

I strongly oppose every aspect of the Draft Scope of Work about the jails plan across four boroughs. If you just look at Rikers, detaining innocent people there has caused them to lose their jobs and housing. Over 75

of those detained at Rikers are released because they're found not guilty. That's proof in itself that jailing people, mostly because they cannot afford bail, is inefficient and frankly costly and cruel. Your plan to design new jails in this city will not fix those issues. Please take action to morally oppose moving forward with this Draft Scope of Work. Urge the mayor's administration to stop expanding new jails in this city. Please reinvest your time and resources to policies and practices that support all of our communities. You can do so, Mr. Fiedler. Thank you.

"

Howard Fiedler,

As a resident of the Upper West Side (10023), I strongly oppose the Draft Scope of Work for new jails across 4 boroughs. If you just look at Rikers, innocent people detained there have lost their jobs and housing. Over 75

of those detainees are released because they're found not guilty. That's proof in itself that jailing people--mostly because they cannot afford bail--is as inefficient as it is costly and cruel. Your plan to design new jails in this city--no matter how humane-- will not fix fundamental social and ethical shortcomings in providing fair and appropriate treatment for all.

I urge you to take moral action to oppose moving forward with this Draft Scope of Work. Advise the mayor's administration to stop expanding new jails in this city. Please reinvest your time and resources to policies and practices that *support* all of our communities. I believe it is in your power to do so, Mr. Fiedler.

Thank you.

These new jails will not solve the crux of the issue: that most people held on Rikers are detained because they are too poor to pay bail. Over 75

are eventually released because they are not found guilty of crime. Mr. Fiedler, I am asking you to take a moral stance against further working on the architecture of this building. You have the power to halt its construction and encourage the city to instead invest in solutions to incarceration which include restorative justice. Incarceration does not have to be the only way. Please, reject this plan now.

Howard Fiedler,

I do not approve any part of the Draft Scope of Work. After reviewing the plan, it is clear that it would cause significant environmental damage and health hazards on the sites where it is proposed. These new jails will not solve the crux of the issue: that most people held on Rikers are detained because they are too poor to pay bail. Over 75

are eventually released because they are not found guilty of crime. Mr. Fiedler, I am asking you to take a moral stance against further working on the architecture of this building. Howard Fiedler,

I strongly oppose every aspect of the Draft Scope of Work about the jails plan across four boroughs. If you just look at Rikers, detaining innocent people there has caused them to lose their jobs and housing. Over 75

of those detained at Rikers are released because they're found not guilty. That's proof in itself that jailing people, mostly because they cannot afford bail, is inefficient and frankly costly and cruel. Your plan to design new jails in this city will not fix those issues. Please take action to morally oppose moving forward with this Draft Scope of Work. Urge the mayor's administration to stop expanding new jails in this city. Please reinvest your time and resources to policies and practices that support all of our communities. You can do so, Mr. Fiedler. Thank you.

Howard Fiedler,

I do not approve any part of the Draft Scope of Work. After reviewing the plan, it is clear that it would cause significant environmental damage and health hazards on the sites where it is proposed. These new jails will not solve the crux of the issue: that most people held on Rikers are detained because they are too poor to pay bail. Over 75

are eventually released because they are not found guilty of crime. Mr. Fiedler, I am asking you to take a moral stance against further working on the architecture of this building. You have the power to halt its construction and encourage the city to instead invest in solutions to incarceration which include restorative justice. Incarceration does not have to be the only way. Please, reject this plan now.

"

Howard Fiedler,

I strongly oppose every aspect of the Draft Scope of Work about the jails plan across four boroughs. If you just look at Rikers, detaining innocent people there has caused them to lose their jobs and housing. Over 75

of those detained at Rikers are released because they're found not guilty. That's proof in itself that jailing people, mostly because they cannot afford bail, is inefficient and frankly costly and cruel. Your plan to design new jails in this city will not fix those issues. Please take action to morally oppose moving forward with this Draft Scope of Work. Urge the mayor's administration to stop expanding new jails in this city. Please reinvest your time and resources to policies and practices that support all of our communities. You can do so, Mr. Fiedler. Thank you.

Anna Coll

ac5799@nyu.edu

"To the Mayor's Office of Environmental Coordination and the Department of Corrections:

I am writing to state my opposition to the city's proposed jail expansion. I oppose building any new jails, and I insist on closing Rikers now. Jails and prisons are infrastructural nightmares. The city's plan would make jails central aspects of all city planning for hundreds of years, instead of community spaces and resources. Making us go to police and jails for access to public services like rehabilitation is violent and exclusive and puts new power in the hands of a Department of Corrections which has a well-documented and long history of violence. DOC can never be capable, due to its nature and role, of administering services fostering New Yorkers' health or wellbeing. The city's plan makes our neighborhoods monuments to mass incarceration and centers human caging in our urban planning and design. Jails and their surrounding areas

Best,
Anna

Aline Gue

aline.myriam.gue@gmail.com

"To the Mayor's Office of Environmental Coordination and the Department of Corrections:

I am writing to express that I oppose the city's proposed jail expansion. As a New York City resident, I oppose building any new jails, and I insist on closing Rikers now. Reducing the population down to 5,000 by 2027 is not enough. Jails and prisons are infrastructural nightmares.

The city's plan would make jails central aspects of all city planning for hundreds of years, instead of community spaces and resources. Forcing our communities to go to police and jails for access to public services like rehabilitation is violent and exclusive and puts new power in the hands of a Department of Corrections which has a well-documented and long history of violence. DOC can never be capable, due to its nature and role, of administering services fostering New Yorkers' wellness. The city's plan makes our neighborhoods monuments to mass incarceration and centers human caging in our urban planning and design.

Jails and their surrounding areas put community members in proximity to violent and abuse police and corrections officers, and transform neighborhood character by incorporating dehumanizing and austere "security" like razor wire, police barricades, and austere, imposing buildings designed to separate us from our community members locked inside. No amount of green space and open areas in the blueprint of the jail sites will erase that. Close Rikers now without opening new jails. Our communities deserve better than packaging much needed resources through incarceration.

Sincerely,

Aline

I am writing to state my opposition to the city's proposed jail expansion. I oppose building any new jails, and I insist on closing Rikers now. Jails and prisons are infrastructural nightmares. The city's plan would make jails central aspects of all city planning for hundreds of years, instead of n community spaces and resources. Making us go to police and jails for access to public services like rehabilitation is violent and exclusive and puts new power in the hands of a Department of Corrections which has a well-documented and long history of violence. DOC can never be capable, due to its nature and role, of administering services fostering New Yorkers' health or wellbeing. The city's plan makes our neighborhoods monuments to mass incarceration and centers human caging in our urban planning and design. Jails and their surrounding areas put community members in proximity to violent and abuse police and corrections officers, and transform neighborhood character by incorporating dehumanizing and austere "security" like razor wire, police barricades, and austere, imposing buildings designed to separate us from our community members locked inside. Just like we look back on Rikers Island 75 years later with shock and dismay that we could ever have thought it was a "modern, humane" jail, so too will we look back at these detention complexes in horror. Close Rikers now without opening new jails.

Sincerely,

Ananth

Hello,

I am ABSOLUTELY against the destruction of the Municipal parking Lot and the proposal to build a monster building in a residential area.

There is no 29 story high building in Queens, why would you build such a monster, and make it a jail, on top of it all.

A 29 story building will change the face of the whole area, not only Kew Gardens, might even affect the flight patterns of both airports' approaches, and will definitely affect the infrastructure. Queens was never predicated on such monster buildings, so the sewers, electrical loads, air quality will also be affected.

If you want more comments why you shouldn't build a monster, please organize community meetings...I don't think there is even ONE person who would be agreeable to building a monster in Queens.

Thank you

Sinetta Avram

bahram03@aol.com

"Hi

I live in Fresh Meadows, Queens and oppose the plans to expand the jail and bring Rikers inmates to our community. I am appalled that a plan to bring inmates from Rikers was made without informing every member of the neighboring communities. The planned area in Queens is home to many people, a central place for daily commuters, multiple schools only 3 blocks away from the courthouse, and parks where children play. We demand our safety be taken as the first priority over where you house criminals.

bahram03@aol.com

"

Hi

I am writing to oppose the plan to build a new jail in queens. Do not build it anywhere in queens. We have no interest in bringing criminals to our neighborhood.

I live in fresh meadows and do not support this idea.

The proposal would redevelop the dormant Queens Detention Complex — located at 126-02 82nd Ave., adjacent to the Queens Criminal Courthouse — and the nearby municipal parking lot (which opened earlier this year) into a corrections center with space for 1,510 prisoner beds. The block of 82nd Street between 126th and 132nd streets would be demapped to allow for the facility's development

COMMENTS: Kew Gardens 29 story Jail building Proposal.

Regarding the building proposal to house 1500 juvenile inmates plus staff and required security in an area that is already overburdened with traffic, people, housing & apartment house expansion, crowded retail shopping, homeless shelters, overcrowded subways & LLRR and Grand Central Pkwy. expansion.

Many of us in Kew Gardens, Briarwood & Forest Hills have lived here most of our lives and this will effect surrounding areas and increase our burden and lower property values.

I hope you can help preserve our community before it's too late.

Thank You,

Sincerely,

George L. Balle

"

Howard Fiedler,

I am writing to urge the Mayor and the Department of Corrections to cancel their plan to use

10 billion to build new jails. As a New York City resident, I am vehemently opposed to the Draft Scope of Work for the new jails.

Learn from the tragedies of Rikers Island. We need to end mass incarceration, starting with eliminating cash bail for misdemeanors and ministerial offences, decriminalizing personal use of marijuana and pursuing non-carceral pre-trial alternatives for those charged with non-violent crimes. We need to put an end to the rampant abuse, including sexual abuse, and corruption that have for years been documented at Rikers.

Unless and until these issues of mass incarceration of low-income New Yorkers have been effectively addressed, I cannot support the opening of any new jails.

Thank you.

Lauren Bellard

lbellard1973@gmail.com

"

Dear Mr. Fiedler:

Having been a resident of Kew Gardens for many years I have witnessed a consistent decline of the beautiful neighborhood since the election of Bill DiBlasio. DiBlasio is a thoroughly incompetant leader who lacks vision or a plan on how to resolve issues with homelessness in New York City therefore planting them in hotels in residential neighborhoods such as mine. The homeless men who reside in our neighborhood are menacing and also appear to suffer from mental illness. There is one homeless male who walks Queens Boulevard with his pants down exposing his buttocks and penis in the vicinity of PS99. No mayor or elected leader in our history has ever come up with such an ill thought, ineffective plan to combat homelessness.

DiBlasio then creates another short-sighted plan to build borough based jails in residential communities throughout the city. His lack of intelligent leadership and sound judgement will put the safety of children, elderly and all residents of Kew Gardens at risk. We already have a detention center and a homeless shelter for women in our community and it is troublesome to know that we will be surrounded by derelicts and bear the financial burden as a tax payers.

I am making a plea to you, Mr. Fiedler, whom I am confident will put a stop to your colleague's imprudent, reckless plan and consider the voices of the Kew Gardens residents. NO HOMELESS NO JAILS IN KEW GARDENS.

Sincerely,

Lauren Bellard

"

Ariel Ben-Ami

karielbenami@gmail.com

"Dear Mr. Fiedler,

I am writing to express my grave concern about the New York City proposal to close the Rikers Island jail facility and build an expanded jail at 126-02 82nd Avenue
<<https://maps.google.com/?q=126>

E2

80

9002+82nd+Avenue&entry=gmail&source=g> in Kew Gardens. I am adamantly opposed to the plan to bring this jail to Kew Gardens and the other four borough neighborhood. The borough-based jail system will concentrate the prison population in four highly residential neighborhoods. The presence of these jails will harm our already-deteriorating quality of life, make Kew Gardens less safe, and exhaust our overburdened parking and transportation resources.

The problems associated with Rikers Island can be addressed through effective training of corrections officers, increasing the efficiency of the court system, and dismantling the bail bonds industry, which is disproportionately responsible for keeping poor, non-violent offenders needlessly behind bars. Please consider these options before irrevocably damaging the fabric of our communities.

Best regards,
Ariel Ben-Ami

"

Howard Fiedler,

It is good that Rikers is closing because it is overcrowded and there is abuse. However, opening 4 jails in New York City would be to just replace Rikers. The proposed plan in the Draft Scope of Work will only redistribute it and make matters worse. I cannot support this Draft Scope of Work. New cages cannot reform old ones. The problem is that too many African Americans and Hispanics are the ones taken to Rikers. They remain there because they don't have the money to pay their bails. After some time there, they are frequently found innocent. By then, their lives are damaged significantly because they lost their jobs and often housing. What is needed is ending cash bail and pretrial detention. I am writing to ask that the administration retract the proposal and instead invest in alternatives to resource Black and Brown communities. Thank you.

I live in the borough of Queens.

"

Mary ann castle

info@email.actionnetwork.org

"

Howard Fiedler,

As you know, hundreds of New York City residents have gathered at each of the public hearings across four boroughs calling for the Mayor and Department of Correction to stop their plan to use

10 billion to build the jails. As a resident, I vehemently oppose the Draft Scope of Work for the new jails. There is no such thing as a humane jail, no matter how modern it is. Rikers itself was created as a jail to end all jails and look where that has gotten us. Please halt the plan to expand the city's carceral system. While I support the closing of Rikers, I do not support the opening of any new jails. Thank you.

A recent expose of Rikers Island Prison showed that most people incarcerated there are there for non violent drug crimes. Moreover, many -- if they came from affluent families--could have posted bail. Poor and working class people cannot post bail--this is a social justice issue of mammoth proportions. Use the funding to fix the broken public school educational system, create apprenticeship programs, job training and placement in many diverse sectors. No more jails -- More education, training, job placement, job coaches to help people negotiate on-the-job communications and relationship. BE BOLD, MR MAYOR THINK OUTSIDE THE BOX-- YES CLOSE THE SWAMP THAT IS RIKERS ISLAND AND GIVE PEOPLE THE OPPORTUNITIES THAT THEY HAVE BEEN DENIED.

thank you

"

Nina Cohen

ninka030777@yahoo.com

"Hello my name is Nina Orsini and I live in Kew Gardens Queens with my husband and son.

Over a year ago a hotel nearby to my apartment had allowed part of the space to be used as a temporary living for single homeless men. This led to the drastic change in our residential neighborhood where families many of low income with many children live. Thankfully more recently the shelter had been converted to accommodate women and children instead.

Just to give you an idea in 3 months at that time my husband was almost mugged on his way to work as an intensive care dr at 5 am. Two separate pedophile men approached closely my 4 year old son (one almost grabbed him into his car), another with a dog followed in the park playground. Also drunk men roaming the streets screaming and throwing bottles. Yet a third men with a dog for 6 months was standing by PS99 with a dog morning and evening pick up and the drop off times. PS 99 is around the corner from the "hotel that was used as a men's Shelter". Our train station still smells as a bathroom. Change in the use of the shelter

Putting a jail in the residential neighborhood like Kew Gardens instead of an isolated island is reckless. That's making the city unlivable for the residents who abide by the laws and a compromising our families and children.

I hope your office reconsiders this proposal and stops all plans for building jail in Kew Gardens Queens!!!

Sincerely Nina and Jose Orsini

david123@rcn.com

"Hello Mr. Howard Fiedler,

I happen to be 100

against the idea of building 4
Community jails to replace the jails on Rikers Island.

This proposal, described in the brochure, ""Beyond Rikers, Towards a Borough Based Jail System"" presents some lofty goals, but its impact will be negative on the communities where the jails will be built.

In Kew Gardens, where I live, visitors and residents can't find parking near the places they are visiting or where they live. And that is the situation now. With so many more people coming into the community on a daily basis when the proposed 29 story building is finished this situation will become a real nightmare.

Furthermore, the brochure does not discuss the negative impact of an estimated 250 daily visitors, 290 detention facility workers, 20 Community facility workers, and 8 parking workers.

The brochure goes on to say that a Borough based jail system will be Fairer, Safer and more Efficient. There is no evidence that a new building will make any of these goals achievable. Rikers is known for not being Fair or Safe or Efficient. The Staff and inmates would simply move to a new space. And spaces don't change the way people work together or relate to each other.

When the much smaller jail was operational behind the court house, and someone was released from jail at night because they made bail, invariably that person would break into a car by breaking one of the windows and drive off or steal something from the car. With a much larger population this would happen more often. So much for the claim that the communities where the jails will be built will be safer than other communities.

If the mayor really wants the people who live close to where these jails are to be built to be in favor of them, he

Edna Davoudi

edna@myprimerealtor.com

"Hi,

We are a family of 7, I have 5 kids and we live in Kew Gardens since 1992. I am a real estate broker , very active in the neighborhood and a member of the Jewish community of Ner Mordechai, in the corner of Lefferts Blvd and Abingdon rd.

Moving 1500 inmate in our backyards will be devastating for all of us.

And how is even possible that they could even be thinking to move a large jail in the middle of a very busy neighborhood.

Happened that I visited an inmate for a business purpose in the Green Haven Jail in upstate NY. Why can't they build whatever is necessary close to that same location, after all it is only 1:30 min away from the court.

"

Dennis F

76flamini@gmail.com

"Hi. My name is Dennis Flamini and I own a 1BR coop in Forest Hills with my wife. I am APPALLED with the idea of erecting a jail in this area. There is already a major issue with traffic, as evident by all of the traffic cameras and traffic signs. Why would anyone think it is a good idea to add a building that will attract an absurd amount of cars to the area?! There is already a crippled mass transit system, that will not be able to get people to this location efficiently, so the only option will be to DRIVE! The already over regulated and under enforced traffic, should eliminate Kew Gardens as a choice! In addition, why burden a diverse multicultural population with this issue? It seems racist to me, why wouldn't it be erected in Whitestone or Bayside?!?!

"

Alexander Dunlop

dunloaw@auburn.edu

"

Howard Fiedler,

The proposal to end abuses at Rikers island by closing the well-placed and very extensive facility is misguided. End abuses by ending the abuses. In other words change the people not the buildings. No doubt many procedures, including sentencing, will need to be changed as well. The city's proposal to open four new borough-based jails fails to address the problems the city is seeking to remedy by closing Rikers. The proposed plan in the Draft Scope of Work will only redistribute it and make matters worse. I cannot support this Draft Scope of Work. New cages cannot reform old ones, you must know that. The city needs to address the issues of over-policing and criminalization of poverty in communities of color, and look at true proven reform such as ending cash bail and pretrial detention. I am writing to ask that the administration retract the proposal and instead invest in alternatives to resource Black and Brown communities. Thank you.

Bill Eagen

bill.eagen@gmail.com

"Dear Mr. Fielder,

I am disgusted that the city is proposing to build a large jail complex in the Kew Gardens community. Kew Gardens is nice, family friendly community. Building this jail will certainly negatively impact this area. Why would you consider putting such a large jail facility two blocks for a public elementary school? You will be endangering the lives of small children. Does housing and releasing pedophiles so close to a school of small children really seem like a good idea to you?

Furthermore, the community most certainly cannot sustain the traffic and parking nightmares that will be created!!!

This is a lousy idea. The mayor and anyone who supports this awful plan most certainly will lose the votes of everyone within this area. I will campaign night and day to ensure so!

Please reconsider this plan and construct a jail in a more isolated, safe, and sensible location.

Bill Eagen

"

Elizabeth J

info@email.actionnetwork.org

"

Howard Fiedler,

Yeah, we need more actual rehabilitation, less jails. More money towards community centers to give youth a place to grow and learn. Funnel those millions into the poorer communities. There's so much mental potential in the Black and Latino community that to waste it on more jails for a small segment of the population that commit crimes because they're natural sociopaths is a shame.

Let's focus on healing and therapy!

"October 14, 2018

To Whom It May Concern:

I'm writing to express my heartfelt opposition to the Borough Based Jail System. I have lived at my current address for sixteen and a half years with the Brooklyn House of Detention visible from my living room window.

Fifteen of those sixteen years there has been major construction in the immediate vicinity of my building.

I don't understand how prison reform should prioritize the building of more prisons. That doesn't help anyone but the usual suspects: the development and building industries. It's typical of the cynicism often displayed by Mayor Di Blasio and his real-estate cronies.

Perhaps we should ask why so many people, primarily young men of color, wind up in jail when accused of petty crimes they may well not have committed. A review of policing practices in NYC seems far more necessary. Just because the cops have no longer use the vile ""stop and frisk"" policy means they are now doing a fabulous, color-blind job.

Our less-than-wonderful mayor will no longer be in office when this plan is implemented and noise, dirt, shaking walls, and all the other inconveniences of living very near construction sites start . As usual, the citizens of the disappearing city I used to love will be left facing the sad consequences, while the politician de jour is off to his or her next romp.

I strongly oppose this project.

Sincerely,

Barbara Elovic
96 Schermerhorn St. #6A
Brooklyn, NY 11201-5036
"

Patricia Farrell

pfarrell@nyc.rr.com

"Dear Mr. Fiedler,

I'm a concerned resident of Kew Gardens, Queens (11415) and I'm reaching out today to express my opposition to the Queens Jail Proposal as well as all of the other proposed NYC Borough Jails.

I cannot understand why anyone would want to bring dangerous people, who have committed, or are charged with, violent crimes closer to residential areas. They belong where they are – on an island surrounded by water. They have already attacked and overcome corrections officers, and could do so again, making it possible for them to escape into our neighborhoods, putting residents at risk. It also brings the family and friends of the prisoners onto the buses, subways, and streets of our already crowded neighborhood. While many of these visitors will be law-abiding, there may well be those who are not, and that puts us at further risk. We already have homeless men, some who are mentally ill, wandering the neighborhood. We have recently had two episodes of violent assaults on people at our subway stations – we don't need more.

Kew Gardens is a middle-class residential community where people have lived for years and invested in their homes because it was considered a desirable area. This will change if the proposed jail goes forward.

The officials who support the prison do not live near the proposed sites. Sad to say, it appears that politicians only remember we live in a democracy when it is time for them to be elected.

Thank you for taking the time to read this.

Sincerely,
Patricia Farrell
"

Francis Marie Ferreira

francis.marie.ferreira@gmail.com

"To Whom It May Concern:

I unequivocally reject the city's plan to site a new jail at 320 Concord Avenue in the South Bronx, and I oppose the construction of any new jails in New York City as a whole. A new jail at 320 Concord Avenue is in direct conflict with locally-driven, grassroots efforts by the Diego Beekman Mutual Housing Association to develop the community in a way that respects the long history of organizing by Bronxites who struggled through years of abandonment and neglect. We will also not accept more spending on infrastructure that coerces and controls when our neighborhood is in desperate need of community-driven development. Our community demands: community centers, the creation of green spaces, living wage jobs, truly affordable housing, and other investments in positive things that would alleviate the conditions that push so many into the criminal justice system. And as someone who has lived in the South Bronx since the beginning of her life, I have seen the changes that were made in order to make this area better and cleaner for everyone who lives here. Placing a jail around here will set us back the 10-20 years we have been working hard to remove the stereotypes about the South Bronx. You would also corrupt the children who would have to see the action going on between the jail and back.

Finally, I stand with the nearly 2,500 people who have signed a petition against building a new jail at 320 Concord Avenue in the South Bronx. While we applaud the city's plan to close Rikers Island, the answer is not to expand the criminal justice footprint – not in the South Bronx, not anywhere.

Sincerely,
Francis Ferreira

kennsbusy@gmail.com

"I absolutely OPPOSE it's construction.

The only practical benefit is political.

There is no benefit to degrading nearby property values. We have already endured the newly constructed hotel across the street being partially used by homeless families. Another political decision based on politics.

Our stinking mayor is a socialist.

He can't even take care of his constituency living in NYCHA houses. They live in horrible conditions and he can't even get help them, in addition to lying about the number of tenants affected by lead poisoning and other lies and political maneuvering for his party's benefit instead of the people.

"

Kellie Foxx-Gonzalez

kellie.foxx.gonzalez@gmail.com

"I am a resident of Flatbush.

I demand that the DOC

1. Shuts down Rikers.
2. NO NEW JAILS in Brooklyn.
3. Ends cash bail which disproportionately incarcerates poor people of color.
4. Invest immediately in community built and managed transformative justice structures that do not result in criminalization and incarceration

Jails and prisons serve departments such as your self and help rich private contractors become even richer. They do not serve my community.

JAILS MAKE BROOKLYN LESS SAFE.

INVEST IN SOCIAL SERVICES AND EDUCATION, NO MORE JAILS.

INCARCERATION IS ABUSE.

"

Jordana Marx Fried

jordana.marx@gmail.com

"Dear Elected Officials, Queens Community Board, Neighbors -

This is not the type of communication I usually send, but I felt very compelled to write all of you about this matter. In the spirit of community and doing the right thing, I felt that I needed to speak up and voice my concern and I am sure you will be happy that it's not bike lane related.

I am 33 years old and I have lived in Queens my entire life (in Fresh Meadows and now Forest Hills for the past 7 years) and have seen a noticeable change in this neighborhood, which my parents and grandparents have been long term residents of since the 1940s and I have been very familiar with all my life. Over the past few months, if not 1-2 years, I have noticed an influx of homeless, mentally disturbed, what it appears to be as drug addicted and troubled people in the Kew Gardens/Forest Hills/Rego Park area. I attribute this to the local hotels which have been set up as temporary homeless shelters more so than any other changing factor in this neighborhood. Most people might not even know they exist, but they are definitely negatively impacting our community on a daily basis. Crime has increased in these neighborhoods since the shelters have been established and the safe feeling we once had coming and going to our homes is now in question.

I think that Kew Gardens, Forest Hills, and Rego Park are wonderful areas which pride themselves on truly being a melting pot of cultures and people of all different financial backgrounds. This is not an economical or racial issue -- but a safety one. You can tell as you travel up towards the courthouse on Queens Boulevard that the environment, clientele, and atmosphere changes from family-friendly and residential, to dangerous and criminal, and I am extremely concerned with what adding a full fledged prison to our neighborhood would do and who it would attract.

We pay a high premium for safety expectations in Forest Hills, and adding ""steps away from Queens finest prison"" to attract other families with young children to our potential listing description is just not ok. I think having a prison here would destroy our neighborhoods, our children's upbringing in a safe environment, the economical booming of the retail stores, the attractiveness of living here, etc.

I beg you to please prevent this prison from coming to Queens. I don't want to have to leave a place I love because I don't feel safe and I definitely don't want to move to Long Island. If you won't think of me, please think of my two year old daughter when making your decisions.

Thank you for serving our community,
Jordana Fried

"

Howard Fiedler,

i DISAPPROVE OF THIS DRAFT. t Here IS NO REASON TO MAKE JAILS A PLACE TO ASPIRE TO GO TO. jails SHOULD BE A PLACE TO DISCOURAGE VIOLENCE. with ALL THE SOCIAL SERVICES THAT THE CITY PAYS AND GIVES THERE IS NO REASON FOR ALL THAT THE CITIZENS MUST ENDURE TO LIVE IN THE CITY. i MUST ADMIT THAT THERE IS A SEGMENT OF THE POPULATION AND SOME EMPLOYED BY THE CITY THAT ENCOURAGE VIOLENCE AND GOING TO JAIL. i AM SPEAKING OF THE RESIDENCE OF THE american BLACK COMMUNITY THAT ARE AND WANT TO DISCREDIT THE WHITE POPULATION AND WHITE ADMINISTRATION . All the hoopla over black right is a false rouse to under mind the forward results of race relations. I am in favor of deporting those that are not happy with the forward nature of race relations. It was Lincoln's plan and should have been carried out and should be carried out today. This would spare the county with all the problems that Blacks use to maintain a hostile nature toward white citizens. Why placate to viole nce and hostile persons of color make then persons with out a country.

Abraham Gellis

aagellis@gmail.com

"I have been keeping myself informed of the city's plan to close Rikers and open 4 new ones in its place. I am glad that progress is being made towards closing Rikers - in any other country it would be cited as an example of human rights violations - but opening new jails undermines this positive impact. These jails will be filled and they will be staffed by the same or similar abusive employees as Rikers was - no screening system can solve prisoner mistreatment. We'll hear all the same stories of underserved mental health needs, physical and psychological torture, and suicide.

Particularly abhorrent is the city's reliance on cash bail, which leaves vulnerable, impoverished residents incarcerated for months and years before they even get a day in court! What conscionable reasoning can justify spending city funds on more jails instead of unclogging the mess that keeps them full? I urge you to extend some empathy - imagine being taken off the street for weeks, stuffed in a cell, treated as less than human, waiting for your court date, your only chance to maybe get back to your community and your loved ones, as it gets delayed and rescheduled by forces outside your control.

I live near the Brooklyn Detention Complex and I walk past it nearly every day to get to my workplace. While it is an outdated eyesore, I hardly think the answer is renovating it into a bigger jail. The idea that this would somehow improve the neighborhood with first-floor shops and basement parking beneath a tower's worth of unjustly imprisoned pre-trial detainees is not only misguided, it is downright cruel.

-Abraham Gellis, Downtown Brooklyn Resident

"

Jon Golbe

jgolbe@gmail.com

"I'm not a NIMBY guy, I just don't think we should be incarcerating most of the ppl we are incarcerating. We should end cash bail and we'll have more than enough beds for all the rest. Obv we should not have prison sentences be so long, we should have almost nobody locked up for non-violent offenses, and blackmail-like plea deals should be done away with. But first we should end cash bail.
"

Ken Goldman

kenbgoldman@gmail.com

"We all understand that the jail needs to be here and needs to be rebuilt. But a jail skyscraper would ruin the skyline and send property values down. And the huge population of inmates would require massive changes at street level. this is mixed use neighborhood! dont ruin it.

"

Howard Fiedler,

Closing rikers always meant less prisons, not different prisons. I'm just so confused...

"" Sartre begins his Black Orpheus thus: "What would you expect to find when the muzzle that has silenced the voices of black men is removed? That they would thunder your praise? When these heads that our fathers have forced to the very ground are risen, do you expect to read adoration in their eyes?" All I know is that anyone who tries to read in my eyes anything but a perpetual questioning won't see a thing—neither gratitude nor hatred. And if I utter a great shout, it won't be black. No, from the point of view adopted here, there is no black problem. Or at least if there is one, the Whites are only accidentally interested. Our history takes place in obscurity and the sun I carry with me must lighten every corner.""

" This letter is a response to the proposal of the Queens County Prison on behalf of my Kew Gardens and Forest Hills Neighbors.

Closing Rikers Island and putting dangerous inmates in local communities is a bad idea. There is nothing beneficial to the Kew Gardens Community. Quality of life and neighborhood safety has decreased since the introduction of the Homeless Shelter on Queens Blvd. Do not further destroy our community (or any of the other boroughs) by placing a local jail in the neighborhood. If you want the value of the neighborhood to increase, don't devalue it with a jail.

Thank you.

"

RainbowDee

rainbowdee@verizon.net

"To all those with plans to install a 29 story Jail in Kew Gardens

WE DON'T WANT THIS -stop wasting tax dollars

Replace the incompetents that cannot manage , renovate or reform Rikers –

Our borough president did not even care enough to attend the meeting – what are we paying for

The corrections department cannot run one facility effectively; managing additional locations is just extending the problem to the new facilities without addressing the causes

The poor ADMINISTRATION - must be replaced by people who KNOW what to do and how to clean up the mess

Stop the mandatory overtime for corrections officers so exhausted they cannot function effectively

Stop destroying Kew Gardens causing property values to go down as more homeless are already suturing this small community and neighboring communities

We need better government and administrators –that have integrity and care about this community

We have lost UPS, Hot and Crusty and other stores already leaving the area – please have a conscience and STOP this

Stop wasting our tax dollars that just rebuilt the municipal parking lot- in Kew Gardens -stop prioritizing the inmates of Rikers over the residents of our community

Joshua L

joshual78@hotmail.com

"To Howard Judd Fielder,

This email is voice my displeasure of the proposed jail in Kew Gardens. It's bad enough we have to deal with the homeless shelter that recently opened. I do not enjoy walking by 82nd Ave to see homeless individuals smoking marijuana and consuming alcohol on the steps of the closed diner. This problem will multiply if the jail opens. Also, why would you build a jail in close proximity to a public school? This proposal shows that you do not care about the safety of children and other members of this community. I can keep on ranting about why this is a bad idea, but many others already feel they way I do, so you will hear it from them as well.

Joshua

Andrew Julia

andrewtjulia@gmail.com

"Good Morning,

I am writing to you as a very concerned resident of Kew Gardens. The proposed jail is an absolute monstrosity in the middle of a quiet, residential, family-filled community. To even suggest placing a jail a few blocks from a school is ridiculous. As I am sure city official are aware, the public transportation and parking in the Kew Gardens area is already extremely congested. In addition, the utilities in our area are subject to constant blackouts and shortages. I am not sure how the utilities can possibly handle this additional strain.

Rikers Island is the perfect place for a jail - it is isolated. I cannot possibly imagine (without corruption involved) as to why the city would spend billions of taxpayers dollars building new prisons instead of simply renovating and re-organizing the current prison on Rikers Island. Any corrupt practices on Rikers Island will be the same in any prison regardless of the location. This ""fix"" will not fix anything besides allowing builders to place multi-million dollar condos on Rikers Island. Some argue that it will allow easier access to prisoners by families and friends - and I say prisoners are in jail for a reason and we should not inconvenience law-abiding citizens for the convenience of criminals and their families.

Please put an end to this shameful proposal that Mayor DeBlasio is forcing on NYC residents.

Thank you for your time.

Regards,

Andrew Julia

"

drewkallu@gmail.com

drewkallu@gmail.com

"Dear Mr. Fielder:

I am a new owner of a unit in Silver Towers. I am writing to express my concerns regarding the creation of a jail at 126-02 82nd Avenue as proposed in the Office of the Mayor's brochure entitled "Beyond Rikers - Towards a Borough-Based Jail System".

As a single, immigrant female, who saved her hard earnings and decided to buy property in the neighborhood of Kew Gardens, the prospect of a jail across the street is a dire concern. Kew Gardens is a safe, middle-class, up and coming neighborhood. The building of a jail will not only significantly diminish the value of the neighborhood property, but the culture as well.

This prospect has shattered what this neighborhood means to me. Supporters of the creation of this jail will not be walking me home at night and making sure the atmosphere that this jail will create does not creep into my life.

By supporting the creation of this jail you are sending a message to law abiding citizens, that no matter what you do and how hard you work, in the end it is not enough.

I am asking you to please not let this jail be built in my neighborhood, not only as a home owner, but as a female who values her safety and community.

Regards,
Drew Kallu

"As a lifelong downtown New Yorker, I am opposed to locating a new jail at this address or anywhere in the surrounding area. The Chinatown area needs to be protected and enhanced with other amenities, not a jail.

Reopen Park Row, address affordable housing and rents, put in new public park space!! Those are the priorities.

Thanks.

"

Shahnawaz Khan

shahnawaz81@hotmail.com

"Dear Mr. Fielder,

I reside in Kew Gardens with my family that includes young children.

I am writing to voice my disapproval of the proposal to build a jail facility in our neighborhood.

Far from improving the quality of life in the neighborhood, it will lead to more traffic congestion and deterioration of the overall law and order situation.

The solution to the problems at Rikers jails cannot be to build jails in heavily residential neighborhoods like Kew Gardens but to examine what is wrong at Rikers and build/improve new facilities (as required) on Rikers Island itself.

I hope my voice (like thousands of others) is heard and this proposal is discarded and a new solution considered.

Thanks,
Shahnawaz

"

Seth Klempner

jumako1111@gmail.com

"I have lived in Kew Gardens for 44 years and this is the most assinine ""plot"" ever to disrupt the lives of the residents living in the area. Has anyone done a study of the transportation problems we have here? Has anyone taken note of the overcrowded subway station at Union Turnpike? Do you really think we can handle more ""visitors"" and ""families"" of those who will be incarcerated there? What about the location of schools just blocks from this this monstrosity?

I for one TOTALLY OPPOSE THIS FOOLHARDY PLAN!

June. M. Kolb

"

Rhonda Kontner

rhondakontner@gmail.com

"I am writing to express my feelings about the closing of the Riker's Island and the relocation of a smaller? facility adjacent to borough hall. I think this a bad idea and the relocation in Kew Gardens is also a bad idea since that is not a place that can accommodate such a facility and they want to put retail stores in the bottom of that facility. Who do you think is going there to shop? The new parking facility was just completed and now it is my understanding that will be incorporated into the facility. All those years with no place to park over there and now that there is a new parking lot, you want to take that way. I think the entire thing is a bad idea.

Rhonda Kontner
President, Royal ranch Association

"

Deekron

deekron@gmail.com

"Dear Mr. Fiedler

I have been living in the Forest Hills / Kew Gardens area for nearly 20 years now.

First in Forest Hills, and now I live in Kew Gardens directly in front of the Queen Criminal Court, proposed site for the Queens Jail.

Anyone who know the FH/KG area will agree that theses neighborhoods are precious.

Unfortunately, there are has bee a decline in the quality of the people coming to these neighborhoods. Especially in Kew Gardens, where a proposed hotel has now been converted to a residence for homeless men.

Adding a jail to Kew Gardens will make things much, much worse in this regard. It's bad enough we have convicts coming in and out of the area daily to go to court appearances in the Queens criminal court, going to bail bonds offices, etc.

Creating a jail will bring the wrong element to an otherwise peaceful and beautiful neighborhood, plummet our property values and, no to mention, create congestion, noise, littering, loitering, etc.

For these reasons, I implore to please place said jail in a less populate or less elegant part of Queens where the neighborhood will not suffer like we will with a jail in our backyard.

Thank you.

Regards,

Deekron Krikorian

"

Nish Kumar

nishkumar03@gmail.com

"We recently moved to the Kew Gardens neighborhood after living in Manhattan for several years. We chose to pay the very expensive price to purchase a home in this area in order to leave the hustle and bustle of Manhattan yet remain in New York City. When we moved to the area, we were reminded of the relative peace and safety of the neighborhood and were made aware of the high quality resources we would have available to us as a young family looking to have children. In particular, we were made aware the high quality school system and the low crime rate.

Moving forward to today, we are about 4 weeks away from having our first child. The idea of putting a Jail in the very community that was marketed to us as safe and a good place to raise a family completely undermines the those notions. It is appalling that local legislatures can even consider putting a jail so close to schools and residences with no consideration for the safety of those in the community to promote their own political agenda. Putting their own public motive ahead of public safety is truly a lack of good judgment and true step in leading to the demise of a high quality family oriented community.

We strongly oppose the Kew Gardens Jail project and will take whatever necessary action against this jail becoming operational. This project will drive good hard working taxpayers out of the area, including ourselves.

I would be happy to discuss this matter in more detail. Don't hesitate to call me if you have questions.

lawrenceofarabia12@yahoo.com

"To close one Riker Jail and create four new ones, in four boroughs, is the definition of insanity.

Instead, correct the present day Rikers Jail , Correction Depart. Procedures, and facilities, with necessary funds.

Professional management advice ,without political consideration, is what is needed.

Do not create four new large jails with no good reasonable objective , doing nothing but causing NEGATIVE repercussions in their respective communities.

Again,this endeavor is the very definition of INSANITY.

"

Barry Lewis

bstplewis@aol.com

"attention Howard FIEDLER

The proposed jail in Kew Gardens adjacent to the Criminal Courthouse, like the previous smaller jail, sits in an area that in several ways is perfect for any escapee to hide at night from overhead searchlight teams.

A block away is maple grove cemetery, obvious as a hiding place. Next to the prison is the van wyck expressway & the kew gardens interchange, built in a natural valley, & below the surrounding hilly residential districts where it's easy to hide from overhead searchlights; anyone making their way thru the interchange, can access flushing meadow park, another obvious place for a prisoner on-the-run.

Plus, the neighborhood's dense tree coverage gives any escapee other routes as well which is the reason the helicopters linger so long over our immediate area.

Riker's is surrounded by water and there still have been escapes or attempts. The new prison in Kew Gardens is set in a field of escape routes perfect for anyone on the run to find cover, especially at night. The decision to build the prison is condemning the neighborhood to constant noise and disruption from prison-related activities. We had those disruptions constantly when the old smaller jail was in use; a large jail means simply a large prison population and bigger problems to the immediate residential area.

I'm saying 'no' to giving us a 28 story prison that will define our skyline and give us problems both day and especially at night.

"

Barry Lewis

bstplewis@aol.com

"to the powers that be:

i'm a resident of Kew Gardens for 48 years. i lived with the previous jail, a much smaller one, that was attached to the Criminal Courthouse. When that jail existed, the number of times our neighborhood was subjected to constant helicopter searches for escaped prisoners or other jail-related matters was unconscionable. the constant din of a basically stationary helicopter sending its searchlight into the neighborhood could happen day or night.

this is exacerbated by the presence of Maple Grove Cemetery only 2 blocks from the prison site; a nearby cemetery is the perfect place for an escapee to hide.

we have a school, PS 99, only 3 blocks from the prison site, we have one of the most cohesive communities in the 5 boros and because it's Queens the population is beyond diversified.

but you want to give all of us an equal opportunity to a dimmer future by having our skyline dominated by a local 'sing sing' & helicopters, sirens & potential escapees a constant fact of our community.

this is not acceptable.

regards,
barry lewis

Seth Lissak

sethlissak@gmail.com

"To whom it may concern:

I was at the meeting back in September on the expansion of the BDC.
While I agree with the closing of Rikers, the expansion of the BDC 4x is not the solution.
I have lived near the BDC since 2001; I have seen it grow and prosper.
So, now you want to have the largest building around be a jail?
I do not think this is the prudent way to fix the issue.

I am happy to discuss alternative solutions.

Your proposal is not something I have heard anyone in the community agree with.

Regards,
Seth Lissak

"

Sandeep Mahale

smahale1@gmail.com

"Dear Planning Committee,

I am all for Prison Reform. I support fairness, and I welcome new ideas.

However, I have strong concerns about moving any Corrections Facility right in the middle of a residential community. Here I choose to speak about the Kew Gardens location:

1) There are probably going to be some child abusers among the inmate population. There are a few schools in close vicinity of the proposed site. When the inmates are released, their first contact is with the Kew Gardens community, and these schools just a few blocks away.

2) There was a foot bridge built very recently over Van Wyck Expressway. This bridge is essential for the residents living behind the Courthouse. It saves 10 minutes each way for thousands of commuters everyday. This bridge was newly built, and soon thereafter closed most probably to accommodate the proposed Jail facility (as one of the roads is going to be decommissioned) .

Is it fair to penalize existing residents, thousands of them?

3) The existing Courthouse itself creates a lot of issues for residents of Kew gardens. Just walk on the stretch of Queens Blvd on the opposite side of the Court Houses. This is where most of the visitors trash the place. We the residents strive to keep our streets clean. We want to live in a residential neighborhood. We chose this place away from the hustle bustle of city to make it our home. Please let this stay a residential neighborhood. If you want a borough based jail, please look for a place that is non-residential.

A facility of this magnitude would be a huge overload on the already congested Kew Gardens. The visitors of the inmates would add to the chaos and trash the place even more. Even today, there are so many bail bond offices, and the people that hang around them are not you would want next to your homes. At night, my wife refuses to go out alone. Not saying they are criminals, but you don't want them right next to your homes.

Please consider keeping the jails in non-residential areas.

Thank you,

Sandeep

"Dear Mr. Fiedler,

How are you doing, sir?

This is the first time I am ever writing to a City Official. I am really concerned about a jail with 1500 inmates coming into my neighborhood.

Many years ago, when there was a small jail operational at Kew Gardens, we did have increased incidents of car thefts and vandalism. When some of the inmates get released on Bail-bond, they are not as respectful towards the community they first get in contact with.

No matter how secure and modern the building and facilities are, there will always be that exposure to the inmates (at least some of them could be real bad guys), once they are released on bail.

Would you live right next to a jail?

My wife wants to move from Kew Gardens. I am sure there are many other families considering moving out. This jail will destroy a neighborhood.

Another big concern is there are many schools close by. At least a few inmates could be potential child abusers.

I am not as concerned about traffic and parking ... those are much smaller issues, and I can live with those.

However I can't force my wife to ""think"", a Jail in the backyard is just fine.
I beg you to please reconsider the decision to house a jail in a residential community.

Thank you!
Sam

"

Amanda Mohamed

amanda.mohamed@zurich.com

"To all,

Please adhere to the community voices to oppose this proposed 29 story Kew Gardens jail that will hold 5,000 to 6,000 inmates.

This is not the right location for this establishment being proposed.

As a community that is already having a hard time with various situations such as; increase crime – we as upholding citizens DO NOT need more stress in our neighborhoods.

Please listen to the voices of the people and NOT proceed with building a jail.

Thank you in advance.

Concern Citizen and Neighbor.

Many thanks,

Amanda

"Dear Mr. Howard Fiedler,

I am a long time resident of Kew Gardens, and I am writing to express by grave concern with the proposed "neighborhood jail." The lack of communication among our elected officials, the disregard for engaging community and civic organizations, the indifference toward community safety, the failure to evaluate infrastructure capacity, the wanton spending, etc. This mega project has the potential to become a catastrophic failure by every measure.

I would never claim to be an expert in law enforcement or inmate treatment, and while the stories regarding Rikers Island sound tragic, I do not understand how building new jails in neighborhoods solves those problems. Even if new jails need to replace outdated old structures, it would seem obvious to use existing land that has served that purpose for almost a century. Furthermore, the money saved by rebuilding on Rikers could be put to better use for officer training, additional staff, education for inmates, etc., which appear to be the root source of many problems.

Is it unrealistic for residents to be concerned with a 1,500 bed mega jail next door to schools, kindergarten, day-care facilities, etc.? Has there been any analysis of the strain this will put on our existing infrastructure, where it takes 25-30 minutes to drive 2-3 miles because Kew Gardens lies at the cross roads of so many highways with its local narrow streets? Have any other properties been considered, especially near JFK? Has anyone seen the existing unsightly bail bond offices and police equipment stores on Queens Blvd? Do the supporters of this project really believe that new restaurants and other businesses will open and benefit this neighborhood? The answer to all of those questions is, sadly, no. This proposed jail would be the biggest building in the area and would completely overwhelm our community by any dimension.

Residents are expected to believe that a new structure will somehow solve our jail system problems, but instead, all we see is a not-so-secret real estate deal of epic proportions, perpetrated by an inner-circle of politicians, and based on commission findings that defy logic. This is a sham, and makes a mockery of our democratic process. I strongly oppose this plan, I will fight this, and I am not alone.

Kris Monaco

"

Howard Fiedler,

Invest in at-risk, low-income communities to combat poverty and class stratification. The current proposal, to build new jails, is anathema to progressive political action. Do not posture as a liberal politician while perpetuating systemic oppression of minority and marginalized groups. There remains time to do the right thing and make better use of such a monetary outlay. Make the right choice; it is the moral imperative.

If you find yourself bereft of investment ideas that do not involve institutions of incarceration, I urge you to work directly with community organizers and grassroots organizations that live and serve the most effected areas.

Thank you.

YONATAN Nadelman

nadeastern@gmail.com

"Dear Howard J. Fiedler, AIA, Director of Design Unit, NYC Department of Correction,

Please realize that Kew Gardens is a vibrant neighborhood and is not the place for any correctional facility of any kind.

Rikers island is clearly and without questions the place for the city to expand its existing DOC to whatever size they need. Existing problems of the DOC need to be addressed and fixed from within its administration and organization. Moving it to Kew Gardens is not a magical fix. If they need to arrive earlier at the courts they need to be responsible and leave earlier like every other responsible person. Overwhelming Kew Gardens with the DOC's irresponsible plan will choak and destroy a vibrant community.

Kew Gardens needs more cultural and recreational facilities, and retain its friendly skyline. Please don't let us be destroyed due to foolish unnecessary and irresponsible planning.

Thank you,

-Yonatan Nadelman

"

Tanya Nguyen

tanya@blackandpink.org

"Dear Mr. Fiedler,

My name is Tanya, and I am a resident of East Harlem in Manhattan. I am writing as your concerned constituent. I believe the Mayor's plan for new borough-based jails would only result in more punishment, imprisonment, and criminalization of our community members, which often happens in deeply racist, classist, and ableist ways.

I call on you and all our Council Members to instead work for a plan to invest in community-building resources such as housing, education, health and mental health care, and social services. I call on you to close Rikers without expanding or constructing jails in New York. Reject the Mayor's proposal.

Sincerely,
Tanya Nguyen

Paglia, Tom

tpaglia@ncpdirectsourcing.com

"To whom it may concern,

This proposal as with all others by politicians are a farce - it is only about money and power.

The rhetoric gets too absurd to follow and believe but this is always how they prevail. We as a people in this city, this state, this country need to come together and work together to benefit all. Not the Left - Not the right.

Look around at what is transpiring now and our country is ill - Again - Not the left - Not the right.

The way we are all going now is not going to end well and I would hope clear heads prevail. Unfortunately, I do not see that on the horizon.

The Atlantic City Jail Facility is just a minute part of a much greater problem we as Americans are all facing now.

Good Luck to us all - I can only pray.

Tom Paglia

"

Alfredo Parraga

parragaphoto@aol.com

"I have lived in this neighborhood for over 40 years, is a beautiful and quiet area, what are these politicians

Trying to do, turning the area into a dump? Is this fair ? I don't think so. And I am sure must of the residents

Here feel the same way I do. Please stop this project, you are chasing us out of here, what a sham
"

Katherine Pena

katmariapena@gmail.com

"Good Afternoon,

My name is Kat Peña, my fiancé Ashley and I have now been living in Kew Gardens for over a year. Within the past year, the neighborhood and community that we were introduced to has been slowly deteriorating. Aside from safety concerns and our evening commutes being significantly more anxiety-ridden, after the homeless housing plan at the Comfort Inn on 82nd Road. Now, we have learned that the next negative changes to our beloved neighborhood is the creation of the jail at 126-02 82nd Avenue.

I ask that you listen to the residences' voice. I ask that you please understand what this means to the changes in our community. The neighborhood is rising in crime, discomfort, and living experience. We have thoroughly enjoyed our community, it is a melting pot of people and experiences. There are bountiful restaurants, shops, and beautiful neighborhoods and houses beyond Queens Blvd. However, just last Monday the 15, in front of the Queens County Criminal Court House, I spent the day at home due to a severe virus, I was woken up with argumentative yells and screams coming from in front of the court house. During this, about 10 police officers walked out to make sure the scene did not escalate. The unfortunate thing is that this was NOT the first occurrence of such a situation. We are constantly being bombarded with uncomfortable situations beyond what a neighborhood like ours should experience. There are constant panhandlers now on the corner of both Union Turnpike and 82nd Ave. The streets at night must be walked with caution as there are always panhandlers and homeless citizens. It is very unfortunate that a neighborhood which once felt safe and secure at any hour is no longer.

Please listen to the voices of your community and take serious consideration into our opposition of the building of the jail. I can personally and honestly say that if that jail is built, I am not one of the only residences with plans to evacuate the area.

Thank you for your time,

Kat Peña

"

Sydney Pickman

sydneyppickman@gmail.com

"Good afternoon,

I was at the public hearing in Queens on 9/26 regarding the plans for the community based detention center. I have a few questions I'd love to have answered:

What if there isn't enough room in the community based centers for all the inmates that are at Rykers Island at the time the centers open?

All the statistics provided at the public hearing reflect a time when Rykers Island was open, how do they know these statistics won't change?

Have they considered the fact that there is a homeless shelter less than 2 blocks away from the proposed detention center in Queens?

There was a statistic provided that property value went up in one area where this has been done, how do you know that that has anything to do with the detention center and not other factors?

How much will this cost taxpayers?

Staten Island: the hardest borough to leave isn't getting a community based center. Why is that?

Thank you for your time,
Sydney Pickman

"

To Whom It May Concern,

I would like to reach out in protest of the new plans for the Brooklyn Jail (on Atlantic Ave) and the overall size and scale of the four purposed jails. The idea of moving hardened criminals to a residential area which has been growing exponentially makes no sense at all. The plans which the city outlined are halfhearted and seem to have not been planned at all. There are three fatal flaws with the plans.

* The 40 story monster of a prison which will take up 1.5 million square feet is a joke. The area is growing tremendously and there are young children all over the place. This large of a prison will fundamentally change an area which is being gentrified. The City including Mr. DeBlasio fight against real progress and have protested building housing which would enable growth and instead are catering to people who should not be first priority. Thought the idea was to go to "smaller jails" – not large monument/hotels for the world's worst. It is really laughable.

* The area around the jail is currently plagued by issues from the current jail and will only get worse if a larger jail is built. We live right across the street and have the unique ability to see into the prison, hear all the commotion and live through some of the heart ache. Currently there is noise throughout the night and gangsters and drug addicts in the area acting like zombies after being released. We even have people who beg for money and come into our lobby asking for central booking. Don't understand how leaders in the City believe that adding more criminals who are actually worse to a residential neighborhood makes any sense. This will put peoples lives in danger - there needs to be more cleanup in the area and not more dirt.

* The plan does not solve the problem – this is a larger jail which will cause more issues than it will solve.

As stated – we live right across the street and are ready to file a class action lawsuit against the City if the plan moves ahead.

"

Rahner, Joseph John (US - New York)

jrahner@deloitte.com

"To Whom it May Concern,

I wanted to reach out to formally protest the expansions of the Brooklyn Detention Center (275 Atlantic Avenue) as part of the planned shutdown of Rikers Island. The Cities plan to optimize the jail system and correct the issues which currently exist is well intentioned but is designed without proper thought, does not serve the outlined purpose and puts Brooklyn community members at risk. The idea of the original study was to transform the judicial system and move to a model with smaller more efficient prisons – however this is exactly the opposite of the proposed plan.

I currently own a condominium at 53 Boerum Place and have a direct view into the existing Brooklyn House of Detention. The building at around 200,000 square feet, is an eyesore but not intrusive part of the Boerum Hill/ Downtown Brooklyn architecture. It is a very loud neighbor as you can hear prisoners at all parts of the night, police stopping by to drop off new detainees and constant DOC traffic in and out of the main gate. The “new jail” at almost 1,500,000 million square feet is the exact opposite of a smaller prison and is will be an extreme waste of funds for the city. Many are saying that new prisons must be built quickly to fix the problem – this another reason why a 40 story behemoth makes little to no sense. Building a monster with all the security needed will take multiple years; where smaller prisons can be built much quicker.

Moving from the existing facility to one which would provide approximately 1,510 beds and be nearly 8x times larger would destroy a thriving neighbor and fill it with thieves, low-lives and pollution. If the city does not rethink the scale and scope of this project, I will gather the other 98 members of my condo board and will move to file a class action lawsuit (citing damage due to construction, depreciated value, tenant safety, and other inefficiencies).

Sincerely,

Joe Rahner

Aaron Reichel

reichelaa@aol.com

"

Dear City Officials,

You know all the reasons, of course, why it would be criminal (ironically) to build a huge jail in an already overcrowded residential area like ours in Kew Gardens. We were not warned of this when we moved in, and it would be punishing all of us unfairly after we have dug our roots in this neighborhood.

Very truly yours,
Aaron Reichel

"

Anne Renda

annerenda@mac.com

"Dear Mr Fiedler,

After my message to you yesterday, I read this article about teens at Horizon:
<https://www.nytimes.com/2018/10/03/nyregion/rikers-island-teenagers-horizon.html?emc=edit_th_181004&nl=todaysheadlines&nlid=805794411004>
https://www.nytimes.com/2018/10/03/nyregion/rikers-island-teenagers-horizon.html?emc=edit_th_181004&nl=todaysheadlines&nlid=805794411004
I think it proves my point.

I started researching a little about rehabilitation and found ACS already has programs
I have to suppose they are not working or they would have been upheld as plans for the new
Real Estate deal:

<https://www1.nyc.gov/site/acs/justice/limited-secure-placement.page>
and
<https://www1.nyc.gov/site/acs/justice/close-home.page>

More information on caring about solutions over Real Estate deals:
<https://www.nytimes.com/2018/09/28/nyregion/nyc-teenagers-rikers-island.html?action=click>
<<https://www.nytimes.com/2018/09/28/nyregion/nyc-teenagers-rikers-island.html?action=click&module=RelatedCoverage&pgtype=Article®ion=Footer>>
&module=RelatedCoverage&pgtype=Article®ion=Footer

Hoping you can use this information to help rehabilitation efforts over Real Estate deals! No,
Jails don't work
but they can using updated techniques. I think CO's do their best but need different and better
training.

Hoping you can help make this help everyone. Big buildings and housing more criminals in one
building are not the solution to rehabilitation - as the above article shares.

Anne Renda

"

Anne Renda

annerenda@mac.com

"Dear Mr Fiedler,

It seems none of the residents attending the meetings (mine in Brooklyn) were interested in these Real Estate plans that ignore all families with members needing rehabilitation - especially those in Staten Island. ""Build It a They Will Come"" is not the way to address rehabilitation. It does open lots

of political doors and affiliations for donations but rehabilitation was not on the agenda. If having families visit their members in jail, the numbers and sites have to be smaller and more spread out. Imagine a poverty family with elders getting from their home to the ferry then to the subway and then to the jail - how long and expensive a trip would that be? Even in Brooklyn as trains and construction have made downtown Brooklyn a maze of backups families will have travel difficulties - and retail on the bottom floor - what kind of mean joke is that?

Although there were meetings they were not very well advertised and no one I have spoken with even heard about them or this plan. Let's get on board with rehabilitation trials and see their success before building an opportunity for worse experiences that lead to more violence instead of rehabilitation. A building will not rehabilitate! As a Human Services Administrator in Public School/Social Worker/School Counselor with experience in an Alternatives to Incarceration program, I believe it is imperative to explore and research trial scenarios with Sociologists before building a failure used for Political/Real Estate affiliations!

Anne Renda

"Dear Mr. Fiedler,

My name is Sonali Sen Sharma and I am a resident of Bed-Stuy. I am very concerned with the Mayor's plan for four new borough based jails as this would result in more imprisonment and criminalization of our community members. Investments must be made in life affirming resources such as housing, education, health and mental health care, and social services. I call on you, and all our Council Members, to work towards closing Rikers without building or expanding any jails in neighborhoods across New York and to firmly reject the Mayor's proposal.

"

msrs20@aol.com

msrs20@aol.com

"Dear Governor Cuomo,

Kew Gardens is a small residential neighborhood which already supports ""people in need."" A few years ago, a homeless shelter for families was built behind the existing courthouse in Briarwood. Last year a hotel was built off Queens Blvd. and was immediately turned into a shelter for homeless men. The Criminal Courthouse has been here for many years and I've witness people being escorted through my building in handcuffs on their way to bail bondsmen.

Where do our civic duties end and our rights to live in a safe environment begin?

Walking alone from the Kew Gardens/Union St. subway at 10:00 PM, after a night at the theater, is scary and stressful. On Tuesday evening, I walked in the gutter to avoid being confronted by a stranger. As my luck would have it, one homeless person person called out to me. Though I was not touched, I breathed a sigh of relief as I entered my apartment building.

Where are my rights?

Building a jail in Kew Gardens will destroy this neighborhood. Is that your intention?

Sincerely,
Roberta Shwide

"

Alfredo Soto

info@email.actionnetwork.org

"

Howard Fiedler,

We do not need more jails. We need projects that help keep our future generations from ending up in Jail. Individuals in Jail ended up there, because their choices and environment enabled risky behavior. When people find themselves struggling to keep food in their belly and a roof over their head, we can't be shocked when they begin engaging in risky alternatives to meet their needs. This living scenario becomes more and more prominent as the cost of living in NYC persistently increases without wages compensating for those increases. What we need to see 10 billion dollars funding are programs that address the issues mentioned from different angles. Increase funding for tuition assistance and work study programs. Invest more into our public schools. Partner with non-profit organizations to establish programs that will help people getting out of Jail acquire skill sets they need for the changing professional landscape. AI is coming and lots of jobs that are readily attainable now have a strong chance of disappearing in the next 10-15 years in favor of automation. Invest in improving conditions in our current prison system. Expand the facilities of our current prisons instead of building brand new ones that would cost more. Invest in staff that will facilitate and improve the rehabilitative process for inmates that yield tangible results. These are human beings whose lives were derailed, because the intermingling of their unforgiving environment and choices propelled them toward prison. Invest in monitoring the integrity of our institutions, collaborate with our unions to protect our workers rights that often get stomped on by their employers. Invest in more secure voting systems and protect our residents voting rights. There so many reports of residents being purged from voter registrations who have been a resident of NYC for decades. These issues are constantly discussed in the media. These are issues that are important to citizens. Do we hear citizens crying out for a brand new prison? I don't think so. Spending on a new prison is just wasting our tax dollars.

Gia Tran

giabtran@verizon.net

"Dear Mr. Fiedler,

I, Gia Tran, is a resident of Queens and currently reside at 124-10 Queens Blvd, Kew Gardens, NY 11415. I live directly across the street from where the proposed borough-based jail in Queens is planned to be built.

I vehemently oppose the building of the Queens jail for the following reasons:

1. The jail will dramatically increase the amount of transient traffic in the neighborhood.
2. The jail will cause the neighborhood streets unsafe as well as increasing amount of auto vandalism and mugging in the area.
3. The safety of residents and the property values in the neighborhood will be at stake. Except for the commercial strip on Queens Blvd, this area is primarily a residential neighborhood which also houses a large public school population.

The prisoners should be kept on Riker Island isolated from the general public.

Sincerely,

Gia Tran

"

Hannah Walsh

walshannah@gmail.com

"Dear Department of Corrections and Borough Planning offices,

I am writing to you as a resident of Astoria, Queens. Unfortunately I will be unable to attend the town hall meeting in Queens tonight, so I am submitting a written comment to you. I am writing to SUPPORT the closing of all Rikers detention facilities and OPPOSE the opening of any new jails in New York City (including Queens, Manhattan, the Bronx, and Brooklyn).

Rikers is not being closed solely on the basis of its dilapidated facilities and toxic threat to the health of the people who are caged there. It is also being closed for rampant human rights violations, including solitary confinement and other forms of torture, sexual abuse of the people held there, lack of access to medical care, hygiene and basic human dignity, to name a few. These atrocious abuses go much deeper than the physical four walls of the prison, so they will not be fixed by moving the people currently detained to new facilities, nor will they disappear when more people are jailed in newer, larger facilities.

I ask you as a resident and neighbor to the persons currently incarcerated that you redirect these funds for jails to affordable housing, health and education services, and other forms community investment they and their families ask for. Rikers is an abusive, dangerous institution that must be closed. More prisons will not make our communities safer; in fact, they will cause more harm.

Please CLOSE RIKERS and DO NOT OPEN ANY NEW JAILS.

Sincerely,

Hannah Walsh

Astoria, New York

Re: Talbot Gardens Condominium
83-09 Talbot Street
Kew Gardens, NY 11415

To Whom It May Concern:

Our office represents the management company for Talbot Gardens Condominium.

Enclosed with this letter, please find the list of signatures gathered by the residents at Talbot Gardens Condominium. Please be advised that we oppose and are concerned with the proposed project to build a jail in Kew Gardens.

Feel free to contact me should you have any questions or concerns. I can be reached 516-504-9538 or email me at andy.falkin@brgny.com.

Respectfully,

A handwritten signature in black ink, appearing to be 'Andy Falkin', written over a horizontal line.

Re: **Community Meeting to Discuss 29 Story Jail to be
built in Kew Gardens**

Dear Residents:

A group of Kew Gardens civic activists attended a meeting organized on September 21st by Councilwoman Karen Koslowitz with City Hall representatives to discuss the plan to close Rikers Island and construct 4 jails in the boroughs including a 29 story jail complex behind the Courthouse on Queens Boulevard.

This was the first meeting that the City jail planners had with any community group in Queens to discuss the project and the impact on the surrounding community.

On **Wednesday September 26, 2018 at 6PM**, the City will be holding a public hearing at Queens Borough Hall on Queens Boulevard, to present the plan to close the Rikers Island jail and the plan to build a massive jail facility in Kew Gardens.

We urge you to come out in force to protest the lack of transparency in this process and let our elected officials know that we do not want this development in our community and **THAT THIS IS NOT A DONE DEAL.**

Respectfully,

BRG Management

Stop Mayor De Blasio's Plan to Build a New Jail in the South Bronx

2,445 have signed. Let's get to 2,500!

South Bronx Coalition started this petition to **Mayor of New York City Mayor Bill de Blasio** and 5 others

We, the residents of the South Bronx, call on all people of conscience to stand with us in strong opposition to the mayor's proposal to build a new jail in the Mott Haven neighborhood at a site vital to implementing the community-driven [Diego Beekman Neighborhood Development Plan](#).

On February 14, 2018, Mayor De Blasio revealed a plan to speed up the closing of Rikers Island by transferring those incarcerated into existing (retrofitted) facilities in Manhattan, Brooklyn and Queens, bypassing Staten Island altogether, and building a new jail in a South Bronx community still reeling from decades of disinvestment, destabilization and the resulting fallout, and where two other jails already exist. The proposed site at 320 Concord Avenue – steps from three schools, homeowners, and the 38-building Diego Beekman housing complex – has already been earmarked for years by the community as the central piece of its Neighborhood Development Plan for affordable housing, community centers and living wage jobs. Building on 22 years of community organizing, the Neighborhood Plan was developed in consultation with residents, organizations, agencies and elected officials, none of whom were consulted about the mayor's new jail proposal. The area already has one of the highest and most unequal concentrations of homeless shelters, methadone clinics, power plants and waste transfer stations in the city. With some of the highest rates of poverty and unemployment nationwide, the Mott Haven community is in crisis, and any tax dollar investments must be in (long-ignored) social, educational and economic opportunities for the community – not a jail.

We applaud the city's plan to close Rikers Island, but the answer is not to expand the criminal justice footprint – not in the South Bronx, not anywhere – when over the last 25 years, the city's jail population has fallen from a high of 21,674 in 1991 to under 9,000 earlier this year through a combination of falling crime rates and criminal justice reforms. Our opposition to a new jail is in no way a rejection of the people caught up in the system. We desire fairer, swifter, and more humane forms of justice for incarcerated families. We challenge the city to further reduce the number of people in jail through a combination of bail reform, decriminalization of minor offenses, and more restorative ways to deal with crime that would make the construction of a new facility unnecessary. With more than 2.3 million people imprisoned across the US, mass incarceration is the greatest moral and racial injustice of our time. We need bold investments in people, not prisons.

Now therefore, please join us in our fight, stand in solidarity with us and demand that our Mott Haven community receives the revitalization plan it designed, developed and deserves.

For more information about this campaign, send us an email at southbronxcoalition@gmail.com.

...

[Mon, Oct 1, Noon \(Rally\) & Wed, Oct 3, 6:00 PM \(Public Hearing\) | Stop the Proposed Mott Haven Jail!](#)

[Dear Friend,](#)

[This week is a big one in our fight against a jail in Mott Haven.](#)

Mon, Oct 1, 12:00 Noon -- on Monday, October 1st, [Justice for the Bronx](#) will host a rally outside of Council Member Diana Ayala's office to protest her continued support of this unjust jail. Join us at 12:00 noon at 214 St. Ann's Avenue to make sure she hears us loud and clear. And [share this Facebook invite](#) to spread the word.

Wed, Oct 3, 6:00 PM -- On Wednesday, October 3rd, there is a public hearing on the jail plan at 6 PM at the Bronx County Courthouse. This is our big chance to demonstrate the strength of our coalition. Please attend and spread the word.

[Our coalition against the jail already has strong support from elected officials](#), local groups and citywide organizations. Now we need to keep the momentum going.

I do not support jail expansion in New York City and the Department of Correction must shut down Rikers Island without wasting millions of dollars in public resources on new jails that will only exist to imprison the people in my community.

Sincerely,

Re: Talbot Gardens Condominium
83-09 Talbot Street
Kew Gardens, NY 11415

To Whom It May Concern:

Our office represents the management company for Talbot Gardens Condominium.

Enclosed with this letter, please find the list of signatures gathered by the residents at Talbot Gardens Condominium. Please be advised that we oppose and are concerned with the proposed project to build a jail in Kew Gardens.

Feel free to contact me should you have any questions or concerns. I can be reached 516-504-9538 or email me at andy.falkin@brgny.com.

Respectfully,

A handwritten signature in dark ink, appearing to read 'Andy Falkin', is written over a faint, stylized graphic element that resembles a large, abstract letter 'A' or a signature flourish.

Re: **Community Meeting to Discuss 29 Story Jail to be
built in Kew Gardens**

Dear Residents:

A group of Kew Gardens civic activists attended a meeting organized on September 21st by Councilwoman Karen Koslowitz with City Hall representatives to discuss the plan to close Rikers Island and construct 4 jails in the boroughs including a 29 story jail complex behind the Courthouse on Queens Boulevard.

This was the first meeting that the City jail planners had with any community group in Queens to discuss the project and the impact on the surrounding community.

On **Wednesday September 26, 2018 at 6PM**, the City will be holding a public hearing at Queens Borough Hall on Queens Boulevard, to present the plan to close the Rikers Island jail and the plan to build a massive jail facility in Kew Gardens.

We urge you to come out in force to protest the lack of transparency in this process and let our elected officials know that we do not want this development in our community and **THAT THIS IS NOT A DONE DEAL.**

Respectfully,

BRG Management

Letter from Mayor Bill de Blasio

New York City is at the forefront nationally of both ending mass incarceration and reducing crime. Our criminal justice reforms have resulted in a big city that is one of the safest in the nation and has the lowest rate of incarceration. In order to truly end the harms of mass incarceration, we cannot stop now. This is why we have made it the official policy of the City of New York to close the jails on Rikers Island.

For this administration, simply making the statement that we are going to close down Rikers Island is not enough. New Yorkers deserve a concrete and achievable plan to get the job done. That plan is detailed in this report.

We are not offering a quick fix. Rikers Island cannot be closed overnight. It would be much simpler for us to tell people what they want to hear and say we can achieve this goal quickly and easily, but we won't do that. Instead, we are realistic. It will require the work of many—city and state criminal justice agencies, elected officials, prosecutors, defenders, courts, program providers, New Yorkers and their communities—to ultimately close Rikers Island. This will be a long and difficult path.

The central challenge involved in closing Rikers Island is reducing the number of people in jail to a number that can be safely and effectively accommodated elsewhere. At the beginning of this Administration, it would have been impossible to even conceive of a Rikers population small enough to consider such a change. New Yorkers should be proud that we have already come far enough to contemplate the steps we are now going to take.

Thanks to the hard work of NYPD and communities across the city, we have driven crime down to historic lows. Last year was the safest in the modern recorded history of New York City. Overall crime is down nine percent since 2013. Some of the biggest reductions in the jail population have come from new city investments to ensure that low-risk people do not enter jail, and our efforts to work with every part of the criminal justice system to reduce case delay. These initiatives have come together to bring the city jail population down by 18 percent in just three years.

Today, in a city of 8.5 million people, there are about 9,400 people in custody on any given day in our entire jail system—down from a daily average of over 20,000 in the early 1990s. Of the total jail population only approximately 2,300 can be housed off of Rikers Island with the existing capacity in the Department of Correction's borough facilities. That's why none of this is possible without first reducing the number of people in our jails significantly.

For the first time in history, closing Rikers Island can be and is the official policy of the City of New York.

Under our plan, within five years we will bring the daily number of people in our jails down to 7,000. We will also establish a Justice Implementation Task Force, chaired by Elizabeth Glazer, Director of the Mayor's Office of Criminal Justice and Zachary Carter, Corporation Counsel of the City of New York. This Task Force will bring together all of the entities that affect the size of our jail population—including, the police, prosecutors, defenders, state courts, local and state corrections agencies and service providers—to help us identify and implement strategies that will ultimately reduce the daily jail population to 5,000 people. The Task Force will also examine other issues essential to the creation of a smaller, safer and fairer jail system, including improving safety and opportunity for people inside the jails and designing modern jail facilities that are well integrated into New York City's dense, urban communities. Regular meetings of this Task Force will ensure greater levels of accountability and coordination as we drive towards closure.

Once the jail population reaches 5,000, the City will be in a position to close Rikers Island for good. Doing so will depend on the desires of neighborhoods and their elected officials, as even a jail population of 5,000—significantly smaller than the jail population today—will still require identifying and developing appropriate sites for new jails as well as renovating existing facilities in the boroughs. We are committed to an open, ongoing conversation with New Yorkers and the City Council to work through these issues.

We also have a responsibility to those who are in our jails right now. They cannot afford to wait a decade. Even as we plan the end of Rikers Island we must do all we can to ensure that it is safer and fairer now. That isn't just the right thing to do. It is the smart thing to do. We are confident that upgrading the facilities and offering more and better support for incarcerated people will help us reduce the size of the jail population by curbing recidivism. Better facilities, programming and services will also allow us to provide safer working conditions and more professional development opportunities for corrections officers.

The plan we lay out in this report builds upon the work of many, including the Independent Commission on Closing Rikers Island convened by City Council Speaker Melissa Mark-Viverito and chaired by former Chief Judge of the State of New York Jonathan Lippman. We look forward to partnering with all New Yorkers to achieve the milestones laid out in our roadmap. Closing Rikers Island is an enormous undertaking with profound implications for our future. It is the right thing to do and together we can do it.

Mayor Bill de Blasio
City of New York

Executive Summary

Executive Summary

Our plan is to close Rikers Island and replace it with a smaller network of modern jails.

Our goal is a jail system that is smaller, safer, and fairer—one consistent with the overall criminal justice system we are building in New York City, in which crime continues to fall, the jail population drops significantly, and all New Yorkers are treated with dignity. Our newer system of jails will be focused on helping those incarcerated find a better path in life and maintain access to community supports. And it will ensure that officers have safer places to work and more support.

What follows is a credible path to that goal by continuing to reduce both crime and incarceration and by ensuring that the City’s jails are humane productive places for those who work and are incarcerated there now. Specifically, this report includes 18 concrete strategies that will move the City toward a smaller jail population, safer facilities, and fairer culture inside jails.

This plan will not be easy. Historically, community opposition, land use requirements, and the high cost of acquiring and developing new land have prevented the City from siting new jails or even expanding existing jails. And it will not be fast. We estimate it will take at least a decade. In order to achieve our goal, we must have a jail population that is small enough to be housed safely off-Island. On an average day in 2017, there were approximately 9,400 people incarcerated in city jails with space for just 2,300 of these people in existing facilities in the boroughs. To close Rikers and replace it with a new, smaller network of jails, we will have to continue to bring the jail population down while ensuring that we sustain the City’s historically low crime rate—which is down 76% from 1990.

We believe these obstacles are surmountable with the partnership of many. Through a Justice Implementation Task Force (“Implementation Task Force”), we will ensure the transparent partnership with New Yorkers across the City and with government, including the City Council and the State, required to close Rikers Island for good. The Implementation Task Force will ensure the effective execution of the strategies laid out in this report to ensure a correctional system that is:

This report is a concrete plan to create a correctional system with a smaller jail population, safer facilities, and fairer culture inside.

- **Smaller:** our goal is to reduce the average daily jail population by 25% to 7,000 in the next five years. To achieve this goal, the City will work with every part of the criminal justice system to implement strategies that:
 - Make it easier to pay bail;
 - Expand pre-trial diversion to allow more defendants to wait for trial in the community instead of in jail;
 - Replace short jail sentences with programs that reduce recidivism;
 - Reduce the number of people with behavioral health needs in city jails;
 - Reduce the number of state parole violators in city jails;
 - Reduce the number of women in city jails; and
 - Speed up case processing times.

Fully implementing the strategies in this report to reduce the population to 7,000 will require the partnership of the entire criminal justice system, the health and education systems, and New Yorkers themselves in keeping crime low. With 7,000 individuals in city jails, New York City will be using jail almost exclusively for individuals facing serious charges or who pose a high risk, making further safe reductions difficult. But closing the jails on Rikers Island for good requires a daily jail population of 5,000 or fewer. To reach this goal, violent crime will have to decline in New York City and we will need to address the problem of chronic offending, which to date has been intractable nationwide and in which our shelter and health systems play an important role as well. As part of the Implementation Task Force, a Working Group on Safely Reducing the Size of the Jail Population will develop strategies to address these issues.

- **Safer:** our goal is to ensure that those who work and those who are incarcerated in city jails have safe and humane facilities as quickly as possible. We must start improving the conditions of our jails today. To achieve this goal, the City will:
 - Continue to make long-needed physical improvements to all city jails on-and off-Rikers Island using the more than \$1 billion in funding that the Administration has already added to its capital plan over the last three years;
 - Triple the number of dedicated housing units designed for individuals with serious mental illness, which have been shown to reduce violence;
 - Improve officer safety by building a new training academy to ensure all corrections officers receive the best possible training; and
 - Enhance safety by implementing full camera coverage in all city jails by the end of 2017.

A Design and Facilities Working Group, part of the Implementation Task Force, will convene design experts and neighborhood and community development leaders to help drive thoughtful design of new facilities and renovation of existing facilities.

- **Fairer:** our goal is to improve the culture inside city jails by increasing support and opportunity for corrections officers and everyone in the City's custody. The City has already invested over \$90 million in professional development for corrections officers and in educational, vocational and recreational programming for incarcerated people to help reduce future returns to jail. To further improve the culture inside city jails, the City will:
 - Offer everyone in city custody five hours per day of education, vocational, and therapeutic programming by the end of 2018;
 - Provide everyone in city custody with reentry support and implement new programs for those who have served a city sentence, including support from trained, formerly incarcerated mentors and new transitional employment programs;
 - Foster connections to families and community by improving visiting;
 - Continue to develop and refine alternatives to punitive segregation that can safely house people who commit acts of violence; and
 - Better support correctional officers by offering peer mentoring for new recruits to reduce attrition and supportive services for staff to deal with distress and trauma.

A Culture Change Working Group—part of the Implementation Task Force and comprised of corrections officers, formerly incarcerated individuals and their families, as well as representatives from government and non-profits that provide programming in jails—will guide implementation of the new strategies contained in this report to improve visits, programming, reentry, and support for officers and staff.

Ultimately, closing all the jails on Rikers Island will depend not only on reducing the size of the city jail population to 5,000, but also on the willingness of neighborhoods and their elected officials to identify appropriate new sites. We are committed

to an open, ongoing conversation with New Yorkers and the City Council to work through these issues. The Design and Facilities Working Group will partner with communities to address issues related to the complicated siting process, including looking at how jails can be designed to better integrate into New York City neighborhoods.

The City cannot accomplish these goals alone. It will require the work of many partners. We will need the NYPD to build on its success in keeping crime at historic lows through precision policing efforts. We will need continued investment in neighborhoods and in our people to keep New Yorkers from getting involved in the criminal justice system in the first place. We will need the active partnership of residents to help reduce and solve crimes. Courts will need the resources to manage case processing effectively and justly. We will need prosecutors and the defense bar to prioritize reducing case delay while promoting justice. We will need to provide incarcerated people with the quality programming that has a demonstrated effect on reducing recidivism. And we will need to support corrections staff to serve the public at the highest levels of integrity.

This plan outlines the commitment we are making to New Yorkers. We will need your help to achieve these goals and invite you to join us at nyc.gov/rikers

Smaller:

Safely reduce
the City's jail
population by
25% over the
next 5 years

The Plan: Smaller

Our goal is to operate the smallest jail system possible without compromising public safety. This is a matter of justice: no one should be incarcerated who does not pose a risk, either to public safety or of not returning to court. It is also a matter of pragmatism: the smaller the jail population, the easier it becomes to close the aging, isolated facilities on Rikers Island and replace them with a smaller network of safe, humane and modern facilities.

In the last three years, New York City has made great strides toward this goal. Major crime has fallen by 9% and the size of the jail population has dropped by 18%, giving us the lowest incarceration rate of any big city. On an average day in the first quarter of 2017, there were roughly 9,400 people incarcerated in New York City. Our strategy to reduce the population further while maintaining safety has two phases:

1 First, over the next five years, we will work toward the goal of safely reducing the size of the jail population by an additional 25% to 7,000. Doing so will require full implementation of the strategies laid out below to reduce the number of people who enter jail and the length of time they stay – both of which necessitate the commitment of every part of the criminal justice system and the partnership of New Yorkers in keeping crime at historic lows.

2 Second, working with our partners in the criminal justice system, we will develop innovative ways to reduce the population further, with a goal of reaching 5,000. As the size of the jail population falls to 7,000, jail will increasingly be reserved only for individuals charged with serious crimes or who are a high risk of flight. Further reductions will require developing solutions to complicated problems like chronic recidivism and reaching a consensus as to the appropriate use of confinement for those charged with violent crimes (discussed in further detail below).

On the next pages are the concrete strategies that will move us toward these goals. To help shape further interventions and ensure effective implementation, this work will be guided by a Working Group on Safely Reducing the Size of the Jail Population, which will be part of the Implementation Task Force and comprised of experts and practitioners from inside and outside of city government.

For real-time updates on this work, please visit nyc.gov/rikers.

The data used throughout this section comes from city and state agencies. For a complete data breakdown of the current jail population and opportunities to reduce, please see the Justice Brief available at www.nyc.gov/rikers.

Both crime and the size of the jail population are falling in New York City

Major Crime in NYC

Average Daily Jail Population

*The average daily jail population has continued to decline. In 2017, the average daily population is 9,400.

Current Context

The size of the jail population in New York City has been steadily declining for thirty years. While jail and prison populations around the country increased, New York City's jail population has fallen by half since 1990 even while major crime fell by 76%. This experience has shown that it is possible to have both more safety and less incarceration. In fact, New York has the lowest rate of incarceration among the largest cities in the country while retaining its status as one of the safest big cities.

New York City's use of jail is the lowest among large U.S. cities*

2014 incarceration rate per 100,000 people

The trends toward less crime and less use of jail have accelerated in New York City over the last three years. Because of deliberate efforts to rethink policing strategy, expand alternatives to jail, and reduce the time it takes cases to move to conclusion, fewer people are entering city jails and the number of people in city jails for longer than one year has declined. Steep declines in the number of people admitted to New York City jails are evident across a number of different categories, including those detained pretrial on misdemeanors (down 25%), those serving sentences (down 34%), and those detained on bail of \$2000 or less (down 36%). After increasing for decades, the average length of time it takes a Supreme Court case to reach disposition has shrunk by 18 days over the last two years.

*The chart contains the top ten cities by population size in the United States, 2015.

New York City jail populations with the steepest declines over the last three years

| Population | | Decline | | Reduction Strategy |
|--|---|---|---|--|
| Misdemeanor detainees | ➤ | 5600 fewer jail admissions (-25%) | ➤ | Reduce number of people who enter jail (Supervised Release, bail reform, enforcement strategy) |
| City-sentenced population* | ➤ | 3900 fewer jail admissions (-34%) | ➤ | Reduce number of people who enter jail (alternatives to incarceration) |
| Non-violent felony detainees | ➤ | 2530 fewer jail admissions (-13%) | ➤ | Reduce number of people who enter jail (Supervised Release, bail reform, enforcement strategy) |
| Mental health service users | ➤ | 297 fewer in custody on an average day (-7%) | ➤ | Reduce number of people who enter jail (diversion) and reduce length of stay (enhanced programming and services in custody to avoid decompensation and case delay) |
| Detainees with bail up to \$2,000 | ➤ | 244 fewer in custody on an average day (-36%) | ➤ | Reduce number of people who enter jail (Supervised Release, bail reform, enforcement strategy) |
| People in custody for longer than one year | ➤ | 110 fewer in custody on an average day (-8%) | ➤ | Reduce length of stay (shortening case processing times) |
| Adolescents (16-to-17) and young adults (18-to-21) | ➤ | 64 fewer adolescents in custody on an average day (-30%) ; 233 fewer young adults in custody on an average day (-18%) | ➤ | Reduce number of people who enter jail (diversion) and reduce length of stay (shortening case processing times) |

*These are individuals who have been convicted and are serving a sentence of one year or less. Sentences of longer than one year are served in State prison.

Source: Mayor's Office of Criminal Justice analysis of Department of Correction data.

A number of factors have driven these declines in New York City's jail population:

- **New Yorkers commit fewer crimes.** Every type of major crime has fallen in New York City in the last three years: violent crime is down 8%, property crime is down 10%, and shootings are down 10%.
- **The NYPD arrests fewer people.** Although not every arrest leads to jail—approximately 15% of arrests do—enforcement trends do affect the size of the jail population. Police in New York City have increasingly focused enforcement resources on violent crime, while de-escalating their activity around lower level offenses. This has led both to a steep reduction in arrests for misdemeanors (down 22% since 2013) and a greater emphasis on arrests for more serious offenses that could lead to jail. For instance, gun arrests are up 23% since 2013. However, because gun arrests are such a small proportion of arrests overall, the large reduction in misdemeanor and non-violent felony arrests have helped to drive down the overall jail population.
- **The City has expanded reliable, effective alternatives to jail.** New York City has multiple diversion options that judges can use instead of setting bail at arraignment or sentencing a defendant to jail. Approximately 4,000 people are diverted from city jails every year through these alternatives to incarceration. One of the newest and largest options, which started in March 2016, is called Supervised Release. Crafted by judges, prosecutors, and defenders, Supervised Release is a program that gives judges the option at arraignment to release low-and medium-risk defendants, with modest mechanisms such as weekly meetings with a social worker or text message reminders to ensure defendants return to court. To date, the program has served over 3,700 people with a 92% success rate in defendants returning to court.
- **Judges continue to allow a larger percentage of defendants than in any other city to wait for trial in the community instead of in jail.** Nearly 70% of all defendants are released without conditions (such as bail), known as released on recognizance (“ROR”). New York City’s 70% ROR rate is more than double that in Washington, D.C., the next largest user of this form of pretrial release¹.
- **Every part of the criminal justice system is working together to reduce case delay.** After increasing for decades, the average length of a Supreme Court case in New York City has shrunk by 18 days since April 2015, when the Mayor’s Office, the courts, the City’s five district attorneys and the defense bar launched Justice Reboot, an initiative to reduce case delay in a lasting, systemic way.

Today, as a result of these efforts to reduce the use of jail for people charged with lower-level offenses or at low risk of failing to appear for court if released, a greater percentage of those in jail are facing serious charges or a higher risk of not returning to court. The percentage of the jail population held on violent offenses has increased 56% over the last twenty years, while those held on lower level offenses (in particular drug offenses) has dropped 51%. Today, 91% of the pretrial population in city jails is held on a felony charge (49% on violent felony charges), over half of the jail population is facing multiple cases—the resolution of which can delay discharge from Rikers—and 69% are at medium or high risk of failing to appear in court, the primary basis on which a New York State judge can hold a defendant.

Fewer individuals in jail for drugs, more for violent offenses

Over the past 20 years, the composition of the jail population has shifted as it has decreased in size. Changes in police enforcement and an expansion of diversion programs have reduced the number of people held on misdemeanor and non-violent felony charges (such as drug possession). As the population has become smaller, a greater percentage are held on serious or violent charges or a judge has determined that they pose a high risk of missing a court appearance.

*Top other charges include larceny and criminal contempt.

Although the majority of people in our jails are charged with serious crimes, have multiple cases or pose a medium or high risk of failing to appear in court, there are still opportunities to reduce the jail population safely. The strategies below will expand appropriate alternatives to jail for those who could be safely supervised in the community, make it easier to pay bail, and increase the speed at which cases are resolved (so that people can be released or start serving their sentences either in the jails or in prison). It will take the focused commitment of every part of the criminal justice system and the partnership of New Yorkers in keeping crime at historic lows to ensure that these strategies are successful. With that partnership, these strategies can reduce the average daily jail population by 25% over the next five years while protecting public safety.

At 7,000, our jails will consist primarily of those charged with violent offenses and chronic offenders. Thus, further reductions will require significant changes in how we prevent and address both kinds of behavior. A Working Group on Safely Reducing the Size of the Jail Population, which will be part of the Implementation Task Force, will be charged with developing concrete ways to achieve the eventual goal of reducing the size of the jail population to 5,000 (more below in Strategy 9).

Five Year Goal: Reduce the jail population by 25% to 7,000

Reducing the average daily jail population to 7,000 will be accomplished by (a) reducing the number of people who enter the jails, and (b) reducing the amount of time people spend in the jails. Admissions and length of stay are the two drivers of the size of the jail population. Please see Appendix A for additional information on how each population reduction was calculated.

The strategies in this section are projected to reduce the jail population by 25% over the next 5 years

STRATEGIES TO REDUCE THE NUMBER OF PEOPLE WHO ENTER JAIL

About half of the jail population turns over every nine days. These individuals, who only stay in jail for a short time, tend to be charged with lower-level offenses and most are able to make bail after a few days in jail. Others plead guilty and receive short jail sentences. With appropriate, evidence-based guidance and programming that judges and prosecutors can rely upon, it is possible, without sacrificing public safety, to divert from the jails some additional individuals who pose a lower risk, for the most part, misdemeanor and non-violent felony detainees and those serving a city sentence.

*Other includes those held on warrants and state holds.

**Projected
reduction:
approximately**

710

over 5 years

For more information on how the population reduction projections in the section were calculated, please see Appendix A.

Strategy 1: Provide judges with modern tools that assess the likelihood a defendant will return to court, assisting decisions to release or detain while a criminal case is pending

Providing better information to judges to assist in their assessment of a defendant's risk of flight will further reduce the jail population. The City's pretrial services agency interviews all arraigned individuals and provides an assessment to the courts on that person's likelihood of returning for future court dates. While this type of assessment has been in use in New York City since the 1960s, the City is currently working to update the instrument using more recent data and new technologies that will allow for more accurate assessments. An updated instrument that accurately reflects risk could reduce the average daily population in city jails by approximately 710 people in the five years following implementation.

New York City is also seeking to improve the tools available to judges to assess risk by continuing to advocate for a change in state law that would allow judges to consider a defendant's risk to public safety, and not just the risk that the defendant might fail to appear for future court appearances, when making bail decisions. Currently, New York is one of only four states that prohibit judges from considering public safety when making decisions about release, with a few narrow exceptions². Allowing judges to consider danger when making bail decisions is a common sense reform. It would improve public safety by ensuring that judges take into account a defendant's risk to public safety, and not just the risk that he or she might fail to appear for court appearances.

Why risk assessment matters

The goal of effective risk assessment instruments is to improve the criminal justice system's accuracy by ensuring we can separate the few individuals who should be detained from the many who should not. When used well, risk assessment instruments can improve both safety and fairness.

Risk assessment instruments are used across the country to evaluate defendants' likelihood of pretrial success, meaning their likelihood of attending all court dates and not getting re-arrested while awaiting trial in the community. These risk instruments are constructed by taking historical data and calculating what factors are most associated with missing a court

appearance or getting re-arrested—for example, a past record of missing court dates—and building a model to predict future outcomes.

These models are validated by researchers to ensure they are accurate, and then they are assessed by policy-makers, practitioners and researchers to ensure they do not produce biased outcomes

based on race and gender. Risk assessment has been used for decades in New York City, and through developing and validating more accurate tools while ensuring that we are avoiding biased outcomes, risk instruments will help New York City's criminal justice system to continue reducing unnecessary incarceration while protecting public safety.

**Projected
reduction:
approximately
200
over 5 years**

Strategy 2: Reform the bail system by making it easier for people to pay bail

Money bail can undermine fairness if low-risk defendants are held in jail because they cannot afford relatively small bail amounts. And it can undermine public safety if higher-risk individuals are able to post high bail amounts and secure release. For the last two years, New York City has been working to reduce reliance on money bail by expanding alternative-to-bail programs such as Supervised Release, a new program that allows judges to release lower risk defendants to a supervisory program in the community instead of setting bail. This new program, coupled with the efforts described below to make it easier to pay bail, has led to a 36% reduction in the number of people in jail on bail of \$2,000 or less in the last three years. (Learn more about the City's efforts to reduce reliance on money bail at www.bail-lab.nyc). Taken together, the two strategies below could reduce the average daily jail population by 200 over the next five years:

Reduce inefficiencies in the bail payment process to allow those who can post bail to do so more easily:

- Approximately three-quarters of people who pay bail do so within seven days of arraignment. Often they end up at Rikers because they were not able to raise bail in time; they did not have access to cash or some other reason not associated with the merits of their case. To remedy these issues, the City is working to make it easier for defendants and their family members to pay the bail the judge has set. An online bail payment system and ATMs in every courthouse will be in place by late 2017. Additionally, the City is investing \$490,000 per year to add 50% more "bail expeditors" citywide, staff who can help families pay bail before their relative enters jail by interviewing defendants about who could help them post bail, contacting family members to let them know bail has been set, and helping to ensure that defendants are held at the courthouse while their contacts make the trip to court to post bail.

Help people charged with misdemeanors who pose a low or medium risk of flight post bail when it is unaffordable:

- For some defendants and their families, low amounts of bail can be out of reach financially, even though the judge may have intended it to be met. New York City has launched a charitable bail fund that expands the availability of this resource from the Bronx and Brooklyn to all five boroughs. Created by the City Council with public funds, it pays bail of \$2,000 or below for an estimated 1,000 low-and medium-risk misdemeanor defendants annually. Three programs that perform the same service have been in place in the Bronx and Brooklyn since 2012 and defendants bailed under this program return to court on time in 97% of cases.

For more information on how the population reduction projections in the section were calculated, please see Appendix A.

**Projected
reduction:
approximately**

500

over 5 years

Strategy 3: Expand diversion programs that allow low-and medium-risk defendants to remain in the community while their case is pending

New York City has multiple diversion options that judges can use instead of setting bail at arraignment. Currently, judges divert to city-funded programs approximately 4,000 New Yorkers from jail every year. One of the newest options, which started in March 2016, is called “Supervised Release,” a new citywide alternative to jail program that allows individuals to wait for trial in the community, working and living with their families. To date, the program effectively diverted over 3,700 people from jail, 92% of who successfully returned to court. Beginning in June, the City is investing an additional \$2.3 million per year to enhance Supervised Release’s capacity to serve people with behavioral health needs, including additional masters-level clinical social workers and peers, as well as increasing by 10% the number of people who can be diverted from jail through Supervised Release every year.

**Projected
reduction:
approximately**

300

over 5 years

Strategy 4: Replace short jail sentences with programs that reduce recidivism

Beginning in July 2017, the City will start a new \$5 million per year program that could dramatically reduce jail sentences of less than thirty days. Over the course of a year, there are approximately 9,000 admissions to jail on these short sentences. Many of these individuals have had multiple, short stays in jail over the course of their adult lives—a pattern often exacerbated by homelessness and behavioral health needs. Beginning in the summer of 2017, judges will have the option to assign individuals to short-term programs that can include community service, vocational training, case management, and health treatment. Programs will be specifically tailored to individuals’ risks and needs and will help address some of the issues—such as chronic homelessness or substance use—that could be leading to repeated jail stays, providing instead a pathway to stability and self-sufficiency. The City will closely evaluate the program to ensure effectiveness. New York City is the first jurisdiction in the country to launch a program explicitly to reduce these short jail sentences.

For more information on how the population reduction projections in the section were calculated, please see Appendix A.

**Projected
reduction:
approximately**

50+

over 5 years

Other strategies in this section will further reduce the number of people with behavioral health needs in city jails. This projection is solely for a program specifically serving this population.

In the three years since the Mayor's Task Force on Behavioral Health and the Criminal Justice System launched, the number of individuals with a mental health diagnosis in city jails has dropped by 7%.

Strategy 5: Reduce the number of individuals with mental illness and substance use disorders held in the jails through continued implementation of the Mayor's Action Plan on Behavioral Health and the Criminal Justice System

In December 2014, Mayor de Blasio announced the Mayor's Action Plan on Behavioral Health and the Criminal Justice System, 24 interlocking strategies to reduce the number of people with behavioral health needs cycling through the criminal justice system. These strategies included reducing arrests and diversion to treatment where appropriate, ensuring that those who do enter the criminal justice system are treated in a therapeutic way, and that the City provides support for individuals to live stable lives in their communities to prevent future returns to jail. Before the launch of this Action Plan, the number of people with behavioral health needs in city jails had been increasing for years—despite the decline in overall jail population. In the three years since this concerted effort began, the number of individuals with a mental health diagnosis in city jails has dropped by 7%.

The City will continue these efforts, training more police officers on how to intervene effectively in situations where people are in crisis, opening community-based drop off centers that provide short-term case management as an alternative to arrest, and offering permanent supportive housing. To date, 102 individuals have been placed in supportive housing. These individuals are among the highest users of jail in New York City, are chronically homeless and are dealing with severe behavioral health issues. Collectively, these individuals have served over 36,000 days in jail and spent over 22,000 days in shelter over the last five years. Permanent housing, coupled with supportive services to help these individuals stabilize, will save the City an estimated \$1.6 million annually through reduced hospital visits, shelter admissions, and trips to jail. These efforts are expected to reduce the average daily jail population by 50. Other strategies in this section—including Supervised Release, the new program offering alternatives to short jail sentences, and efforts to reduce case delay—will also contribute to further declines in the number of people with behavioral health needs in city jails.

For more information on how the population reduction projections in the section were calculated, please see Appendix A.

New Resources for Behavioral Health Citywide

Both in New York City and across the country, a relatively small number of people consume a disproportionate share of shelter, jail and emergency room resources. These individuals tend to be chronically homeless, struggle with severe behavioral health issues, and return to jail frequently on lower-level charges. This problem of frequent use remains a large, unsolved issue that jurisdictions nationwide are working to solve, one prominent example being through the federal Data-Driven Justice Initiative.

New York City has launched several city-wide initiatives, including ThriveNYC and HealingNYC, which broadly expand services for people with behavioral health needs and aim to help the population that frequently cycles between jail and shelter.

ThriveNYC is an unprecedented commitment of over \$850 million for 54 initiatives to improve the mental health of NYC. The focus on prevention, including a new network of school-based services, will keep people from going down a path toward instability that so often leads to cycles of arrest and incarceration. Closing treatment gaps, expanding services like supportive housing, building our mental health

workforce, and creating NYC Well—a single point of entry for New Yorkers who need any kind of connection to behavioral health services—will improve the health of our city.

HealingNYC, which launched in March 2017, is a comprehensive, \$38 million initiative to prevent opioid overdose and includes several programs that specifically target people in the criminal justice system. Through HealingNYC, the City is committed to locating more evidence-based substance use treatment services, like Medication Assisted Treatment, in jails while increasing reentry planning to serve the approximately 1700 individuals with substance use disorders in the jails on an average day. These new and expanded programs will not only reduce the risk of drug overdose for people leaving jail (a leading cause of death for people recently released from jail), but will help put incarcerated people with behavioral health disorders on a stable path toward recovery—making them less likely to return to jail. Tools of the criminal justice system should not be the default response to people in crisis, and the City is dedicated to targeting initiatives that get people the public health services they need to avoid incarceration and ultimately thrive.

**Projected
reduction:
approximately
20+
over 5 years**

Other strategies in this section will further reduce the number of women in city jails. This projection is solely for a new program specifically serving women.

For more information on how the population reduction projections in the section were calculated, please see Appendix A.

Strategy 6: Reduce the number of women in city jails by providing programs inside and outside of the jails focused on their unique needs

There are approximately 630 women in custody on an average day. A limited survey of women in New York City jail found a high need for employment upon release and also that women in jail are often caregivers, and many have experienced domestic violence³. Additionally, approximately 75% of women in jail use mental health services while in custody, compared to 42% for the jailed population as a whole. The most common diagnoses are depression, anxiety, adjustment disorder, and personality disorders.

Similar to the overall jail population, 50% of women who enter custody leave within one week. Forty-three percent of women detained pretrial face either misdemeanor or non-violent felony charges (compared to 37% for the overall jail population). The City's strategies to reduce the use of jail for individuals facing misdemeanors and non-violent felonies—including Supervised Release and bail reform, mentioned earlier in this section—will help to reduce the number of women in city jails.

In addition to bringing down the number of women in the jails through broader population reduction strategies, the City also plans to implement a new program tailored specifically to homeless women. Rolling out in the summer of 2017 and back by a three-year investment of \$7 million, the new program will be focused on the approximately 510 women who are admitted to city jails every year who report they are homeless—some of whom could be diverted from jail if their housing needs are addressed. This new program will offer transitional housing to women who are homeless to make it easier for them to participate in alternative to jail programs, many of which require permanent housing as a requirement for eligibility. This program is projected to divert 250 women from jail per year; given the relatively short jail stays of this population, this will reduce the average daily jail population in city jails by approximately 20.

In addition to these targeted programs to reduce the number of women who enter jail, the City has an array of programs for women in custody. There are currently more than 25 programs operating in the Rose M. Singer Center (RMSC), the jail where all women are housed, including:

- Seeking Safety, an evidence-based, trauma-informed therapy that has been proven effective for women with behavioral health needs;
- Manhattan College, which allows women with a high school diploma or GED the opportunity to earn credits toward a college degree while incarcerated;
- Single Stop, a partnership with the Center for Urban and Community Services that assists women serving a sentence in jail with public benefits and other civil legal matters;
- Steps to End Family Violence, which offers workshops that promote healing and social change and provides real assistance for women with custody issues; and
- HOUR children-parenting class, which focuses on women with children, including those women who have babies with them in the RMSC nursery.

These programs address the unique needs of women, laying the foundation for future stability and reducing the number of women who return to jail. Also, moving forward, women leaving jail after serving a city sentence will qualify for the City's new transitional employment program as well as an array of supportive services to help prevent future returns to jail.

Finally, as part of the Implementation Task Force, the City will work with partners inside and outside of government to develop additional strategies tailored to the issues facing women in the criminal justice system.

**Projected
reduction:
approximately**
170
over 5 years

Strategy 7: **Reduce the number of State technical parole violators in New York City jails**

New York State technical parole violators constitute 6% of the average daily population in city jails, approximately 570 individuals on any given day. Technical parole violators have violated a condition of their State parole (such as failing to show up for a meeting or failing to update an address), not committed a new criminal act. Even though 70% of the technical parole violators are ultimately returned to state prison after their parole hearing process is completed, state law still requires them to be housed locally, to the extent practicable, at an average annual cost to New York City of tens of millions of dollars.

To reduce the number of state parolees in city jails, the City is recommending that the State:

- **Reduce the number of State technical parole violators who enter city jails:**
 - **Expand funding for alternative to jail programs.** The State currently funds one parolee diversion program for state parole violators in New York City at Edgecombe Correctional Facility. The State's investment in available diversion programs for state parolees should be expanded.
 - **Change state law to allow for immediate, safe diversion from jail.** Current state law requires that everyone arrested on a parole violation be immediately jailed. The City is calling on the State to replace this law with a risk-driven system in which those who pose a high risk are detained and those who pose a lower risk have an opportunity to remain in the community by being assigned to an alternative to jail program.
 - This change to state law, coupled with an expanded investment in alternative to jail programs for State technical parole violators, could prevent 480 of the 4,000 yearly admissions to jail for state technical parole violators, reducing the average daily jail population by 70.
- **Reduce the length of time state parolees spend in city custody:** State parole violators spend an average of 55 days in city custody. The State should take steps to reduce the length of time it takes to process a parole violation and the length of time it takes to transfer an individual from city jails back to state prison after the parole hearing. These strategies could reduce the number of people in city jails by 100.

For more information on how the population reduction projections in the section were calculated, please see Appendix A.

The average length of a Supreme Court case in New York City has fallen by 18 days in the last two years.

STRATEGIES TO REDUCE THE AMOUNT OF TIME PEOPLE SPEND IN JAIL

The length of time that people spend in jail, particularly for pretrial detainees who make up 74% of the jail population, is a significant driver of the size of the jail population. In 2016, pretrial detainees spent an average of 57 days in custody, with those detained on misdemeanors staying an average of 22 days and those detained on violent felonies staying an average of 111 days in jail. Those detained on homicide charges stay an average of 390 days, far longer than any other charge.

The City is particularly focused on reducing the length of time that detainees spend in jail not just because it will reduce the size of the jail population but because long periods of pretrial detention present problems of justice and safety. As cases drag on, delays can be compounded by the turnover of attorneys and the disappearance of witnesses, making cases more difficult to resolve. Most importantly, victims of serious crime should not have to wait long periods of time to see justice served, individuals who are innocent of any crime should be swiftly returned to their communities and those who are guilty of serious crimes should be sent to state prisons to serve their sentences.

Reducing length of stay in jail requires significant cooperation and coordination among a number of different entities, including the courts, Mayoral agencies, state corrections, district attorneys and defense attorneys. The City will continue to work with all the relevant actors to reduce further the length of time people spend in the jails while their cases are resolved.

Projected reduction: approximately
450
over 5 years

For more information on how the population reduction projections in the section were calculated, please see Appendix A.

Strategy 8: Speed up case processing times

The single largest driver of the jail population is the length of time people are held pretrial. In April of 2015, the Mayor and then Chief Judge of the State of New York Jonathan Lippman launched “Justice Reboot,” an initiative to reduce case delay by addressing systemic causes. Over the last two years, this effort has regularly brought together leadership from the courts, Mayoral agencies, district attorneys’ offices and the defense bar to identify and resolve causes of delay. After increasing for decades, the average length of a Supreme Court case in New York City has fallen by 18 days in the last two years.

With the full participation of every part of the criminal justice system to continue reducing the time between court appearances and ensuring that each court appearance is used productively, case delay for felony cases could be reduced by an additional 20 days over the next five years. Doing so would result in 450 fewer people in city jails.

Eventual goal:

Reduce the jail population to 5,000

Strategy 9: Develop additional strategies to reduce the jail population further from 7,000 to 5,000

Once the jail population reaches 7,000 through implementation of the strategies laid out above, jail will be increasingly reserved in New York City for individuals who are facing very serious charges or who pose a high risk of flight. We project that in five years, the pretrial population will be: 61% individuals facing violent felony charges (3100 individuals), 33% individuals facing non-violent felony charges (1700), and 6% individuals facing misdemeanor charges (300). Some individuals charged with low-level crimes are deemed high-risk because they have a history of chronic offending and/or a history of prior failures to appear in court. Given this, further reductions to the size of the jail population will require developing new approaches for both those facing violent felony charges and chronic offenders.

Because of this composition, further safe reductions to the size of the jail population will become increasingly difficult: we will need to develop strategies to reduce the number of admissions and time spent in jail by both violent and chronic offenders. There are some additional strategies for that effort:

- **Developing reliable alternative to jail programs for individuals charged with felonies.** Other jurisdictions have experimented with more intensive community supervision models for higher risk populations, including elements such as electronic monitoring, home confinement, or mandated outpatient treatment. New York City could explore whether these approaches, as well as others, could safely divert defendants facing felony charges from jail. For every four defendants charged with a felony who are diverted from jail, the average yearly population in city jails could be reduced by one.
- **Significantly reducing violent felony case processing times.** Strategy 8 focuses on reducing the length of time it takes to process all felony cases, which could help to reduce the jail population to 7,000 over the next five years. Reducing beyond 7,000 will require focusing specifically on shortening case processing times for violent felony cases, as these cases tend to be the most complex and protracted. For every 10% reduction in the length of homicide cases, the jail population could reduce by approximately 50. However, speeding up violent felony case processing times will require developing new strategies as well as sustained coordinated effort from the court system, the City, defense attorneys, and district attorneys. It will also require New Yorkers to show up as jurors, grand jurors and witnesses, as lapses in attendance are a driver of court delay and thus of the jail population.

For more information on how the population reduction projections in the section were calculated, please see Appendix A.

- **Pursuing effective strategies to reduce chronic offending.** In New York City, a small segment of the population frequently cycles between jail, shelter and hospitals. These individuals tend to have severe behavioral health needs. To reduce this number, we will need to identify solutions for the high utilizers of shelters, jail, and hospitals—an issue that jurisdictions across the country have yet to entirely solve.

Each of these steps would require a seismic shift in culture and expectations by New Yorkers and the justice system. While research has demonstrated that individuals charged with more serious offenses often have the lowest re-offending rates and typically return for their court appearances⁴, will judges and prosecutors be confident enough to release these individuals while they await trial? And while there is broad agreement that jail is not the right response for chronic low-level offending, we do not yet have, but are dedicated to developing, interventions that work and that judges can rely on as alternatives to jail.

One key focus of the Working Group on Safely Reducing the Size of the Jail Population, part of the Implementation Task Force, will be to develop specific strategies to address these issues and help to reduce the population from 7,000 to 5,000. This work will happen alongside implementation of the strategies we have already developed to reduce the jail population to 7,000 over the next five years and will bring together criminal justice agencies, defense attorneys, prosecutors, the courts, nonprofit service providers, state government and New Yorkers.

Safer:

Ensure safe,
humane and
safe and human
facilities for
staff and for
incarcerated
individuals as
quickly as possible

The Plan: Safer

Our goal is to ensure safe, humane and productive environments for staff and incarcerated individuals as quickly as possible.”

The physical conditions in jails have a profound effect on safety and on whether jails are places of isolation and despair or opportunity and hope⁵. The City’s goal is to make safe and humane housing a reality for every person in the city jails. While violence is decreasing in city jails, much more needs to be done to achieve this goal. We are committed to the goal of closing Rikers Island altogether. But that will take time as we work toward lowering the number of people incarcerated in city jails. While we drive this important work forward, we must improve now both the infrastructure and conditions for the people who work and are incarcerated in the City’s jail facilities both on and off the Island. Better conditions inside of the jails, including better physical spaces for housing, improved programming and visits, are not just a matter of safety and fairness, they also play a role in the City’s goal of reducing the population, by contributing to recidivism reduction. To achieve the short and long term goals for jails, the City will:

1 First, continue the work already begun to make long-overdue improvements to the conditions in jails on Rikers Island while also renovating existing facilities off-Island utilizing the more than \$1 billion in funding the Administration has added to the Department of Correction’s capital plan over the last three years. Doing so is the fastest way to ensure that the tens of thousands of people who move through our jails each year are adequately housed and that those who work in our jails have decent conditions, even while the City works toward the longer-term goal of closing Rikers completely.

2 Additionally, beginning now, undertake a cooperative planning process with New Yorkers, elected officials, and many others to identify appropriate sites for additional jails. A working group of the Implementation Task Force will work with neighborhoods and their elected officials on these issues.

The strategies below chart a plan to provide safe housing and working conditions for all, dedicated housing units specifically designed for the needs of some special populations, the installation of key technology infrastructure, and the construction of sufficient space to improve culture through expanded programming and staff development.

A Design and Facilities Working Group, part of the Implementation Task Force, will be convened to serve as an advisory body with design experts and neighborhood and community development leaders. This Working Group will help to drive thoughtful design of new facilities and renovation of existing facilities.

Strategy 10: **Ensure that all individuals in city custody are housed in safe, secure and humane facilities by making necessary repairs to the jails**

The City's Investments in Safer Jails

More needs to be done to reduce violence and provide a safe environment for those incarcerated and those who work every day on Rikers Island and in borough facilities. In March 2015, the Department of Correction began implementation of a 14-point reform plan targeting the root causes of violence in New York City's jails—many of which relate to physical design and conditions. Since then, violence indicators have consistently dropped: Uses of Force (UOF) resulting in serious injury have decreased by 35%, and UOF resulting in minor injury decreased 18%. Fewer incarcerated people and fewer corrections officers are experiencing serious injury in facilities stemming from fights or assaults. Through the 14-Point Anti-Violence Plan, DOC has made the following important

changes to create safer environments in city jails:

- **Keeping weapons and drugs out of Rikers:** DOC has increased contraband finds by 37% through revamped processes for conducting searches, including during visits and in housing areas. The City will continue to advocate for a change in state law to allow for the use of state-of-the-art body scanners that can adequately detect the most dangerous weapons brought into facilities.
- **Infrastructure and housing improvements:** DOC began 'restarting' housing units in 2015 by transforming them into cleaner and calmer housing areas with less violence, more programming, and improved officer training.

Since that time, the proportion of incarcerated individuals housed in these units has increased from 4% of the population to 12% across dozens of units in four facilities. Incarcerated individuals who enter restarted units consistently demonstrate decreased rates of violence during their time there (see page 41 for more information about Restart).

- **Transformation of organizational culture:** DOC has designed and implemented a new recruitment, hiring, and staff selection plan, resulting in three back to back record-breaking recruit classes. To guarantee DOC leadership and staff are held accountable, DOC has re-imagined the investigations division and improved intelligence gathering. To ensure targeted

training is working and accountability is taken seriously, all DOC staff are on track to have evaluations on record by the end of 2017 as part of a newly designed staff performance management plan. Because safety and security in every jail is vital, DOC has relaunched TEAMS, which is modeled on NYPD's CompStat, that tracks safety metrics and holds management accountable for safety within each facility.

- **Modern, robust training:** Training in the Academy, as well as in-service training for Corrections Officers, has been expanded to make sure all officers are trained on the new Use of Force policy, conflict resolution and crisis intervention, safe crisis management, de-escalation, and defensive tactics.

Strategy 11: **Complete the movement of all 16- and 17- year-olds from Rikers Island to a newly designed facility**

The City is committed to ensuring that as few young people are in detention as possible in New York City. Since 2014, the number of adolescents in the custody of DOC has been reduced from 489 to an average daily population of 150 in 2017. This reduction of 339 has been driven by providing case expediting services, case review and reentry services at the point of intake.

In addition to reducing the number of young people in custody, the City is also committed to providing developmentally appropriate detention facilities for this population. In the summer of 2016, the City began work to move 16- and 17-year-olds off of Rikers Island through beginning a design process for a more developmentally appropriate facility for young adults. With the recent passage of Raise the Age legislation in New York state, the City will continue its commitment to transition 16- and 17- year-olds off of Rikers Island when the law takes effect in 2018. The City is currently working to design and develop age-appropriate facilities that prioritize education, vocational programming, provide therapeutic services, and have space for outdoor recreation. Providing educational, vocational and therapeutic services to individuals while they are incarcerated has been shown to prevent future returns to jail⁶.

Strategy 12: **Expand dedicated housing designed for the unique needs of individuals with serious mental illness**

Since 2015, the City has opened intensive therapeutic housing units in the jails for people with serious mental health disorders, known as Clinical Alternatives to Punitive Segregation (CAPS) and Program to Accelerate Clinical Effectiveness (PACE) units. In PACE units, health and security staff train and work together to engage and stabilize patients. To date there is one CAPS unit and four PACE units, which have dramatically improved the level of clinical care and coordination between health and security staff for incarcerated individuals with the most severe mental illness. By early fiscal year 2018, the City will create a PACE unit for women in Rose M. Singer Center (RMSC), the women's facility on Rikers Island, and a PACE unit in George Motchan Detention Center (GMDC), where young adults are housed. By 2020, the City will triple the number of PACE units to a total of 12, bringing more intensive interventions and related clinical and safety benefits to additional people with serious mental illness.

The enhanced staffing and clinical care available in these units has led to the lowest incidence of verified injuries per incarcerated individual of any housing unit in city jails. Since inception, PACE has served over 1,000 individuals and CAPS has served over 1,300 people. The use of force rates in PACE and CAPS units are lower: use of force rates are 67% lower for individuals in CAPS and 74% lower for individuals in PACE, compared to projected use of force rates had these same individuals been housed with the general jail population. The PACE units serve patients returning from inpatient hospitalization, those who may require hospitalization, those with complex diagnostic challenges, and those returning from court-based competency evaluations.

Approximately 11% of the New York City jail population has been diagnosed with a serious mental illness, and almost one third of the population has some kind of psychiatric diagnosis. Even more incarcerated individuals have some kind of behavioral health need. The City has many strategies in place to reduce the number of people with behavioral health needs in city jails (see Strategy 5). A key piece of this strategy is ensuring that those who do enter jail have access to high-quality therapeutic spaces and clinical care while incarcerated. This has been shown to reduce violent incidents and can help provide a foundation for future stability and prevent returns to jail⁷.

Expanding dedicated units for those with mental health needs will also help to reduce the average length of stay for this population. Currently, those with mental health needs spend approximately twice as long in city jails as those without mental health needs—129 days versus 67 days, on average. The enhanced staffing and clinical care available in dedicated mental health units has led improved mental health outcomes, including fewer incidents of self-harm, and fewer overall violent incidents which can reduce length of stay.

Strategy 13: Use technology to reduce violence and support more efficient and effective Department of Correction operations

Technology will play a key role in the modernization of our jails and in making available the kind of information that will ensure they are safe and productive environments. Planned technology improvements include security cameras and state of the art contraband detectors, wireless-enabled tablets that will enable self-paced learning and give incarcerated people direct access to the grievance system.

Strategy 13a: Expand the use of a technology tool to ensure incarcerated individuals get to medical and court appointments on time and help reduce violence

In order to ensure that incarcerated people are transported to programming, health care appointments, visits with family, and court on time, it is important to have real-time and reliable information about where individuals are located within correctional facilities. This has been a challenge both in New York City and in jurisdictions across the country. Other correctional systems have had success with Radio-Frequency Identification (RFID) wristbands, similar to hospital wristbands, which contain a unique identification code that incarcerated people can scan to “check in” at various locations around the jail. These hypoallergenic, tamper-resistant, and water-resistant wristbands can also help in other ways, including speeding up discharge by improving validation of an individual’s identity and enhancing safety by making it easier to enforce necessary separation of specific individuals.

An RFID system has been used in the Robert N. Davoren Center (RNDC), the facility that houses adolescents and older males, and in the Queens courts since early October 2016. By the end of 2018, the City will expand the RFID system to all facilities.

Strategy 13b: Improve the system for submission, tracking and responding to incarcerated individuals’ grievances

A well-functioning grievance system is essential to ensuring that DOC can fully and swiftly respond to individuals’ concerns about all manner of issues in the jails, including those related to basic needs (e.g., delays in obtaining essential items, such as toothpaste, toilet paper and laundered clothing), requests for assistance (e.g., help in conducting legal research related to a criminal case), and the need for accommodation (e.g., to address a person’s physical limitations). Such a system provides an outlet for concerns and issues and thus has a role in reducing the tensions that lead to violence in the jails. In order to improve the grievance process, DOC, working with the Board of Correction, developed a new grievance resolution model which streamlines the tracking of grievances, prioritizes and escalates the most serious concerns (e.g., medical access and requests for protective custody) and seeks to resolve transparently all issues raised by people through the grievance process.

DOC is currently building on the new grievance resolution model by piloting a digital system for tracking and responding to grievances. By the end of fiscal year 2017, the digital grievance system will be operational in the model housing units (called “Restarts”) in one jail facility, the George R. Vierno Center (GRVC), which houses approximately 630 adolescent and adult men. This system should improve transparency in the grievance process by providing incarcerated people, in their own housing units, with real-time tracking of their grievances and the response from DOC staff. It will also assist DOC in tracking the number, type, and resolution of grievances submitted to ensure accountability and allow for better identification of systemic issues requiring resolution (e.g., broader issues with providing necessary services or supplies to a particular housing area). Assuming the digital grievance tracking pilot is successful, DOC will expand it throughout the jails.

Strategy 13c: **Reduce violence through full camera coverage by the end of 2017**

DOC has invested over \$64 million in full camera coverage in every jail on and off Rikers Island so that all housing units on Rikers Island now have complete coverage. Coverage will be complete in all city facilities by the end of the year. This camera footage deters violence, improves intelligence, and enables DOC to quickly respond to incidents, leading to increased accountability for jail staff and incarcerated people alike.

Strategy 14: **Improve officer safety through investment in a new training academy and full headcount at DOC**

Supporting Effective Prosecution of Violence in the Jails

A new partnership between the City and the Bronx District Attorney, along with heightened internal investigations within the City's Department of Correction, are helping to address violence as well as enhance accountability for both corrections staff and incarcerated individuals.

Enhanced prosecution

The Department of Correction's partnership with the Bronx District Attorney's Office is vital to ensuring prosecution of people who commit crimes on Rikers Island and preventing violence in the City's jails. In the fall of 2016, with an additional \$1.842 million allocated by Mayor de Blasio in the city budget, the Bronx District Attorney's Office

The City is committed to providing corrections officers with the appropriate training, equipment and supports to ensure they are safe and prepared to do the difficult job of serving in the jails. The City has made large-scale investments in DOC's emergency response strategy and in professional development for DOC staff, creating a college program specifically for employees and partnering with Columbia University's Senior Leadership Management Institute.

The City has also invested in the investigation and prosecution of crimes committed in the jails, to ensure accountability and reduce violence and will continue its commitment to make the job of corrections officers as safe as possible and to ensure safety for all incarcerated individuals.

officially opened its new prosecution bureau on Rikers Island. For the first time, the Bronx District Attorney has a physical presence on Rikers, consisting of investigators, administrators, and assistant district attorneys who investigate and prosecute crimes committed by incarcerated people and visitors to Rikers Island. The Bureau ensures faster prosecutions of crimes and expanded investigations of gang violence and the smuggling of contraband, two of the major drivers of violence in the jails.

Enhanced internal investigations

The Department of Correction has recently enhanced its multi-pronged internal investigation strategy to include assigning a dedicated team to each individual jail and creating an Immediate Action Committee to review force incidents soon after they occur, in order to immediately correct bad practice and identify troubling trends. This approach has led to:

- The Investigation Division resolving 1,800 cases involving

corrections officers in 2016, a 183.8% increase over the 634 cases closed in 2013. In 2013, only 93 cases resulted in criminal charges; in 2016, the number of cases resulting in criminal charges increased to 276.

- The DOC Trials and Litigation Division imposing discipline in 744 cases in 2016, an increase of 120% from the 338 cases in 2013. This resulted in 108 suspensions and 94 terminations of corrections Officers.

Strategy 14a: **Provide corrections officers with a new training academy and a revamped, modern training curriculum**

The City recognizes the need for more, and more thorough, training for staff at every level. To achieve the goal of providing the best possible training, in keeping with modern day best correctional practices, the City has allocated \$100 million for a new Department of Correction Training Academy.

While the new Training Academy is being constructed, DOC will continue implementing strategies to improve training. The overarching goal is to provide training that equips all recruits with the tools necessary to become successful officers, and ongoing professional development opportunities for in-service staff to promote career satisfaction.

To drive toward this goal, DOC is already implementing and will build upon the following:

Comprehensive and enhanced Academy training.

DOC's new recruit Academy is longer by several weeks now than it was even a few years ago, deepening new recruit training in de-escalation and tactical skills.

- In November 2016, nearly 3,000 officers and captains, including over 700 recruits, completed 24 hours of DOC's new defensive tactical and de-escalation training, called START (Special Tactics and Responsible Techniques), designed to promote jail safety.
- De-escalation training for all DOC recruits in the Academy is integrated into safe crisis management, conflict resolution, and suicide prevention, where multiple de-escalation techniques are taught and reiterated.
- All recruits receive 35 hours of training (much of it provided by licensed psychologists) to effectively interact with incarcerated individuals who have behavioral health needs.

Enhanced skill-based training for in-service officers.

More opportunities for specific skill-based training are offered to all recruits and are being rolled out for staff already on the job.

- *Limiting use of force and expanding de-escalation training:* All staff will be trained in the new Use of Force policy by September 2017.
- *Specialized training in mental health:* Mental Health First Aid assists staff with identifying signs and symptoms of mental illness and de-escalating potentially violent situations. Crisis Intervention Teams' (CIT) training, which about 400 officers have already received, is a 40-hour specialized training for in-service staff. CIT training is a joint venture between DOC and Correctional Health Services, providing corrections officers and mental health clinicians, who work together every day in our jails, joint training on the best practices for responding to crises and reducing violence. Any officer working with individuals with mental health needs receives additional crisis management skills training.

- *Specialized training for officers working with adolescents and young adults:* Officers working with adolescents and young adults get Safe Crisis Management training, which provides information on youth brain development, crisis prevention, and trauma-informed care practices, as well as the nationally known evidence-based Dialectical Behavior Therapy that helps individuals increase their emotional and cognitive regulation and improve coping skills.
- *Improving responses to violent incidents:* Staff in the Emergency Services Units (ESU) who respond to violent incidents have received specialized training designed to reduce these officers' injuries and minimize use of force. In September 2016, the Mayor announced improvements to ESU that increase their effectiveness. ESU teams, once centrally-located, are now stationed within key facilities on Rikers to drastically decrease the time it takes to respond to incidents, providing critical assistance to facility staff. These teams focus on the facilities with the most significant violence issues.

Strategy 14b: **Increase stability and safety through adequate staffing levels, steady staffing models, and higher staff ratios**

DOC is in the process of completing the hiring and training needed to bring DOC staffing to full head count. The Department will then be able to increase officer-to-incarcerated individual ratios in order to implement population management best practices and improve culture inside jails. Specifically, it will enable the Department to steadily assign the same staff members to the same posts in all housing units. This practice provides staff with more insights into how a particular housing area operates, helps both to develop rapport with incarcerated individuals and identify issues before violence erupts. Steady assignment of staff also means that DOC can provide even more tailored training for staff typically assigned to work with difficult populations, including the most violent incarcerated individuals and those with mental illness. Further, operating at full headcount, DOC will be able to improve efficiency, including by significantly reducing overtime and providing in-service staff training in a timely and comprehensive manner without affecting operations.

Fully staffed, DOC will be able to appropriately supervise the various populations with adequate staff-to-incarcerated individual ratios depending on each population's unique needs. For example, younger populations like adolescents and young adults require higher staff numbers than general population adults, and more violent adolescent and young adults require even higher staff ratios, sometimes reaching as high as 1-to-1 or 1-to-2 staff per young person. In addition, the high classification adult populations, or adults most likely to be violent, require a robust staff to incarcerated individual ratio to maintain safety and security for both staff and other incarcerated individuals.

DOC is training recruit classes of record size to achieve the goals above. In November 2016, over 700 new officers joined DOC's ranks. Approximately 900 recruits graduated in May 2017, and will be followed by a class of over 1300 recruits. A full headcount will allow the Department to promote a culture of safety in the jails by ensuring a targeted approach to staffing the various populations in its custody.

Fairer:
Provide
staff and
incarcerated
individuals
with paths
to success

The Plan: Fairer

Provide staff and incarcerated individuals with paths to success

The culture inside jails—whether one of fairness and accountability or isolation and instability—can have profound effects on safety inside and on the likelihood that those discharged from jail achieve stability on the outside. Educational and therapeutic programming—instead of idle isolation—can reduce violence and the likelihood that detainees will return to jail in the future. And professional development opportunities for staff can support them to serve the public at the highest levels of integrity.

To make the culture inside jails fairer, the City is pursuing four goals:

- 1** Preventing future returns to jail by providing incarcerated individuals with support to lay a foundation for future stability;
- 2** Improving visits to reduce isolation and support more effective reintegration;
- 3** Replacing overly punitive population management strategies with evidence-driven approaches that enhance safety and fairness; and
- 4** Expanding professional development opportunities and supportive services for correctional officers.

The work described below builds on the City's investment over the last three years of \$52.5 million in programming for those who are incarcerated and \$39 million in professional development for staff. Each investment and reform is made in order to support a culture in which each person is treated with dignity and respect and jails become places of calm and order.

A Culture Change Working Group, part of the Implementation Task Force, will be convened to shape this work as well as ensure effective implementation. This Working Group, which will be comprised of corrections officers, formerly incarcerated individuals and their families, as well as representatives from government and non-profits that provide programming in jails, will focus on topics including visits, programming, reentry, and support for corrections officers and staff.

Strategy 15: **Prevent returns to jail by laying a foundation for future stability**

When Mayor de Blasio took office, individuals detained in city jails had access to an average of less than one hour per day of programming. Idle time can lead to violence. It can foster conditions that encourage crime instead of inhibit it.⁸ Conversely, programming that is wisely designed and connected to life upon release can lift people up and set them on a path of productivity and advancement.⁹

The City is building a system in which every person who enters city jails will be provided with new tools and services that will help to promote a stable future. By addressing vocational, educational, therapeutic and other needs in an individualized way, time inside jail can be used productively to lay a foundation that can prevent future interaction with the criminal justice system. This new system will begin with expanded risk and needs assessment on the first day that someone enters jail, offer five hours every day of programming that addresses an individual's unique needs, and continue with support—including new employment and educational programs—after someone leaves jail and returns to the community.

Supporting Productive Futures for Young Adults

A recently launched program for young adults, managed in partnership with the Friends of Island Academy, serves as a model for providing comprehensive

programming and reentry services to the entire jail population. Through this program, 16-to-21-year olds are interviewed at admission to understand with greater depth their unique needs; they are matched with programming while inside that addresses these needs;

encouraged to form connections to educational, therapeutic and other community-based supports while in jail; and then supported for up to a year after leaving jail to assist with successful reentry. This model has proven to reduce reoffending and encourage instead positive, productive outcomes.

Strategy 15a: **Offer everyone in city custody five hours per day of educational, vocational, and therapeutic programming to lay the foundation for future stability and prevent returns to jail**

By the end of 2017, the City will offer everyone confined in a New York City jail a minimum of five hours of structured programming daily. Activities will include vocational training, group and individual counseling, art therapy, pet therapy, recreation, and more. People enrolled in post-secondary courses will receive assistance so that they do not fall behind in their studies while they are in jail, and efforts will be made to engage individuals who are not currently enrolled in school. To ensure that these gains count in the community, transition specialists will help people transfer school credits earned in jail to their neighborhood schools and leverage vocational and educational achievements to land jobs or internships after release. Transitional specialists will also help people apply for available public benefits and connect them with housing and employment assistance, counseling, and any other needed services.

Strategy 15b: Offer everyone in city custody dedicated reentry planning before discharge as well as support after returning to the community

Also by the end of 2017, the City will build on the five hours of in-custody programming to ensure that everyone in city jails is offered reentry support, beginning on the first day that individuals are admitted to jail and continuing after returning to the community. Reentry service plans will be individualized and offered based on the needs of the individual. A network of non-profit organizations with deep expertise in helping individuals involved in the criminal justice system stabilize will provide a range of services inside the jails, as well as support in the community after individuals leave jail. Programming and support will include educational, rehabilitative, and vocational training and services, as well as educational assistance for high school equivalency tests and training for industry-recognized credentials.

Strategy 15c: Implement a new technology tool that will ensure continuity of stabilizing support

To facilitate effective in-custody programming and in-community reentry support, the City is developing state-of-the-art program and case management technology. This new tool will help counselors to assess the risks and needs of every person who enters city custody and match individuals to the right combination of therapeutic, vocational and educational programming while they are in jail. The tool will track how people are doing in programs and whether programs are effectively addressing an individual's risk and needs. The network of non-profits that provide reentry services to individuals after they leave city jails will have access to this technology, allowing this network to connect people to appropriate, available supports such as health care, benefits, employment, and education to continue building on the foundation laid while in jail.

Strategy 15d: **Prevent returns to jail by expanding the network of available reentry services in the community**

By the end of 2017, the City will have in place a new program, Jails to Jobs, to offer the opportunity for paid, transitional employment to everyone who leaves jail after serving a city sentence. The Jails to Jobs program includes five components:

- *Peer Navigators*: Everyone leaving city jails after serving a sentence will be paired with a Peer Navigator from a new public health-informed program in which peers who have successfully stabilized after incarceration help those who are recently released to achieve this same stability.
- *Transitional employment*: Everyone leaving city jails after serving a sentence will be offered paid, short-term transitional employment to help with securing a long-term job. Research has shown that connecting those recently released from prison to short-term transitional jobs can reduce recidivism by 22%¹⁰.
- *Career advancement support*: Additionally, the City will continue its partnership with the City University of New York to offer 500 people per year who leave City jails after serving a sentence educational subsidies to support getting certificates and other credentials that promote career advancement, including the opportunity to become a certified peer and join the Peer Navigators for the Jails to Jobs program. This subsidy will be the equivalent of one semester of education at CUNY and can be used toward a degree or certificate program that can qualify individuals for higher paid employment in the long term.
- *Trained workforce providers*: All City-funded workforce professionals will be trained on issues and laws related to working with people with criminal records, including the Fair Chance Act, legislation signed by Mayor de Blasio that prohibits discrimination based on a person's arrest record or criminal conviction.
- *Jails to Jobs* will be folded into the larger network of non-profit reentry providers in New York City. These providers will help individuals in securing longer-term employment as well as provide them with connection to housing, health care, benefits, and other supports that can help to build a stable future.

Strategy 16: **Foster connections to families and community by improving visits**

Maintaining community connections is vital for people who are incarcerated. Established research has shown that incarcerated people's ability to maintain community connections, including through visits, is key to breaking the cycle of recidivism¹¹. DOC has been working to improve visits through construction and renovations to visit areas, staff training on department policy and community engagement, and revamped protocols that encourage families with children under six to visit. A Visit Working Group comprised of several organizations including Brooklyn Defenders, Jail Action Coalition, the Osborne Association, the Board of Correction, and the Department of Correction uniform and non-uniform staff meets regularly to discuss ways to improve the visit process. Several recommendations have already been put in place.

For instance, in the Central Visit House, DOC has separated the bail payment and package drop-off windows to increase efficiency, which reduces the time it takes go through the visit process. DOC has installed information kiosks with look-up systems so that visitors can easily determine which facility they must go to in order to visit a loved one, hired dedicated visit greeters to answer questions, and instituted streamlined registration. DOC is in the process of updating the Visitor Handbook in order to issue a new one for the first time since 2013.

DOC will seek to expand opportunities for meaningful visits, working with the Board of Correction to increase the maximum visit length to up to two hours. But more improvements are needed to maximize the ability for people who are incarcerated to have contact with families and obtain all of the benefits that come along with having strong community supports. The Visit Working Group will become part of the City's Implementation Task Force to continue to work toward achieving these goals.

Strategy 16a: **Create expedited transportation to Rikers Island through dedicated buses that transport visitors from more convenient locations**

To reduce the time and inconvenience of visiting someone in jail, the City is piloting an express shuttle bus service to Rikers Island from major public transit hubs in Manhattan and Brooklyn. These buses will transport passengers directly to Rikers Island and back, bypassing many of the difficulties inherent in traveling to the Island, drastically reducing travel time and increasing the feasibility of visitors going to see their incarcerated family member or friend. Once established by the end of 2017, these routes and timetables will provide an expedited process for visitors arriving via the shuttle buses, saving people valuable time on transportation that can now be used visiting with loved ones. The buses will operate regularly throughout the visiting hours, ensuring visitors won't miss a shuttle.

Strategy 16b: Renovate the Central Visits facility to allow for better initial screening and reduce the need for additional searches that slow the visit process

Recognizing that people's experiences during visits are as important as the visiting policies themselves, DOC will transform the physical experience through immediate renovations to the Central Visit House and a strong effort to improve facility visit areas. There will be new seating, construction, and painting to bring the Central Visit facility to a state of good repair. DOC will also increase signage, phones, and on-site staff to resolve issues as quickly as possible. Combining these renovations and new technology will allow DOC to create a more robust screening process at a single point of entry, significantly reducing the number of searches and wait times throughout the process while increasing security. Dedicated staff in visiting areas, including on-site supervisors, will receive training on the visiting policies and other relevant directives to prioritize a safe, positive visiting experience and a relationship of mutual respect between visitors and staff. DOC, working with the Board of Correction, will overhaul the visiting process to maintain security while creating a process and environment that values the quality of visits.

Strategy 17: Continue to create alternatives to punitive segregation to improve safety and fairness

In the last three years, the City has taken bold steps to reduce the reliance on punitive segregation. New York City is the first jurisdiction in the country to announce a complete end to solitary confinement for individuals under 22 years of age and has ended the practice entirely for women. The City has also placed significant restrictions on the use of punitive segregation for those who are still eligible, including allowing its use only for serious, violent infractions, and limiting the length of time someone can be held in punitive segregation to 30 consecutive days or a total of 60 days in six months, with a few limited exceptions.

Further, DOC has created viable alternatives to punitive segregation such as the Clinical Alternative to Punitive Segregation (CAPS) program which places individuals with serious mental health diagnoses in a housing unit that offers therapeutically appropriate strategies for addressing violence. DOC has also created dedicated housing units for adolescents and young adults, who are no longer eligible for punitive segregation, to address the root causes of violent behavior with higher staff-to-incarcerated-individual ratios and targeted programming options. DOC will continue to work to develop and refine alternative housing options to punitive segregation that can safely house people who commit acts of violence while incarcerated without subjecting them to extensive periods of isolation. These alternatives will build on the incentive-based, phased approach that has already proven effective at both managing problematic behavior and encouraging positive development.

Model Facilities: Restart Units

Many reforms in the 14 Point Anti-Violence Reform Agenda are incorporated into DOC's model facilities or "Restart units"—housing units that have been transformed, through focused implementation of key reforms, into clean, calm housing areas with low levels of violence and expanded programming offerings. Currently, DOC has such units in four facilities including George R. Vierno Center (GRVC, which houses adolescent and adult men), Anna M. Kross Center (AMKC, which houses women), George Motchan Detention Center (GMDC, which houses men) and Otis Bantum Correctional Center (OBCC, which houses detained and sentenced men). DOC is rapidly expanding the number of such units for people in general population housing. These units have demonstrated that instituting a comprehensive suite of reforms can effectively reduce violence by simultaneously addressing multiple drivers of violence. Over 1,000 people in DOC custody are in Restarts. As of December 2016, people who entered Restart units had over 30% fewer assaults on staff and 50% lower Use of

Force rates (instances in which corrections officers use force), both for uses of force without injury and those with minimal injury. In fact, there are almost no uses of force that result in serious injury in Restarts. For example, there are units in AMKC that have gone over 200 days without any incident, the longest any unit has gone without violence since before such numbers were tracked.

Key components of these reformed housing units include:

- **Reclassification:** Incarcerated people are classified by security risk, using a new tool that includes reviews of behavior, age and gang affiliation in order to minimize potential violence and target programming.
- **Added programming:** Incarcerated people in Restarts receive five hours a day of programming, including weekends, to reduce idleness and violence and help ensure success once they leave jail.
- **Staffing:** Restart units have steady staffing, meaning officers

are assigned consistently to one unit, and in turn act as a team. Additionally, there are higher staffing ratios. Steady teams and higher ratios mean officers are familiar with one another, those housed in the units, and the rules and expectations of Restart units.

- **Additional training:** Officers receive an additional eight hours of training, including training on expectations, management protocols, and de-escalation and engagement skills. This training has become standard for new recruits.
- **Repairs:** Restart units are painted and their infrastructure repaired. Each housing unit contains three televisions with transmitters that allow for incarcerated individuals to quietly listen to TV through headsets, which greatly contributes to the reduction in fights.

For people housed in general population housing, Restart units have been shown to work. They reduce violence and increase programming participation.

Strategy 18: **Expand supportive services for correctional officers**

This Administration has increased support services for DOC staff to fulfill the 14 Point Anti-Violence Reform Agenda's mission to improve leadership development and culture. Through several initiatives, DOC is expanding training to help staff deal with stress and other effects of their demanding jobs. DOC is currently offering peer mentoring for new recruits to reduce attrition and supportive services for staff to deal with distress and trauma. Additionally, the City will implement the DOC Injury Treatment Service, so officers who are injured on the job will have a dedicated clinic inside every facility by the end of 2018.

In 2016, DOC started the Correction Assistance Response for Employees (CARE) Unit, a division that addresses the needs of uniformed and non-uniformed staff by providing continuous support and resources to staff who may be experiencing personal or family issues. The City is expanding the staffing, scope, and work of the CARE Units to include trauma debriefing, as well as support on issues such as domestic violence, high anxiety, family crisis, PTSD, job related stressors, terminal illness, financial difficulties, and substance use. The CARE Unit also provides referrals to community resources as an additional source for employees to obtain further assistance when coping with unexpected situations. For example, CARE provides bereavement related services, including a family liaison that assists with obtaining deceased employee's benefits. The victim service staff provides support for employees affected by criminal acts on-and off-duty, accompanies staff members to physical therapy and doctors visits, and coordinates service referrals for staff members who have been victims of domestic violence, rape and sexual assault, stalking, or other kinds of abuse. CARE conducts incident response for employees involved in on-duty use of force incidents, accidents, illness, or other traumatic events, and coordinates psychiatric referrals. This Unit also coordinates military support, the Employee Assistance Program, and religious outreach.

The Future of Rikers Island

We are continuing to dramatically reduce the size of our jail population.

We are improving the culture in our jails.

We are ensuring safe and humane conditions as quickly as possible.

And we are creating a future where people are no longer incarcerated on Rikers Island.

With crime and incarceration at historic lows—and a concrete plan to reduce both even further—New York City can credibly commit to closing Rikers Island. This is the right thing to do: the aging, isolated facilities on Rikers Island exacerbate security threats, have limited space for programming and staff development, and are cut off from the neighborhoods to which those released will ultimately return. Closing the jails on Rikers Island and replacing them with a smaller, safer, and fairer correctional system is the next key piece of the City’s larger work to create a safer and fairer city for all New Yorkers.

For the thousands of people detained and thousands of corrections employees who work in our jails every year, the City’s plan prioritizes moving with urgency—both to improve conditions now and to move with creativity and efficiency toward the long-term goal of closing the jails on Rikers Island for good.

To ensure effective progress and navigate the inevitable obstacles that will arise, the Implementation Task Force will guide work toward a correctional system that is:

- **Smaller:** The Population Working Group will help achieve our goal of ensuring that no one who could safely remain in the community enters jail and that those in custody are not there longer than needed.
- **Safer:** A Design and Facilities Working Group will help drive thoughtful renovations to existing facilities and development of new facilities, creating environments that foster opportunity and hope instead of isolation and despair.
- **Fairer:** The Culture Change Working Group will ensure that incarcerated people have access to stabilizing services and staff have support to serve the public at the highest levels of integrity.

Ultimately, closing all the jails on Rikers Island will depend not only on reducing the size of the city jail population to 5,000, but on the willingness of neighborhoods and their elected officials to identify appropriate new sites. The Design and Facilities Working Group will partner with New Yorkers, the City Council, and others to address issues related to the complicated siting process.

As the population declines and we are able to close the jails on Rikers Island, we will repurpose the newly freed up space on the Island. One possible plan would be to move municipal functions such as fleet storage from the boroughs to Rikers Island, freeing up space in neighborhoods across the City that could be used for new affordable housing. The Implementation Task Force will work with New Yorkers and experts to solicit ideas and develop a plan.

Beginning today, real-time updates on our progress and opportunities to get involved in work that will affect the long-term safety and vibrancy of our city are available at nyc.gov/rikers.

Appendix

HOW TO MEASURE REDUCTIONS IN JAIL USE

When people talk about reducing jail populations, they usually refer to two metrics: how many people enter jail each year (admissions) and how many people are in jail on any given day (average daily population).

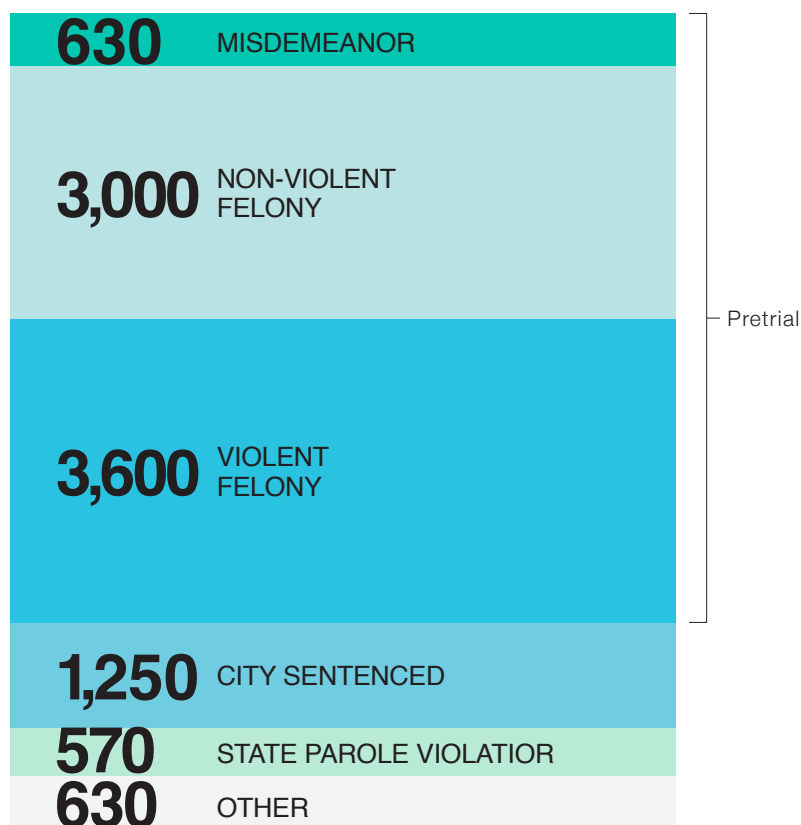

Admissions are always a much bigger number than average daily population. For example, in New York City, there were 61,000 admissions in 2016 but the average daily jail population was 9,680. This is because some people are in and out in a short period of time while some stay much longer.

One jail “bed” could be used by 365 people OR by one person over the course of a year.

There were approximately **61,000 admissions** to New York City Jails in 2016

But because some **people only stay** a few days, the **average daily population** on any given day was **9,680**

WHAT IS A “BED”?

We measure the effect of our jail population reduction strategies by estimating their effect on the number of beds.

The daily jail population is a measure of beds occupied on any given day.

To reduce the jail population, we need to reduce the number of beds occupied. Specifically, to close Rikers Island, we will need to shrink the size of the jail population so that just 5,000 beds are occupied on any given day.

If one person is in jail for 365 days, that equals one bed.

If two people are in jail, each for six months, that is also one bed.

If 365 people are in jail for one day each, that is also one bed.

To save 1 bed annually, the system would need to divert or release, on average:

How are beds calculated?

$$([\text{number of individuals affected}] * [\text{their average length of stay}]) / 365 = \# \text{ beds}$$

There is not a 1 to 1 correlation between people diverted from the system and beds reduced.

For example: 3,300 people served annually by Supervised Release would not translate to 3,300 beds saved in city jails. Using an average 15-day stay for misdemeanors and 50-day stay for felonies (calculated using eligibility requirements for Supervised Release), the estimated bed savings is 330 in one year. Over five years, as more people are diverted, the total estimated bed savings is 500.

Both reducing admissions and length of stay affect bed days, to varying degrees.

Interventions that aim to keep people out of city jails all together tend to focus on populations that cycle in and out of jail quickly. This means that more people would have to be diverted in order to save one bed.

Interventions that aim to reduce length of stay tend to focus on individuals with more complex cases who spend months or years in city custody.

MAYOR'S OFFICE OF CRIMINAL JUSTICE 5 YEAR PROJECTION CALCULATIONS FOR JAIL POPULATION REDUCTION

By reducing admissions and length of stay, we can shrink the number of people held in jail on any given day. This will require that all partners in the criminal justice system continue to work toward a common goal of reducing unnecessary incarceration.

Improved Risk Assessment

(Projected reduction: 710 beds)

RESPONSIBLE PARTIES: CITY, STATE COURTS,
DISTRICT ATTORNEYS, DEFENSE COUNSEL

Assumes that 4,700 individuals will be reclassified as lower risk of flight in the first year, with smaller, ongoing reductions after that.

Assumes a 15% detention rate for reclassified individuals and accounts for natural reductions in population.

Assumes people diverted would otherwise stay an average of 20 days on misdemeanor charges and 84 days on felony charges (calculated using estimated lengths of stay for eligible population).

Reform the Bail System

(Projected reduction: 200 beds)

RESPONSIBLE PARTIES: CITY, STATE COURTS

Expected to divert 1,500 people in the first year, with smaller, ongoing returns after that.

Assumes that people diverted though bail fund would otherwise stay an average of 15 days, and that expediting bail would speed up the bail payment process by one day (calculated using estimated lengths of stay for eligible population).

Supervised Release

(Projected reduction: 500 beds)

RESPONSIBLE PARTIES: CITY, STATE COURTS,
DISTRICT ATTORNEYS, DEFENSE COUNSEL

Assumes 3,300 people will be diverted annually.

Assumes people diverted would otherwise stay an average of 15 days on misdemeanor charges and 50 days on felony charges (calculated using eligibility requirements for Supervised Release).

Divert Short Jail Sentences

(Projected reduction: 300 beds)

RESPONSIBLE PARTIES: CITY, STATE COURTS,
DISTRICT ATTORNEYS, DEFENSE COUNSEL

Assumes 1,700 people will be diverted annually who would otherwise receive a short city sentence of, on average, 15 days (calculated using estimated lengths of stay for eligible population).

Reduce Length of Stay

(Projected reduction: 620 beds cumulative)

RESPONSIBLE PARTIES: CITY, STATE COURTS,
DISTRICT ATTORNEYS, DEFENSE COUNSEL

Assumes a 20% reduction in case length for non-homicide violent felony cases (from 111 days to 89 days). Projected reduction: 450.

Assumes a 20% reduction in length of stay for state technical parole violation cases (from 55 to 44 days). Projected reduction: 170.

APPENDIX D

PROPOSED PROJECT POPULATION ESTIMATES

EXISTING/NO ACTION AND WITH ACTION CONDITIONS

Appendix A

Bronx Site - 745 East 141st Street Population Estimates

| | Existing/No-Action | | |
|-------|-----------------------------------|--------------|---|
| | Existing Use | Count | Source / Notes |
| Bronx | NYPD Tow Pound | 0 | Minimal employment. Assumes no employment for conservative analysis. |
| | With-Action | | |
| | Proposed Use | Count | Source |
| | Detainee Beds | 1,437 | DOC. |
| | Uniformed Staff | 290 | Peak shift from DOC staffing plan (Wednesday 7AM and 5AM overlapping shift). |
| | Non-Uniformed Staff | 144 | DOC. Assumed to all be day shift. |
| | Authorized Visitors | 639 | Survey data collected at Manhattan and Brooklyn Detention Complexes. Includes contract staff, attorneys, service providers. |
| | Detainee Visitors | 216 | Visitor registration data from existing Manhattan and Brooklyn Detention Complexes. |
| | Clinical/Medical Staff | 90 | Correctional Health Services data. Assumed to all be day shift. |
| | Retail / Community Facility Staff | 66 | Assumes 3 employees per 1,000 gsf for retail (13k gsf) and 1 employee per 1,000 gsf for CF (27k gsf) |
| | Retail Staff - Mixed Use Bldg | 62 | Assumes 3 employees per 1,000 gsf for retail (15.5k gsf) and 1 employee per 1,000 gsf for CF (15.5k gsf) |
| | Parole Court Staff | 55 | MOCI estimate, based on current Rikers Parole Court operations. |
| | Parole Court Visitors | 175 | MOCI estimate. |
